"(5) NONPREFERENCE IMMIGRANTS.—(A) Visas not required for the classes specified in paragraphs (1) through (4), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available to other qualified immigrants who are not entering the country to perform skilled or unskilled labor in the chronological order in which they qualify.

"(B) No immigrant visa shall be issued under this paragraph to an adopted child or prospective adopted child of a United States citizen or lawfully resident alien unless (i) a valid home-study has been favorably recommended by an agency of the State of the child's proposed residence, or by an agency authorized by that State to conduct such a study, or, in the case of a child adopted abroad, by an appropriate public or private adoption agency which is licensed in the United States, and (ii) the child has been irrevocably released for immigration and adoption. No natural parent or prior adoptive parent of any such child shall thereafter, by virtue of such parentage, be accorded any right, privilege, or status under this Act. No immigrant visa shall otherwise be issued under this paragraph to an unmarried child under 16 years of age except a child who is accompanying or following to join his natural parent.

An immigrant visa shall not be issued to an immigrant under paragraph (1), (2), or (4) until the consular officer is in receipt of a determination made by the Secretary of Labor pursuant to the provisions of section 212(a)(14).

"(c) GUIDE FOR ALLOCATION BETWEEN PREFERENCE SYSTEMS.—Where it is determined that the maximum number of visas will be made available under section 202(a)(2) to natives of any single foreign state (defined in section 202(b)) or any dependent area (defined in section 202(c)) in any fiscal year, in determining whether to provide for visas to such natives under the preference system described in subsection (a) or that described in subsection (b), visa numbers with respect to natives of that state or dependent area shall be allocated (to the extent practicable and otherwise consistent with this section) in a manner so that the ratio of—

"(A) the number of family reunification immigrants described in subsection (a) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year, to

"(B) the number of independent immigrants described in subsection (b) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year,

is equal to 3 to 1.

"(d)(1) A spouse or child as defined in subparagraph (A), (B), (C), (D), or (E) of section 101(b)(1) and shall, if not otherwise entitled to an immigrant status and the immediate issuance of a visa under subsection (a) or (b), be entitled to the same status, and the same order of consideration provided in the respective subsection, if accompanying or following to join, his spouse or parent.

"(2) Waiting lists of applicants for visas under this section shall be maintained in accordance with regulations prescribed by the Secretary of State.".

(2) Subsection (e) of such section, as so redesignated, is amended—

(A) by inserting "or under subsection (b)" after "subsection (a)" the first place it appears, and

(B) by striking out "subsection (a)" the second place it appears and inserting in lieu thereof "the respective subsection".

(b)(1) Secton 202 (8 U.S.C. 1152) is amended by striking out subsection (e).

(2) Section 204 (8 U.S.C. 1154) is amended by striking out subsection (f).

(3) Section 245(b) (8 U.S.C. 1255(b)) is amended by striking out "202(e) or".

(c)(1)(A) Subsection (f) of section 203 (8 U.S.C. 1153), as redesignated by subsection (a)(1), is amended by striking out "paragaphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or pursuant to paragraphs (1) through (5) of subsection (b)".

(B) Subsection (g) of such section, as so redesignated, is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or paragraphs (1) through (4) of subsection (b)" each place it appears.

(2)(A) Subsection (a) of section 204 (8 U.S.C. 1154) is amended—

(i) by striking out "paragraph (1), (4), or (5) of section 203(a)" and inserting in lieu thereof "paragraph (3) or (4) of section 203(a)",

(ii) by striking out "section 203(a)(2)" and inserting in lieu thereof "paragraph (1), (2), or (5) of section 203(a)",

(iii) by striking out "section 203(a)(3)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(b)", and

(iv) by striking out "section 203(a)(6)" and inserting in lieu thereof "paragraph (2) or (4) of section 203(b)",

(B) Subsection (b) of such section is amended by striking out "section 203(a) (3) or (6)" and inserting in lieu thereof "paragraph (1), or (2), or (4) of section 203(b)".

(d) Section 241(a)(9) (8 U.S.C. 1251(a)(9)) is amended—

(1) by inserting "(A)" after "(9)", and

(2) by adding at the end the following new subparagraph:

"(B) was admitted as (or otherwise acquired the status of) an independent immigrant described in paragraph (3) of section 203(b) and has failed without good cause to maintain such an investment for a period of at least one year after the date of such entry (or of acquiring such status) or after the date such substantial investment was made, whichever date is later;".

Page 49, line 14, strike out "(a)".

Page 50, line 11, strike out "paragraph (3) or (6)" and all that follows through "section 203(a)(7)" on line 13 and insert in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

Page 50, strike out line 21 and all that follows through page 51, line 2.

Page 59, after line 6, insert the following new section (and insert a corresponding item in the table of contents):

EFFECTIVE DATES AND TRANSITION

SEC. . (a) The amendments made by sections 201, 202 (other than subsection (e)), and 203 shall take effect on October 1, 1983. When an immigrant, in possession of an unexpired immigrant visa issued before October 1, 1983, makes application for admission, his admissibility under section 212(a)(20) of the Immigration and Nationality Act shall be determined under the provisions of law in effect on the date of the issuance of such visa. The amendments made by the other provisions of this part shall take effect on the date of the enactment of this Act.

(b)(1) In the case of a petition filed under section 204(a) of the Immigration and Nationality Act before October 1, 1983, such petition shall be deemed, as of such date, to be a petition for the new corresponding classification (as defined in paragraph (2)), and the priority date for such petition shall remain in effect.

(2) For purposes of paragraph (1), the term "new corresponding classification" means, in the case of a petition for a—

(A) preference status described in section 203(a)(1) of the Immigration and Nationality Act (as in effect on September 30, 1983), the status as an immediate relative described in section 201(b) of such Act;

(B) preference status described in section 203(a)(2) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(a) of such Act as in effect after such date, as the case may be;

(C) preference status described in section 203(a)(3) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(b) of such Act as in effect after such date, as the case may be;

(D) preference status described in section 203(a)(4) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(3) of such Act as in effect after such date;

(E) preference status described in section 203(a)(5) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(4) of such Act as in effect after such date; and

(F) preference status described in section 203(a)(6) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (2) or (4) of section 203(b) of such Act (as in effect after such date), as the case may be.

(c) Aliens registered in the nonpreference classification described in section 203(a)(7) of the Immigration and Nationality Act (as in effect on September 30, 1983) shall be transferred, as of October 1, 1983, to the preference status described in section 203(a)(5) or 203(b)(3) of such Act or the nonpreference classification described in section 203(b)(5) of such Act (as such sections are in effect after such date), as the case may be, and the priority date for such classification shall remain in effect.

AMENDMENT (34)

Page 49, after line 12, insert the following new sections (and redesignate the succeeding sections of part A of title II, and the table of contents and cross-references thereto, accordingly):

NUMERICAL LIMITATIONS

SEC. 201. (a)(1) Subsection (a) of section 201 (8 U.S.C. 1151) is amended to read as follows:

"(a)(1) Exclusive of aliens described in paragraph (3), aliens born in a foreign state (other than a contiguous foreign state) or dependent area who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 320,000, plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year and the number of visas issued under that subparagraph during that year, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all such fiscal year, and

"(B) independence immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 65,000, minus (ii) the number of special immigrants (other than those described in section 101(a)27)(A)) who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"(2) Exclusive of aliens described in paragraph (3), aliens born in a contiguous foreign state who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 83 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year for that foreign state and the number of visas issued under that subparagraph during that year, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 17 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), minus (ii the number of special immigrants (other than those described in section 101(a)(27(A)) who were born in that contiguous foreign state and who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"For purposes of this paragraph, the overall numerical limitation for a contiguous foreign state for a fiscal year is 40,000, plus the number by which 40,000 exceeds the number of aliens, who are not described in paragraph (3) and were born in the other contiguous foreign state, who were issued immigrant visas or otherwise acquired the status of an alien lawfully admitted for permanent residence in the previous fiscal year.

"(3) The aliens described in this paragraph, who are not subject to the numerical limitations described in paragraph (1) and (2), are—

"(A) special immigrants defined in section 101(a)(27),

"(B) immigrants born to permanent resident aliens during a temporary visit abroad,

"(C) immediate relatives specified in subsection (b) of this section,

"(D) immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent who is such an immediate relative,

"(E) aliens who are admitted or granted asylum under section 207 or 208,

"(F) aliens provided records of permanent residence under section 214(d), and

"(G) aliens whose status is adjusted to permanent resident status under section 245A.".

(2) The first sentence of subsection (b) of such section is amended by striking out "children, spouses, and parents" inserting in lieu thereof "children, unmarried sons, unmarried daughters, spouses, and parents".

(b) Section 202(a) (8 U.S.C. 1152(a)) is amended—

(1) by striking out "(a) No person" and inserting in lieu thereof "(a)(1) Except as specifically provided in paragraph (2) of this subsection and in section 101(a)(27), 201(b), 203, and 214(d), no person",

(2) by striking out ", except as specifically" and all that follows up to the period at the end, and

(3) by adding at the end the following new paragraph:

"(2) The total number of immigrant visas made available to natives of any single foreign state under subsections (a) (other than paragraph (1) thereof) and (b) of section 203 shall not exceed in any fiscal year—

"(A) 20,000, in the case of any foreign state other than either of the two foreign states contiguous to the United States, or

"(B) in the case of either of the foreign states contiguous to the United States, the numerical limitation for that foreign state for that fiscal year described in section 201(a)(2).".

PREFERENCE AND NONPREFERENCE ALLOCATION SYSTEMS

SEC. 202. (a)(1) Section 203 (8 U.S.C. 1153) is amended—

(A) by redesignating subsections (b) through (e) as subsections (e) through (h), respectively, and

(B) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) PREFERENCE ALLOCATION FOR FAMILY REUNIFICATION IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(A) for family reunification immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in section 201(a)(2)(A) for family reunification immigrants shall be allotted visas as follows:

"(1) SPOUSES AND CHILDREN OF PERMANENT RESIDENT ALIENS.—Visas shall first be made available to qualified immigrants, in a number not to exceed 36 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (4), who are the spouses or children of aliens lawfully admitted for permanent residence.

"(2) UNMARRIED SONS AND DAUGHTERS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (1), who are the spouses or the unmarried sons or unmarried daughters of aliens lawfully admitted for permanent residence.

"(3) MARRIED SONS AND DAUGHTERS OF CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) and (2), who are the married sons or married daughters of citizens of the United States.

"(4) BROTHERS AND SISTERS OF ADULT CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 34 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (3), who are the brothers or unmarried sisters of United States citizens who are at least 21 years of age.

"(5) PARENTS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specifed in paragraphs (1) through (4), who are at least 60 years of age and who are the parents of aliens lawfully admitted for permanent residents.

In allocating visa numbers to aliens under this section, aliens born in noncontiguous foreign states and dependent areas shall be treated as one group and aliens born in each of the contiguous foreign states shall be treated as separate groups.

"(b) ALLOCATION FOR INDEPENDENT IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(B) for independents immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in or section 201(a)(2)(B) for independent immigrants shall be allocated visas as follows:

"(1) ALIENS OF EXCEPTIONAL ABILITY.—Visas shall first be made available, in a number not to exceed such respective numerical limitation, to qualifed immigrants who because of their exceptonal ability in the sciences, arts, professions, or business will substantially benefit prospectively the national economy, cultural interests, or welfare of the United States and whose services in the sciences, arts, professions, or business are sought by an employer in the United States. In determining under this paragraph whether an immigrant has exceptional ability, the possession of a degree, diploma, cer-

tificate, or similar award from a college, university, school, or other institution of learning, or of a license to practice or certification for a particular profession or occupation shall not by itself be considered sufficient evidence of such exceptional ability.

"(2) SKILLED WORKERS.—Visas not required for classes specified in paragraph (1) shall next be made available to qualified immigrants who are capable of performing skilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(3) INVESTORS.—Visas not required for classes specified in paragraph (1) and (2), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available—

"(A) first, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment in a high unemployment area (as defined by the Attorney General, after consultation with the Secretary of Labor, and as determined at the time of the filing of a petition for classification under this paragraph) for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant, and

"(B) then, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant.

"(4) UNSKILLED WORKERS.—Visas not required for classes specified in paragraph (1) through (3) shall next be made available to qualified immigrants who are capable of performing unskilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(5) NONPREFERENCE IMMIGRANTS.—(A) Visas not required for the classes specified in paragraph (1) through (4), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available to other qualified immigrants who are not entering the country to perform skilled or unskilled labor in the chronological order in which they qualify.

"(B) No immigrant visa shall be issued under this paragraph to an adopted child or prospective adopted child of a United States citizen or lawfully resident alien unless (i) a valid home-study has been favorably recommended by an agency of the State of the child's proposed residence, or by an agency authorized by that State to conduct such a study, or, in the case of a child adopted abroad, by an appropriate public or private adoption agency which is licensed in the United States, and (ii) the child has been irrevocably released for immigration and adoption. No natural parent or prior adoptive parent of an such child shall thereafter, by virtue of such parentage, be accorded any right, privilege, or status under this Act. No immigrant visa shall otherwise be issued under this paragraph to an unmarried child under 16 years of age except a child who is accompanying or following to join his natural parent.

An immigrant visa shall not be issued to an immigrant under paragraph (1), (2), or (4) until the consular officer is in receipt of a determination made by the Secretary of Labor pursuant to the provisions of section 212(a)(14).

"(c) GUIDE FOR ALLOCATION BETWEEN PREFERENCE SYSTEMS.—Where it is determined that the maximum number of visas will be made available under section 202(a)(2) to natives of any single foreign state (defined in section 202(b)) or any dependent area (defined in section 202(c)) in any fiscal year, in determining whether to provide for visas to such natives under the preference system described in subsection (a) or that described in subsection (b), visa numbers with respect to natives of that state or dependent area shall be allocated (to the extent practicable and otherwise consistent with this section) in a manner so that the ratio of—

"(A) the number of family reunification immigrants described in subsection (a) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year, to

"(B) the number of independent immigrants described in subsection (b) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year.

is equal to 3 to 1.

"(d)(1) A spouse or child as defined in subparagraph (A), (B), (C), (D), or (E) of section 101(b)(1) and shall, if not otherwise entitled to an immigrant status and the immediate issuance of a visa under subsection (a) or (b), be entitled to the same status, and the same order of consideration provided in the respective subsection, if accompanying or following to join, his spouse or parent.

"(2) Waiting lists of applicants for visas under this section shall be maintained in accordance with regulations prescribed by the Secretary of State.".

(2) Subsection (e) of such section, as so redesignated, is amended—

(A) by inserting "or under subsection (b)" after "subsection (a)" the first place it appears, and

(B) by striking out "subsection (a)" the second place it appears and inserting in lieu thereof "the respective subsection".

(b)(1) Section 202 (8 U.S.C. 1152) is amended by striking out subsection (e).

(2) Section 204 (8 U.S.C. 1154) is amended by striking out subsection (f).

(3) Section 245(b) (8 U.S.C. 1255(b)) is amended by striking out "202(e) or".

(c)(1)(A) Subsection (f) of section 203 (8 U.S.C. 1153), as redesignated by subsection (a)(1), is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or pursuant to paragraphs (1) through (5) of subsection (b)".

(B) Subsection (g) of such section, as so redesignated, is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or paragraphs (1) through (4) of subsection (b)" each place it appears.

(2)(A) Subsection (a) of section 204 (8 U.S.C. 1154) is amended—

(i) by striking out "paragraph (1), (4), or (5) of section 203(a)" and inserting in lieu thereof "paragraph (3) or (4) of section 203(a)",

(ii) by striking out "section 203(a)(2)" and inserting in lieu thereof "paragraph (1) or (2) [OPTION B: or (5)] of section 203(a)",

(iii) by striking out "section 203(a)(3)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(b)", and

(iii) by striking out "section 203(a)(6)" and inserting in lieu thereof "paragraph (2) or (4) of section 203(b)".

(B) Subsection (b) of such section is amended by striking out "section 203(a) (3) or (6)" and inserting in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

(d) Section 241(a)(9) (8 U.S.C. 1251(a)(9)) is amended—

(1) by inserting "(A)" after "(9)", and

(2) by adding at the end the following new subparagraph:

"(B) was admitted as (or otherwise acquired the status of) an independent immigrant described in paragraph (3) of section 203(b) and has failed without good cause to maintain such an investment for a period of at least one year after the date of such entry (or of acquiring such status) or after the date such substantial investment was made, whichever date is later;".

Page 49, line 14, strike out "(a)".

Page 50, line 11, strike out "paragraph (3) or (6)" and all that follows through "section 203(a)(7)" on line 13 and insert in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

Page 50, strike out line 21 and all that follows through page 51, line 2.

Page 59, after line 6, insert the following new section (and insert a corresponding item in the table of contents):

EFFECTIVE DATES AND TRANSITION

SEC. . (a) The amendments made by sections 201, 202 (other than subsection (e)), and 203 shall take effect on October 1, 1983. When an immigrant, in possession of an unexpired immigrant visa issued before October 1, 1983, makes application for admission, his admissibility under section 212(a)(20) of the Immigration and Nationality Act shall be determined under the provisions of law in effect on the date of the issuance of such visa. The amendments made by the other provisions of this part shall take effect on the date of the enactment of this Act.

(b)(1) In the case of a petition filed under section 204(a) of the Immigration and Nationality Act before October 1, 1983, such petition shall be deemed, as of such date, to be a petition for the new corresponding classification (as defined in paragraph (2)), and the priority date for such petition shall remain in effect.

(2) For purposes of paragraph (1), the term "new corresponding classification" means, in the case of a petition for a—

(A) preference status described in section 203(a)(1) of the Immigration and Nationality Act (as in effect on September 30, 1983), the status as an immediate relative described in section 201(b) of such Act;

(B) preference status described in section 203(a)(2) of such act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(a) of such act as in effect after such date, as the case may be;

(C) preference status described in section 203(a)(3) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(b) of such Act as in effect after such date, as the case may be;

(D) preference status described in section 203(a)(4) of such Act (as in effect on September 30, 1983), the preference status de-

scribed in section 203(a)(3) of such Act as in effect after such date;

(E) preference status described in section 203(a)(5) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(4) of such Act as in effect after such date; and

(F) preference status described in section 203(a)(6) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (2) or (4) of section 203(b) of such Act (as in effect after such date), as the case may be.

(c) Aliens registered in the nonpreference classification described in section 203(a)(7) of the Immigration and Nationality Act (as in effect on September 30, 1983) shall be transferred, as of October 1, 1983, to the preference status described in section 203(a)(5) or 203(b)(3) of such Act or the nonpreference classification described in section 203(b)(5) of such Act (as such sections are in effect after such date), as the case may be, and the priority date for such classification shall remain in effect.

AMENDMENT (34C)

Page 49, after line 12, insert the following new sections (and redesignate the succeeding sections of part A of title II, and the table of contents and cross-references thereto, accordingly):

NUMERICAL LIMITATIONS

SEC. 201. (a)(1) Subsection (a) of section 201 (8 U.S.C. 1151) is amended to read as follows:

"(a)(1) Exclusive of aliens described in paragraph (3), aliens born in a foreign state (other than a contiguous foreign state) or dependent area who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 320,000, plus (i) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year and the number of visas issued under that subparagraph during that year, plus (iii) for fiscal years before fiscal year 1989, 66,500, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a relationship described in paragraph (1), (2), (4), or (5) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 65,000, minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, plus (iii) for fiscal years before fiscal year 1989, 13,500, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a paragraph (3) or (6) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitations for all of such fiscal year.

"(2) Exclusive of aliens described in paragraph (3), aliens born in a contiguous foreign state who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 83 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year for that foreign state and the number of visas issued under that subparagraph during that year, plus (iii) for fiscal years before fiscal year 1989, 8,300, but only available to aliens born in that contiguous state with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a relationship described in paragraph (1), (2), (4), or (5) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 17 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who were born in that contiguous foreign state and who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, plus (iii) for fiscal years before fiscal year 1989, 1,700, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of paragraph (3) or (6) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"For purposes of this paragraph, the overall numerical limitation for a contiguous foreign state for a fiscal year is 40,000, plus the number by which 40,000 (or, for fiscal years before fiscal year 1989, 50,000) exceeds the number of aliens, who are not described in paragraph (3) and were born in the other contiguous foreign state, who were issued immigrant visas or otherwise acquired the status of an alien lawfully admitted for permanent residence in the previous fiscal year.

"(3) The aliens described in this paragraph, who are not subject to the numerical limitations described in paragraphs (1) and (2), are—

"(A) special immigrants defined in section 101(a)(27)

"(B) immigrants born to permanent resident aliens during a temporary visit abroad,

"(C) immediate relatives specified in subsection (b) of this section,

"(D) immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent who is such an immediate relative,

"(E) aliens who are admitted or granted asylum under section 207 or 208,

"(F) aliens provided records of permanent residence under section 214(d), and

"(G) aliens who status is adjusted to permanent resident status under section 245A.".

(2) The first sentence of subsection (b) of such section is amended by striking out "children, spouses, and parents" inserting in lieu thereof "children, unmarried sons, unmarried daughters, spouses, and parents".

(b) Section 202(a) (8 U.S.C. 1152(a)) is amended—

(1) by striking out "(a) No person" and inserting in lieu thereof "(a)(1) Except as specifically provided in paragraph (2) of this subsection and in section 101(a)(27), 201(b), 203, and 214(d), no person",

(2) by striking out ", except as specifically" and all that follows up to the period at the end, and

(3) by adding at the end the following new paragraph:

"(2) The total number of immigrant visas made available to natives of any single foreign state under subsections (a) and (b) of section 203 shall not exceed in any fiscal year—

"(A) 20,000, in the case of any foreign state other than either of the two foreign states contiguous to the United States, or

"(B) in the case of either of the foreign states contiguous to the United States, the numerical limitation for that foreign state for that fiscal year described in section 201(a)(2).".

PREFERENCE AND NONPREFERENCE ALLOCATION SYSTEMS

SEC. 202. (a)(1) Section 203 (8 U.S.C. 1153) is amended—

(A) by redesignating subsections (b) through (e) as subsections (e) through (h), respectively, and

(B) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) PREFERENCE ALLOCATION FOR FAMILY REUNIFICATION IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(A) for family reunification immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in section 201(a)(2)(A) for family reunification immigrants shall be allotted visas as follows:

"(1) SPOUSES AND CHILDREN OF PERMANENT RESIDENT ALIENS.—Visas shall first be made available to qualified immigrants, in a number not to exceed 36 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (4), who are the spouses or children of aliens lawfully admitted for permanent residence.

"(2) UNMARRIED SONS AND DAUGHTERS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (1), who are the spouses or the unmarried sons or unmarried daughters of aliens lawfully admitted for permanent residence.

"(3) MARRIED SONS AND DAUGHTERS OF CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) and (2), who are the married sons or mar-

ried daughters of citizens of the United States.

"(4) BROTHERS AND SISTERS OF ADULT CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 34 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (3), who are the brothers or unmarried sisters of United States citizens who are at least 21 years of age.

"(5) PARENTS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (4), who are at least 60 years of age and who are the parents of aliens lawfully admitted for permanent residence.

In allocating visa numbers to aliens under this section, aliens born in noncontiguous foreign states and dependent areas shall be treated as one group and aliens born in each of the contiguous foreign states shall be treated as separate groups.

"(b) ALLOCATION FOR INDEPENDENT IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(B) for independents immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in or section 201(a)(2)(B) for independent immigrants shall be allocated visas as follows:

"(1) ALIENS OF EXCEPTIONAL ABILITY.—Visas shall first be made available, in a number not to exceed such respective numerical limitation, to qualified immigrants who because of their exceptional ability in the sciences, arts, professions, or business will substantially benefit prospectively the national economy, cultural interests, or welfare of the United States and whose services in the sciences, arts, professions, or business are sought by an employer in the United States. In determining under this paragraph whether an immigrant has exceptional ability, the possession of a degree, diploma, certificate, or similar award from a college, university, school, or other institution of learning, or of a license to practice or certification for a particular profession or occupation shall not by itself be considered sufficient evidence of such exceptional ability.

"(2) SKILLED WORKERS.—Visas not required for classes specified in paragraph (1) shall next be made available to qualified immigrants who are capable of performing skilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(3) INVESTORS.—Visas not required for classes specified in paragraphs (1) and (2), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available—

"(A) first, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment in a high unemployment area (as defined by the Attorney General, after consultation with the Secretary of Labor, and as determined at the time of the filing of a petition for classification under this paragraph) for not fewer than four eligible individuals (as defined in section 214(c)(3)(D), other than the spouse or children of such immigrant, and

"(B) then, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant.

"(4) UNSKILLED WORKERS.—Visas not required for classes specified in paragraphs (1) through (3) shall next be made available to qualified immigrants who are capable of performing unskilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(5) NONPREFERENCE IMMIGRANTS.—(A) Visas not required for the classes specified in paragraphs (1) through (4), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available to other qualified immigrants who are not entering the country to perform skilled or unskilled labor in the chronological order in which they qualify.

"(B) No immigrant visa shall be issued under this paragraph to an adopted child or prospective adopted child of a United States citizen or lawfully resident alien unless (i) a valid home-study has been favorably recommended by an agency of the State of the child's proposed residence, or by an agency authorized by that State to conduct such a study, or, in the case of a child adopted abroad, by an appropriate public or private adoption agency which is licensed in the United States, and (ii) the child has been irrevocably released for immigration and adoption. No natural parent or prior adoptive parent of any such child shall thereafter, by virtue of such parentage, be accorded any right, privilege, or status under this Act. No immigrant visa shall otherwise be issued under this paragraph to an unmarried child under 16 years of age except a child who is accompanying or following to join his natural parent.

An immigrant visa shall not be issued to an immigrant under paragraph (1), (2), or (4) until the consular officer is in receipt of a determination made by the Secretary of Labor pursuant to the provisions of section 212(a)(14).

"(c) GUIDE FOR ALLOCATION BETWEEN PREFERENCE SYSTEMS.—Where it is determined that the maximum number of visas will be made available under section 202(a)(2) to natives of any single foreign state (defined in section 202(b)) or any dependent area (defined in section 202(c)) in any fiscal year, in determining whether to provide for visas to such natives under the preference system described in subsection (a) or that described in subsection (b), visa numbers with respect to natives of that state or dependent area shall be allocated (to the extent practicable and otherwise consistent with this section) in a manner so that the ratio of—

"(A) the number of family reunification immigrants described in subsection (a) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year, to

"(B) the number of independent immigrants described in subsection (b) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year,

is equal to 3 to 1.

"(d)(1) A spouse or child as defined in subparagraph (A),(B), (C), (D), or (E) of section 101(b)(101) and shall, if not otherwise entitled to an immigrant status and the immediate issuance of a visa under subsection (a) or (b), be entitled to the same status, and the same order of consideration provided in the respective subsection, if accompanying or following to join, his spouse or parent.

"(2) Waiting lists of applicants for visas under this section shall be maintained in accordance with regulations prescribed by the Secretary of State.".

(3) Subsection (e) of such section, as so redesignated, is amended—

(A) by inserting "or under subsection (b)" after "subsection (a)" the first place it appears, and

(B) by striking out "subsection (a)" the second place it appears and inserting in lieu thereof "the respective subsection".

(b)(1) Section 202 (8 U.S.C. 1152) is amended by striking out subsection (e).

(2) Section 204 (8 U.S.C. 1154) is amended by striking out subsection (f).

(3) Section 245(b) (8 U.S.C. 1255(b)) is amended by striking out "202(e) or".

(c)(1)(A) Subsection (f) of section 203 (8 U.S.C. 1153), as redesignated by subsection (a)(1), is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or pursuant to paragraphs (1) through (5) of subsection (b)".

(B) Subsection (g) of such section, as so redesignated, is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or paragraphs (1) through (4) of subsection (b)" each place it appears.

(2)(A) Subsection (a) of section 204 (8 U.S.C. 1154) is amended—

(i) by striking out "paragraph (1), (4), or (5) of section 203(a)" and inserting in lieu thereof "paragraph (3) or (4) of section 203(a)",

(ii) by striking out "section 203(a)(2)" and inserting in lieu thereof "paragraph (1), (2), or (5) of section 203(a)",

(iii) by striking out "section 203(a)(3)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(b)", and

(iii) by striking out "section 203(a)(6)" and inserting in lieu thereof "paragraph (2) or (4) of section 203(b)".

(B) Subsection (b) of such section is amended by striking out " section 203(a) (3) or (6)" and inserting in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

(d) Section 241(a)(9) (8 U.S.C. 1251(a)(9)) is amended—

(1) by inserting "(A)" after "(9)", and

(2) by adding at the end the following new subparagraph:

"(B) was admitted as (or otherwise acquired the status of) an independent immigrant described in paragraph (3) of section 203(b) and has failed without good cause to maintain such an investment for a period of at least one year after the date of such entry (or of acquiring such status) or after the date such substantial investment was made, whichever date is later;".

Page 49, line 14, strike out "(a)".

Page 50, line 11, strike out "paragraph (3) or (6)" and all that follows through "section 203(a)(7)" on line 13 and insert in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

Page 50, strike out line 21 and all that follows through page 51, line 2.

Page 59, after line 6, insert the following new section (and insert a corresponding item in the table of contents):

EFFECTIVE DATES AND TRANSITION

SEC. . (a) The amendment made by sections 201, 202 (other than subsection (e)), and 203 shall take effect on October 1, 1983. When an immigrant, in possession of an unexpired immigrant visa issued before October 1, 1983, makes application for admission, his admissibility under section 212(a)(20) of the Immigration and Nationality Act shall be determined under the provisions of law in effect on the date of the issuance of such visa. The amendments made by the other provisions of this part shall take effect on the date of the enactment of this Act.

(b)(1) In the case of a petition filed under section 204(a) of the Immigration and Nationality Act before October 1, 1983, such petition shall be deemed, as of such date to be a petition for the new corresponding classification (as defined in paragraph (2)), and the priority date for such petition shall remain in effect.

(2) For purposes of paragraph (1), the term "new corresponding classification" means, in the case of a petition for a—

(A) preference status described in section 203(a)(1) of the Immigration and Nationality Act (as in effect on September 30, 1983), the status as an immediate relative described in section 201(b) of such Act;

(B) preference status described in section 203(a)(2) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(a) of such Act as in effect after such date, as the case may be;

(C) preference status described in section 203(a)(3) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(b) of such Act as in effect after such date, as the case may be;

(D) preference status described in section 203(a)(4) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(3) of such Act as in effect after such date;

(E) preference status described in section 203(a)(5) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(4) of such Act as in effect after such date; and

(F) preference status described in section 203(a)(6) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (2) or (4) of section 203(b) of such Act (as in effect after such date), as the case may be.

(c) Aliens registered in the nonpreference classification described in section 203(a)(7) of the Immigration and Nationality Act (as in effect on September 30, 1983) shall be transferred, as of October 1, 1983, to the preference status described in section 203(a)(5) or 203(b)(3) of such Act or the nonpreference classification described in section 203(b)(5) of such Act (as such sections are in effect after such date), as the case may be, and the priority date for such classification shall remain in effect.

AMENDMENT (34D)

Page 49, after line 12, insert the following new sections (and redesignate the succeeding sections of part A of title II, and the table of contents and cross-references thereto, accordingly):

NUMERICAL LIMITATIONS

SEC. 201. (a)(1) Subsection (a) of section 201 (8 U.S.C. 1151) is amended to read as follows:

"(a)(1) Exclusive of aliens described in paragraph (3), aliens born in a foreign state (other than a contiguous foreign state) or dependent area who may be issue immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 320,000, plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year and the number of visas issued under that subparagraph during that year, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 65,000, minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"(2) Exclusive of aliens described in paragraph (3), aliens born in a contiguous foreign state who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 83 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the perior fiscal year for that foreign state and the number of visas issued under that subparagraph during that year, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 17 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who were born in that contiguous foreign state and who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"For purposes of this paragraph, the overall numerical limitation for a contiguous foreign state for a fiscal year is 40,000, plus the number by which 40,000 exceeds the number of aliens, who are not described in paragraph (3) and were born in the other contiguous foreign state, who were issued immigrant visas or otherwise acquired the status of an alien lawfully admitted for permanent residence in the previous fiscal year.

"(3) The aliens described in this paragraph, who are not subject to the numerical limitations described in paragraphs (1) and (2), are—

"(A) special immigrants defined in section 101(a)(27),

"(B) immigrants born to permanent resident aliens during a temporary visit abroad,

"(C) immediate relatives specified in subsection (b) of this section,

"(D) immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent who is such an immediate relative,

"(E) aliens who are admitted or granted asylum under section 207 or 208,

"(F) aliens provided records of permanent residence under section 214(d), and

"(G) aliens whose status is adjusted to permanent resident status under section 245A.".

(2) The first sentence of subsection (b) of such section as amended is amended by striking out "children spouses, and parents" inserting in lieu thereof "children, unmarried sons, unmarried daughters, spouses, and parents".

(b) Section 202(a) (8 U.S.C. 1152(a)) is amended—

(1) by striking out "(a) No person" and inserting in lieu thereof "(a)(1) Except as specifically provided in paragraph (2) of this subsection and in section 101(a)(27), 201(b), 203, and 214(d), no person",

(2) by striking out ", except as specifically" and all that follows up to the period at the end, and

(3) by adding at the end the following new paragraph:

"(2) The total number of immigrant visas made available to natives of any single foreign state under subsections (a) and (b) of section 203 shall not exceed in any fiscal year—

"(A) 20,000, in the case of any foreign state other than either of the two foreign states contiguous to the United States, or

"(B) in the case of either of the foreign states contiguous to the United States, the numerical limitation for that foreign state for that fiscal year described in section 201(a)(2).".

PREFERENCE AND NONPREFERENCE ALLOCATION SYSTEMS

SEC. 202. (a)(1) Section 203 (8 U.S.C. 1153) is amended—

(A) by redesignating subsections (b) through (e) as subsections (e) through (h), respectively, and

(B) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) PREFERENCE ALLOCATION FOR FAMILY REUNIFICATION IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(A) for family reunification immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in section 201(a)(2)(A) for family reunification immigrants shall be allotted visas as follows:

"(1) SPOUSES AND CHILDREN OF PERMANENT RESIDENT ALIENS.—Visas shall first be made available to qualified immigrants, in a number not to exceed 36 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (4), who are the spouses or children of aliens lawfully admitted for permanent residence.

"(2) UNMARRIED SONS AND DAUGHTERS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (1), who are the spouses or the unmarried sons or unmarried daughters of aliens lawfully admitted for permanent residence.

"(3) MARRIED SONS AND DAUGHTERS OF CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) and (2), who are the married sons or married daughters of citizens of the United States.

"(4) BROTHERS AND SISTERS OF ADULT CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 34 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (3), who are the brothers or unmarried sisters of United States citizens who are at least 21 years of age.

"(5) PARENTS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (4), who are at least 60 years of age and who are the parents of aliens lawfully admitted for permanent residence.

In allocating visa numbers to aliens under this section, aliens born in noncontiguous foreign states and dependent areas shall be treated as one group and aliens born in each of the contiguous foreign states shall be treated as separate groups.

"(b) ALLOCATION FOR INDEPENDENT IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(B) for independents immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in or section 201(a)(2)(B) for independent immigrants shall be allocated visas as follows:

"(1) ALIENS OF EXCEPTIONAL ABILITY.—Visas shall first be made available, in a number not to exceed such respective numerical limitation, to qualified immigrants who because of their exceptional ability in the sciences, arts, professions, or business will substantially benefit prospectively the national economy, cultural interests, or welfare of the United States and whose services in the sciences, arts, professions, or business are sought by an employer in the United States. In determining under this paragraph whether an immigrant has exceptional ability, the possession of a degree, diploma, certificate, or similar award from a college, university, school, or other institution of learning, or of a license to practice or certification for a particular profession or occupation shall not by itself be considered sufficient evidence of such exceptional ability.

"(2) SKILLED WORKERS.—Visas not required for classes specified in paragraph (1) shall next be made available to qualified immigrants who are capable of performing skilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(3) INVESTORS.—Visas not required for classes specified in paragraphs (1) and (2), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available—

"(A) first, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment in a high unemployment area (as defined by the Attorney General, after consultation with the Secretary of Labor, and as determined at the time of the filing of a petition for than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant, and

"(B) then, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant.

"(4) UNSKILLED WORKERS.—Visas not requried for classes specified in paragraphs (1) through (3) small next be made available to qualified immigrants who are capable of performing unskilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(5) NONPREFERENCE IMMIGRANTS.—(A) Visas not required for the classes specified in paragraphs (a) through (4), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available to other qualified immigrants who are not entering the country to perform skilled or unskilled labor in the chronological order in which they qualify.

"(B) No immigrant visa shall be issued under this paragraph to an adopted child or prospective adopted child of a United States citizen or lawfully resident alien unless (i) a valid home-study has been favorably recommended by an agency of the State of the child's proposed residence, or by an agency authorized by that State to conduct such a study, or, in the case of a child adopted abroad, by an appropriate public or private adoption agency which is licensed in the United States, and (ii) the child has been irrevocably released for immigration and adoption. No natural parent or prior adoptive parent of any such child shall thereafter, by virtue of such parentage, be accorded any right, privilege, or status under this Act. No immigrant visa shall otherwise be issued under this paragraph to an unmarried child under 16 years of age except a child who is accompanying or following to join his natural parent.

An immigrant visa shall not be issued to an immigrant under paragraph (1), (2), or (4) until the consular officer is in receipt of a determination made by the Secretary of Labor pursuant to the provisions of section 212(a)(14).

"(c) GUIDE FOR ALLOCATION BETWEEN PREFERENCE SYSTEM.—Where it is determined that the maximum number of visas will be made available under section 202(a)(2) to natives of any single foreign state (defined in section 202(b)) or any dependent area (defined in section 202(c)) in any fiscal year, in determining whether to provide for visas to such natives under the preference system described in subsection (a) or that described in subsection (b), visa numbers with respect to natives of that state or dependent area shall be allocated (to the extent practicable and otherwise consistent with this section) in a manner so that the ratio of—

"(A) the number of family reunification immigrants described in subsection (a) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year, to

"(B) the number of independent immigrants described in subsection (b) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year,

is equal to 3 to 1.

"(d)(1) A spouse or child as defined in subparagraph (A), (B), (C), or (E) of section 101(b)(1) and shall, if not otherwise entitled to an immigrant status and the immediate issuance of a visa under subsection (a) or (b), be entitled to the same status, and the same order of consideration provided in the respective subsection, if accompanying or following to join, his spouse or parent.

"(2) Waiting lists of applicants for visas under this section shall be maintained in accordance with regulations prescribed by the Secretary of State.".

(2) Subsection (e) of such section, as so redesignated, is amended—

(A) by inserting "or under subsection (b)" after "subsection (a)" the first place it appears, and

(B) by striking out "subsection (a)" the second place it appears and inserting in lieu thereof "the respective subsection".

(b)(1) Section 202 (8 U.S.C. 1152) is amended by striking out subsection (e).

(2) Section 204 (8 U.S.C. 1154) is amended by striking out subsection (f).

(3) Section 245(b) (8 U.S.C. 1255(b)) is amended by striking out "202(e) or".

(c)(1)(A) Subsection (f) of section 203 (8 U.S.C. 1153), as redesignated by subsection (a)(1), is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or pursuant to paragraphs (1) through (5) of subsection (b)".

(B) Subsection (g) of such section, as so redesignated, is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or paragraphs (1) through (4) of subsection (b)" each place it appears.

(2)(A) Subsection (a) of section 204 (8 U.S.C. 1154) is amended—

(i) by striking out "paragraph (1), (4), or (5) of section 203(a)" and inserting in lieu thereof "paragraph (3) or (4) of section 203(a)",

(ii) by striking out "section 203(a)(2)" and inserting in lieu thereof "paragraph (1), (2), or (5) of section 203(a)",

(iii) by striking out "section 203(a)(3)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(b)", and

(iii) by striking out "section 203(a)(6)" and inserting in lieu thereof "paragraph (2) or (4) of section 203(b)".

(B) Subsection (b) of such section is amended by striking out "section 203(a) (3) or (6)" and inserting in lieu thereof "paragraph (1), (2) or (4) of section 203(b)".

(d) Section 241(a)(9) (8 U.S.C. 1251(a)(9)) is amended—

(1) by inserting "(A)" after "(9)", and

(2) by adding at the end the following new subparagraph:

"(B) was admitted as (or otherwise acquired the status of) an independent immigrant described in paragraph (3) of section 203(b) and has failed without good cause to maintain such as investment for a period of at least one year after the date of such entry (or of acquiring such status) or after the date such substantial investment was made, whichever date is later;".

Page 49, line 14, strike out "(a)".

Page 50, line 11, strike out "paragraph (3) or (6)" and all that follows through "section 203(a)(7)" on line 13 and insert in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

Page 50, strike out line 21 and all that follows through page 51, line 2.

Page 59, after line 6, insert the following new section (and insert a corresponding item in the table of contents):

EFFECTIVE DATES AND TRANSITION

SEC. . (a) The amendments made by sections 201, 202 (other than subsection (e)), and 203 shall take effect on October 1, 1983. When an immigrant, in possession of an unexpired immigrant visa issued before October 1, 1983, makes application for admission, his admissibility under section 212(a)(20) of the Immigration and Nationality Act shall be determined under the provisions of law in effect on the date of the issuance of such visa. The amendments made by the other provisions of this part shall take effect on the date of the enactment of this Act.

(b)(1) In the case of a petition filed under section 204(a) of the Immigration and Nationality Act before October 1, 1983, such petition shall be deemed, as of such date, to be a petition for the new corresponding classification (as defined in paragraph (2)), and the priority date for such petition shall remain in effect.

(2) For purposes of paragraph (1), the term "new corresponding classification" means, in the case of a petition for a—

(A) preference status described in section 203(a)(1) of the Immigration and Nationality Act (as in effect on September 30, 1983), the status as an immediate relative described in section 201(b) of such Act;

(B) preference status described in section 203(a)(2) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(a) of such Act as in effect after such date, as the case may be;

(C) preference status described in section 203(a)(3) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(b) of such Act as in effect after such date, as the case may be;

(D) preference status described in section 203(a)(4) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(3) of such Act as in effect after such date;

(E) preference status described in section 203(a)(5) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(4) of such Act as in effect after such date; and

(F) preference status described in section 203(a)(6) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (2) or (4) of section 203(b) of such Act (as in effect after such date), as the case may be.

(c) Aliens registered in the nonpreference classification described in section 203(a)(7) of the Immigration and Nationality Act (as in effect on September 30, 1983) shall be transferred, as of October 1, 1983, to the preference status described in section 203(a)(5) or 203(b)(3) of such Act or the nonpreference classification described in section 203(b)(5) of such Act (as such sections are in effect after such date), as the case may be, and the priority date for such classification shall remain in effect.

AMENDMENT (34E)

Page 49, after line 12, insert the following new sections (and redesignate the succeeding sections of part A of title II, and the table of contents and cross-references thereto, accordingly):

NUMERICAL LIMITATIONS

SEC. 201. (a)(1) Subsection (a) of section 201 (8 U.S.C. 1151) is amended to read as follows:

"(a)(1) Exclusive of aliens described in paragraph (3), aliens born in a foreign state (other than a contiguous foreign state) or dependent area who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 320,000, plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year and the number of visas issued under that subparagraph during that year, plus (iii) for fiscal years before fiscal year 1989, 66,500, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a relationship described in paragraph (1), (2), (4), or (5) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 65,000, minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, plus (iii) for fiscal years before fiscal year 1989, 13,500, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a paragraph (3) or (6) section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"(2) Exclusive of aliens described in paragraph (3), aliens born in a contiguous foreign state who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 83 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year for that foreign state and the number of visas issued under that subparagraph during that year, plus (iii) for fiscal years before fiscal year 1989, 8,300, but only available to aliens born in that contiguous state with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a relationship described in paragraph (1), (2), (4), or (5) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 17 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who were born in that contiguous foreign state and who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, plus (iii) for fiscal years before fiscal year 1989, 1,700, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of paragraph (3) or (6) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"For purposes of this paragraph, the overall numerical limitation for a contiguous foreign state for a fiscal year is 40,000, plus the number by which 40,000 (or, for fiscal years before fiscal year 1989, 50,000) exceeds the number of aliens, who are not described in paragraph (3) and were born in the other contiguous foreign state, who were issued immigrant visas or otherwise acquired the status of an alien lawfully admitted for permanent residence in the previous fiscal year.

"(3) The aliens described in this paragraph, who are not subject to the numerical limitations described in paragraph (1) and (2), are—

"(A) special immigrants defined in section 101(a)(27),

"(B) immigrants born to permanent resident aliens during a temporary visit abroad,

"(C) immediate relatives specified in subsection (b) of this section,

"(D) immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent who is such an immediate relative,

"(E) aliens who are admitted or granted asylum under section 207 or 208,

"(F) aliens provided records of permanent residence under section 214(d), and

"(G) aliens whose status is adjusted to permanent resident status under section 245A.".

(2) The first sentence of subsection (b) of such section is amended by striking out "children, spouses, and parents" inserting in lieu thereof "children, unmarried sons, unmarried daughters, spouses, parents, and grandparents" and by inserting "and grandparents" after "of parents".

(3) Section 221 (8 U.S.C. 1201) is amended by adding at the end the following new subsection:

"(j) Notwithstanding any other provision of this Act, no alien shall be eligible to re-

ceive an immigrant visa (or to otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence) by virtue of a petition filed under section 204(a) to grant preference status to the alien by reason of the relationship described in section 203(a)(1), 203(a)(2), or 203(a)(5), filed by an individual who was admitted to the United States as an immigrant by virtue of an immediate relative petition filed by the grandson or granddaughter of the individual.".

(b) Section 202(a) (8 U.S.C. 1152(a)) is amended—

(1) by striking out "(a) No person" and inserting in lieu thereof "(a)(1) Except as specifically provided in paragraph (2) of this subsection and in section 101(a)(27), 201(b), 203(, and 214(d), no person",

(2) by striking out ", except as specifically" and all that follows up to the period at the end, and

(3) by adding at the end the following new paragraph:

"(2) The total number of immigrant visas made available to natives of any single foreign state under subsections (a) (other than paragraph (1) thereof) and (b) of section 203 shall not exceed in any fiscal year—

"(A) 20,000, in the case of any foreign state other than either of the two foreign states contiguous to the United States, or

"(B) in the case of either of the foreign states contiguous to the United States, the numerical limitation for that foreign state for that fiscal year described in section 201(a)(2).".

PREFERENCE AND NONPREFERENCE ALLOCATION SYSTEMS

SEC. 202. (a)(1) Section 203 (8 U.S.C. 1153) is amended—

(A) by redesignating subsections (b) through (e) as subsections (e) through (h), respectively, and

(B) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) PREFERENCE ALLOCATION FOR FAMILY REUNIFICATION IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(A) for family reunification immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in section 201(a)(2)(A) for family reunification immigrants shall be allotted visas as follows:

"(1) SPOUSES AND CHILDREN OF PERMANENT RESIDENT ALIENS.—Visas shall first be made available to qualified immigrants, in a number not to exceed 36 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (4), who are the spouses or children of aliens lawfully admitted for permanent residence.

"(2) UNMARRIED SONS AND DAUGHTERS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (1), who are the spouses or the unmarried sons or unmarried daughters of aliens lawfully admitted for permanent residence.

"(3) MARRIED SONS AND DAUGHTERS OF CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) and (2), who are the married sons or married daughters of citizens of the United States.

"(4) BROTHERS AND SISTERS OF ADULT CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 34 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (3), who are the brothers or unmarried sisters of United States citizens who are at least 21 years of age.

"(5) PARENTS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (4), who are at least 60 years of age and who are the parents of aliens lawfully admitted for permanent residence.

In allocating visa numbers to aliens under this section, aliens born in noncontiguous foreign states and dependent areas shall be treated as one group and aliens born in each of the contiguous foreign states shall be treated as separate groups.

"(b) ALLOCATION FOR INDEPENDENT IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(B) for independents immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in or section 201(a)(2)(B) for independent immigrants shall be allocated visas as follows:

"(1) ALIENS OF EXCEPTIONAL ABILITY.—Visas shall first be made available, in a number not to exceed such respective numerical limitation, to qualified immigrants who because of their exceptional ability in the sciences, arts, professions, or business will substantially benefit prospectively the national economy, cultural interests, or welfare of the United States and whose services in the sciences, arts, professions, or business are sought by an employer in the United States. In determining under this paragraph whether an immigrant has exceptional ability, the possession of a degree, diploma, certificate, or similar award from a college, university, school, or other institution of learning, or of a license to practice or certification for a particular profession or occupation shall not by itself be considered sufficient evidence of such exceptional ability.

"(2) SKILLED WORKERS.—Visas not required for classes specified in paragraph (1) shall next be made available to qualified immigrants who are capable of performing skilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(3) INVESTORS.—Visas not required for classes specified in paragraphs (1) and (2), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available—

"(A) first, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment in a high unemployment area (as defined by the Attorney General, after consultation with the Secretary of Labor, and as determined at the time of the filing of a petition for classification under this paragraph) for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant, and

"(B) then, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant.

"(4) UNSKILLED WORKERS.—Visas not required for classes specified in paragraphs (1) through (3) shall next be made available to qualified immigrants who are capable of performing unskilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(5) NONPREFERENCE IMMIGRANTS.—(A) Visas not required for the classes specified in paragraphs (1) through (4), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available to other qualified immigrants who are not entering the country to perform skilled or unskilled labor in the chronological order in which they qualify.

"(B) No immigrant visa shall be issued under this paragraph to an adopted child or prospective adopted child of a United States citizen or lawfully resident alien unless (i) a valid home-study has been favorably recommended by an agency of the State of the child's proposed residence, or by an agency authorized by that State to conduct such a study, or, in the case of a child adopted abroad, by an appropriate public or private adoption agency which is licensed in the United States, and (ii) the child has been irrevocably released for immigration and adoption. No natural parent or prior adoptive parent of any such child shall thereafter, by virtue of such parentage, be accorded any right, privilege, or status under this act. No immigrant visa shall otherwise be issued under this paragraph to an unmarried child under 16 years of age except a child who is accompanying or following to join his natural parent.

An immigrant visa shall not be issued to an immigrant under paragraph (1), (2), or (4) until the consular officer is in receipt of a determination made by the Secretary of Labor pursuant to the provisions of section 212(a)(14).

"(c) GUIDE FOR ALLOCATION BETWEEN PREFERENCE SYSTEMS.—Where it is determined that the maximum number of visas will be made available under section 202(a)(2) to natives of any single foreign state (defined in section 202(b)) or any dependent area (defined in section 202(c)) in any fiscal year, in determining whether to provide for visas to such natives under the preference system described in subsection (a) or that described in subsection (b), visa numbers with respect to natives of that state or dependent area shall be allocated (to the extent practicable and otherwise consistent with this section) in a manner so that the ratio of—

"(A) the number of family reunification immigrants described in subsection (a) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year, to

"(B) the number of independent immigrants described in subsection (b) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admit-

ted to the United States for permanent residence in that fiscal year,

is equal to 3 to 1.

"(d)(1) A spouse or child as defined in subparagraph (A), (B), (C), (D), or (E) of section 101(b)(1) and shall, if not otherwise entitled to an immigrant status and the immediate issuance of a visa under subsection (a) or (b), be entitled to the same status, and the same order of consideration provided in the respective subsection, if accompanying or following to join, his spouse or parent.

"(2) Waiting lists of applicants for visas under this section shall be maintained in accordance with regulations prescribed by the Secretary of State.".

(2) Subsection (e) of such section, as so redesignated, is amended—

(A) by inserting "or under subsection (b)" after "subsection (a)" the first place it appears, and

(B) by striking out "subsection (a)" the second place it appears and inserting in lieu thereof "the respective subsection".

(b)(1) Section 202 (8 U.S.C. 1152) is amended by striking out subsection (e).

(2) Section 204 (8 U.S.C. 1154) is amended by striking out subsection (f).

(3) Section 245(b) (8 U.S.C. 1255(b)) is amended by striking out "202(e) or".

(c)(1)(A) Subsection (f) of section 203 (8 U.S.C. 1153), as redesignated by subsection (a)(1), is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or pursuant to paragraphs (1) through (5) of subsection (b)".

(B) Subsection (g) of such section, as so redesignated, is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or paragraphs (1) through (4) of subsection (b)" each place it appears.

(2)(A) Subsection (a) of section 204 (8 U.S.C. 1154) is amended—

(i) by striking out "paragraph (1), (4), or (5) of section 203(a)" and inserting in lieu thereof "paragraph (3) or (4) of section 203(a)",

(ii) by striking out "section 203(a)(2)" and inserting in lieu thereof "paragraph (1), (2), or (5) of section 203(a)",

(iii) by striking out "section 203(a)(3)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(b)", and

(iii) by striking out "section 203(a)(6)" and inserting in lieu thereof "paragraph (2) or (4) of section 203(b)".

(B) Subsection (b) of such section is amended by striking out "section 203(a) (3) or (6)" and inserting in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

(d) Section 241(a)(9) (8 U.S.C. 1251(a)(9)) is amended—

(1) by inserting "(A)" after "(9)", and

(2) by adding at the end the following new subparagraph:

"(B) was admitted as (or otherwise acquired the status of) an independent immigrant described in paragraph (3) of section 203(b) and has failed without good cause to maintain such an investment for a period of at least one year after the date of such entry (or of acquiring such status) or after the date such substantial investment was made, whichever date is later;".

Page 49, line 14, strike out "(a)".

Page 50, line 11, strike out "paragraph (3) or (6)" and all that follows through "section 203(a)(7)" on line 13 and insert in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

Page 50, strike out line 21 and all that follows through page 51, line 2.

Page 59, after line 6, insert the following new section (and insert a corresponding item in the table of contents):

EFFECTIVE DATES AND TRANSITION

SEC. . (a) The amendments made by sections 201, 202 (other than subsection (e)), and 203 shall take effect on October 1, 1983. When an immigrant, in possession of an unexpired immigrant visa issued before October 1, 1983, makes application for admission, his admissibility under section 212(a)(20) of the Immigration and Nationality Act shall be determined under the provisions of law in effect on the date of the issuance of such visa. The amendments made by the other provisions of this part shall take effect on the date of the enactment of this Act.

(b)(1) In the case of a petition filed under section 204(a) of the Immigration and Nationality Act before October 1, 1983, such petition shall be deemed, as of such date, to be a petition for the new corresponding classification (as defined in paragraph (2)), and the priority date for such petition shall remain in effect.

(2) For purposes of paragraph (1), the term "new corresponding classification" means, in the case of a petition for a—

(A) preference status described in section 203(a)(1) of the Immigration and Nationality Act (as in effect on September 30, 1983), the status as an immediate relative described in section 201(b) of such Act;

(B) preference status described in section 203(a)(2) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(a) of such Act as in effect after such date, as the case may be;

(C) preference status described in section 203(a)(3) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(b) of such Act as in effect after such date, as the case may be:

(D) preference status described in section 203(a)(4) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(3) of such Act as in effect after such date;

(E) preference status described in section 203(a)(5) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(4) of such Act as in effect after such date; and

(F) preference status described in section 203(a)(6) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (2) or (4) of section 203(b) of such Act (as in effect after such date), as the case may be.

(c) Aliens registered in the nonpreference classification described in section 203(a)(7) of the Immigration and Nationality Act (as in effect on September 30, 1983) shall be transferred, as of October 1, 1983, to the preference status described in section 203(a)(5) or 203(b)(3) of such Act or the nonpreference classification described in section 203(b)(5) of such Act (as such sections are in effect after such date), as the case may be, and the priority date for such classification shall remain in effect.

AMENDMENT (34F)

Page 49, after line 12, insert the following new sections (and redesignate the succeeding sections of part A of title II, and the table of contents and cross-references thereto, accordingly):

NUMERICAL LIMITATIONS

SEC. 201. (a)(1) Subsection (a) of section 201 (8 U.S.C. 1151) is amended to read as follows:

"(a)(1) Exclusive of aliens described in paragraph (3), aliens born in a foreign state (other than a contiguous foreign state) or dependent area who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 320,000, plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year and the number of visas issued under that subparagraph during that year, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 65,000, minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"(2) Exclusive of aliens described in paragraph (3), aliens born in a contiguous foreign state who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 83 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year for that foreign state and the number of visas issued under that subparagraph during that year, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 17 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who were born in that contiguous foreign state and who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"For purposes of this paragraph, the overall numerical limitation for a contiguous foreign state for a fiscal year is 40,000, plus the number by which 40,000 exceeds the number of aliens, who are not described in paragraph (3) and were born in the other contiguous foreign state, who were issued immigrant visas or otherwise acquired the status of an alien lawfully admitted for permanent residence in the previous fiscal year.

"(3) The aliens described in this paragraph, who are not subject to the numerical limitations described in paragraphs (1) and (2), are—

"(A) special immigrants defined in section 101(a)(27),

"(B) immigrants born to permanent resident aliens during a temporary visit abroad,

"(C) immediate relatives specified in subsection (b) of this section,

"(D) immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent who is such an immediate relative,

"(E) aliens who are admitted or granted asylum under section 207 or 208,

"(F) aliens provided records of permanent residence under section 214(d), and

"(G) aliens whose status is adjusted to permanent resident status under section 245A.".

(2) The first sentence of subsection (b) of such section is amended by striking out "children, spouses, and parents" inserting in lieu thereof "children, unmarried sons, unmarried daughters, spouses, parents, and grandparents" and by inserting "and grandparents" after "of parents".

(3) Section 221 (8 U.S.C. 1201) is amended by adding at the end the following new subsection:

"(j) Notwithstanding any other provision of this Act, no alien shall be eligible to receive an immigrant visa (or to otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence) by virtue of a petition filed under section 204(a) to grant preference status to the alien by reason of the relationship described in section 203(a)(1), 203(a)(2), or 203(a)(5), filed by an individual who was admitted to the United States as an immigrant by virtue of an immediate relative petition filed by the grandson or granddaughter of the individual.".

(b) Section 202(a) (8 U.S.C. 1152(a)) is amended—

(1) by striking out "(a) No person" and inserting in lieu thereof "(a)(1) Except as specifically provided in paragraph (2) of this subsection and in section 101(a)(27), 201(b), 203, and 214(d), no person",

(2) by striking out ", except as specifically" and all that follows up to the period at the end, and

(3) by adding at the end the following new paragraph:

"(2) The total number of immigrant visas made available to natives of any single foreign state under subsections (a) (other than paragraph (1) thereof) and (b) of section 203 shall not exceed in any fiscal year—

"(A) 20,000, in the case of any foreign state other than either of the two foreign states contiguous to the United States, or

"(B) in the case of either of the foreign states contiguous to the United States, the numerical limitation for that foreign state for that fiscal year described in section 201(a)(2).".

PREFERENCE AND NONPREFERENCE ALLOCATION SYSTEMS

SEC. 202. (a)(1) Section 203 (8 U.S.C. 1153) is amended—

(A) by redesignating subsections (b) through (e) as subsections (e) through (h), respectively, and

(B) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) PREFERENCE ALLOCATION FOR FAMILY REUNIFICATION IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(A) for family reunification immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in section 201(a)(2)(A) for family reunification immigrants shall be allotted visas as follows:

"(1) SPOUSES AND CHILDREN OF PERMANENT RESIDENT ALIENS.—Visas shall first be made available to qualified immigrants, in a number not to exceed 36 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (4), who are the spouses or children of aliens lawfully admitted for permanent residence.

"(2) UNMARRIED SONS AND DAUGHTERS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (1), who are the spouses or the unmarried sons or unmarried daughters of aliens lawfully admitted for permanent residence.

"(3) MARRIED SONS AND DAUGHTERS OF CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) and (2), who are the married sons or married daughters of citizens of the United States.

"(4) BROTHERS AND SISTERS OF ADULT CITIZENS.—Visas shall next be made available to qualifed immigrants, a number not to exceed 34 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (3), who are the brothers or unmarried sisters of United States citizens who are at least 21 years of age.

"(5) PARENTS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (4), who are at least 60 years of age and who are the parents of aliens lawfully admitted for permanent residence.

In allocating visa numbers to aliens under this section, aliens born in noncontiguous foreign states and dependent areas shall be treated as one group and aliens born in each of the contiguous foreign states shall be treated as separate groups.

"(b) ALLOCATION FOR INDEPENDENT IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(B) for independents immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in or section 201(a)(2)(B) for independent immigrants shall be allocated visas as follows:

"(1) ALIENS OF EXCEPTIONAL ABILITY.—Visas shall first be made available, in a number not to exceed such respective numerical limitation, to qualified immigrants who because of their exceptional ability in the sciences, arts, professions, or business will substantially benefit prospectively the national economy, cultural interests, or welfare of the United States and whose services in the sciences, arts, professions, or business are sought by an employer in the United States. In determining under this paragraph whether an immigrant has exceptional ability, the possession of a degree, diploma, certificate, or similar award from a college, university, school, or other institution of learning, or of a license to practice or certification for a particular profession or occupation shall not by itself be considered sufficient evidence of such exceptional ability.

"(2) SKILLED WORKERS.—Visas not required for classes specified in paragraph (1) shall next be made available to qualified immigrants who are capable of performing skilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(3) INVESTORS.—Visas not required for classes specified in paragraphs (1) and (2), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available—

"(A) first, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment in a high unemployment area (as defined by the Attorney General, after consultation with the Secretary of Labor, and as determined at the time of the filing of a petition for classification under this paragraph) for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant, and

"(B) then, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant.

"(4) UNSKILLED WORKERS.—Visas not required for classes specified in paragraphs (1) through (3) shall next be made available to qualified immigrants who are capable of performing unskilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(5) NONPREFERENCE IMMIGRANTS.—(A) Visas not required for the classes specified in paragraphs (1) through (4), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available to other qualified immigrants who are not entering the country to perform skilled or unskilled labor in the chronological order in which they qualify.

"(B) No immigrant visa shall be issued under this paragraph to an adopted child or prospective adopted child of a United States citizen or lawfully resident alien unless (i) a valid home-study has been favorably recommended by an agency of the State of the child's proposed residence, or by an agency authorized by that State to conduct such a study, or, in the case of a child adopted abroad, by an appropriate public or private adoption agency which is licensed in the United States, and (ii) the child has been irrevocably released for immigration and adoption. No natural parent or prior adoptive parent of any such child shall thereafter, by virtue of such parentage, be accorded any right, privilege, or status under this Act. No immigration visa shall otherwise be issued under this paragraph to an unmarried child under 16 years of age except a child who is accompanying or following to join his natural parent.

An immigrant visa shall not be issued to an immigrant under paragraph (1), (2), or (4) until the consular officer is in receipt of a determination made by the Secretary of Labor pursuant to the provisions of section 212(a)(14).

"(c) GUIDE FOR ALLOCATION BETWEEN PREFERENCE SYSTEMS.—Where it is determined that the maximum number of visas will be made available under section 202(a)(2) to natives of any single foreign state (defined in section 202(b)) or any dependent area (defined in section 202(c)) in any fiscal year, in determining whether to provide for visas to such natives under the preference system described in subsection (a) or that described in subsection (b), visa numbers with respect to natives of that state or dependent area shall be allocated (to the extent practicable and otherwise consistent with this section) in a manner so that the ratio of—

"(A) the number of family reunification immigrants described in subsection (a) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in the fiscal year, to

"(B) the number of independent immigrants described in subsection (b) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year,

is equal to 3 to 1.

"(d)(1) A spouse or child as defined in subparagraph (A), (B), (C), (D), or (E) of section 101(b)(1) and shall, if not otherwise entitled to an immigrant status and the immediate issuance of a visa under subsection (a) or (b), be entitled to the same status, and the same order of consideration provided in the respective subsection, if accompanying or following to join, his spouse or parent.

"(2) Waiting lists of applicants for visas under this section shall be maintained in accordance with regulations prescribed by the Secretary of State.".

(2) Subsection (e) of such section, as so redesignated, is amended—

(A) by inserting "or under subsection (b)" after "subsection (a)" the first place it appears, and

(B) by striking out "subsection (a)" the second place it appears and inserting in lieu thereof "the respective subsection".

(b)(1) Section 202 (8 U.S.C. 1152) is amended by striking out subsection (e).

(2) Section 204 (8 U.S.C. 1154) is amended by striking out subsection (f).

(3) Section 245(b) (8 U.S.C. 1255(b)) is amended by striking out "202(e) or".

(c)(1)(A) Subsection (f) of section 203 (8 U.S.C. 1153), as redesignated by subsection (a)(1), is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or pursuant to paragraphs (1) through (5) of subsection (b)".

(B) Subsection (g) of such section, as so redesignated, is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or paragraphs (1) through (4) of subsection (b)" each place it appears.

(2)(A) Subsection (a) of section 204 (8 U.S.C. 1154) is amended—

(i) by striking out "paragraph (1), (4), or (5) of section 203(a)" and inserting in lieu thereof "paragraph (3) or (4) of section 203(a)",

(ii) by striking out "section 203(a)(2)" and inserting in lieu thereof "paragraph (1), (2), or (5) of section 203(a)",

(iii) by striking out "section 203(a)(3)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(b)", and

(iii) by striking out "section 203(a)(6)" and inserting in lieu thereof "paragraph (2) or (4) of section 203(b)".

(B) Subsection (b) of such section is amended by striking out "section 203(a) (3) or (6)" and inserting in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

(d) Section 241(a)(9) (8 U.S.C. 1251(a)(9)) is amended—

(1) by inserting "(A)" after "(9)", and

(2) by adding at the end the following new subparagraph:

"(B) was admitted as (or otherwise acquired the status of) an independent immigrant described in paragraph (3) of section 203(b) and has failed without good cause to maintain such an investment for a period of at least one year after the date of such entry (or of acquiring such status) or after the date such substantal investment was made, whichever date is later;".

Page 49, line 14, strike out "(a)".

Page 50, line 11, strike out "paragraph (3) or (6)" and all that follows through "section 203(a)(7)" on line 13 and insert in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

Page 50, strike out line 21 and all that follows through page 51, line 2.

Page 59, after line 6, insert the following new section (and insert a corresponding item in the table of contents):

EFFECTIVE DATES AND TRANSITION

SEC. . (a) The amendments made by sections 201, 202 (other than subsection (e)), and 203 shall take effect on October 1, 1983. When an immigrant, in possession of an unexpired immigrant visa issued before October 1, 1983, makes application for admission, his admissibility under section 212(a)(20) of the Immigration and Nationality Act shall be determined under the provisions of law in effect on the date of the issuance of such visa. The amendments made by the other provisions of this part shall take effect on the date of the enactment of this Act.

(b)(1) In the case of a petition filed under section 204(a) of the immigration and Nationality Act before October 1, 1983, such petition shall be deemed, as of such date, to be a petition for the new corresponding classification (as defined in paragraph (2)), and the priority date for such petition shall remain in effect.

(2) For purposes of paragraph (1), the term "new corresponding classification" means, in the case of a petition for a—

(A) preference status described in section 203(a)(1) of the Immigration and Nationality Act (as in effect on September 30, 1983), the status as an immediate relative described in section 201(b) of such Act;

(B) preference status described in section 203(a)(2) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(a) of such Act as in effect after such date, as the case may be;

(C) preference status described in section 203(a)(3) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(b) of such Act as in effect after such date, as the case may be;

(D) preference status described in section 203(a)(4) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(3) of such Act as in effect after such date;

(E) preference status described in section 203(a)(5) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(4) of such Act as in effect after such date; and

(F) preference status described in section 203(a)(6) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (2) or (4) of section 203(b) of such Act (as in effect after such date), as the case may be.

(c) Aliens registered in the nonpreference classification described in section 203(a)(7) of the Immigration and Nationality Act (as in effect on September 30, 1983) shall be transferred, as of October 1, 1983, to the preference status described in section 203(a)(5) or 203(b)(3) of such Act or the nonpreference classification described in section 203(b)(5) of such Act (as such sections are in effect after such date), as the case may be, and the priority date for such classification shall remain in effect.

AMENDMENT (34G)

Page 49, after line 12, insert the following new sections (and redesignate the succeeding sections of part A of title II, and the table of contents and cross-references thereto, acccordingly):

NUMERICAL LIMITATIONS

SEC. 201. (a)(1) Subsection (a) of section 201 (8 U.S.C. 1151) is amended to read as follows:

"(a)(1) Exclusive of aliens described in paragraph (3), aliens born in a foreign state (other than a contiguous foreign state) or dependent area who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 320,000, plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year and the number of visas issued under that subparagraph during that year, plus (iii) for fiscal years before fiscal year 1989, 66,500, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a relationship described in paragraph (1), (2), (4), or (5) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 65,000, minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, plus (iii) for fiscal years before fiscal year 1989, 13,500, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a paragraph (3) or (6) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"(2) Exclusive of aliens described in paragraph (3), aliens born in a contiguous for-

eign state who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 83 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year for that foreign state and the number of visas issued under that subparagraph during that year, plus (iii) for fiscal years before fiscal year 1989, 8,300, but only available to aliens born in that contiguous state with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a relationship described in paragraph (1), (2), (4), or (5) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 17 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who were born in that contiguous foreign state and who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, plus (iii) for fiscal years before fiscal year 1989, 1,700, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of paragraph (3) or (6) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"For purposes of this paragraph, the overall numerical limitation for a contiguous foreign state for a fiscal year is 40,000, plus the number by which 40,000 (or, for fiscal years before fiscal year 1989, 50,000) exceeds the number of aliens, who are not described in paragraph (3) and were born in the other contiguous foreign state, who were issued immigrant visas or otherwise acquired the status of an alien lawfully admitted for permanent residence in the previous fiscal year.

"(3) The aliens described in this paragraph, who are not subject to the numerical limitations described in paragraphs (1) and (2), are—

"(A) special immigrants defined in section 101(a)(27),

"(B) immigrants born to permanent resident aliens during a temporary visit abroad,

"(C) immediate relatives specified in subsection (b) of this section,

"(D) immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent who is such an immediate relative,

"(E) aliens who are admitted or granted asylum under section 207 or 208,

"(F) aliens provided records of permanent residence under section 214(d), and

"(G) aliens whose status is adjusted to permanent resident status under section 245A.".

(2) The first sentence of subsection (b) of such section is amended by striking out "children, spouses, and parents" inserting in lieu thereof "children, unmarried sons, unmarried daughters, spouses, parents, and grandparents" and by inserting "and grandparents" after "of parents".

(3) Section 221 (8 U.S.C. 1201) is amended by adding at the end the following new subsection:

"(j) Notwithstanding any other provision of this Act, no alien shall be eligible to receive an immigrant visa (or to otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence) by virtue of a petition filed under section 204(a) to grant preference status to the alien by reason of the relationship described in section 203(a)(1), 203(a)(2), or 203(a)(5), filed by an individual who was admitted to the United States as an immigrant by virtue of an immediate relative petition filed by the grandson or granddaughter of the individual.".

(b) Section 202(a) (8 U.S.C. 1152(a)) is amended—

(1) by striking out "(a) No person" and inserting in lieu thereof "(a)(1) Except as specifically provided in paragraph (2) of this subsection and in section 101(a)(27), 201(b), 203, and 214(d), no person",

(2) by striking out ", except as specifically" and all that follows up to the period at the end, and

(3) by adding at the end the following new paragraph:

"(2) The total number of immigrant visas made available to natives of any single foreign state under subsections (a) and (b) of section 203 shall not exceed in any fiscal year—

"(A) 20,000, in the case of any foreign state other than either of the two foreign states contiguous to the United States, or

"(B) in the case of either of the foreign states contiguous to the United States, the numerical limitation for that foreign state for that fiscal year described in section 201(a)(2).".

PREFERENCE AND NONPREFERENCE ALLOCATION SYSTEMS

SEC. 202. (a)(1) Section 203 (8 U.S.C. 1153) is amended—

(A) by redesignating subsections (b) through (e) as subsections (e) through (h), respectively, and

(B) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) PREFERENCE ALLOCATION FOR FAMILY REUNIFICATION IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(A) for family reunification immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in section 201(a)(2)(A) for family reunification immigrants shall be allotted visas as follows:

"(1) SPOUSES AND CHILDREN OF PERMANENT RESIDENT ALIENS.—Visas shall first be made available to qualified immigrants, in a number not to exceed 36 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (4), who are the spouses or children of aliens lawfully admitted for permanent residence.

"(2) UNMARRIED SONS AND DAUGHTERS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (1), who are the spouses or the unmarried sons or unmarried daughters of aliens lawfully admitted for permanent residence.

"(3) MARRIED SONS AND DAUGHTERS OF CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) and (2), who are the married sons or married daughters of citizens of the United States.

"(4) BROTHERS AND SISTERS OF ADULT CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 34 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (3), who are the brothers or unmarried sisters of United States citizens who are at least 21 years of age.

"(5) PARENTS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (4), who are at least 60 years of age and who are the parents of aliens lawfully admitted for permanent residence.

In allocating visas numbers to aliens under this section, aliens born in noncontiguous foreign states and dependent areas shall be treated as one group and aliens born in each of the contiguous foreign states shall be treated as separate groups.

"(b) ALLOCATION FOR INDEPENDENT IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(B) for independent immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in or section 201(a)(2)(B) for independent immigrants shall be allocated visas as follows:

"(1) ALIENS OF EXCEPTIONAL ABILITY.—Visas shall first be made available, in a number not to exceed such respective numerical limitation, to qualified immigrants who because of their exceptional ability in the sciences, arts, professions, or business will substantially benefit prospectively the national economy, cultural interests, or welfare of the United States and whose services in the sciences, arts, professions, or business are sought by an employer in the United States. In determining under this paragraph whether an immigrant has exceptional ability, the possession of a degree, diploma, certificate, or similar award from a college, university, school, or other institution of learning, or of a license to practice or certification for a particular profession or occupation shall not by itself be considered sufficient evidence of such exceptional ability.

"(2) SKILLED WORKERS.—Visas not required for classes specified in paragraph (1) shall not be made available to qualified immigrants who are capable of performing skilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(3) INVESTORS.—Visas not required for classes specified in paragraphs (1) and (2), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available—

"(A) first, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an

amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment in a high unemployment area (as defined by the Attorney General, after consultation with the Secretary of Labor, and as determined at the time of the filing of a petition for classification under this paragraph) for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant, and

"(B) then, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant.

"(4) UNSKILLED WORKERS.—Visas not required for classes specified in paragraphs (1) through (3) shall next be made available to qualified immigrants who are capable of performing unskilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(5) NONPREFERENCE IMMIGRANTS.—(A) Visas not required for the classes specified in paragraphs (1) through (4), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available to other qualified immigrants who are not entering the country to perform skilled or unskilled labor in the chronological order in which they qualify.

"(B) No immigrant visa shall be issued under this paragraph to an adopted child or prospective adopted child of a United States citizen or lawfully resident alien unless (i) a valid home-study has been favorably recommended by an agency of the State of the child's proposed residence, or by an agency authorized by that State to conduct such a study, or, in the case of a child adopted abroad, by an appropriate public or private adoption agency which is licensed in the United States, and (ii) the child has been irrevocably released for immigration and adoption. No natural parent or prior adoptive parent of any such child shall thereafter, by virtue of such parentage, be accorded any right, privilege, or status under this Act. No immigrant visa shall otherwise be issued under this paragraph to an unmarried child under 16 years of age except a child who is accompanying or following to join his natural parent.

An immigrant visa shall not be issued to an immigrant under paragraph (1), (2), or (4) until the consular officer is in receipt of a determination made by the Secretary of Labor pursuant to the provisions of section 212(a)(14).

"(c) GUIDE FOR ALLOCATION BETWEEN PREFERENCE SYSTEMS.—Where it is determined that the maximum number of visas will be made available under section 202(a)(2) to natives of any single foreign state (defined in section 202(b)) or any dependent area (defined in section 202(c)) in any fiscal year, in determining whether to provide for visas to such natives under the preference system described in subsection (a) or that described in subsection (b), visa numbers with respect to natives of that state or dependent area shall be allocated (to the extent practicable and otherwise consistent with this section) in a manner so that the ratio of—

"(A) the number of family reunification immigrants described in subsection (a) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year, to

"(B) the number of independent immigrants described in subsection (b) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year,

is equal to 3 to 1.

"(d)(1) A spouse or child as defined in subparagraph (A), (B), (C), (D), or (E) of section101(b)(1) and shall, if not otherwise entitled to an immigrant status and the immediate issuance of a visa under subsection (a) or (b), be entitled to the same status, and the same order of consideration provided in the respective subsection, if accompanying or following to join, his spouse or parent.

"(2) Waiting lists of applicants for visas under this section shall be maintained in accordance with regulations prescribed by the Secretary of State.".

(2) Subsection (e) of such section, as so redesignated, is amended—

(A) by inserting "or under subsection (b)" after "subsection (a)" the first place it appears, and

(B) by striking out "subsection (a)" the second place it appears and inserting in lieu thereof "the respective subsection".

(b)(1) Section 202 (8 U.S.C. 1152) is amended by striking out subsection (e).

(2) Section 204 (8 U.S.C. 1154) is amended by striking out subsection (f).

(3) Section 245(b) (8 U.S.C. 1155(b)) is amended by striking out "202(e) or".

(c)(1)(A) Subsection (f) of section 203 (8 U.S.C. 1153), as redesignated by subsection (a)(1), is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or pursuant to paragraphs (1) through (5) of subsection (b)".

(B) Subsection (g) of such section, as so redesignated, is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or paragraphs (1) through (4) of subsection (b)" each place it appears.

(2)(A) Subsection (a) of section 204 (8 U.S.C. 1154) is amended—

(i) by striking out "paragraph (1), (4), or (5) of section 203(a)" and inserting in lieu thereof "paragraph (3) or (4) of section 203(a)",

(ii) by striking out "section 203(a)(2)" and inserting in lieu thereof "paragraph (1), (2), or (5) of section 203(a)",

(iii) by striking out "section 203(a)(3)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(b)", and

(iv) by striking out "section 203(a)(6)" and inserting in lieu thereof "paragraph (2), or (4) of section 203(b)".

(B) Subsection (b) of such section is amended by striking out "section 203(a) (3) or (6)" and inserting in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

(d) Section 241(a)(9) (8 U.S.C. 1251(a)(9)) is amended—

(1) by inserting "(A)" after "(9)", and

(2) by adding at the end the following new subparagraph:

"(B) was admitted as (or otherwise acquired the status of) an independent immigrant described in paragraph (3) of section 203(b) and has failed without good cause to maintain such an investment for a period of at least one year after the date of such entry (or of acquiring such status) or after the date such substantial investment was made, whichever date is later;".

Page 49, line 14, strike out "(a)".

Page 50, line 11, strike out "paragraph (3) or (6)" and all that follows through "section 203(a)(7)" on line 13 and insert in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

Page 50, strike out line 21 and all that follows through page 51, line 2.

Page 59, after line 6, insert the following new section (and insert a corresponding item in the table of contents):

EFFECTIVE DATES AND TRANSITION

SEC. . (a) The amendments made by sections 201, 202 (other than subsection (e)), and 203 shall take effect on October 1, 1983. When an immigrant, in possession of an unexpired immigrant visa issued before October 1, 1983, makes application for admission, his admissibility under section 212(a)(20) of the Immigration and Nationality Act shall be determined under the provisions of law in effect on the date of the issuance of such visa. The amendments made by the other provisions of this part shall take effect on the date of the enactment of this Act.

(b)(1) In the case of a petition filed under section 204(a) of the Immigration and Nationality Act before October 1, 1983, such petition shall be deemed, as of such date, to be a petition for the new corresponding classification (as defined in paragraph (2)), and the priority date for such petition shall remain in effect.

(2) For purposes of paragraph (1), the term "new corresponding classification" means, in the case of a petition for a—

(A) preference status described in section 203(a)(1) of the Immigration and Nationality Act (as in effect on September 30, 1983), the status as an immediate relative described in section 201(b) of such Act;

(B) preference status described in section 203(a)(2) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(a) of such Act as in effect after such date, as the case may be;

(C) preference status described in section 203(a)(3) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(b) of such Act as in effect after such date, as the case may be;

(D) preference status described in section 203(a)(4) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(3) of such Act as in effect after such date;

(E) preference status described in section 203(a)(5) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(4) of such Act as in effect after such date; and

(F) preference status described in section 203(a)(6) of such Act (as in effect on September 30, 1983), the preference status described in section (2) or (4) of section 203(b) of such Act (as in effect after such date), as the case may be.

(c) Aliens registered in the nonpreference classification described in section 203(a)(7) of the Immigration and Nationality Act (as in effect on September 30, 1983) shall be transferred, as of October 1, 1983, to the preference status described in section 203(a)(5) or 203(b)(3) of such Act or the

nonpreference classification described in section 203(b)(5) of such Act (as such sections are in effect after such date), as the case may be, and the priority date for such classification shall remain in effect.

AMENDMENT (34H)

Page 49, after line 12, insert the following new sections (and redesignate the succeeding sections of part A of title II, and the table of contents and cross-references thereto, accordingly):

NUMERICAL LIMITATIONS

SEC. 201. (a)(1) Subsection (a) of section 201 (8 U.S.C. 1151) is amended to read as follows:

"(a)(1) Exclusive of aliens described in paragraph (3), aliens born in a foreign state (other than a contiguous foreign state) or dependent area who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 320,000, plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year and the number of visas issued under that subparagraph during that year, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 65,000, minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"(2) Exclusive of aliens described in paragraph (3), aliens born in a contiguous foreign state who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 83 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year for that foreign state and the number of visas issued under that subparagraph during that year, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in number not to exceed in any fiscal year the number equal to (i) 17 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who were born in that contiguous foreign state and who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"For purposes of this paragraph, the overall numerical limitation for a contiguous foreign state for a fiscal year is 40,000, plus the number by which 40,000 exceeds the number of aliens, who are not described in paragraph (3) and were born in the other contiguous foreign state, who were issued immigrant visas or otherwise acquired the status of an alien lawfully admitted for permanent residence in the previous fiscal year.

"(3) The aliens described in this paragraph, who are not subject to the numerical limitations described in paragraphs (1) and (2), are—

"(A) special immigrants defined in section 101(a)(27),

"(B) immigrants born to permanent resident aliens during a temporary visit abroad,

"(C) immediate relatives specified in subsection (b) of this section,

"(D) immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent who is such an immediate relative,

"(E) aliens who are admitted or granted asylum under section 207 or 208,

"(F) aliens provided records of permanent residence under section 214(d), and

"(G) aliens whose status is adjusted to permanent resident status under section 245A.".

(2) The first sentence of subsection (b) of such section is amended by striking out "children, spouses, and parents" inserting in lieu thereof "children, unmarried sons, unmarried daughters, spouses, parents, and grandparents" and by inserting "and grandparents" after "of parents".

(3) Section 221 (8 U.S.C. 1201) is amended by adding at the end the following new subsection:

"(j) Notwithstanding any other provision of this Act, no alien shall be eligible to receive an immigrant visa (or to otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence) by virtue of a petition filed under section 204(a) to grant preference status to the alien by reason of the relationship described in section 203(a)(1), 203(a)(2), or 203(a)(5), filed by an individual who was admitted to the United States as an immigrant by virtue of an immediate relative petition filed by the grandson or granddaughter of the individual.".

(b) Section 202(a) (8 U.S.C. 1152(a)) is amended—

(1) by striking out "(a) No person" and inserting in lieu thereof "(a)(1) Except as specifically provided in paragraph (2) of this subsection and in section 101(a)(27), 201(b), 203, and 214(d), no person",

(2) by striking out ", except as specifically" and all that follows up to the period at the end, and

(3) by adding at the end the following new paragraph:

"(2) The total number of immigrant visas made available to natives of any single foreign state under subsections (a) and (b) of section 204 shall not exceed in any fiscal year—

"(A) 20,000, in the case of any foreign state other than either of the two foreign states contiguous to the United States, or

"(B) in the case of either of the foreign states contiguous to the United States, the numerical limitation for that foreign state for that fiscal year described in section 201(a)(2).".

PREFERENCE AND NONPREFERENCE ALLOCATION SYSTEMS

SEC. 202. (a)(1) Section 203 (8 U.S.C. 1153) is amended—

(A) by redesignating subsection (b) through (e) as subsections (e) through (h), respectively, and

(B) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) PREFERENCE ALLOCATION FOR FAMILY REUNIFICATION IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(A) for family reunification immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in section 201(a)(2)(A) for family reunification immigrants shall be allotted visas as follows:

"(1) SPOUSES AND CHILDREN OF PERMANENT RESIDENT ALIENS.—Visas shall first be made available to qualified immigrants, in a number not to exceed 36 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (4), who are the spouses or children of aliens lawfully admitted for permanent residence.

"(2) UNMARRIED SONS AND DAUGHTERS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (1), who are the spouses or the unmarried sons or unmarried daughters of aliens lawfully admitted for permanent residence.

"(3) MARRIED SONS AND DAUGHTERS OF CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) and (2), who are the married sons or married daughters of citizens of the United States.

"(4) BROTHERS AND SISTERS OF ADULT CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 34 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (3), who are the brothers or unmarried sisters of United States citizens who are at least 21 years of age.

"(5) PARENTS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (4), who are at least 60 years of age and who are the parents of aliens lawfully admitted for permanent residence.

In allocating visa numbers to aliens under this section, aliens born in noncontiguous foreign states and dependent areas shall be treated as one group and aliens born in each of the contiguous foreign states shall be treated as separate groups.

"(b) ALLOCATION FOR INDEPENDENT IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(B) for independent immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in or section 201(a)(2)(B) for independent immigrants shall be allocated visas as follows:

"(1) ALIENS OF EXCEPTIONAL ABILITY.—Visas shall first be made available, in a number not to exceed such respective nu-

merical limitation, to qualified immigrants who because of their exceptional ability in the sciences, arts, professions, or business will substantially benefit prospectively the national economy, cultural interests, or welfare of the United States and whose services in the sciences, arts, professions, or business are sought by an employer in the United States. In determining under this paragraph whether an immigrant has exceptional ability, the possession of a degree, diploma, certificate, or similar award from a college, university, school, or other institution of learning, or of a license to practice or certification for a particular profession or occupation shall not by itself be considered sufficient evidence of such exceptional ability.

"(2) SKILLED WORKERS.—Visas not required for classes specified in paragraph (1) shall next be made available to qualified immigrants who are capable of performing skilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(3) INVESTORS.—Visas not required for classes specified in paragraphs (1) and (2), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available—

"(A) first, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment in a high unemployment area (as defined by the Attorney General, after consultation with the Secretary of Labor, and as determined at the time of the filling of a petition for classification under this paragraph) for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant, and

"(B) then, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant.

"(4) UNSKILLED WORKERS.—Visas not required for classes specified in paragraphs (1) through (3) shall next be made available to qualified immigrants who are capable of performing unskilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(5) NONPREFERENCE IMMIGRANTS.—(A) Visas not required for the classes specified in paragraphs (1) through (4), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available to other qualified immigrants who are not entering the country to perform skilled or unskilled labor in the chronological order in which they qualify.

"(B) No immigrant visa shall be issued under this paragraph to an adopted child or prospective adopted child of a United States citizen or lawfully resident alien unless (i) a valid home-study has been favorably recommended by an agency of the State of the child's proposed residence, or by an agency authorized by that State to conduct such a study, or, in the case of a child adopted abroad, by an appropriate public or private adoption agency which is licensed in the United States, and (ii) the child has been irrevocably released for immigration and adoption. No natural parent or prior adoptive parent of any such child shall thereafter, by virtue of such parentage, be accorded any right, privilege, or status under this Act. No immigrant visa shall otherwise be issued under this paragraph to an unmarried child under 16 years of age except a child who is accompanying or following to join his natural parent.

An immigrant visa shall not be issued to an immigrant under paragraph (1), (2), or (4) until the consular officer is in receipt of a determination made by the Secretary of Labor pursuant to the provisions of section 212(a)(14).

"(c) GUIDE FOR ALLOCATION BETWEEN PREFERENCE SYSTEMS.—Where it is determined that the maximum number of visas will be made available under section 202(a)(2) to natives of any single foreign state (defined in section 202(b)) or any dependent area (defined in section 202(c)) in any fiscal year, in determining whether to provide for visas to such natives under the preference system described in subsection (a) or that described in subsection (b), visa numbers with respect to natives of that state or dependent area shall be allocated (to the extent practicable and otherwise consistent with this section) in a manner so that the ratio of—

"(A) the number of family reunification immigrants described in subsection (a) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year, to

"(B) the number of independent immigrants described in subsection (b) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year,

is equal to 3 to 1.

"(d)(1) A spouse or child as defined in subparagraph (A), (B), (C), (D), or (E) of section 101(b)(1) and shall, if not otherwise entitled to an immigrant status and the immediate issuance of a visa under subsection (a) or (b), be entitled to the same status, and the same order of consideration provided in the respective subsection, if accompanying or following to join, his spouse or parent.

"(2) Waiting lists of applicants for visas under this section shall be maintained in accordance with regulations prescribed by the Secretary of State.".

(2) Subsection (e) of such section, as so redesignated, is amended—

(A) by inserting "or under subsection (b)" after "subsection (a)" the first place it appears, and

(B) by striking out "subsection (a)" the second place it appears and inserting in lieu thereof "the respective subsection".

(b)(1) Section 202 (8 U.S.C. 1152) is amended by striking out subsection (e).

(2) Section 204 (8 U.S.C. 1154) is amended by striking out subsection (f).

(3) Section 245(b) (8 U.S.C. 1255(b)) is amended by striking out "202(e) or".

(c)(1)(A) Subsection (f) of section 203 (8 U.S.C. 1153), as redesignated by subsection (a)(1), is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or pursuant to paragraphs (1) through (5) of subsection (b)".

(B) Subsection (g) of such section, as so redesignated, is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or paragraphs (1) through (4) of subsection (b)" each place it appears.

(2)(A) Subsection (a) of section 204 (8 U.S.C. 1154) is amended—

(i) by striking out " paragraph (1), (4), or (5) of section 203(a)" and inserting in lieu thereof "paragraph (3) or (4) of section 203(a)",

(ii) by striking out "section 203(a)(2)" and inserting in lieu thereof "paragraph (1), (2), or (5) of section 203(a)",

(iii) by striking out "section 203(a)(3)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(b)", and

(iii) by striking out "section 203(a)(6)" and inserting in lieu thereof "paragraph (2) or (4) of section 203(b)".

(B) Subsection (b) of such section is amended by striking out "section 203(a) (3) or (6)" and inserting in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

(d) Section 241(a)(9) (8 U.S.C. 1251(a)(9)) is amended—

(1) by inserting "(A)" after "(9)", and

(2) by adding at the end the following new subparagraph:

"(B) was admitted as (or otherwise acquired the status of) an independent immigrant described in paragraph (3) of section 203(b) and has failed without good cause to maintain such an investment for a period of at least one year after the date of such entry (or of acquiring such status) or after the date such substantial investment was made, whichever date is later;".

Page 49, line 14, strike out "(a)".

Page 50, line 11, strike out "paragraph (3) or (6)" and all that follows through "section 203(a)(7)" on line 13 and insert in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

Page 50, strike out line 21 and all that follows through page 51, line 2.

Page 59, after line 6, insert the following new section (and insert a corresponding item in the table of contents):

EFFECTIVE DATES AND TRANSITION

SEC. . (a) The Amendments made by sections 201, 202 (other than subsection (e)), and 203 shall take effect on October 1, 1983, When an immigrant, in possession of an unexpired immigrant visa issued before October 1, 1983, makes application for admission, his admissibility under section 212(a)(20) of the Immigration and Nationality Act shall be determined under the provisions of law in effect on the date of the issuance of such visa. The amendments made by the other provisions of this part shall take effect on the date of the enactment of this Act.

(b)(1) In the case of petition filed under section 204(a) of the Immigration and Nationality Act before October 1, 1983, such petition shall be deemed, as of such date, to be a petition for the new corresponding classification (as defined in paragraph (2)), and the priority date for such petition shall remain in effect.

(2) For purposes of paragraph (1), the term "new corresponding classification" means, in the case of a petition for a—

(A) preference status described in section 203(a)(1) of the Immigration and Nationality Act (as in effect on September 30, 1983), the status as an immediate relative described in section 201(b) of such Act;

(B) preference status described in section 203(a)(2) of such Act (as in effect on September 30, 1983), the preference status de-

scribed in paragraph (1) or (2) of section 203(a) of such Act as in effect after such date, as the case may be;

(C) preference status described in section 203(a)(3) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(b) of such Act as in effect after such date, as the case may be;

(D) preference status described in section 203(a)(4) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(3) of such Act as in effect after such date;

(E) preference status described in section 203(a)(5) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(4) of such Act as in effect after such date; and

(F) preference status described in section 203(a)(6) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (2) or (4) of section 203(b) of such Act (as in effect after such date), as the case may be.

(c) Aliens registered in the nonpreference classification described in section 203(a)(7) of the Immigration and Nationality Act (as in effect on September 30, 1983) shall be transferred, as of October 1, 1983, to the preference status described section 203(a)(5) or 203(b)(3) of such Act or the nonpreference classification described in section 203(b)(5) of such Act (as much sections are in effect after such date), as the case may be, and the priority date for such classification shall remain in effect.

AMENDMENT (34I)

Page 49, after line 12, insert the following new sections (and redesignate the succeeding sections of part A of title II, and the table of contents and cross-references thereto, accordingly):

NUMERICAL LIMITATIONS

SEC. 201. (a)(1) Subsection (a) of section 201 (8 U.S.C. 1151) is amended to read as follows:

"(a)(1) Exclusive of aliens described in paragraph (3), aliens born in a foreign state (other than a contiguous foreign state) or dependent area who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 320,000, plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year and the number of visas issud under that subparagraph during that year, plus (iii) for fiscal years before fiscal year 1989, 66,500, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a relationship described in paragraph (1), (2), (4), or (5) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 65,000, minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, plus (iii) for fiscal years before fiscal year 1989, 13,500, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a paragraph (3) of (6) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"(2) Exclusive of aliens described in paragraph (3), aliens born in a contiguous foreign state who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 83 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year for that foreign state and the number of visas issued under that subparagraph during that year, plus (iii) for fiscal year 1989, 8,300, but only available to aliens born in that contiguous state with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a relationship described in paragraph (1), (2), (4), or (5) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 17 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who were born in that contiguous foreign state and who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, plus (iii) for fiscal years before fiscal year 1989, 1,700 but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of paragraph (3) or (6) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three-quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"For purposes of this paragraph, the overall numerical limitation for a contiguous foreign state for a fiscal year is 40,000, plus the number by which 40,000 (or, for fiscal years 1989, 50,000) exceeds the number of aliens, who are not described in paragraph (3) and were born in the other contiguous foreign state, who were issued immigrant visas or otherwise acquired the status of an alien lawfully admitted for permanent residence in the previous fiscal year.

"(3) The aliens described in this paragraph, who are not subject to the numerical limitations described in paragraphs (1) and (2), are—

"(A) special immigrants defined in section 101(a)(27),

"(B) immigrants born to permanent resident aliens during a temporary visit abroad,

"(C) immediate relatives specified in subsection (b) of this section,

"(D) immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their acompanying parent who is such an immediate relative,

"(E) aliens who are admitted or granted asylum under section 207 or 208,

"(F) aliens provided records of permanent residence under section 214(d), and

"(G) aliens whose status is adjusted to permanent resident status under section 245(A.".

(2) Subsection (b) of such section is amended by striking out "children, spouses, and paarents" and all that follows through "years of age" and inserting in lieu thereof "children, unmarried sons, unmarried daughters, spouses, parents, and grandparents of a citizen of the United States.".

(3) Section 221 (8 U.S.C. 1201 is amended by adding at the end the following new subsection:

"(j) Notwithstanding any other provision of this Act, no alien shall be eligible to receive an immigrant visa (or to otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence) by virtue of a petition filed under section 204(a) to grant preference status to the alien by reason of the relationship described in section 203(a)(1), 203(a)(2), or 203(a)(5), filed by an individual who was admitted to the United States as an immigrant by virtue of an immediate relative petition filed by the grandson or granddaughter of the individual.".

(b) Section 202(a) (8 U.S.C. 1152(a)) is amended—

(1) by striking out "(a) No person" and inserting in lieu thereof "(a)(1) Except as specifically provided in paragraph (2) of this subsection and in section 101(a)(27), 201(b), 203, and 214(d), no person",

(2) by striking out ", except as specifically" and all that follows up to the period at the end, and

(3) by adding at the end the following new paragraph:

"(2) The total number of immigrant visas made available to natives of any single foreign state under subsections (a) (other than paragraph (1) thereof) and (b) of section 203 shall not exceed in any fiscal year—

"(A) 20,000, in the case of any foreign state other than either of the two foreign states contiguous to the United States, or

"(B) in the case of either of the foreign states contiguous to the United States, the numerical limitation for that foreign state for that fiscal year described in section 201(a)(2).".

PREFERENCE AND NONPREFERENCE ALLOCATION SYSTEMS

SEC. 202. (a)(1) Section 203 (8 U.S.C. 1153) is amended—

(A) by redesignating subsections (b) through (e) as subsections (e) through (h), respectively, and

(B) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) PREFERENCE ALLOCATION FOR FAMILY REUNIFICATION IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(A) for family reunification immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in section 201(a)(2)(A) for family

reunification immigrants shall be alloted visas as follows:

"(1) SPOUSES AND CHILDREN OF PERMANENT RESIDENT ALIENS.—Visas shall first be made available to qualified immigrants, in a number not to exceed 36 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (4), who are the spouses or children of aliens lawfully admitted for permanent residence.

"(2) UNMARRIED SONS AND DAUGHTERS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualifed immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (1), who are the spouses or the unmarried sons or unmarried daughters of aliens lawfully admitted for permanent residence.

"(3) MARRIED SONS AND DAUGHTERS OF CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) and (2), who are the married sons or married daughters of citizens of the United States.

"(4) BROTHERS AND SISTERS OF ADULT CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 34 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (3), who are the brothers or unmarried sisters of United States citizens who are at least 21 years of age.

"(5) PARENTS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent to such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (4), who are at least 60 years of age and who are the parents of aliens lawfully admitted for permanent residence.

In allocating visa numbers to aliens under this section, aliens born in noncontiguous foreign states and dependent areas shall be treated as one group and aliens born in each of the contiguous foreign states shall be treated as separate groups.

"(b) ALLOCATION FOR INDEPENDENT IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(B) for independents immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in or section 201 (a)(2)(B) for independent immigrants shall be allocated visas as follows:

"(1) ALIENS OF EXCEPTIONAL ABILITY.—Visas shall first be made available, in a number not to exceed such respective numerical limitation, to qualified immigrants who because of their exceptional ability in the sciences, arts, professions, or business will substantially benefit prospectively the national economy, cultural interests, or welfare of the United States and whose services in the sciences, arts, professions, or business are sought by an employer in the United States. In determining under this paragraph whether an immigrant has exceptional ability, the possession of a degree, diploma, certificate, or similar award from a college, university, school, or other institution of learning, or of a license to practice or certification for a particular profession or occupation shall not by itself be considered sufficient evidence of such exceptional ability.

"(2) SKILLED WORKERS.—Visas not required for classes specified in paragraph (1) shall next be made available to qualified immigrants who are capable of performing skilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(3) INVESTORS.—Visas not required for classes specified in paragraphs (1) and (2), but in a number not to exceed 10 percent of such respective numberical limitation, shall be made available—

"(A) first, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment in a high unemployment area (as defined by the Attorney General, after consultation with the Secretary of Labor, and as determined at the time of the filing of a petition for classification under this paragraph) for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant, and

"(B) then, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant.

"(4) UNSKILLED WORKERS.—Visas not required for classes specified in paragraphs (1) through (3) shall next be made available to qualified immigrants who are capable of performing unskilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(5) NONPREFERENCE IMMIGRANTS.—(A) Visas not required for the classes specified in paragraphs (1) through (4), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available to other qualified immigrants who are not entering the country to perform skilled or unskilled labor in the chronological order in which they qualify.

"(B) No immigrant visa shall be issued under this paragraph to an adopted child or prospective adopted child of a United States citizen or lawfully resident alien unless (i) a valid home-study has been favorably recommended by an agency of the State of the child's proposed residence, or by an agency authorized by that State to conduct such a study, or, in the case of a child adopted abroad, by an appropriate public or private adoption agency which is licensed in the United States, and (ii) the child has been irrevocably released for immigration and adoption. No natural parent or prior adoptive parent of any such child shall thereafter, by virtue of such parentage, be accorded any right, privilege, or status under this Act. No immigrant visa shall otherwise be issued under this paragraph to an unmarried child under 16 years of age except a child who is accompanying or following to join his natural parent.

An immigrant visa shall not be issued to an immigrant under paragraph (1), (2), or (4) until the consular officer is in receipt of a determination made by the Secretary of Labor pursuant to the provisions of section 212(a)(14).

"(c) GUIDE FOR ALLOCATION BETWEEN PREFERENCE SYSTEMS.—Where it is determined that the maximum number of visas will be made available under section 202(a)(2) to natives of any single foreign state (defined in section 202(b)) or any dependent area (defined in section 202(c) in any fiscal year, in determining whether to provide for visas to such natives under the preference system described in subsection (a) or that described in subsection (b), visa numbers with respect to natives of that state or dependent area shall be allocated (to the extent practicable and otherwise consistent with this section) in a manner so that the ratio of—

"(A) the number of family reunification immigrants described in subsection (a) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year, to

"(B) the number of independent immigrants described in subsection (b) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year,

is equal to 3 to 1.

"(d)(1) A spouse or child as defined in subparagraph (A), (B), (C), (D), or (E) of section 101(b)(1) and shall, if not otherwise entitled to an immigrant status and the immediate issuance of a visa under subsection (a) or (b), be entitled to the same status, and the same order of consideration provided in the respective subsection, if accompanying or following to join, his spouse or parent.

"(2) Waiting lists of applicants for visas under this section shall be maintained in accordance with regulations prescribed by the Secretary of State.".

(2) Subsection (e) of such section, as so redesignated, is amended—

(A) by inserting "or under subsection (b)" after "subsection (a)" the first place it appears, and

(B) by striking out "subsection (a)" the second place it appears and inserting in lieu thereof "the respective subsection".

(b)(1) Section 202 (8 U.S.C. 1152) is amended by striking out subsection (e).

Section 204 (8 U.S.C. 1154) is amended by striking out subsection (f).

(3) Section 245(b) (8 U.S.C. 1255(b)) is amended by striking out "202(e) or".

(c)(1)(A) Subsection (f) of section 203 (8 U.S.C. 1153), as redesignated by subsection (a)(1), is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or pursuant to paragraphs (1) through (5) of subsection (b)".

(B) Subsection (g) of such section, as so redesignated, is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or paragraphs (1) through (4) of subsection (b)" each place it appears.

(2)(A) Subsection (a) of section 204 (8 U.S.C. 1154) is amended—

(i) by striking out "paragraph (1), (4), or (5) of section 203(a)" and inserting in lieu thereof "paragraph (3) or (4) of section 203(a)",

(ii) by striking out "section 203(a)(2)" and inserting in lieu thereof "paragraph (1), (2), or (5) of section 203(a)",

(iii) by striking out "section 203(a)(3)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(b)", and

(iv) by striking out "section 203(a)(6)" and inserting in lieu thereof "paragraph (2) or (4) of section 203(b)".

(B) Subsection (b) of such section is amended by striking out "section 203(a) (3) or (6)" and inserting in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

(d) Section 241(a)(9) (8 U.S.C. 1251(a)(9)) is amended—

(1) by inserting "(A)" after "(9)", and

(2) by adding at the end the following new subparagraph:

"(B) was admitted as (or otherwise acquired the status of) an independent immigrant described in paragraph (3) of section 203(b) and has failed without good cause to maintain such an investment for a period of at least one year after the date of such entry (or of acquiring such status) or after the date such substantial investment was made, whichever date is later;".

Page 49, line 14, strike out "(a)".

Page 50, line 11, strike out "paragraph (3) or (6)" and all that follows through "section 203(a)(7)" on line 13 and insert in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

Page 50, strike out line 21 and all that follows through page 51, line 2.

Page 59, after line 6, insert the following new section (and insert a corresponding item in the table of contents):

EFFECTIVE DATES AND TRANSITION

SEC. . (a) The amendments made by sections 201, 202 (other than subsection (e)), and 203 shall take effect on October 1, 1983. When an immigrant, in possession of an unexpired immigrant visa issued before October 1, 1983, makes application for admission, his admissibility under section 212(a)(20) of the Immigration and Nationality Act shall be determined under the provisions of law in effect on the date of the issuance of such visa. The amendments made by the other provisions of this part shall take effect on the date of the enactment of this Act.

(b)(1) In the case of a petition filed under section 204(a) of the Immigration and Nationality Act before October 1, 1983, such petition shall be deemed, as of such date, to be a petition for the new corresponding classification (as defined in paragraph (2)), and the priority date for such petition shall remain in effect.

(2) For purposes of paragraph (1), the term "new corresponding classification" means, in the case of a petition for a—

(A) preference status described in section 203(a)(1) of the Immigration and Nationality Act (as in effect on September 30, 1983), the status as an immediate relative described in section 201(b) of such Act;

(B) preference status described in section 203(a)(2) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(a) of such Act as in effect after such date, as the case may be;

(C) preference status described in section 203(a)(3) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(b) of such Act as in effect after such date, as the case may be;

(D) preference status described in section 203(a)(4) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(3) of such Act as in effect after such date;

(E) preference status described in section 203(a)(5) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(4) of such Act as in effect after such date; and

(F) preference status described in section 203(a)(6) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (2) or (4) of section 203(b) of such Act (as in effect after such date), as the case may be.

(c) Aliens registered in the nonpreference classification described in section 203(a)(7) of the Immigration and Nationality Act (as in effect on September 30, 1983) shall be transferred, as of October 1, 1983, to the preference status described in section 203(a)(5) or 203(b)(3) of such Act or the nonpreference classification described in section 203(b)(5) of such Act (as such sections are in effect after such date), as the case may be, and the priority date for such classification shall remain in effect.

AMENDMENT (34J)

Page 49, after line 12, insert the following new sections (and redesignate the succeeding sections of part A of title II, and the table of contents and cross-references thereof, accordingly):

NUMERICAL LIMITATIONS

SEC. 201. (a)(1) Subsection (a) of section 201 (8 U.S.C. 1151) is amended to read as follows:

"(a)(1) Exclusive of aliens described in paragraph (3), aliens both in a foreign state (other than a contiguous foreign state) or dependent area who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 320,000, plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year and the number of visas issued under that subparagraph during that year, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 65,000, minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A) who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"(2) Exclusive of aliens described in paragraph (3), aliens born in a contiguous foreign state who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 83 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year for that foreign state and the number of visas issued under that subparagraph during that year, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 17 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who were born in that contiguous foreign state and who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States or permanent residence, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"For purposes of this paragraph, the overall numerical limitation for a contiguous foreign state for a fiscal year is 40,000, plus the number by which 40,000 exceeds the number of aliens, who are not described in paragraph (3) and were born in the other contiguous foreign state, who were issued visas or otherwise acquired the status of an alien lawfully admitted for permanent residence in the previous fiscal year.

"(3) The aliens described in this paragraph, who are not subject to the numerical limitations described in paragraphs (1) and (2), are—

"(A) special immigrants defined in section 101(a)(27),

"(B) immigrants born to permanent resident aliens during a temporary visit abroad,

"(C) immediate relatives specified in subsection (b) of this section,

"(D) immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent who is such an immediate relative,

"(E) aliens who are admitted or granted asylum under section 207 or 208.

"(F) aliens provided records of permanent residence under section 214(d), and

"(G) aliens whose status is adjusted to permanent resident status under section 245A.".

(2) Subsection (b) of such section is amended by striking out "children, spouses, and parents" and all that follows through "years of age and inserting in lieu thereof "children, unmarried sons, unmarried daughters, spouses, parents, and grandparents of a citizen of the United States".

(3) Section 221 (8 U.S.C. 1201) is amended by adding at the end the following new subsection:

"(j) Notwithstanding any other provision of this Act, no alien shall be eligible to receive an immigrant visa (or to otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence) by virtue of a petition filed under section 204(a) to grant preference status to the alien by reason of the relationship described in section 203(a)(1), 203(a)(2), or 203(a)(5), filed by an individual who was admitted to the United States as an immigrant by virtue of an immediate relative petition filed by the grandson or granddaughter of the individual.".

(b) Section 202(a) (8 U.S.C. 1152(a)) is amended—

(1) by striking out "(a) No person" and inserting in lieu thereof "(a)(1) Except as specifically provided in paragraph (2) of this subsection and in section 101(a)(27), 201(b), 203, and 214(d), no person",

(2) by striking out ", except as specifically" and all that follows up to the period at the end, and

(3) by adding at the end the following new paragraph:

"(2) The total number of immigrant visas made available to natives of any single foreign state under subsections (a) (other than paragraph (1) thereof) and (b) of section 203 shall not exceed in any fiscal year—

"(A) 20,000, in the case of any foreign state other than either of the two foreign states contiguous to the United States, or

"(B) in the case of either of the foreign states contiguous to the United States, the numerical limitation for that foreign state for that fiscal year described in section 201(a)(2).".

PREFERENCE AND NONPREFERENCE ALLOCATION SYSTEMS

SEC. 202. (a)(1) Section 203 (8 U.S.C. 1153) is amended—

(A) by redesignating subsections (b) through (e) as subsections (e) through (h), respectively, and

(B) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) PREFERENCE ALLOCATION FOR FAMILY REUNIFICATION IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(A) for family reunification immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in section 201(a)(2)(A) for family reunification immigrants shall be allotted visas as follows:

"(1) SPOUSES AND CHILDREN OF PERMANENT RESIDENT ALIENS.—Visas shall first be made available to qualified immigrants, in a number not to exceed 36 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (4), who are the spouses or children of aliens lawfully admitted for permanent residence.

"(2) UNMARRIED SONS AND DAUGHTERS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (1), who are the spouses or the unmarried sons or unmarried daughters of aliens lawfully admitted for permanent residence.

"(3) MARRIED SONS AND DAUGHTERS OF CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceeed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraph (1) and (2), who are the married sons or married daughters of citizens of the United States.

(4) BROTHERS AND SISTERS OF ADULT CITIZENS.—Visas shall not be made available to qualified immigrants, in a number not to exceed 34 percent of such respective numerical limitation plus any visas not required for the class specified in paragraphs (1) through (3), who are the brothers or unmarried sisters of United States citizens who are at least 21 years of age.

"(5) PARENTS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (4), who are the last 60 years of age and who are the parents of aliens lawfully admitted for permanent residence.

In allocating visa numbers to aliens under this section, aliens born in noncontiguous foreign states and dependent areas shall be treated as one group and aliens born in each of the contiguous foreign states shall be treated as separate groups.

"(b) ALLOCATION FOR INDEPENDENT IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(B) for independents immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in or section 201(a)(1)(2)(B) for independent immigrants shall be allocated visas as follows:

"(1) ALIENS OF EXCEPTIONAL ABILITY.—Visas shall first be made available, in a number not to exceed such respective numerical limitation, to qualified immigrants who because of their exceptional ability in the sciences, arts, professions, or business will substantially benefit prospectively the national economy, cultural interests, or welfare of the United States and whose services in the sciences, arts, professions, or business are sought by an employer in the United States. In determining under this paragraph whether an immigrant has exceptional ability, the possession of a degree, diploma, certificate, or similar award from a college, university, school, or other institution of learning, or of a license to practice or certification for a particular profession or occupation shall not by itself be considered sufficient evidence of such exceptional ability.

"(2) SKILLED WORKERS.—Visas not required for classes specified in paragraph (1) shall next be made available to qualified immigrants who are capable of performing skilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(3) INVESTORS.—Visas not required for classes specified in paragraphs (1) and (2), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available—

"(A) first, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment in a high unemployment area (as defined by the Attorney General, after consultation with the Secretary of Labor, and as determined at the time of the filing of a petition for classification under this paragraph) for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant, and

"(B) then, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant.

"(4) UNSKILLED WORKERS.—Visas not required for classes specified in paragraphs (1) through (3) shall next be made available to qualified immigrants who are capable of performing unskilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(5) NONPREFERENCE IMMIGRANTS.—(A) Visas not required for the classes specified in paragraphs (1) through (4), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available to other qualified immigrants who are not entering the country to perform skilled or unskilled labor in the chronological order in which they qualify.

"(B) No immigrant visas shall be issued under this paragraph to an adopted child or prospective adopted child of a United States citizen or lawfully resident alien unless (i) a valid home-study has been favorably recommended by an agency of the State of the child's proposed residence, or by an agency authorized by that State to conduct such a study, or, in the case of a child adopted abroad, by an appropriate public or private adoption agency which is licensed in the United States, and (ii) the child has been irrevocably released for immigration and adoption. No natural parent or prior adoptive parent of any such child shall thereafter, by virtue of such parentage, be accorded any right, privilege, or status under this Act. No immigrant visa shall otherwise be issued under this paragraph to an unmarried child under 16 years of age except a child who is accompanying or following to join his natural parent.

An immigrant visa shall not be issued to an immigrant under paragraph (1), (2), or (4) until the consular officer is in receipt of a determination made by the Secretary of Labor pursuant to the provisions of section 212(a)(14).

"(c) GUIDE FOR ALLOCATION BETWEEN PREFERENCE SYSTEM.—Where it is determined that the maximum number of visas will be made available under section 202(a)(2) to natives of any single foreign state (defined in section 202(b)) or any dependent area (defined in section 202(c)) in any fiscal year, in determining whether to provide for visas to such natives under the preference system described in subsection (a) or that described in subsection (b), visa numbers with respect to natives of that state or dependent area shall be allocated (to the extent practicable and otherwise consistent with this section) in a manner so that the ratio of—

"(A) the number of family reunification immigrants described in subsection (a) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year, to

"(B) the number of independent immigrants described in subsection (b) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year,

is equal to 3 to 1.

"(d)(1) A spouse or child as defined in subparagraph (A), (B), (C), (D), or (E) of section 101(b)(1) and shall, if not otherwise entitled to an immigrant status and the immediate issuance of a visa under subsection (a) or (b), be entitled to the same status, and the same order of consideration provided in the respective subsection, if accompanying or following to join, his spouse or parent.

"(2) Waiting lists of applicants for visas under this section shall be maintained in accordance with regulations prescribed by the Secretary of State.".

(2) Subsection (e) of such section, as so redesignated, is amended—

(A) by inserting "or under subsection (b)" after "subsection (a)" the first place it appears, and

(B) by striking out "subsection (a)" the second place it appears and inserting in lieu thereof "the respective subsection".

(b)(1) Section 202 (8 U.S.C. 1152) is amended by striking out subsection (e).

(2) Section 204 (8 U.S.C. 1154) is amended by striking out subsection (f).

(3) Section 245(b) (8 U.S.C. 1255(b)) is amended by striking out "202(e) or".

(c)(1)(A) Subsection (f) of section 203 (8 U.S.C. 1153), as redesignated by subsection (a)(1), is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or pursuant to paragraphs (1) through (5) of subsection (b)".

(B) Subsection (g) of such section, as so redesignated, is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or paragraphs (1) through (4) of subsection (b)" each place it appears.

(2)(A) Subsection (a) of section 204 (8 U.S.C. 1154) is amended—

(i) by striking out "paragraph (1), (4), or (5) of section 203(a)" and inserting in lieu thereof "paragraph (3) or (4) of section 203(a)",

(ii) by striking out "section 203(a)(2)" and inserting in lieu thereof "paragraph (1) or (2) or (5) of section 203(a)",

(iii) by striking out "section 203(a)(3)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(b)", and

(iv) by striking out "section 203(a)(6)" and inserting in lieu thereof "paragraph (2) or (4) of section 203(b)".

(B) Subsection (b) of such section is amended by striking out "section 203(a) (3) or (6) " and inserting in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

(d) Section 241(a)(9) (8 U.S.C. 1251(a)(9)) is amended—

(1) by inserting "(A)" after "(9)", and

(2) by adding at the end the following new subparagraph:

"(B) was admitted as (or otherwise acquired the status of) an independent immigrant described in paragraph (3) of section 203(b) and has failed without good cause to maintain such an investment for a period of at least one year after the date of such entry (or of acquiring such status) or after the date such substantial investment was made, whichever date is later;".

Page 49, line 14, strike out "(a)".

Page 50, line 11, strike out "paragraph (3) or (6)" and all that follows through "section 203(a)(7)" on line 13 and insert in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

Page 50, strike out line 21 and all that follows through page 51, line 2.

Page 59, after line 6, insert the following new section (and insert a corresponding item in the table of contents):

EFFECTIVE DATES AND TRANSITION

SEC. . (a) The amendments made by sections 201, 202 (other than subsection (e)), and 203 shall take effect on October 1, 1983. When an immigrant, in possession of an unexpired immigrant visa issued before October 1, 1983, makes application for admission, his admissibility under section 212(a)(20) of the Immigration and Nationality Act shall be determined under the provisions of law in effect on the date of the issuance of such visa. The amendments made by the other provisions of this part shall take effect on the date of the enactment of this Act.

(b)(1) In the case of a petition filed under section 204(a) of the Immigration and Nationality Act before October 1, 1983, such petition shall be deemed, as of such date, to be a petition for the new corresponding classification (as defined in paragraph (2)), and the priority date for such petition shall remain in effect.

(2) For purposes of paragraph (1), the term "new corresponding classification" means, in the case of a petition for a—

(A) preference status described in section 203(a)(1) of the Immigration and Nationality Act (as in effect on September 30, 1983), the status as an immediate relative described in section 201(b) of such Act;

(B) preference status described in section 203(a)(2) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(a) of such Act as in effect after such date, as the case may be;

(C) preference status described in section 203(a)(3) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(b) of such Act as in effect after such date, as the case may be;

(D) preference status described in section 203(a)(4) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(3) of such Act as in effect after such date;

(E) preference status described in section 203(a)(5) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(4) of such Act as in effect after such date; and

(F) preference status described in section 203(a)(6) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (2) or (4) of section 203(b) of such Act (as in effect after such date), as the case may be.

(c) Aliens registered in the nonpreference classification described in section 203(a)(7) of the Immigration and Nationality Act (as in effect on September 30, 1983) shall be transferred, as of October 1, 1983, to the preference status described in section 203(a)(5) or 203(b)(3) of such Act or the nonpreference classification described in section 203(b)(5) of such Act (as such sections are in effect after such date), as the case may be, and the priority date for such classification shall remain in effect.

AMENDMENT (34K)

Page 49, after line 12, insert the following new sections (and redesignate the succeeding sections of part A of title II, and the table of contents and cross-references thereto, accordingly):

NUMERICAL LIMITATIONS

SEC. 201. (a)(1) Subsection (a) of section 201 (8 U.S.C. 1151) is amended to read as follows:

"(a)(1) Exclusive of aliens discribed in paragraph (3), aliens born in a foreign state (other than a contiguous foreign state) or dependent area who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 320,000, plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year and the number of visas issued under that subparagraph during that year, plus (iii) for fiscal years before fiscal year 1989, 66,500, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a relationship described in paragraph (1), (2), (4), or (5) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 65,000, minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, plus (iii) for fiscal years before fiscal year 1989, 13,500, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a paragraph (3) or (6) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"(2) Exclusive of aliens described in paragraph (3), aliens born in a contiguous foreign state who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 83 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year for that foreign state and the number of visas issued under that subparagraph during that year, plus (iii) for fiscal years before fiscal year 1989, 8,300, but only available to aliens born in that contiguous state with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a relationship described in paragraph (1), (2), (4), or (5) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 17 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who were born in that contiguous foreign state and who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, plus (iii) for fiscal years before fiscal year 1989, 1,700, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of paragraph (3) or (6) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"For purposes of this paragraph, the overall numerical limitation for a contiguous foreign state for a fiscal year is 40,000, plus

the number by which 40,000 (or, for fiscal years before fiscal year 1989, 50,000) exceeds the number of aliens, who are not described in paragraph (3) and were born in the other contiguous foreign state, who were issued immigrant visas or otherwise acquired the status of an alien lawfully admitted for permanent residence in the previous fiscal year.

"(3) The aliens described in this paragraph, who are not subject to the numerical limitations described in paragraphs (1) and (2), are—

"(A) special immigrants defined in section 101(a)(27),

"(B) immigrants born to permanent resident aliens during a temporary visit abroad,

"(C) immediate relatives specified in subsection (b) of this section,

"(D) immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent who is such an immediate relative,

"(E) aliens who are admitted or granted asylum under section 207 or 208,

"(F) aliens provided records of permanent residence under section 214(d), and

"(G) aliens whose status is adjusted to permanent resident status under section 245A.".

(2) Subsection (b) of such section is amended by striking out "children, spouses, and parents" and all that follows through "years of age and inserting in lieu thereof "children, unmarried sons, unmarried daughters, spouses, parents, and grandparents of a citizen of the United States".

(3) Section 221 (8 U.S.C. 1201) is amended by adding at the end the following new subsection:

"(j) Notwithstanding any other provision of this Act, no alien shall be eligible to receive an immigrant visa (or to otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence) by virtue of a petition filed under section 204(a) to grant preference status to the alien by reason of the relationship described in section 203(a)(1), 203(a)(2), or 203(a)(5), filed by an individual who was admitted to the United States as an immigrant by virtue of an immediate relative petition filed by the grandson or granddaughter of the individual.".

(b) Section 202(a) (8 U.S.C. 1152(a)) is amended—

(1) by striking out "(a) No person" and inserting in lieu thereof "(a)(1) Except as specifically provided in paragraph (2) of this subsection and in section 101(a)(27), 201(b), 203, and 214(d), no person",

(2) by striking out ", except as specifically" and all that follows up to the period at the end, and

(3) by adding at the end the following new paragraph:

"(2) The total number of immigrant visas made available to natives of any single foreign state under subsections (a) and (b) of section 203 shall not exceed in any fiscal year—

"(A) 20,000, in the case of any foreign state other than either of the two foreign states contiguous to the United States, or

"(B) in the case of either of the foreign states contiguous to the United States, the numerical limitation for that foreign state for that fiscal year described in section 201(a)(2).".

PREFERENCE AND NONPREFERENCE ALLOCATION SYSTEMS

SEC. 202. (a)(1) Section 203 (8 U.S.C. 1153) is amended—

(A) by redesignating subsections (b) through (e) as subsections (e) through (h), respectively, and

(B) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) PREFERENCE ALLOCATION FOR FAMILY REUNIFICATION IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(A) for family reunification immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in section 201(a)(2)(A) for family reunification immigrants shall be allotted visas as follows:

"(1) SPOUSES AND CHILDREN OF PERMANENT RESIDENT ALIENS.—Visas shall first be made available to qualified immigrants, in a number not to exceed 36 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (4), who are the spouses or children of aliens lawfully admitted for permanent residence.

"(2) UNMARRIED SONS AND DAUGHTERS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (1), who are the spouses or the unmarried sons or unmarried daughters of aliens lawfully admitted for permanent residence.

"(3) MARRIED SONS AND DAUGHTERS OF CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) and (2), who are the married sons or married daughters of citizens of the United States.

"(4) BROTHERS AND SISTERS OF ADULT CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 34 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (3), who are the brothers or unmarried sisters of United States citizens who are at least 21 years of age.

"(5) PARENTS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (4), who are at least 60 years of age and who are the parents of aliens lawfully admitted for permanent residence.

In allocating visa numbers to aliens under this section, aliens born in noncontiguous foreign states and dependent areas shall be treated as one group and aliens born in each of the contiguous foreign states shall be treated as separate groups.

"(b) ALLOCATION FOR INDEPENDENT IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(B) for independents immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in or section 201(a)(2)(B) for independent immigrants shall be allocated visas as follows:

"(1) ALIENS OF EXCEPTIONAL ABILITY.—Visas shall first be made available, in a number not to exceed such respective numerical limitation, to qualified immigrants who because of their exceptional ability in the sciences, arts, professions, or business will substantially benefit prospectively the national economy, cultural interests, or welfare of the United States and whose services in the sciences, arts, professions, or business are sought by an employer in the United States. In determining under this paragraph whether an immigrant has exceptional ability, the possession of a degree, diploma, certificate, or similar award from a college, university, school, or other institution of learning, or of a license to practice or certification for a particular profession or occupation shall not by itself be considered sufficient evidence of such exceptional ability.

"(2) SKILLED WORKERS.—Visas not required for classes specified in paragraph (1) shall next be made available to qualified immigrants who are capable of performing skilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(3) INVESTORS.—Visas not required for classes specified in paragraphs (1) and (2), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available—

"(A) first, to qualified immigrants who have invested, or are actively in the processs of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment in a high unemployment area (as defined by the Attorney General, after consultation with the Secretary of Labor, and as determined at the time of the filing of a petition for classification under this paragraph) for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant, and

"(B) then, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant.

"(4) UNSKILLED WORKERS.—Visas not required for classes specified in paragraphs (1) through (3) shall next be made available to qualified immigrants who are capable of performing unskilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(5) NONPREFERENCE IMMIGRANTS.—(A) Visas not required for the classes specified in paragraphs (1) through (4), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available to other qualified immigrants who are not entering the country to perform skilled or unskilled labor in the chronological order in which they qualify.

"(B) No immigrant visa shall be issued under this paragraph to an adopted child or prospective adopted child of a United States citizen or lawfully resident alien unless (i) a valid home-study has been favorably recommended by an agency of the State of the child's proposed residence or by an agency authorized by that State to conduct such a study, or, in the case of a child adopted abroad, by an appropriate public or private adoption agency which is licensed in the United States, and (ii) the child has been irrevocably released for immigration and adoption. No natural parent or prior adoptive parent of any such child shall thereafter, by virtue of such parentage, be accorded any right, privilege or status under this Act.

No immigrant visa shall otherwise be issued under this paragraph to an unmarried child under 16 years of age except a child who is accompanying or following to join his natural parent.

An immigrant visa shall not be issued to an immigrant under paragraph (1), (2) or (4) until the consular officer is in receipt of a determination made by the Secretary of Labor pursuant to the provisions of section 212(a)(14).

"(c) GUIDE FOR ALLOCATION BETWEEN PREFERENCE SYSTEMS.—Where it is determined that the maximum number of visas will be made available under section 202(a)(2) to natives of any single foreign state (defined in section 202(b)) or any dependent area (defined in section 202(c)) in any fiscal year, in determining whether to provide for visas to such natives under the preference system described in subsection (a) or that described in subsection (b) visa numbers with respect to natives of that state or dependent area shall be allocated (to the extent practicable and otherwise consistent with this section) in a manner so that the ratio of—

"(A) the number of family reunification immigrants described in subsection (a) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year, to

"(B) the number of independent immigrants described in subsection (b) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year,

is equal to 3 to 1.

"(d)(1) A spouse or child as defined in subparagraph (A), (B), (C), (D) or (E) of section 101(b)(1) and shall, if not otherwise entitled to an immigrant status and the immediate issuance of a visa under subsection (a) or (b), be entitled to the same status, and the same order of consideration provided in the respective subsection, if accompanying or following to join, his spouse or parent.

"(2) Waiting lists of applicants for visas under this section shall be maintained in accordance with regulations prescribed by the Secretary of State.".

(2) Subsection (e) of such section, as so redesignated, is amended—

(A) by inserting "or under subsection (b)" after "subsection (a)" the first place it appears, and

(B) by striking out "subsection (a)" the second place it appears and inserting in lieu thereof "the respective subsection".

(b)(1) Section 202 (8 U.S.C. 1152) is amended by striking out subsection (e).

(2) Section 204 (8 U.S.C. 1154) is amended by striking out subsection (f).

(3) Section 245(b) (8 U.S.C. 1255(b)) is amended by striking out "202(e) or".

(c)(1)(A) Subsection (f) of section 203 (8 U.S.C. 1153), as redesignated by subsection (a)(1), is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or pursuant to paragraphs (1) through (5) of subsection (b)".

(B) Subsection (g) of such section, as so redesignated, is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or paragraphs (1) through (4) of subsection (b)" each place it appears.

(2)(A) Subsection (a) of section 204 (8 U.S.C. 1154) is amended—

(i) by striking out "paragraph (1), (4), or (5) of section 203(a)" and inserting in lieu thereof "paragraph (3) or (4) of section 203(a)",

(ii) by striking out "section 203(a)(2)" and inserting in lieu thereof "paragraph (1), (2), or (5) of section 203(a)",

(iii) by striking out "section 203(a)(3)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(b)", and

(iv) by striking out "section 203(a)(6)" and inserting in lieu thereof "paragraph (2) or (4) of section 203(b)".

(B) Subsection (b) of such section is amended by striking out "section 203(a) (3) or (6)" and inserting in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

(d) Section 241(a)(9) (8 U.S.C. 1251(a)(9)) is amended—

(1) by inserting "(A)" after "(9)", and

(2) by adding at the end the following new subparagraph:

"(B) was admitted as (or otherwise acquired the status of) an independent immigrant described in paragraph (3) of section 203(b) and has failed without good cause to maintain such an investment for a period of at least one year after the date of such entry (or of acquiring such status) or after the date such substantial investment was made, whichever date is later;".

Page 49, line 14, strike out "(a)".

Page 50, line 11, strike out "paragraph (3) or (6)" and all that follows through "section 203(a)(7)" on line 13 and insert in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

Page 50, strike out line 21 and all that follows through page 51, line 2.

Page 59, after line 6, insert the following new section (and insert a corresponding item in the table of contents):

EFFECTIVE DATES AND TRANSITION

SEC. . (a) The amendments made by sections 201, 202 (other than subsection (e)), and 203 shall take effect on October 1, 1983. When an immigrant, in possession of an unexpired immigrant visa issued before October 1, 1983, makes application for admission, his admissibility under section 212(a)(20) of the Immigration and Nationality Act shall be determined under the provisions of law in effect on the date of the issuance of such visa. The amendments made by the other provisions of this part shall take effect on the date of the enactment of this Act.

(b)(1) In the case of a petition filed under section 204(a) of the Immigration and Nationality Act before October 1, 1983, such petition shall be deemed, as of such date, to be a petition for the new corresponding classification (as defined in paragraph (2)), and the priority date for such petition shall remain in effect.

(2) For purposes of paragraph (1), the term "new corresponding classification" means, in the case of a petition for a—

(A) preference status described in section 203(a)(1) of the Immigration and Nationality Act (as in effect on September 30, 1983), the status as an immediate relative described in section 201(b) of such Act;

(B) preference status described in section 203(a)(2) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(a) of such Act as in effect after such date, as the case may be;

(C) preference status described in section 203(a)(3) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(b) of such Act as in effect after such date, as the case may be;

(D) preference status described in section 203(a)(4) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(3) of such Act as in effect after such date;

(E) preference status described in section 203(a)(5) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(4) of such Act as in effect after such date; and

(F) preference status described in section 203(a)(6) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (2) or (4) of section 203(b) of such Act (as in effect after such date), as the case may be.

(c) Aliens registered in the nonpreference classification described in section 203(a)(7) of the Immigration and Nationality Act (as in effect on September 30, 1983) shall be transferred, as of October 1, 1983, to the preference status described in section 203(a)(5) or 203(b)(3) of such Act or the nonpreference classification described in section 203(b)(5) of such Act (as such sections are in effect after such date), as the case may be, and the priority date for such classification shall remain in effect.

AMENDMENT (34L)

Page 49, after line 12, insert the following new sections (and redesignate the succeeding sections of part A of title II, and the table of contents and cross-references thereto, accordingly):

NUMERICAL LIMITATIONS

SEC. 201. (a)(1) Subsection (a) of section 201 (8 U.S.C. 1151) is amended to read as follows:

"(a)(1) Exclusive of aliens described in paragraph (3), aliens born in a foreign state (other than a contiguous foreign state) or dependent area who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 320,000, plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year and the number of visas issued under the subparagraph during that year, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 65,000, minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"(2) Exclusive of aliens described in paragraph (3), aliens born in a contiguous foreign state who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 83 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the new sentence), plus (ii) the difference (if any)

between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year for that foreign state and the number of visas issued under that subparagraph during that year, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 17 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who were born in that contiguous foreign state and who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"For purposes of this paragraph, the overall numerical limitation for a contiguous foreign state for a fiscal year is 40,000, plus the number by which 40,000 exceeds the number of aliens, who are not described in paragraph (3) and were born in the other contiguous foreign state, who were issued immigrant visas or otherwise acquired the status of an alien lawfully admitted for permanent residence in the previous fiscal year.

"(3) The aliens described in this paragraph, who are not subject to the numerical limitations described in paragraphs (1) and (2), are—

"(A) special immigrants defined in section 101(a)(27),

"(B) immigrants born to permanent resident aliens during a temporary visit abroad,

"(C) immediate relatives specified in subsection (b) of this section,

"(D) immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent who is such an immediate relative,

"(E) aliens who are admitted or granted asylum under section 207 or 208,

"(F) aliens provided records of permanent residence under section 214(d), and

"(G) aliens whose status is adjusted to permanent resident status under section 245A.".

(2) Subsection (b) of such section is amended by striking out "children, spouses, and parents" and all that follows through "years of age" and inserting in lieu thereof "children, unmarried sons, unmarried daughters, spouses, parents, and grandparents of a citizen of the United States".

(3) Section 221 (8 U.S.C. 1201) is amended by adding at the end the following new subsection:

"(j) Notwithstanding any other provision of this Act, no alien shall be eligible to receive an immigrant visa (or to otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence) by virtue of a petition filed under section 204(a) to grant preference status to the alien by reason of the relationship described in section 203(a)(1), 203(a)(2), or 203(a)(5), filed by an individual who was admitted to the United States as an immigrant by virtue of an immediate relative petition filed by the grandson or granddaughter of the individual.".

(b) Section 202(a) (8 U.S.C. 1152(a)) is amended—

(1) by striking out "(a) No person" and inserting in lieu thereof "(a)(1) Except as specifically provided in paragraph (2) of this subsection and in section 101(a)(27), 201(b), 203, and 214(d), no person",

(2) by striking out ", except as specifically" and all that follows up to the period at the end, and

(3) by adding at the end the following new paragraph:

"(2) The total number of immigrant visas made available to natives of any single foreign state under subsections (a) and (b) of section 203 shall not exceed in any fiscal year—

"(A) 20,000, in the case of any foreign state other than either of the two foreign states contiguous to the United States, or

"(B) in the case of either of the foreign states contiguous to the United States, the numerical limitation for that foreign state for that fiscal year described in section 201(a)(2).".

PREFERENCE AND NONPREFERENCE ALLOCATION SYSTEMS

SEC. 202. (a)(1) Section 203 (8 U.S.C. 1153) is amended—

(A) by redesignating subsections (b) through (e) as subsections (e) through (h), respectively, and

(B) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) PREFERENCE ALLOCATION FOR FAMILY REUNIFICATION IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(A) for family reunification immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in section 201(a)(2)(A) for family reunification immigrants shall be allotted visas as follows:

"(1) SPOUSES AND CHILDREN OF PERMANENT RESIDENT ALIENS.—Visas shall first be made available to qualified immigrants, in a number not to exceed 36 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (4), who are the spouses or children of aliens lawfully admitted for permanent residence.

"(2) UNMARRIED SONS AND DAUGHTERS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (1), who are the spouses or the unmarried sons or unmarried daughters of aliens lawfully admitted for permanent residence.

"(3) MARRIED SONS AND DAUGHTERS OF CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective number limitation plus any visas not required for the classes specified in paragraphs (1) and (2), who are the married sons of married daughters of citizens of the United States.

"(4) BROTHER AND SISTERS OF ADULT CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 34 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (3), who are the brothers or unmarried sisters of United States citizens who are at least 21 years of age.

"(5) PARENTS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraph (1) through (4), who are least 60 years of age and who are the parents of aliens lawfully admitted for permanent residence.

In allocating visa numbers to aliens under the section, aliens born in noncontiguous foreign states and dependent areas shall be treated as one group and aliens born in each of the contiguous foreign states shall be treated as separate groups.

"(b) ALLOCATION FOR INDEPENDENT IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(B) for independents immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in or section 201(a)(2)(B) for independent immigrants shall be allocated visas as follows:

"(1) ALIENS OF EXCEPTIONAL ABILITY.—Visas shall first be made available, in a number not to exceed such respective numerical limitation, to qualified immigrants who because of their exceptional ability in the sciences, arts, professions, or business will substantially benefit prospectively the national economy, cultural interests, or welfare of the United States and whose services in the sciences, arts, professions, or business are sought by an employer in the United States. In determining under this paragraph whether an immigrant has exceptional ability, the possession of a degree, diploma, certificate, or similar award from a college, university school, or other institution of learning, or of a license to practice or certification for a particular profession or occupation shall not by itself be considered sufficient evidence of such exceptional ability.

"(2) SKILLED WORKERS.—Visas not required for classes specified in paragraph (1) shall next be made available to qualified immigrants who are capable of performing skilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(3) INVESTORS.—Visas not required for classes specified in paragraphs (1) and (2), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available—

"(A) first, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment in a high unemployment area (as defined by the Attorney General, after consultation with the Secretary of Labor, and as determined at the time of the filing of a petition for classification under this paragraph) for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant, and

"(B) then, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant.

"(4) UNSKILLED WORKERS.—Visas not required for classes specified in paragraphs (1) through (3) shall next be made available to qualified immigrants who are capable of performing unskilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(5) NONPREFERENCE IMMIGRANTS.—(A) Visas not required for the classes specified in paragraphs (1) through (4), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available to other qualified immigrants who are not entering the country to perform skilled or unskilled labor in the chronological order in which they qualify.

"(B) No immigrant visa shall be issued under this paragraph to an adopted child or prospective adopted child of a United States citizen or lawfully resident alien unless (i) a valid home-study has been favorably recommended by an agency of the State of the child's proposed residence, or by an agency authorized by that State to conduct such a study, or, in the case of a child adopted abroad, by an appropriate public or private adoption agency which is licensed in the United States, and (ii) the child has been irrevocably released for immigration and adoption. No natural parent or prior adoptive parent of any such child shall thereafter, by virtue of such parentage, be accorded any right, privilege, or status under this Act. No immigrant visa shall otherwise be issued under this paragraph to an unmarried child under 16 years of age except a child who is accompanying or following to join his natural parent.

An immigrant visa shall not be issued to an immigrant under paragraph (1), (2), or (4) until the consular officer is in receipt of a determination made by the Secretary of Labor pursuant to the provisions of section 212(a)(14).

"(c) GUIDE FOR ALLOCATION BETWEEN PREFERENCE SYSTEMS.—Where it is determined that the maximum number of visas will be made available under section 202(a)(2) to natives of any single foreign state (defined in section 202(b)) or any dependent area (defined in section 202(c)) in any fiscal year, in determining whether to provide for visas to such natives under the preference system described in subsection (a) or that described in subsection (b), visa numbers with respect to natives of that state or dependent area shall be allocated (to the extent practicable and otherwise consistent with this section) in a manner so that the ratio of—

"(A) the number of family reunification immigrants described in subsection (a) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year, to

"(B) the number of independent immigrants described in subsection (b) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year,

is equal to 3 to 1.

"(d)(1) A spouse or child as defined in subparagraph (A), (B), (C), (D), or (E) of section 101(b)(1) and shall, if not otherwise entitled to an immigrant status and the immediate issuance of a visa under subsection (a) or (b), be entitled to the same status, and the same order of consideration provided in the respective subsection, if accompanying or following to join, his spouse or parent.

"(2) Waiting lists of applicants for visas under this section shall be maintained in accordance with regulations prescribed by the Secretary of State.".

(2) Subsection (e) of such section, as so redesignated, is amended—

(A) by inserting "or under subsection (b)" after "subsection (a)" the first place it appears, and

(B) by striking out "subsection (a)" the second place it appears and inserting in lieu thereof "the respective subsection".

(b)(1) Section 202 (8 U.S.C. 1152) is amended by striking out subsection (e).

(2) Section 204 (8 U.S.C. 1154) is amended by striking out subsection (f).

(3) Section 245(b) (8 U.S.C. 1255(b)) is amended by striking out "202(e) or".

(c)(1)(A) Subsection (f) of section 203 (8 U.S.C. 1153), as redesignated by subsection (a)(1), is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or pursuant to paragraphs (1) through (5) of subsection (b)".

(B) Subsection (g) of such section, as so redesignated, is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or paragraphs (1) through (4) of subsection (b)" each place it appears.

(2)(A) Subsection (a) of section 204 (8 U.S.C. 1154) is amended—

(i) by striking out "paragraph (1), (4), or (5) of section 203(a)" and inserting in lieu thereof "paragraph (3) or (4) of section 203(a)",

(ii) by striking out "section 203(a)(2)" and inserting in lieu thereof "paragraph (1), (2), or (5) of section 203(a)",

(iii) by striking out "section 203(a)(3)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(b)", and

(iv) by striking out "section 203(a)(6)" and inserting in lieu thereof "paragraph (2) or (4) of section 203(b)".

(B) Subsection (b) of such section is amended by striking out "section 203(a) (3) or (6)" and inserting in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

(d) Section 241(a)(9) (8 U.S.C. 1251(a)(9)) is amended—

(1) by inserting "(A)" after "(9)", and

(2) by adding at the end the following new subparagraph:

"(B) was admitted as (or otherwise acquired the status of) an independent immigrant described in paragraph (3) of section 203(b) and has failed without good cause to maintain such an investment for a period of at least one year after the date of such entry (or of acquiring such status) or after the date such substantial investment was made, whichever date is later;".

Page 49, line 14, strike out "(a)".

Page 50, line 11, strike out "paragraph (3) or (6)" and all that follows through "section 203(a)(7)" on line 13 and insert in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

Page 50, strike out line 21 and all that follows through page 51, line 2.

Page 59, after line 6, insert the following new section (and insert a corresponding item in the table of contents):

EFFECTIVE DATES AND TRANSITION

SEC. . (a) The amendments made by section 201, 202 (other than subsection (e)), and 203 shall take effect on October 1, 1983. When an immigrant, in possession of an unexpired immigrant visa issued before October 1, 1983, makes application for admission, his admissibility under section 212(a)(20) of the Immigration and Nationality Act shall be determined under the provisions of law in effect on the date of the issuance of such visa. The amendments made by the other provisions of this part shall take effect on the date of the enactment of this Act.

(b)(1) In the case of a petition filed under section 204(a) of the Immigration and Nationality Act before October 1, 1983, such petition shall be deemed, as of such date, to be a petition for the new corresponding classification (as defined in paragraph (2)), and the priority date for such petition shall remain in effect.

(2) For purposes of paragraph (1), the term "new corresponding classification" means, in the case of a petition for a—

(A) preference status described in section 203(a)(1) of the Immigration and Nationality Act (as in effect on September 30, 1983), the status as an immediate relative described in section 201(b) of such Act;

(B) preference status described in section 203(a)(2) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(a) of such Act as in effect after such date, as the case may be;

(C) preference status described in section 203(a)(3) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(b) of such Act as in effect after such date, as the case may be;

(D) preference status described in section 203(a)(4) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(3) of such Act as in effect after such date;

(E) preference status described in section 203(a)(5) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(4) of such Act as in effect after such date;

(F) preference status described in section 203(a)(6) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (2) or (4) of section 203(b) of such Act (as in effect after such date), as the case may be.

(c) Aliens registered in the nonpreference classification described in section 203(a)(7) of the Immigration and Nationality Act (as in effect on September 30, 1983) shall be transferred, as of October 1, 1983, to the preference status described in section 203(a)(5) or 203(b)(3) of such Act or the nonpreference classification described in section 203(b)(5) of such Act (as such sections are in effect after such date), as the case may be, and the priority date for such classification shall remain in effect.

AMENDMENT (35A)

Page 49, after line 12, insert the following new sections (and redesignate the succeeding sections of part A of title II, and the table of contents and cross-references thereto, accordingly):

NUMERICAL LIMITATIONS

SEC. 201. (a)(1) Subsection (a) of section 201 (8 U.S.C. 1151) is amended to read as follows:

"(a)(1) Exclusive of aliens described in paragraph (3), aliens born in a foreign state (other than a contiguous foreign state) or dependent area who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 320,000, plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year and the number of visas issued under that subparagraph during that year, plus (iii) for

fiscal years before fiscal year 1989, 66,500, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a relationship described in paragraph (1), (2), (4), or (5) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 65,000, minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, plus (iii) for fiscal years before fiscal year 1989, 13,500, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a paragraph (3) or (6) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"(2) Exclusive of aliens described in paragraph (3), aliens born in a contiguous foreign state who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 83 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year for that foreign state and the number of visas issued under that subparagraph during that year, plus (iii) for fiscal years before fiscal year 1989, 8,300, but only available to aliens born in that contiguous state with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a relationship described in paragraph (1), (2), (4), or (5) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 17 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A) who were born in that contiguous foreign state and who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, plus (iii) for fiscal years before fiscal year 1989, 1,700, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of paragraph (3) or (6) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"For purposes of this paragraph, the overall numerical limitation for a contiguous foreign state for a fiscal year is 40,000, plus the number by which 40,000 (or, for fiscal years before fiscal year 1989, 50,000) exceeds the number of aliens, who are not described in paragraph (3) and were born in the other contiguous foreign state, who were issued immigrant visas or otherwise acquired the status of an alien lawfully admitted for permanent residence in the previous fiscal year.

"(3) The aliens described in this paragraph, who are not subject to the numerical limitations described in paragraphs (1) and (2), are—

"(A) special immigrants defined in section 101(a)(27),

"(B) immigrants born to permanent resident aliens during a temporary visit abroad,

"(C) immediate relatives specified in subsection (b) of this section,

"(D) immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent who is such an immediate relative,

"(E) aliens who are admitted or granted asylum under section 207 or 208,

"(F) aliens provided records of permanent residence under section 214(d), and

"(G) aliens whose status is adjusted to permanent resident status under section 245A.".

(2) The first sentence of subsection (b) of such section is amended by striking out "children, spouses, and parents" inserting in lieu thereof "children, unmarried sons, unmarried daughters, spouses, and parents".

(b) Section 202(a) (8 U.S.C. 1152(a)) is amended—

(1) by striking out "(a) No person" and inserting in lieu thereof "(a)(1) Except as specifically provided in paragraph (2) of this subsection and in section 101(a)(27), 201(b), 203, and 214(d), no person",

(2) by striking out ", except as specifically" and all that follows up the period at the end, and

(3) by adding at the end the following new paragraph:

"(2) The total number of immigrant visas made available to natives of any single foreign state under subsections (a) (other than paragraph (1) thereof) and (b) of section 203 shall not exceed in any fiscal year—

"(A) 20,000, in the case of any foreign state other than either of the two foreign states contiguous to the United States, or

"(B) in the case of either of the foreign states contiguous to the United States, the numerical limitation for that foreign state for that fiscal year described in section 201(a)(2).".

PREFERENCE AND NONPREFERENCE ALLOCATION SYSTEMS

SEC. 202. (a)(1) Section 203 (8 U.S.C. 1153) is amended—

(A) by redesignating subsections (b) through (e) as subsections (e) through (h), respectively, and

(B) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) PREFERENCE ALLOCATION FOR FAMILY REUNIFICATION IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(A) for family reunification immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in section 201(a)(2)(A) for family reunification immigrants shall be allotted visas as follows:

"(1) SPOUSES AND CHILDREN OF PERMANENT RESIDENT ALIENS.—Visas shall first be made available to qualified immigrants, in a number not to exceed 41 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (4), who are the spouses or children of aliens lawfully admitted for permanent residence.

"(2) UNMARRIED SONS AND DAUGHTERS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 15 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (1), who are the spouses or the unmarried sons or unmarried daughters of aliens lawfully admitted for permanent residence.

"(3) MARRIED SONS AND DAUGHTERS OF CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) and (2), who are the married sons or married daughters of citizens of the United States.

"(4) BROTHERS AND SISTERS OF ADULT CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 34 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (3), who are the brothers or unmarried sisters of United States citizens who are at least 21 years of age.

In allocating visa numbers to aliens under this section, aliens born in noncontiguous foreign states and dependent areas shall be treated as one group and aliens born in each of the contiguous foreign states shall be treated as separate groups.

"(b) ALLOCATION FOR INDEPENDENT IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(B) for independents immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in or section 201(a)(2)(B) for independent immigrants shall be allocated visas as follows:

"(1) ALIENS OF EXCEPTIONAL ABILITY.—Visas shall first be made available, in a number not to exceed such respective numerical limitation, to qualified immigrants who because of their exceptional ability in the sciences, arts, professions, or business will substantially benefit prospectively the national economy, cultural interests, or welfare of the United States and whose services in the sciences, arts, professions, or business are sought by an employer in the United States. In determining under this paragraph whether an immigrant has exceptional ability, the possession of a degree, diploma, certificate, or similar award from a college, university, school, or other institution of learning, or of a license to practice or certification for a particular profession or occupation shall not by itself be considered sufficient evidence of such exceptional ability.

"(2) SKILLED WORKERS.—Visas not required for classes specified in paragraph (1) shall next be made available to qualified immigrants who are capable of performing skilled labor, not of a tempory or seasonal nature, for which qualified workers are not available in the United States.

"(3) INVESTORS.—Visas not required for classes specified in paragraphs (1) and (2),

but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available—

"(A) first, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment in a high unemployment area (as defined by the Attorney General, after consultation with the Secretary of Labor, and as determined at the time of the filing of a petition for classification under this paragraph) for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant, and

"(B) then, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant.

"(4) UNSKILLED WORKERS.—Visas not required for classes specified in paragraphs (1) through (3) shall next be made available to qualified immigrants who are capable of performing unskilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(5) NONPREFERENCE IMMIGRANTS.—(A) Visas not required for the classes specified in paragraphs (1) through (4), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available to other qualified immigrants who are not entering the country to perform skilled or unskilled labor in the chronological order in which they qualify.

"(B) No immigrant visa shall be issued under this paragraph to an adopted child or prospective adopted child of a United States citizen or lawfully resident alien unless (i) a valid home-study has been favorably recommended by an agency of the State of the child's proposed residence, or by an agency authorized by that State to conduct such a study, or, in the case of a child adopted abroad, by an appropriate public or private adoption agency which is licensed in the United States, and (ii) the child has been irrevocably released for immigration and adoption. No natural parent or prior adoptive parent of any such child shall thereafter, by virtue of such parentage, be accorded any right, privilege, or status under this Act. No immigrant visa shall otherwise be issued under this paragraph to an unmarried child under 16 years of age except a child who is accompanying or following to join his natural parent.

An immigrant visa shall not be issued to an immigrant under paragraph (1), (2), or (4) until the consular officer is in receipt of a determination made by the Secretary of Labor pursuant to the provisions of section 212(a)(14).

"(c) GUIDE FOR ALLOCATION BETWEEN PREFERENCE SYSTEMS.—Where it is determined that the maximum number of visas will be made available under section 202(a)(2) to natives of any single foreign state (defined in section 202(b)) or any dependent area (defined in section 202(c)) in any fiscal year, in determining whether to provide for visas to such natives under the preference system described in subsection (a) or that described in subsection (b), visa numbers with respect to natives of that state or dependent area shall be allocated (to the extent practicable and otherwise consistent with this section) in a manner so that the ratio of—

"(A) the number of family reunification immigrants described in subsection (a) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year, to

"(B) the number of independent immigrants described in subsection (b) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year,

is equal to 3 to 1.

"(d)(1) A spouse or child as defined in subparagraph (A), (B), (C), (D), or (E) of section 101(b)(1) and shall, if not otherwise entitled to an immigrant status and the immediate issuance of a visa under subsection (a) or (b), be entitled to the same status, and the same order of consideration provided in the respective subsection, if accompanying or following to join, his spouse or parent.

"(2) Waiting lists of applicants for visas under this section shall be maintained in accordance with regulations prescribed by the Secretary of State.".

(2) Subsection (e) of such section, as so redesignated, is amended—

(A) by inserting "or under subsection (b)" after "subsection (a)" the first place it appears, and

(B) by striking out "subsection (a)" the second place it appears and inserting in lieu thereof "the respective subsection".

(b)(1) Section 202 (8 U.S.C. 1152) is amended by striking out subsection (e).

(2) Section 204 (8 U.S.C. 1152) is amended by striking out subsection (f).

(3) Section 245(b) (8 U.S.C. 1155(b)) is amended by striking out "202(e) or".

(c)(1)(A) Subsection (f) of section 203 (8 U.S.C. 1153), as redesignated by subsection (a)(1), is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or pursuant to paragraphs (1) through (5) of subsection (b)".

(B) Subsection (g) of such section, as so redesignated, is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or paragraphs (1) through (4) of subsection (b)" each place it appears.

(2)(A) Subsection (a) of section 204 (8 U.S.C. 1154) is amended—

(i) by striking out "paragraph (1), (4), or (5) of section 203(a)" and inserting in lieu thereof "paragraph (3) or (4) of section 203(a)",

(ii) by striking out section 203(a)(2)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(a)",

(iii) by striking out section 203(a)(3)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(b)", and

(iv) by striking out section 203(a)(6)" and inserting in lieu thereof "paragraph (2) or (4) of section 203(b)".

(B) Subsection (b) of such section is amended by striking out "section 203(a) (3) or (6)" and inserting in lieu thereof "paragraph (1), (2), or (4) of subsection 203(b)".

(d) Section 241(a)(9) (8 U.S.C. 1251(a)(9)) is amended—

(1) by inserting "(A)" after "(9)", and

(2) by adding at the end the following new subparagraph:

"(B) was admitted as (or otherwise acquired the status of) an independent immigrant described in paragraph (3) of section 203(b) and has failed without good cause to maintain such an investment for a period of at least one year after the date of such entry (or of acquiring such status) or after the date such substantial investment was made, whichever date is later;".

Page 49, line 14, strike out "(a)".

Page 50, line 11, strike out "paragraph (3) or (6)" and all that follows through "section 203(a)(7)" on line 13 and insert in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

Page 50, strike out line 21 and all that follows through page 51, line 2.

Page 59, after line 6, insert the following new section (and insert a corresponding item in the table of contents):

EFFECTIVE DATES AND TRANSITION

SEC. . (a) The amendments made by sections 201, 202 (other than subsection (e)), and 203 shall take effect on October 1, 1983. When an immigrant, in possession of an unexpired immigrant visa issued before October 1, 1983, makes application for admission, his admissibility under section 212(a)(20) of the Immigration and Nationality Act shall be determined under the provisions of law in effect on the date of the issuance of such visa. The amendments made by the other provisions of this part shall take effect on the date of the enactment of this Act.

(b)(1) In the case of a petition filed under section 204(a) of the Immigration and Nationality Act before October 1, 1983, such petition shall be deemed, as of such date, to be a petition for new corresponding classification (as defined in paragraph (2)), and the priority date for such petition shall remain in effect.

(2) For purposes of paragraph (1), the term "new corresponding classification" means, in the case of a petition for a—

(A) preference status described in section 203(a)(1) of the Immigration and Nationality Act (as in effect on September 30, 1983), the status as an immediate relative described in section 201(b) of such Act;

(B) preference status described in section 203(a)(2) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(a) of such Act as in effect after such date, as the case may be;

(C) preference status described in section 203(a)(3) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(b) of such Act as in effect after such date, as the case may be;

(D) preference status described in section 203(a)(4) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(3) of such Act as in effect after such date;

(E) preference status described in section 203(a)(5) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(4) of such Act as in effect after such date; and

(F) preference status described in section 203(a)(6) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (2) or (4) of section 203(b) of such Act (as in effect after such date), as the case may be.

(c) Aliens registered in the nonpreference classification described in section 203 (a)(7)

of the Immigration and Nationality Act (as in effect on September 30, 1983) shall be transferred, as of October 1, 1983, to the preference status described in section 203(b)(3) of such Act or the nonpreference classification described in section 203(b)(5) of such Act (as such sections are in effect after such date), as the case may be, and the priority date for such classification shall remain in effect.

AMENDMENT (35B)

Page 49, after line 12, insert the following new sections (and redesignate the succeeding sections of part A of title II, and the table of contents and cross-references thereto, accordingly):

NUMERICAL LIMITATIONS

SEC. 201. (a)(1) Subsection (a) of section 201 (8 U.S.C. 1151) is amended to read as follows:

"(a)(1) Exclusive of aliens described in paragraph (3), aliens born in a foreign state (other than a contiguous foreign state) or dependent area who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 320,000, plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year and the number of visas issued under that subparagraph during that year, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 65,000, minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"(2) Exclusive of aliens described in paragraph (3), aliens born in a contiguous foreign state who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 83 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year for that foreign state and the number of visas issued under that subparagraph during that year, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 17 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who were born in that contiguous foreign state and who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation of any fiscal year 27 percent of the numerical limition for all of such fiscal year.

"For purposes of this paragraph, the overall numerical limitation for a contiguous foreign state for fiscal year is 40,000, plus the number by which 40,000 exceeds the number of aliens, who are not described in paragraph (3) and were born in the other contiguous foreign state, who were issued immigrant visas or otherwise acquired the status of an alien lawfully admitted for permanent residence in the previous fiscal year.

"(3) The aliens described in this paragraph, who are not subject to the numerical limitations described in paragraphs (1) and (2), are—

"(A) special immigrants defined in section 101(a)(27),

"(B) immigrants born to permanent resident aliens during a temporary visit abroad,

"(C) immediate relatives specified in subsection (b) of this section,

"(D) immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent who is such an immediate relative,

"(E) aliens who are admitted to granted asylum under section 207 or 208,

"(F) aliens provided records of permanent residence under section 214(d), and

"(G) aliens whose status is adjusted to permanent resident status under section 245A.".

(2) The first sentence of subsection (b) of such section is amended by striking out "children, spouses, and parents" inserting in lieu thereof "children, unmarried sons, unmarried daughters, spouses, and parents".

(b) Section 202(a) (8 U.S.C. 1152(a)) is amended—

(1) by striking out "(a) No person" and inserting in lieu thereof "(a)(1) Except as specifically provided in paragraph (2) of this subsection and in section 101(a)(27), 201(b), 203, and 214(d), no person",

(2) by striking out ", except as specifically" and all that follows up to the period at the end, and

(3) by adding at the end the following new paragraph:

"(2) The total number of immigrant visas made available to natives of any single foreign state under subsections (a) (other than paragraph (1) thereof) and (b) of section 203 shall not exceed in any fiscal year—

"(A) 20,000, in the case of any foreign state other than either of the two foreign states contiguous to the United States, or

"(B) in the case of either of the foreign states contiguous to the United States, the numerical limitation for that foreign state for that fiscal year described in section 201(a)(2).".

PREFERENCE AND NONPREFERENCE ALLOCATION SYSTEMS

SEC. 202. (a)(1) Section 203 (8 U.S.C. 1153) is amended—

(A) by redesignating subsections (b) through (e) as subsections (e) through (h), respectively, and

(B) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) PREFERENCE ALLOCATION FOR FAMILY REUNIFICATION IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(A) for family reunification immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in section 201(a)(2)(A) for family reunification immigrants shall be allotted visas as follows:

"(1) SPOUSES AND CHILDREN OF PERMANENT RESIDENT ALIENS.—Visas shall first be made available to qualified immigrants, in a number not to exceed 41 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (4), who are the spouses or children of aliens lawfully admitted for permanent residence.

"(2) UNMARRIED SONS AND DAUGHTERS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 15 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (1), who are the spouses or the unmarried sons or unmarried daughters of aliens lawfully admitted for permanent residence.

"(3) MARRIED SONS AND DAUGHTERS OF CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) and (2), who are the married sons of married daughters of citizens of the United States.

"(4) BROTHERS AND SISTERS OF ADULT CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 34 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (3), who are the brothers or unmarried sisters of United States citizens who are at least 21 years of age.

In allocating visa numbers to aliens under this section, aliens born in noncontiguous foreign states and dependent areas shall be treated as one group and aliens born in each of the contiguous foreign states shall be treated as separate groups.

"(b) ALLOCATION FOR INDEPENDENT IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(B) for independents immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in or section 201(a)(2)(B) for independent immigrants shall be allocated visas as follows:

"(1) ALIENS OF EXCEPTIONAL ABILITY.—Visas shall first be made available, in a number not to exceed such respective numerical limitation, to qualified immigrants who because of their exceptional ability in the sciences, arts professions, or business will substantially benefit prospectively the national economy, cultural interests, or welfare of the United States and whose services in the sciences, arts, professions, or business are sought by an employer in the United States. In determining under this paragraph whether an immigrant has exceptional ability, the possession of a degree, diploma, certificate, or similar award from a college, university, school, or other institution of learning, or of a license to practice or certification for a particular profession or occupation shall not by itself be considered sufficient evidence of such exceptional ability.

"(2) SKILLED WORKERS.—Visas not required for classes specified in paragraph (1) shall not be made available to qualified immigrants who are capable of performing

skilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(3) INVESTORS.—Visas not required for classes specified in paragraphs (1) and (2), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available—

"(A) first, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment in a high unemployment area (as defined by the Attorney General, after consultation with the Secretary of Labor, and as determined at the time of the filing of a petition for classification under this paragraph) for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant, and

"(B) then, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant.

"(4) UNSKILLED WORKERS.—Visas not required for classes specified in paragraphs (1) through (3) shall next be made available to qualified immigrants who are capable of performing unskilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(5) NONPREFERENCE IMMIGRANTS.—(A) Visas not required for the classes specified in paragraphs (1) through (4), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available to other qualified immigrants who are not entering the country to perform skilled or unskilled labor in the chronological order in which they qualify.

"(B) No immigrant visa shall be issued under this paragraph to an adopted child or prospective adopted child of a United States citizen or lawfully resident alien unless (i) a valid home-study has been favorably recommended by an agency of the State of the child's proposed residence, or by an agency authorized by that States to conduct such a study, or, in the case of a child adopted abroad, by an appropriate public or private adoption agency which is licensed in the United States, and (ii) the child has been irrevocably released for immigration and adoption. No natural parent or prior adoptive parent of any such child shall thereafter, by virtue of such parentage, be accorded any right, privilege, or status under this Act. No immigrant visa shall otherwise to issued under this paragraph to an unmarried child under 16 years of age except a child who is accompanying or following to join his natural parent.

An immigrant visa shall not be issued to an immigrant under paragraph (1), (2), or (4) until the consular officer is in receipt or a determination made by the Secretary of Labor pursuant to the provisions of section 212(a) (14).

"(c) GUIDE FOR ALLOCATION BETWEEN PREFERENCE SYSTEMS.—Where it is determined that maximum number of visas will be made available under section 202(a) (2) to natives of any single foreign state (defined in section 202(b)) or any dependent area (defined in section 202(c)) in any fiscal year, in determining whether to provide for visas to such natives under the preference system described in subsection (a) or that described in subsection (b), visa numbers with respect to natives of that state or dependent area shall be allocated (to the extent practicable and otherwise consistent with this section) in a manner so that the ratio of—

"(A) the number of family reunification immigrants described in subsection (a) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year, to

"(B) the number of independent immigrants described in subsection (b) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year,

is equal to 3 to 1.

"(d)(1) A spouse or child as defined in subparagraph (A), (B), (C), (D) or (E) of section 101(b) (1) and shall, if not otherwise entitled to an immigrant status and the immediate issuance of a visa under subsection (a) or (b), be entitled to the same status, and the same order of consideration provided in the respective subsection, if accompanying or following to join, his spouse or parent.

"(2) Waiting lists of applicants for visas under this section shall be maintained in accordance with regulations prescribed by the Secretary of State.".

(2) Subsection (e) of such section, as so redesignated, is amended—

(A) by inserting "or under subsection (b)" after "subsection (a)" the first place it appears, and

(B) by striking out "subsection (a)" the second place it appears and inserting in lieu thereof "the respective subsection".

(b)(1) Section 202 (8 U.S.C. 1152) is amended by striking out subsection (e).

(2) Section 204 (8 U.S.C. 1154) is amended by striking out subsection (f).

(3) Section 245(b) (8 U.S.C. 1255(b)) is amended by striking out "202(e) or".

(c)(1)(A) Subsection (f) of section 203 (8 U.S.C. 1153), as redesignated by subsection (a)(1), is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or pursuant to paragraphs (1) through (5) of subsection (b)".

(B) Subsection (g) of such section, as so redesignated, is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or paragraphs (1) through (4) of subsection (b)" each place it appears.

(2)(A) Subsection (a) of section 204 (8 U.S.C. 1154) is amended—

(i) by striking out "paragraph (1), (4), or (5) of section 203(a)" and inserting in lieu thereof "paragraph (3) or (4) of section 203(a)",

(ii) by striking out "section 203(a)(2)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(a)",

(iii) by striking out "section 203(a)(3)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(b)", and

(iv) by striking out "section 203(a)(6)" and inserting in lieu thereof "paragraph (2) or (4) of section 203(b)".

(B) Subsection (b) of such section is amended by striking out "section 203(a) (3) or (6)" and inserting in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

(d) Section 241(a)(9) (8 U.S.C. 1251(a)(9)) is amended—

(1) by inserting "(A)" after "(9)", and

(2) by adding at the end the following new subparagraph:

"(B) was admitted as (or otherwise acquired the status of) an independent immigrant described in paragraph (3) of section 203(b) and has failed without good cause to maintain such an investment for a period of at least one year after the date of such entry (or of acquiring such status) or after the date such substantial investment was made, whichever date is later;".

Page 49, line 14, strike out "(a)".

Page 50, line 11, strike out "paragraph (3) or (6)" and all that follows through "section 203(a)(7)" on line 13 and insert in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

Page 50, strike out line 21 and all that follows through page 51, line 2.

Page 59, after line 6, insert the following new section (and insert a corresponding item in the table of contents):

EFFECTIVE DATES AND TRANSITION

SEC. . (a) The amendments made by sections 201, 202 (other than subsection (e)), and 203 shall take effect on October 1, 1983. When an immigrant, in possession of an unexpired immigrant visa issued before October 1, 1983, makes application for admission, his admissibility under section 212(a)(20) of the Immigration and Nationality Act shall be determined under the provisions of law in effect on the date of the issuance of such visa. The amendments made by the other provisions of this part shall take effect on the date of the enactment of this Act.

(b)(1) In the case of a petition filed under section 204(a) of the Immigration and Nationality Act before October 1, 1983, such petition shall be deemed, as of such date, to be a petition for the new corresponding classification (as defined in paragraph (2)), and the priority date for such petition shall remain in effect.

(2) For purposes of paragraph (1), the term "new corresponding classification" means, in the case of a petition for a—

(A) preference status described in section 203(a)(1) of the Immigration and Nationality Act (as in effect on September 30, 1983), the status as an immediate relative described in section 201(b) of such Act;

(B) preference status described in section 203(a)(2) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(a) of such Act as in effect after such date, as the case may be;

(C) preference status described in section 203(a)(3) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(b) of such Act as in effect after such date, as the case may be;

(D) preference status described in section 203(a)(4) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(3) of such Act as in effect after such date,

(E) preference status described in section 203(a)(5) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(4) of such Act as in effect after such date; and

(F) preference status described in section 203(a)(6) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (2) or (4) of section

203(b) of such Act (as in effect after such date), as the case may be.

(c) Aliens registered in the nonpreference classification described in section 203(a)(7) of the Immigration and Nationality Act (as in effect on September 30, 1983) shall be transferred, as of October 1, 1983, to the preference status described in section 203(b)(3) of such Act or the nonpreference classification described in section 203(b)(5) of such Act (as such sections are in effect after such date), as the case may be, and the priority date for such classification shall remain in effect.

AMENDMENT (35C)

Page 49, after line 12, insert the following new sections (and redesignate the succeeding sections of part A of title II, and the table of contents and cross-references thereto, accordingly):

NUMERICAL LIMITATIONS

SEC. 201. (a)(1) Subsection (a) of section 201 (8 U.S.C. 1151) is amended to read as follows:

"(a)(1) Exclusive of aliens described in paragraph (3), aliens born in a foreign state (other than a contiguous foreign state) or dependent area who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 320,000, plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year and the number of visas issued under that subparagraph during that year, plus (iii) for fiscal years before fiscal year 1989, 66,500, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a relationship described in paragraph (1), (2), (4), or (5) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 65,000, minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, plus (iii) for fiscal years before fiscal year 1989, 13,500, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a paragraph (3) or (6) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"(2) Exclusive of aliens described in paragraph (3), aliens born in a contiguous foreign state who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 83 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year for that foreign state and the number of visas issued under that subparagraph during that year, plus (iii) for fiscal years before fiscal year 1989, 8,300, but only available to aliens born in that contiguous state with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a relationship described in paragraph (1), (2), (4), or (5) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 17 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), minus (ii) the number of special immigrants (other than those described in section 101(a)(27)A)) who were born in that contiguous foreign state and who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, plus (iii) for fiscal years before fiscal year 1989, 1,700, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of paragraph (3) or (6) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"For purposes of this paragraph, the overall numerical limitation for a contiguous foreign state for a fiscal year is 40,000, plus the number by which 40,000 (or, for fiscal years before fiscal year 1989, 50,000) exceeds the number of aliens, who are not described in paragraph (3) and were born in the other contiguous foreign state, who were issued immigrant visas or otherwise acquired the status of an alien lawfully admitted for permanent residence in the previous fiscal year.

"(3) The aliens described in this paragraph, who are not subject to the numerical limitations described in paragraphs (1) and (2), are—

"(A) special immigrants defined in section 101(a)(27)

"(B) immigrants born to permanent resident aliens during a temporary visit abroad,

"(C) immediate relatives specified in subsection (b) of this section,

"(D) immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent who is such an immediate relative,

"(E) aliens who are admitted or granted asylum under section 207 or 208,

"(F) aliens provided records of permanent residence under section 214(d), and

"(G) aliens whose status is adjusted to permanent resident status under section 245A.".

(2) The first sentence of subsection (b) of such section is amended by striking out "children, spouses, and parents" inserting in lieu thereof "children, unmarried sons, unmarried daughters, spouses, and parents".

(b) Section 202(a) (8 U.S.C. 1152(a)) is amended—

(1) by striking out "(a) No person" and inserting in lieu thereof "(a)(1) Except as specifically provided in paragraph (2) of this subsection and in section 101(a)(27), 201(b), 203, and 214(d), no person",

(2) by striking out ", except as specifically" and all that follows up to the period at the end, and

(3) by adding at the end the following new paragraph:

"(2) The total number of immigrant visas made available to natives of any single foreign state under subsections (a) and (b) of section 203 shall not exceed in any fiscal year—

"(A) 20,000, in the case of any foreign state other than either of the two foreign states contiguous to the United States, or

"(B) in the case of either of the foreign states contiguous to the United States, the numerical limitation for that foreign state for that fiscal year described in section 201(a)(2).".

PREFERENCE AND NONPREFERENCE ALLOCATION SYSTEMS

SEC. 202. (a)(1) Section 203 (8 U.S.C. 1153) is amended—

(A) by redesignating subsections (b) through (e) as subsections (e) through (h), respectively, and

(B) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) PREFERENCE ALLOCATION FOR FAMILY REUNIFICATION IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(A) for family reunification immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in section 201(a)(2)(A) for family reunification immigrants shall be allotted visas as follows:

"(1) SPOUSES AND CHILDREN OF PERMANENT RESIDENT ALIENS.—Visas shall first be made available to qualified immigrants, in a number not to exceed 41 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (4), who are the spouses or children of aliens lawfully admitted for permanent residence.

"(2) UNMARRIED SONS AND DAUGHTERS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 15 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (1), who are the spouses or the unmarried sons or unmarried daughters of aliens lawfully admitted for permanent residence.

"(3) MARRIED SONS AND DAUGHTERS OF CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) and (2), who are the married sons or married daughters of citizens of the United States.

"(4) BROTHERS AND SISTERS OF ADULT CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 34 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (3), who are the brothers or unmarried sisters of United States citizens who are at least 21 years of age.

In allocating visa numbers to aliens under this section, aliens born in noncontiguous

foreign states and dependent areas shall be treated as one group and aliens born in each of the contiguous foreign states shall be treated as separate groups.

"(b) ALLOCATION FOR INDEPENDENT IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(B) for independent immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in or section 201(a)(2)(B) for independent immigrants shall be allocated visas as follows:

"(1) ALIENS OF EXCEPTIONAL ABILITY.—Visas shall first be made available, in a number not to exceed such respective numerical limitation, to qualified immigrants who because of their exceptional ability in the sciences, arts, professions, or business will substantially benefit prospectively the national economy, cultural interests, or welfare of the United States and whose services in the sciences, arts, professions, or business are sought by an employer in the United States. In determining under this paragraph whether an immigrant has exceptional ability, the possession of a degree, diploma, certificate, or similar award from a college, university, school, or other institution of learning, or of a license to practice or certification for a particular profession or occupation shall not by itself be considered sufficient evidence of such exceptional ability.

"(2) SKILLED WORKERS.—Visas not required for classes specified in paragraph (1) shall next be made available to qualified immigrants who are capable of performing skilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(3) INVESTORS.—Visas not required for classes specified in paragraphs (1) and (2), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available—

"(A) first, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment in a high unemployment area (as defined by the Attorney General, after consultation with the Secretary of Labor, and as determined at the time of the filing of a petition for classification under this paragraph) for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant, and

"(B) then, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant.

"(4) UNSKILLED WORKERS.—Visas not required for classes specified in paragraphs (1) through (3) shall next be made available to qualified immigrants who are capable of performing unskilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(5) NONPREFERENCE IMMIGRANTS.—(A) Visas not required for the classes specified in paragraphs (1) through (4), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available to other qualified immigrants who are not entering the country to perform skilled or unskilled labor in the chronological order in which they qualify.

"(B) No immigrant visas shall be issued under this paragraph to an adopted child or prospective adopted child of a United States citizen or lawfully resident alien unless (i) a valid home-study has been favorably recommended by an agency of the State of the child's proposed residence, or by an agency authorized by that State to conduct such a study, or, in the case of a child adopted abroad, by an appropriate public or private adoption agency which is licensed in the United States, and (ii) the child has been irrevocably released for immigration and adoption. No natural parent or prior adoptive parent of any such child shall thereafter, by virtue of such parentage, be accorded any right, privilege, or status under this Act. No immigrant visa shall otherwise be issued under this paragraph to an unmarried child under 16 years of age except a child who is accompanying or following to join his natural parent.

An immigrant visa shall not be issued to an immigrant under paragraph (1), (2), or (4) until the consular officer is in receipt of a determination made by the Secretary of Labor pursuant to the provisions of section 212(a)(14).

"(c) GUIDE FOR ALLOCATION BETWEEN PREFERENCE SYSTEMS.—Where it is determined that the maximum number of visas will be made available under section 202(a)(2) to natives of any single foreign state (defined in section 202(b)) or any dependent area (defined in section 202(c)) in any fiscal year, in determining whether to provide for visas to such natives under the preference system described in subsection (a) or that described in subsection (b), visa numbers with respect to natives of that state or dependent area shall be allocated (to the extent practicable and otherwise consistent with this section) in a manner so that the ratio of—

"(A) the number of family reunification immigrants described in subsection (a) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year, to

"(B) the number of independent immigrants described in subsection (b) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year,

is equal to 3 to 1.

"(d)(1) A spouse or child as defined in subparagraph (A), (B), (C), (D), or (E) of section 101(b)(1) and shall, if not otherwise entitled to an immigrant status and the immediate issuance of a visa under subsection (a) or (b), be entitled to the same status, and the same order of consideration provided in the respective subsection, if accompanying or following to join, his spouse or parent.

"(2) Waiting lists of applicants for visas under this section shall be maintained in accordance with regulations prescribed by the Secretary of State."

(2) Subsection (e) of such section, as so redesignated, is amended—

(A) by inserting "or under subsection (b)" after "subsection (a)" the first place it appears, and

(B) by striking out "subsection (a)" the second place it appears and inserting in lieu thereof "the respective subsection".

(b)(1) Section 202 (8 U.S.C. 1152) is amended by striking out subsection (e).

(2) Section 204 (8 U.S.C. 1154) is amended by striking out subsection (f).

(3) Section 245(b) (8 U.S.C. 1255(b)) is amended by striking out "202(e) or".

(c)(1)(A) Subsection (f) of section 203 (8 U.S.C. 1153), as redesignated by subsection (a)(1), is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or pursuant to paragraphs (1) through (5) of subsection (b)".

(B) Subsection (g) of such section, as so redesignated, is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or paragraphs (1) through (4) of subsection (b)" each place it appears.

(2)(A) Subsection (a) of section 204 (8 U.S.C. 1154) is amended—

(i) by striking out "paragraph (1), (4), or (5) of section 203(a)" and inserting in lieu thereof "paragraph (3) or (4) of section 203(a)",

(ii) by striking out "section 203(a)(2)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(a)",

(iii) by striking out "section 203(a)(3)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(b)", and

(iv) by striking out "section 203(a)(6)" and inserting in lieu thereof "paragraph (2) or (4) of section 203(b)".

(B) Subsection (b) of such section is amended by striking out "section 203(a) (3) or (6)" and inserting in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

(d) Section 241(a)(9) (8 U.S.C. 1251(a)(9)) is amended—

(1) by inserting "(A)" after "(9)", and

(2) by adding at the end the following new subparagraph:

"(B) was admitted as (or otherwise acquired the status of) an independent immigrant described in paragraph (3) of section 203(b) and has failed without good cause to maintain such an investment for a period of at least one year after the date of such entry (or of acquiring such status) or after the date such substantial investment was made, whichever date is later;".

Page 49, line 14, strike out "(a)".

Page 50, line 11, strike out "paragraph (3) or (6)" and all that follows through "section 203(a)(7)" on line 13 and insert in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

Page 50, strike out line 21 and all that follows through page 51, line 2.

Page 59, after line 6, insert the following new section (and insert a corresponding item in the table of contents):

EFFECTIVE DATES AND TRANSITION

SEC. . (a) The amendments made by sections 201, 202 (other than subsection (e)), and 203 shall take effect on October 1, 1983. When an immigrant, in possession of an unexpired immigrant visa issued before October 1, 1983, makes application for admission, his admissibility under section 212(a)(20) of the Immigration and Nationality Act shall be determined under the provisions of law in effect on the date of the issuance of such visa. The amendments made by the other provisions of this part shall take effect on the date of the enactment of this Act.

(b)(1) In the case of a petition filed under section 204(a) of the Immigration and Nationality Act before October 1, 1983, such

petition shall be deemed, as of such date, to be a petition for the new corresponding classification (as defined in paragraph (2)), and the priority date for such petition shall remain in effect.

(2) For purposes of paragraph (1), the term "new corresponding classification" means, in the case of a petition for a—

(A) preference status described in section 203(a)(1) of the Immigration and Nationality Act (as in effect on September 30, 1983), the status as an immediate relative described in section 201(b) of such Act;

(B) preference status described in section 203(a)(2) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(a) of such Act as in effect after such date, as the case may be;

(C) preference status described in section 203(a)(3) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(b) of such Act as in effect after such date, as the case may be;

(D) preference status described in section 203(a)(4) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(3) of such Act as in effect after such date;

(E) preference status described in section 203(a)(5) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(4) of such Act as in effect after such date; and

(F) preference status described in section 203(a)(6) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (2) or (4) of section 203(b) of such Act (as in effect after such date), as the case may be.

(c) Aliens registered in the nonpreference classification described in section 203(a)(7) of the Immigration and Nationality Act (as in effect on September 30, 1983) shall be transferred, as of October 1, 1983, to the preference status described in section 203(b)(3) of such Act or the nonpreference classification described in section 203(b)(5) of such Act (as such sections are in effect after such date), as the case may be, and the priority date for such classification shall remain in effect.

AMENDMENT (35D)

Page 49, after line 12, insert the following new sections (and redesignate the succeeding sections of part A of title II, and the table of contents and cross-references thereto, accordingly):

NUMERICAL LIMITATIONS

SEC. 201. (a)(1) Subsection (a) of section 201 (8 U.S.C. 1151) is amended to read as follows:

"(a)(1) Exclusive of aliens described in paragraph (3), aliens born in a foreign state (other than a contiguous foreign state) or dependent area who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 320,000, plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year and the number of visas issued under that subparagraph during that year, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 65,000, minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"(2) Exclusive of aliens described in paragraph (3), aliens born in a contiguous foreign state who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the Unites States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 83 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year for that foreign state and the number of visas issued under that subparagraph during that year, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 17 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), minus (ii) the number of special immigrants (other than those described in section 101(a) (27) (A)) who were born in that contiguous foreign state and who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"For purpose of this paragraph, the overall numerical limitation for a contiguous foreign state for a fiscal year is 40,000, plus the number by which 40,000 exceeds the number of aliens, who are not described in paragraph (3) and were born in the other contiguous foreign state, who were issued immigrant visas or otherwise acquired the status of an alien lawfully admitted for permanent residence in the previous fiscal year.

"(3) The aliens described in this paragraph, who are not subject to the numerical limitations described in paragraphs (1) and (2), are—

"(A) special immigrants defined in section 101(a)(27),

"(B) immigrants born to permanent resident aliens during a temporary visit abroad,

"(C) immediate relatives specified in subsection (b) of this section,

"(D) immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent who is such an immediate relative,

"(E) aliens who are admitted or granted asylum under section 207 or 208,

"(F) aliens provided records of permanent residence under section 214(d), and

"(G) aliens whose status is adjusted to permanent resident status under section 245A.".

(2) The first sentence of subsection (b) of such section is amended by striking out "children, spouses, and parents" inserting in lieu thereof "children, unmarried sons, unmarried daughters, spouses, and parents".

(b) Section 202(a) (8 U.S.C. 1152(a)) is amended—

(1) by striking out "(a) No person" and inserting in lieu thereof "(a)(1) Except as specifically provided in paragraph (2) of this subsection and in section 101(a)(27), 201(b), 203, and 214(d), no person",

(2) by striking out ", except as specifically" and all that follows up to the period at the end, and

(3) by adding at the end the following new paragraph:

"(2) The total number of immigrant visas made available to natives of any single foreign state under subsections (a) and (b) of section 203 shall not exceed in any fiscal year—

"(A) 20,000, in the case of any foreign state or other than either of the two foreign states contiguous to the United States, or

"(B) in the case of either of the foreign states contiguous to the United States, the numerical limitation for that foreign state for that fiscal year described in section 201(a)(2).".

PREFERENCE AND NONPREFERENCE ALLOCATION SYSTEMS

SEC. 202. (a)(1) Section 203 (8 U.S.C. 1153) is amended—

(A) by redesignating subsections (b) through (e) as subsections (e) through (h), respectively, and

(B) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) PREFERENCE ALLOCATION FOR FAMILY REUNIFICATION IMMIGRANTS.— Aliens subject to the numerical limitation specified in section 201(a)(1)(A) for family reunification immigrants and, separately for aliens born in each of the two contiguous foreign states, alien subject to the numerical limitation specified in section 201(a)(2)(A) for family reunification immigrants shall be allotted visas as follows:

"(1) SPOUSES AND CHILDREN OF PERMANENT RESIDENT ALIENS.—Visas shall first be made available to qualified immigrants, in a number not to exceed 41 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (4), who are the spouses or children of aliens lawfully admitted for permanent residence.

"(2) UNMARRIED SONS AND DAUGHTERS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 15 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (1), who are the spouses or the unmarried sons or unmarried daughters of aliens lawfully admitted for permanent residence.

"(3) MARRIED SONS AND DAUGHTERS OF CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) and (2), who are the married sons or married daughters of citizens of the United States.

"(4) BROTHERS AND SISTERS OF ADULT CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 34 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1)

through (3), who are the brothers or unmarried sisters of United States citizens who are at least 21 years of age.

In allocating visa numbers to aliens under this section, aliens born in noncontiguous foreign states and dependent areas shall be treated as one group and aliens born in each of the contiguous foreign states shall be treated as separate groups.

"(b) ALLOCATION FOR INDEPENDENT IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(B) for independents immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in or section 201(a)(2)(B) for independent immigrants shall be allocated visas as follows:

"(1) ALIENS OF EXCEPTIONAL ABILITY.—Visas shall first be made available, in a number not to exceed such respective numerical limitation, to qualified immigrants who because of their exceptional ability in the sciences, arts, professions, or business will substantially benefit prospectively the national economy, cultural interests, or welfare of the United States and whose services in the sciences, arts, professions, or business are sought by an employer in the United States. In determining under this paragraph whether an immigrant has exceptional ability, the possession of a degree, diploma, certificate, or similar award from a college, university, school, or other institution of learning, or of a license to practice or certification for a particular profession or occupation shall not by itself be considered sufficient evidence of such exceptional ability.

"(2) SKILLED WORKERS.—Visas not required for classes specified in paragraph (1) shall next be made available to qualified immigrants who are capable of performing skilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(3) INVESTORS.—Visas not required for classes specified in paragraphs (1) and (2), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available—

"(A) first, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment in a high unemployment area (as defined by the Attorney General, after consultation with the Secretary of Labor, and as determined at the time of the filing of a petition for classification under this paragraph) for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant, and

"(B) then, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant.

"(4) UNSKILLED WORKERS.—Visas not required for classes specified in paragraphs (1) through (3) shall next be made available to qualified immigrants who are capable of performing unskilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(5) NONPREFERENCE IMMIGRANTS.—(A) Visas not required for the classes specified in paragraphs (1) through (4), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available to other qualified immigrants who are not entering the country to perform skilled or unskilled labor in the chronological order in which they qualify.

"(B) No immigrant visa shall be issued under this paragraph to an adopted child or prospective adopted child of a United States citizen or lawfully resident alien unless (i) a valid home-study has been favorably recommended by an agency of the State of the child's proposed residence, or by an agency authorized by that State to conduct such a study, or, in the case of a child adopted abroad, by an appropriate public or private adoption agency which is licensed in the United States, and (ii) the child has been irrevocably released for immigration and adoption. No natural parent or prior adoptive parent of any such child shall thereafter, by virtue of such percentage, be accorded any right, privilege, or status under this Act. No immigrant visa shall otherwise be issued under this paragraph to an unmarried child under 16 years of age except a child who is accompanying or following to join his natural parent.

An immigrant visa shall not be issued to an immigrant under paragraph (1), (2), or (4) until the consular officer is in receipt of a determination made by the Secretary of Labor pursuant to the provisions of section 212(a)(14).

"(c) GUIDE FOR ALLOCATION BETWEEN PREFERENCE SYSTEMS.—Where it is determined that the maximum number of visas will be made available under section 202(a)(2) to natives of any single foreign state (defined in section 202(b)) or any dependent area (defined in section 202(c)) in any fiscal year, in determining whether to provide for visas to such natives under the preference system described in subsection (a) or that described in subsection (b), visa numbers with respect to natives of that state or dependent area shall be allocated (to the extent practicable and otherwise consistent with this section) in a manner so that the ratio of—

"(A) the number of family reunification immigrants described in subsection (a) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year, to

"(B) the number of independent immigrants described in subsection (b) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year,

is equal to 3 to 1.

"(d)(1) A spouse or child as defined in subparagraph (A), (B), (C), (D), or (E) of section 101(b)(1) and shall, if not otherwise entitled to an immigrant status and the immediate issuance of a visa under subsection (a) or (b), be entitled to the same status, and the same order of consideration provided in the respective subsection, if accompanying or following to join, his spouse or parent.

"(2) Waiting lists of applicants for visas under this section shall be maintained in accordance with regulations prescribed by the Secretary of State.".

(2) Subsection (e) of such section, as so redesignated, is amended—

(A) by inserting "or under subsection (b)" after "subsection (a)" the first place it appears, and

(B) by striking out "subsection (a)" the second place it appears and inserting in lieu thereof "the respective subsection".

(b)(1) Section 202 (8 U.S.C. 1152) is amended by striking out subsection (e).

(2) Section 204 (8 U.S.C. 1154) is amended by striking out subsection (f).

(3) Section 245(b) (8 U.S.C. 1255(b)) is amended by striking out "202(e) or".

(c)(1)(A) Subsection (f) of section 203 (8 U.S.C. 1153), as redesignated by subsection (a)(1), is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or pursuant to paragraphs (1) through (5) of subsection (b)".

(B) Subsection (g) of such section, as so redesignated, is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or paragraphs (1) through (4) of subsection (b)" each place it appears.

(2)(A) Subsection (a) of section 204 (8 U.S.C. 1154) is amended—

(i) by striking out "paragraph (1), (4), or (5) of section 203(a)" and inserting in lieu thereof "paragraph (3) or (4) of section 203(a)",

(ii) by striking out "section 203(a)(2)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(a)",

(iii) by striking out "section 203(a)(3)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(b)", and

(iv) by striking out "section 203(a)(6)" and inserting in lieu thereof "paragraph (2) or (4) of section 203(b)".

(B) Subsection (b) of such section is amended by striking out "section 203(a) (3) or (6)" and inserting in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

(d) Section 241(a)(9) (8 U.S.C. 1251(a)(9)) is amended—

(1) by inserting "(A)" after "(9)", and

(2) by adding at the end the following new subparagraph:

"(B) was admitted as (or otherwise acquired the status of) an independent immigrant described in paragraph (3) of section 203(b) and has failed without good cause to maintain such an investment for a period of at least one year after the date of such entry (or of acquiring such status) or after the date such substantial investment was made, whichever date is later;".

Page 49, line 14, strike out "(a)".

Page 50, line 11, strike out "paragraph (3) or (6)" and all that follows through "section 203(a)(7)" on line 13 and insert in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

Page 50, strike out line 21 and all that follows through page 51, line 2.

Page 59, after line 6, insert the following new section (and insert a corresponding item in the table of contents):

EFFECTIVE DATES AND TRANSITION

SEC. . (a) The amendments made by sections 201, 202 (other than subsection (e)), and 203 shall take effect on October 1, 1983. When an immigrant, in possession of an unexpired immigrant visa issued before October 1, 1983, makes application for admission, his admissibility under section 212(a)(20) of the Immigration and Nationality Act shall be determined under the provisions of law in effect on the date of the issuance of such visa. The amendments made by the other

provisions of this part shall take effect on the date of the enactment of this Act.

(b)(1) In the case of a petition filed under section 204(a) of the Immigration and Nationality Act before October 1, 1983, such petition shall be deemed, as of such date, to be a petition for the new corresponding classification (as defined in paragraph (2)), and the priority date for such petition shall remain in effect.

(2) For purposes of paragraph (1), the term "new corresponding classification" means, in the case of a petition for a—

(A) preference status described in section 203(a)(1) of the Immigration and Nationality Act (as in effect on September 30, 1983), the status as an immediate relative described in section 201(b) of such Act;

(B) preference status described in section 203(a)(2) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(a) of such Act as in effect after such date, as the case may be;

(C) preference status described in section 203(a)(3) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(b) of such Act as in effect after such date, as the case may be;

(D) preference status described in section 203(a)(4) of such Act (as in effect on September 30, 1983), the preference status described in 203(a)(3) of such Act as in effect after such date;

(E) preference status described in section 203(a)(5) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(4) of such Act as in effect after such date; and

(F) preference status described in section 203(a)(6) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (2) or (4) of section 203(b) of such Act (as in effect after such date), as the case may be.

(c) Aliens registered in the nonpreference classification described in section 203(a)(7) of the Immigration and Nationality Act (as in effect on September 30, 1983) shall be transferred, as of October 1, 1983, to the preference status described in section 203(b)(3) of such Act or the nonpreference classification described in section 203(b)(5) of such Act (as such sections are in effect after such date), as the case may be, and the priority date for such classification shall remain in effect.

AMENDMENT (35E)

Page 49, after line 12, insert the following new sections (and redesignate the succeeding sections of part A of title II, and the table of contents and cross-references thereto, accordingly):

NUMERICAL LIMITATIONS

SEC. 201. (a)(1) Subsection (a) of section 201 (8 U.S.C. 1151) is amended to read as follows:

"(a)(1) Exclusive of aliens described in paragraph (3), aliens born in a foreign state (other than a contiguous foreign state) or dependent area who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 320,000, plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year and the number of visas issued under that subparagraph during that year, plus (iii) for fiscal years before fiscal year 1989, 66,500, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a relationship described in paragraph (1), and (2), (4), or (5) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 65,000, minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, plus (iii) for fiscal years before fiscal year 1989, 13,500, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a paragraph (3) or (6) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"(2) Exclusive of aliens described in paragraph (3), aliens born in a contiguous foreign state who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 83 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year for that foreign state and the number of visas issued under that subparagraph during that year, plus (iii) for fiscal years before fiscal year 1989, 8,300, but only available to aliens born in that contiguous state with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a relationship described in paragraph (1), (2), (4), or (5) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 17 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who were born in that contiguous foreign state and who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, plus (iii) for fiscal years before fiscal year 1989, 1,700, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of paragraph (3) or (6) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"For purposes of this paragraph, the overall numerical limitation for a contiguous foreign state for a fiscal year is 40,000, plus the number by which 40,000 (or, for fiscal years before fiscal year 1989, 50,000) exceeds the number of aliens, who are not described in paragraph (3) and were born in the other contiguous foreign state, who were issued immigrant visas or otherwise acquired the status of an alien lawfully admitted for permanent residence in the previous fiscal year.

"(3) The aliens described in this paragraph, who are not subject to the numerical limitations described in paragraphs (1) and (2)—

"(A) special immigrants defined n section 101(a)(27),

"(B) immigrants born to permanent resident aliens during a temporary visit abroad,

"(C) immediate relatives specified in subsection (b) of this section,

"(D) immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent who is such an immediate relative,

"(E) aliens who are admitted or granted asylum under section 207 or 208,

"(F) aliens provided records of permanent residence under section 214(d), and

"(G) aliens whose status is adjusted to permanent resident status under section 245A.".

(2) The first sentence of subsection (b) of such section is amended by striking out "children, spouses, and parents" inserting in lieu thereof "children, spouses, and parents" inserting in lieu thereof "children, unmarried sons, unmarried daughters, spouses, parents, and grandparents" an by inserting "and grandparents" after "of parents".

(3) Section 221 (8 U.S.C. 1201) is amended by adding at the end the following new subsection:

"(j) Notwithstanding any other provision of this Act, no alien shall be eligible to receive an immigrant visa (or to otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence) by virtue of a petition filed under section 204(a) to grant preference status to the alien by reason of the relationship described in section 203(a)(1), 203(a)(2), or 203(a)(5), filed by an individual who was admitted to the United States as an immigrant by virtue of an immediate relative petition filed by the grandson or granddaughter of the individual.".

(b) Section 202(a) (8 U.S.C. 1152(a)) is amended—

(1) by striking out "(a) No person" and inserting in lieu thereof "(a)(1) Except as specifically provided in paragraph (2) of this subsection and in section 101(a)(27), 201(b), 203, and 214(d), no person",

(2) by striking out ", except as specifically" and all that follows up to the period at the end, and

(3) by adding at the end the following new paragraph:

"(2) The total number of immigrant visas made available to natives of any single foreign state under subsections (a) (other than paragraph (1) thereof) and (b) of section 203 shall not exceed in any fiscal year—

"(A) 20,000, in the case of any foreign state other than either of the two foreign states contiguous to the United States, or

"(B) in the case of either of the foreign states contiguous to the United States, the numerical limitation for that foreign state for that fiscal year described in section 201(a)(2).".

PREFERENCE AND NONPREFERENCE ALLOCATION SYSTEMS

SEC. 202. (a)(1) Section 203 (8 U.S.C 1153) is amended—

(A) by redesignating subsections (b) through (e) as subsections (e) through (h), respectively, and

(B) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) PREFERENCE ALLOCATION FOR FAMILY REUNIFICATION IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(A) for family reunification immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in section 201(a)(2)(A) for family reunification immigrants shall be allotted visas as follows:

"(1) SPOUSES AND CHILDREN OF PERMANENT RESIDENT ALIENS.—Visas shall first be made available to qualified immigrants, in a number not to exceed 41 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (4), who are the spouses or children of aliens lawfully admitted for permanent residence.

"(2) UNMARRIED SONS AND DAUGHTERS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 15 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (1), who are the spouses or the unmarried sons or unmarried daughters of aliens lawfully admitted for permanent residence.

"(3) MARRIED SONS AND DAUGHTERS OF CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) and (2), who are the married sons or married daughters of citizens of the United States.

"(4) BROTHERS AND SISTERS OF ADULT CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 34 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (3), who are the brothers or unmarried sisters of United States citizens who are at least 21 years of age.

In allocating visa numbers to aliens under this section, aliens born in noncontiguous foreign states and dependent areas shall be treated as one group and aliens born in each of the contiguous foreign states shall be treated as separate groups.

"(b) ALLOCATION FOR INDEPENDENT IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(B) for independent immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in or section 201(a)(2)(B) for independent immigrants shall be allocated visas as follows:

"(1) ALIENS OF EXCEPTIONAL ABILITY.—Visas shall first be made available, in a number not to exceed such respective numerical limitation, to qualified immigrants who because of their exceptional ability in the sciences, arts, professions, or business will substantially benefit prospectively the national economy, cultural interests, or welfare of the United States and whose services in the sciences, arts, professions, or business are sought by an employer in the United States. In determining under this paragraph whether an immigrant has exceptional ability, the possession of a degree, diploma, certificate, or similar award from a college, university, school, or other institution of learning, or of a license to practice or certification for a particular profession or occupation shall not by itself be considered sufficient evidence of such exceptional ability.

"(2) SKILLED WORKERS.—Visas not required for classes specified in paragraph (1) shall next be made available to qualified immigrants who are capable of performing skilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(3) INVESTORS.—Visas not required for classes specified in paragraphs (1) and (2), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available—

"(A) first, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which will benefit the United States economy and create full-time employment in a high unemployment area (as defined by the Attorney General, after consultation with the Secretary of Labor, and as determined at the time of the filing of a petition for classification under this paragraph) for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant, and

"(B) then, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant.

"(4) UNSKILLED WORKERS.—Visas not required for classes specified in paragraphs (1) through (3) shall next be made available to qualified immigrants who are capable of performing unskilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(5) NONPREFERENCE IMMIGRANTS.—(A) Visas not required for the classes specified in paragraphs (1) through (4), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available to other qualified immigrants who are not entering the country to perform skilled or unskilled labor in the chronological order in which they qualify.

"(B) No immigrant visa shall be issued under this paragraph to an adopted child or prospective adopted child of a United States citizen or lawfully resident alien unless (i) a valid home-study has been favorably recommended by an agency of the State of the child's proposed residence, or by an agency authorized by that State to conduct such a study, or, in the case of a child adopted abroad, by an appropriate public or private adoption agency which is licensed in the United States, and (ii) the child has been irrevocably released for immigration and adoption. No natural parent or prior adoptive parent of any such child shall thereafter, by virtue of such parentage, be accorded any right, privilege, or status under this Act. No immigrant visa shall otherwise be issued under this paragraph to an unmarried child under 16 years of age except a child who is accompanying or following to join his natural parent.

An immigrant visa shall not be issued to an immigrant under paragraph (1), (2), or (4) until the consular officer is in receipt of a determination made by the Secretary of Labor pursuant to the provisions of section 212(a)(14).

"(c) GUIDE FOR ALLOCATION BETWEEN PREFERENCE SYSTEMS.—Where it is determined that the maximum number of visas will be made available under section 202(a)(2) to natives of any single foreign state (defined in section 202(c)) in any fiscal year, in determining whether to provide for visas to such natives under the preference system described in subsection (a) or that described in subsection (b), visa numbers with respect to natives of that state or dependent area shall be allocated (to the extent practicable and otherwise consistent with this section) in a manner so that the ratio of—

"(A) the number of family reunification immigrants described in subsection (a) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year, to

"(B) the number of independent immigrants described in subsection (b) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year,

is equal to 3 to 1.

"(d)(1) A spouse or child as defined in subparagraph (A), (B), (C), (D), or (E) of section 101(b)(1) and shall, if not otherwise entitled to an immigrant status and the immediate issuance of a visa under subsection (a) or (b), be entitled to the same status, and the same order of consideration provided in the respective subsection, if accompanying or following to join, his spouse or parent.

"(2) Waiting lists of applicants for visas under this section shall be maintained in accordance with regulations prescribed by the Secretary of State.".

(2) Subsection (e) of each section, as so redesignated, is amended—

(A) by inserting "or under subsection (b)" after "subsection (a)" the first place it appears, and

(B) by striking out "subsection (a)" the second place it appears and inserting in lieu thereof "the respective subsection".

(b)(1) Section 202 (8 U.S.C. 1152) is amended by striking out subsection (e).

(2) Section 204 (8 U.S.C. 1154) is amended by striking out subsection (f).

(3) Section 245(b) (8 U.S.C. 1255(b)) is amended by striking out "202(e) or".

(c)(1)(A) Subsection (f) of section 203 (8 U.S.C. 1153), as redesignated by subsection (a)(1), is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or pursuant to paragraphs (1) through (5) of subsection (b)".

(B) Subsection (g) of such section, as so redesignated, is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsec-

tion (a) or paragraphs (1) through (4) of subsection (b)" each place it appears.

(2)(A) Subsection (a) of section 204 (8 U.S.C. 1154) is amended—

(i) by striking out "paragraph (1), (4), or (5) of section 203(a)" and inserting in lieu thereof "paragraph (3) or (4) of section 203(a)",

(ii) by striking out "section 203(a)(2)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(a)",

(iii) by striking out "section 203(a)(3)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(b)", and

(iv) by striking out "section 203(a)(6)" and inserting in lieu thereof "paragraph (2) or (4) of section 203(b)".

(B) Subsection (b) of such section is amended by striking out "section 203(a) (3) or (6)" and inserting in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

(d) Section 241(a)(9) (8 U.S.C. 1251(a)(9)) is amended—

(1) by inserting "(A)" after "(9)", and

(2) by adding at the end the following new subparagraph:

"(B) was admitted as (or otherwise acquired the status of) an independent immigrant described in paragraph (3) of section 203(b) and has failed without good cause to maintain such an investment for a period of at least one year after the date of such entry (or of acquiring such status) or after the date such substantial investment was made, whichever date is later;".

Page 49, line 49, strike out "(a)".

Page 50, line 11, strike out "paragraph (3) or (6)" and all that follows through "section 203(a)(7)" on line 13 and insert in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

Page 50, strike out line 21 and all that follows through page 51, line 2.

Page 59, after line 6, insert the following new section (and insert a corresponding item in the table of contents):

EFFECTIVE DATES AND TRANSITION

SEC. . (a) The amendments made by sections 201, 202 (other than subsection (e)), and 203 shall take effect on October 1, 1983. When an immigrant, in possession of an unexpired immigrant visa issued before October 1, 1983, makes application for admission, his admissibility under section 212(a)(20) of the Immigration and Nationality Act shall be determined under the provisions of law in effect on the date of the issuance of such visa. The amendments made by the other provisions of this part shall take effect on the date of the enactment of this Act.

(b)(1) In the case of a petition filed under section 204(a) of the Immigration and Nationality Act before October 1, 1983, such petition shall be deemed, as of such date, to be a petition for the new corresponding classification (as defined in paragraph (2)), and the priority date for such petition shall remain in effect.

(2) For purposes of paragraph (1), the term "new corresponding classification" means, in the case of a petition for a—

(A) preference status described in section 203(a)(1) of the Immigration and Nationality Act (as in effect on September 30, 1983), the status as an immediate relative described in section 202(b) of such Act;

(B) preference status described in section 203(a)(2) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(a) of such Act as in effect after such date, as the case may be;

(C) preference status described in section 203(a)(3) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(b) of such Act as in effect after such date, as the case may be;

(D) preference status described in section 203(a)(4) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(3) of such Act as in effect after such date;

(E) preference status described in section 203(a)(5) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(4) of such Act as in effect after such date; and

(F) preference status described in section 203(a)(6) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (2) or (4) of section 203(b) of such Act (as in effect after such date, as the case may be.

(c) Aliens registered in the nonpreference classification described in section 203(a)(7) of the Immigration and Nationality Act (as in effect on September 30, 1983) shall be transferred, as of October 1, 1983, to the preference status described in section 203(b)(3) of such Act or the nonpreference classification described in section 203(b)(5) of such Act (as such sections are in effect after such date), as the case may be, and the priority date for such classification shall remain in effect.

AMENDMENT (35F)

Page 49, after line 12, insert the following new sections (and redesignate the succeeding sections of part A of title II, and the table of contents and cross-references thereto, accordingly):

NUMERICAL LIMITATIONS

SEC. 210. (a)(1) Subsection (a) of section 201 (8 U.S.C. 1151) is amended to read as follows:

"(a)(1) Exclusive of aliens described in paragraph (3), aliens born in a foreign state (other than a contiguous foreign state) or dependent area who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 320,000, plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year and the number of visas issued under that subparagraph during that year, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 65,000, minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"(2) Exclusive of aliens described in paragraph (3), aliens born in a contiguous foreign state who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 83 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year for that foreign state and the number of visas issued under that subparagraph during that year, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 17 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who were born in that contiguous foreign state and who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"For purposes of this paragraph, the overall numerical limitation for a contiguous foreign state for a fiscal year is 40,000, plus the number by which 40,000 exceeds the number of aliens, who are not described in paragraph (3) and were born in the other contiguous foreign state, who were issued immigrant visas or otherwise acquired the status of an alien lawfully admitted for permanent residence in the previous fiscal year.

"(3) The aliens described in this paragraph, who are not subject to the numerical limitations described in paragraphs (1) and (2), are—

"(A) special immigrants defined in section 101(a)(27),

"(B) immigrants born to permanent resident aliens during a temporary visit abroad,

"(C) immediate relatives specified in subsection (b) of this section,

"(D) immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent who is such an immediate relative,

"(E) aliens who are admitted or granted asylum under section 207 or 208,

"(F) aliens provided records of permanent residence under section 214(d), and

"(G) aliens whose status is adjusted to permanent resident status under section 245A.".

(2) The first sentence of subsection (b) of such section is amended by striking out "children, spouses, and parents" inserting in lieu thereof "children, unmarried sons, unmarried daughters, spouses, parents, and grandparents," and by inserting "and grandparents" after "of parents".

(3) Section 221 (8 U.S.C. 1201) is amended by adding at the end the following new subsection:

"(j) Notwithstanding any other provision of this Act, no alien shall be eligible to receive an immigrant visa (or to otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence) by virtue of a petition filed under section 204(a) to grant preference status to the alien by reason of the relationship described in section 203(a)(1), 203(a)(2), or 203(a)(5), filed by an individual who was admitted to the United States as an immigrant by virtue of an immediate relative petition

filed by the grandson or granddaughter of the individual.".

(b) Section 202(a) (8 U.S.C. 1152(a)) is amended—

(1) by striking out "(a) No person." and inserting in lieu thereof "(a)(1) Except as specifically provided in paragraph (2) of this subsection and in section 101(a)(27), 201(b), 203, and 214(d), no person",

(2) by striking out ", except as specifically" and all that follows up to the period at the end, and

(3) by adding at the end the following new paragraph:

"(2) The total number of immigrant visas made available to natives of any single foreign state under subsections (a) (other than paragraph (1) thereof) and (b) of section 203 shall not exceed in any fiscal year—

"(A) 20,000, in the case of any foreign state other than either of the two foreign states contiguous to the United States, or

"(B) in the case of either of the foreign states contiguous to the United States, the numerical limitation for that foreign state for that fiscal year described in section 201(a)(2).".

PREFERENCE AND NONPREFERENCE ALLOCATION SYSTEMS

SEC. 202. (a)(1) Section 203 (8 U.S.C. 1153) is amended—

(A) by redesignating subsections (b) through (e) as subsections (e) through (h), respectively, and

(B) By striking out subsection (a) and inserting in lieu thereof the following:

"(a) PREFERENCE ALLOCATION FOR FAMILY REUNIFICATION IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(A) for family reunification immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in section 201(a)(1)(A) for family reunification immigrants shall be allotted visas as follows:

"(1) SPOUSES AND CHILDREN OF PERMANENT RESIDENT ALIENS.—Visas shall first be made available to qualified immigrants, in a number not to exceed 41 percent of such respective numerical limitation plus any visas not requied for the class specified in paragraph (4), who are the spouses or children of aliens lawfully admitted for permanent residence.

"(2) UNMARRIED SONS AND DAUGHTERS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 15 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (1), who are the spouses or the unmarried sons or unmarried daughters of aliens lawfully admitted for permanent residence.

"(3) MARRIED SONS AND DAUGHTERS OF CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) and (2), who are the married sons or married daughters of citizens of the United States.

"(4) BROTHERS AND SISTERS OF ADULT CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 34 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (3), who are the brothers or unmarried sisters of United States citizens who are at least 21 years of age.

In allocating visa numbers to aliens under this section, aliens born in noncontiguous foreign states and dependent areas shall be treated as one group and aliens born in each of the contiguous foreign states shall be treated as separate groups.

"(b) ALLOCATION FOR INDEPENDENT IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(B) for independent immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in or section 201(a)(2)(B) for independent immigrants shall be allocated visas as follows:

"(1) ALIENS OF EXCEPTIONAL ABILITY.—Visas shall first be made available, in a number not to exceed such respective numerical limitation, to qualified immigrants who because of their exceptional ability in the sciences, arts, professions, or business will substantially benefit propectively the national economy, cultural interests, or welfare of the United States and whose services in the sciences, arts, professions, or whose services in the sciences, arts, professions, or businesses are sought by an employer in the United States. In determining under this paragraph whether an immigrant has exceptional ability, the possession of a degree, diploma, certificate, or similar award from a college, university, school, or other institution of learning, or a license to practice or certification for a particular profession or occupation shall not by itself be considered sufficient evidence of such exceptional ability.

"(2) SKILLED WORKERS.—Visas not required for classes specified in paragraph (1) shall next be made available to qualified immigrants who are capable of performing skilled labor, not of a temporary or seasonal nature, for which qualifed workers are not available in the United States.

"(3) INVESTORS.—Visas not required for classes specified in paragraphs (1) and (2), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available—

"(A) first, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment in a high unemployment area (as defined by the Attorney General, after consultation with the Secretary of Labor, and as determined at the time of the filing of a petition for classification under this paragraph) for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant, and

"(B) then, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant.

"(4) UNSKILLED WORKERS.—Visas not required for classes specified in paragraphs (1) through (3) shall next be made available to qualified immigrants who are capable of performing unskilled labor, not of a temporary or seasonal nature, for which qualifed workers are not available in the United States.

"(5) NONPREFERENCE IMMIGRANTS.—(A) Visas not required for the classes specified in paragraphs (1) through (4), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available to other qualified immigrants who are not entering the country to perform skilled or unskilled labor in the chronological order in which they qualify.

"(B) No immigrant visa shall be issued under this paragraph to an adopted child or prospective adopted child of a United States citizen or lawful resident alien unless (i) a valid home-study has been favorably recommended by an agency of the State of the child's proposed residence, or by an agency authorized by that State to conduct such a study, or, in the case of a child adopted abroad, by an appropriate public or private adoption agency which is licensed in the United States, and (ii) the child has been irrevocably released for immigration and adoption. No natural parent or prior adoptive parent of any such child shall thereafter, by virtue of such parentage, be accorded any right, privilege, or status under this Act. No immigrant visa shall otherwise be issued under this paragraph to an unmarried child under 16 years of age except a child who is accompanying or following to join his natural parent.

An immigrant visa shall not be issued to an immigrant under paragraph (1), (2), or (4) until the consular officer is in receipt of a determination made by the Secretary of Labor pursuant to the provisions of section 212(a)(14).

"(c) GUIDE FOR ALLOCATION BETWEEN PREFERENCE SYSTEMS.—Where it is determined that the maximum number of visas will be made available under section 202(a)(2) to natives of any single foreign state (defined in section 202(b)) or any dependent area (defined in section 202(c)) in any fiscal year, in determining whether to provide for visas to such natives under the preference system described in subsection (a) or that described in subsection (b), visa numbers with respect to natives of that state or dependent area shall be allocated (to the extent practicable and otherwise consistent with this section) in a manner so that the ratio of—

"(A) the number of family reunification immigrants described in subsection (a) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year, to

"(B) the number of independent immigrants described in subsection (b) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year,

is equal to 3 to 1.

"(d)(1) A spouse or child as defined in subparagraph (A), (B), (C), (D), or (E) of section 101(b)(1) and shall, if not otherwise entitled to an immigrant status and the immediate issuance of a visa under subsection (a) or (b), be entitled to the same status, and the same order of consideration provided in the respective subsection, if accompanying or following to join, his spouse or parent.

"(2) Waiting lists of applicants for visas under this section shall be maintained in accordance with regulations prescribed by the Secretary of State.".

(2) Subsection (e) of such section, as so redesignated, is amended—

(A) by inserting "or under subsection (b)" after "subsection (a)" the first place it appears, and

(B) by striking out "subsection (a)" the second place it appears and inserting in lieu thereof "the respective subsection".

(b)(1) Section 202 (8 U.S.C. 1152) is amended by striking out subsection (e).

(2) Section 204 (8 U.S.C. 1154) is amended by striking out subsection (f).

(3) Section 245(b) (8 U.S.C. 1155(b)) is amended by striking out "202(e) or".

(c)(1)(A) Subsection (f) of section 203 (8 U.S.C. 1153), as redesignated by subsection (a)(1), is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or pursuant to paragraphs (1) through (5) of subsection (b)".

(B) Subsection (g) of such section, as so redesignated, is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or paragraphs (1) through (4) of subsection (b)" each place it appears.

(2)(A) Subsection (a) of section 204 (8 U.S.C. 1154) is amended—

(i) by striking out "paragraph (1), (4), or (5) of section 203(a)" and inserting in lieu thereof "paragraph (3) or (4) of section 203(a)",

(ii) by striking out "section 203(a)(2)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(a)",

(iii) by striking out section 203(a)(3)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(b)", and

(iv) by striking out section 203(a)(6)" and inserting in lieu thereof "paragraph (2) or (4) of section 203(b)".

(B) Subsection (b) of such section is amended by striking out "section 203(a) (3) or (6)" and inserting in lieu thereof "paragraph (1), (2) or (4) of section 203(b)".

(d) Section 241(a)(9) (8 U.S.C. 1251(a)(9)) is amended—

(1) by inserting "(A)" after "(9)", and

(2) by adding at the end the following new subparagraph:

"(B) was admitted as (or otherwise acquired the status of) an independent immigrant described in paragraph (3) of section 203(b) and has failed without good cause to maintain such an investment for a period of at least one year after the date of such entry (or of acquiring such status) or after the date such substantial investment was made, whichever date is later;".

Page 49, line 14, strike out "(a)".

Page 50, line 11, strike out "paragraph (3) or (6)" and all that follows through "section 203(a)(7)" on line 13 and insert in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

Page 50, strike out line 21 and all that follows through page 51, line 2.

Page 59, after line 6, insert the following new section (and insert a corresponding item in the table of contents):

EFFECTIVE DATES AND TRANSITION

SEC. . (a) The amendments made by sections 201, 202 (other than subsection (e)), and 203 shall take effect on October 1, 1983. When an immigrant, in possession of an unexpired immigrant visa issued before October 1, 1983, makes application for admission, his admissibility under section 212(a)(20) of the Immigration and Nationality Act shall be determined under the provisions of law in effect on the date of the issuance of such visa. The amendments made by the other provisions of this part shall take effect on the date of the enactment of this Act.

(b)(1) In the case of a petition filed under section 204(a) of the Immigration and Nationality Act before October 1, 1983, such petition shall be deemed, as of such date, to be a petition for the new corresponding classification (as defined in paragraph (2)), and the priority date for such petition shall remain in effect.

(2) For purposes of paragraph (1), the term "new corresponding classification" means, in the case of a petition for a—

(A) preference status described in section 203(a)(1) of the Immigration and Nationality Act (as in effect on September 30, 1983), the status as an immediate relative described in section 201(b) of such Act;

(B) preference status described in section 203(a)(2) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(a) of such Act as in effect after such date, as the case may be;

(C) preference status described in section 203(a)(3) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(b) of such Act as in effect after such date, as the case may be;

(D) preference status described in section 203(a)(4) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(3) of such Act as in effect after such date;

(E) preference status described in section 203(a)(5) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(4) of such Act as in effect after such date; and

(F) preference status described in section 203(a)(6) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (2) or (4) of section 203(b) of such Act (as in effect after such date), as the case may be.

(c) Aliens registered in the nonpreference classification described in section 203(a)(7) of the Immigration and Nationality Act (as in effect on September 30, 1983) shall be transferred, as of October 1, 1983, to the preference status described in section 203(b)(3) of such Act or the nonpreference classification described in section 203(b)(5) of such Act (as such sections are in effect after such date), as the case may be, and the priority date for such classification shall remain in effect.

AMENDMENT (35G)

Page 49, after line 12, insert the following new sections (and redesignate the succeeding sections of part A of title II, and the table of contents and cross-references thereto, accordingly):

NUMERICAL LIMITATIONS

SEC. 201. (a)(1) Subsection (a) of section 201 (8 U.S.C. 1151) is amended to read as follows:

"(a)(1) Exclusive of aliens described in paragraph (3), aliens born in a foreign state (other than a contiguous foreign state) or dependent area who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 320,000, plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year and the number of visas issued under that subparagraph during that year, plus (iii) for fiscal years before fiscal year 1989, 66,500, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a relationship described in paragraph (1), (2), (4), or (5) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 65,000, minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, plus (iii) for fiscal years before fiscal year 1989, 13,500, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of paragraph (3) or (6) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"(2) Exclusive of aliens described in paragraph (3), aliens born in a contiguous foreign state who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 83 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year for that foreign state and the number of visas issued under that subparagraph during that year, plus (iii) for fiscal years before fiscal year 1989, 8,300, but only available to aliens born in that contiguous state with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a relationship described in paragraph (1), (2), (4), or (5) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 17 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who were born in that contiguous foreign state and who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to United States for permanent residence, plus (iii) for fiscal years before fiscal year 1989, 1,700, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of

paragraph (3) or (6) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"For purposes of this paragraph, the overall numerical limitation for a contiguous foreign state for a fiscal year is 40,000, plus the number by which 40,000 (or, for fiscal years before fiscal year 1989, 50,000) exceeds the number of aliens, who are not described in paragraph (3) and were born in the other contiguous foreign state, who were issued immigrant visas or otherwise acquired the status of an alien lawfully admitted for permanent residence in the previous fiscal year.

"(3) The aliens described in this paragraph, who are not subject to the numerical limitations described in paragraphs (1) and (2), are—

"(A) special immigrants defined in section 101(a)(27),

"(B) immigrants born to permanent resident aliens during a temporary visit abroad,

"(C) immediate relatives specified in subsection (b) of this section,

"(D) immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent who is such an immediate relative,

"(E) aliens who are admitted or granted asylum under section 207 or 208,

"(F) aliens provided records of permanent residence under section 214(d), and

"(G) aliens whose status is adjusted to permanent resident status under section 245A.".

(2) The first sentence of subsection (b) of such section is amended by striking out "children, spouses, and parents" inserting in lieu thereof "children, unmarried sons, unmarried daughters, spouses, parents, and grandparents" and by inserting "and grandparents" after "of parents".

(3) Section 221 (8 U.S.C. 1201) is amended by adding at the end the following new subsection:

"(j) Notwithstanding any other provision of this Act, no alien shall be eligible to receive an immigrant visa (or to otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence) by virtue of a petition filed under section 204(a) to grant preference status to the alien by reason of the relationship described in section 203(a)(1), 203(a)(2), or 203(a)(5), filed by an individual who was admitted to the United States as an immigrant by virtue of an immediate relative petition filed by the grandson or granddaughter of the individual.".

(b) Section 202(a) (8 U.S.C. 1152(a)) is amended—

(1) by striking out "(a) No person" and inserting in lieu thereof "(a)(1) Except as specifically provided in paragrpah (2) of this subsection and in sections 101(a)(27), 201(b), 203, and 214(d), no person",

(2) by striking out ", except as specifically" and all that follows up to the period at the end, and

(3) by adding at the end of the following new paragraph:

"(2) The total number of immigrant visas made available to natives of any single foreign state under subsections (a) and (b) of section 203 shall not exceed in any fiscal year—

"(A) 20,000, in the case of any foreign state other than either of the two foreign states contiguous to the United States, or

"(B) in the case of either of the foreign states contiguous to the United States, the numerical limitation for that foreign state for that fiscal year described in section 201(a)(2).".

PREFERENCE AND NONPREFERENCE ALLOCATION SYSTEMS

SEC. 202. (a)(1) Section 203 (8 U.S.C. 1153) is amended—

(A) by redesignating subsections (b) through (e) as subsections (e) through (h), respectively, and

(B) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) PREFERENCE ALLOCATION FOR FAMILY REUNIFICATION IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(A) for family reunification immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in section 201(a)(2)(A) for family reunification immigrants shall be allotted visas as follows:

"(1) SPOUSES AND CHILDREN OF PERMANENT RESIDENT ALIENS.—Visas shall first be made available to qualified immigrants, in a number not to exceed 41 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (4), who are the spouses or children of aliens lawfully admitted for permanent residence.

"(2) UNMARRIED SONS AND DAUGHTERS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 15 percent of such respective numerical limitation plus any visas not required for the class specified in paragrpah (1), who are the spouses or the unmarried sons or unmarried daughters of aliens lawfully admitted for permanent residence.

"(3) MARRIED SONS AND DAUGHTERS OF CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) and (2), who are the married sons or married daughters of citizens of the United States.

"(4) BROTHERS AND SISTERS OF ADULT CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 34 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (3), who are the brothers or unmarried sisters of United States citizens who are at least 21 years of age.

In allocating visa numbers to aliens under this section, aliens born in noncontiguous foreign states and dependent areas shall be treated as one group and aliens born in each of the contiguous foreign states shall be treated as separate groups.

"(b) ALLOCATION FOR INDEPENDENT IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(B) for independent immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in or section 201(a)(2)(B) for independent immigrants shall be allocated visas as follows:

"(1) ALIENS OF EXCEPTIONAL ABILITY.—Visas shall first be made available, in number not to exceed such respective numerical limitation, to qualified immigrants who because of their exceptional ability in the sciences, arts, professions, or business will substantially benefit prospectively the national economy, cultural interests, or welfare of the United States and whose services in the sciences, arts, professions, or business are sought by an employer in the United States. In determining under this paragraph whether an immigrant has exceptional ability, the possession of a degree, diploma, certificate, or similar award from a college, university, school, or other institution of learning, or of a license to practice or certification for a particular profession or occupation shall not by itself be considered sufficient evidence of such exceptional ability.

"(2) SKILLED WORKERS.—Visas not required for classes specified in paragraph (1) shall next be made available to qualified immigrants who are capable of performing skilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(3) INVESTORS.—Visas not required for classes specified in paragraphs (1) and (2), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available—

"(A) first, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment in a high unemployment area (as defined by the Attorney General, after consultation with the Secretary of Labor, and as determined at the time of the filing of a petition for classification under this paragraph) for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant, and

"(B) then, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant.

"(4) UNSKILLED WORKERS.—Visas not required for classes specified in paragraphs (1) through (3) shall next be made available to qualified immigrants who are capable of performing unskilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(5) NONPREFERENCE IMMIGRANTS.—(A) Visas not required for the classes specified in paragraphs (1) through (4), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available to other qualified immigrants who are not entering the country to perform skilled or unskilled labor in the chronological order in which they qualify.

"(B) No immigrant visa shall be issued under this paragraph to an adopted child or prospective adopted child of a United States citizen or lawful resident alien unless (i) a valid home-study has been favorably recommended by an agency of the State of the child's proposed residence, or by an agency authorized by that State to conduct such a study, or, in the case of a child adopted abroad, by an appropriate public or private adoption agency which is licensed in the United States, and (ii) the child has been irrevocably released for immigration and adoption. No natural parent or prior adoptive parent of any such child shall thereafter, by virtue of such parentage, be accorded any right, privilege, or status under this Act.

No immigrant visa shall otherwise be issued under this paragraph to an unmarried child under 16 years of age except a child who is accompanying or following to join his natural parent.

An immigrant visa shall not be issued to an immigrant under paragraph (1), (2), or (4) until the consular officer is in receipt of a determination made by the Secretary of Labor pursuant to the provisions of section 212(a)(14).

"(c) GUIDE FOR ALLOCATION BETWEEN PREFERENCE SYSTEMS.—Where it is determined that the maximum number of visas will be made available under section 202(a)(2) to natives of any single foreign state (defined in section 202(b)) or any dependent area (defined in section 202(c)) in any fiscal year, in determining whether to provide for visas to such natives of that state or dependent area shall be allocated (to the extent practicable and otherwise consistent with this section) in a manner so that the ratio of—

"(A) the number of family reunification immigrants described in subsection (a) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year, to

"(B) the number of family reunification immigrants described in subsection (b) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year,

is equal to 3 to 1.

"(d)(1) A spouse or child as defined in subparagraph (A), (B), (C), (D), or (E) of section 101(b)(1) and shall, if not otherwise entitled to an immigrant status and the immediate issuance of a visa under subsection (a) or (b), be entitled to the same status, and the same order of consideration provided in the respective subsection, if accompanying or following to join, his spouse or parent.

"(2) Waiting lists of applicants for visas under this section shall be maintained in accordance with regulations prescribed by the Secretary of State.".

(2) Subsection (e) of such section, as so redesignated, is amended—

(A) by inserting "or under subsection (b)" after "subsection (a)" the first place it appears, and

(B) by striking out "subsection (a)" the second place it appears and inserting in lieu thereof "the respective subsection".

(b)(1) Section 202 (8 U.S.C. 1152) is amended by striking out subsection (e).

(2) Section 204 (8 U.S.C. 1154) is amended by striking out subsection (f).

(3) Section 245(b) (8 U.S.C. 1255(b)) is amended by striking out "202(e) or".

(c)(1)(A) Subsection (f) of section 203 (8 U.S.C. 1153), as redesignated by subsection (a)(1), is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or pursuant to paragraphs (1) through (5) of subsection (b)".

(B) Subsection (g) of such section, as so redesignated, is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or paragraphs (1) through (4) of subsection (b)" each place it appears.

(2)(A) Subsection (a) of section 204 (8 U.S.C. 1154) is amended—

(i) by striking out "paragraph (1), (4), or (5) of section 203(a)" and inserting in lieu thereof "paragraph (3) or (4) of section 203(a)",

(ii) by striking out "section 203(a)(2)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(a)",

(iii) by striking out "section 203(a)(3)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(b)", and

(iv) by striking out "section 203(a)(6)" and inserting in lieu thereof "paragraph (2) or (4) of section 203(b)".

(B) Subsection (b) of such section is amended by striking out "section 203(a) (3) or (6)" and inserting in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

(d) Section 241(a)(9) (8 U.S.C. 1251(a)(9)) is amended—

(1) by inserting "(A)" after "(9)", and

(2) by adding at the end the following new subparagraph:

"(B) was admitted as (or otherwise acquired the status of) an independent immigrant described in paragraph (3) of section 203(b) and has failed without good cause to maintain such an investment for a period of at least one year after the date of such entry (or of acquiring such status) or after the date such substantial investment was made, whichever date is later;".

Page 49, line 14, strike out "(a)".

Page 50, line 11, strike out "paragraph (3) or (6)" and all that follows through "section 203(a)(7)" on line 13 and insert in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

Page 50, strike out line 21 and all that follows through page 51, line 2.

Page 59, after line 6, insert the following new section (and insert a corresponding item in the table of contents):

EFFECTIVE DATES AND TRANSITION

SEC. . (a) The amendments made by sections 201, 202 (other than subsection (e)), and 203 shall take effect on October 1, 1983. When an immigrant, in possession of an unexpired immigrant visa issued before October 1, 1983, makes application for admission, his admissibility under section 212(a)(20) of the Immigration and Nationality Act shall be determined under the provisions of law in effect on the date of the issuance of such visa. The amendments made by the other provisions of this part shall take effect on the date of the enactment of this Act.

(b)(1) In the case of a petition filed under section 204(a) of the Immigration and Nationality Act before October 1, 1983, such petition shall be deemed, as of such date, to be a petition for the new corresponding classification (as defined in paragraph (2)), and the priority date for such petition shall remain in effect.

(2) For purposes of paragraph (1), the term "new corresponding classification" means, in the case of a petition for a—

(A) preference status described in section 203(a)(1) of the Immigration and Nationality Act (as in effect on September 30, 1983), the status as an immediate relative described in section 201(b) of such Act;

(B) preference status described in section 203(a)(2) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(a) of such Act as in effect after such date, as the case may be;

(C) preference status described in section 203(a)(3) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(b) of such Act as in effect after such date, as the case may be;

(D) preference status described in section 203(a)(4) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(3) of such Act as in effect after such date;

(E) preference status described in section 203(a)(5) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(4) of such Act as in effect after such date; and

(F) preference status described in section 203(a)(6) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (2) or (4) of section 203(b) of such Act (as in effect after such date), as the case may be.

(c) Aliens registered in the nonpreference classification described in section 203(a)(7) of the Immigration and Nationality Act (as in effect on September 30, 1983) shall be transferred, as of October 1, 1983, to the preference status described in section 203(b)(3) of such Act or the nonpreference classification described in section 203(b)(5) of such Act (as such sections are in effect after such date), as the case may be, and the priority date for such classification shall remain in effect.

AMENDMENT (35H)

Page 49, after line 12, insert the following new sections (and redesignate the succeeding sections of part A of title II, and the table of contents and cross-references thereto, accordingly):

NUMERICAL LIMITATIONS

SEC. 201. (a)(1) Subsection (a) of section 201 (8 U.S.C. 1151) is amended to read as follows:

"(a)(1) Exclusive of aliens described in paragraph (3), aliens born in a foreign state (other than a contiguous foreign state) or dependent area who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 320,000, plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year and the number of visas issued under that subparagraph during that year, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 65,000, minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"(2) Exclusive of aliens described in paragraph (3), aliens born in a contiguous foreign state who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 83 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year

for that foreign state and the number of visas issued under that subparagraph during that year, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 17 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who were born in that contiguous foreign state and who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"For purposes of this paragraph, the overall numerical limitation for a contiguous foreign state for a fiscal year is 40,000, plus the number by which 40,000 exceeds the number of aliens, who are not described in paragraph (3) and were born in the other contiguous foreign state, who were issued immigrant visas or otherwise acquired the status of an alien lawfully admitted for permanent residence in the previous fiscal year.

"(3) The aliens described in this paragraph, who are not subject to the numerical limitations described in paragraphs (1) and (2), are—

"(A) special immigrants defined in section 101(a)(27),

"(B) immigrants born to permanent resident aliens during a temporary visit abroad,

"(C) immediate relatives specified in subsection (b) of this section,

"(D) immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent who is such an immediate relative,

"(E) aliens who are admitted or granted asylum under section 207 or 208,

"(F) aliens provided records of permanent residence under section 214(d), and

"(G) aliens whose status is adjusted to permanent resident status under section 245A.".

(2) The first sentence of subsection (b) of such section is amended is striking out "children, spouses, and parents" inserting in lieu thereof "children, unmarried sons, unmarried daughters, spouses, parents, and grandparents" and by inserting "and grandparents" after "of parents".

(3) Section 221 (8 U.S.C. 1201) is amended by adding at the end the following new subsection:

"(j) Notwithstanding any other provision of this Act, no alien shall be eligible to receive an immigrant visa (or to otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence) by virtue of a petition filed under section 204(a) to grant preference status to the alien by reason of the relationship described in section 203(a)(1), 203(a)(2), or 203(a)(5), filed by an individual who was admitted to the United States as an immigrant by virtue of an immediate relative petition filed by the grandson or granddaughter of the individual.".

(b) Section 202(a) (8 U.S.C. 1152(a)) is amended—

(1) by striking out "(a) No person" and inserting in lieu thereof "(a)(1) Except as specifically provided in paragraph (2) of this subsection and in section 101(a)(27), 201(b), 203, and 214(b), no person",

(2) by striking out, ", except as specifically" and all that follows up to the period at the end, and

(3) by adding at the end the following new paragraph:

"(2) The total number of immigrant visas made available to natives of any single foreign state under subsections (a) and (b) of section 203 shall not exceed in any fiscal year—

"(A) 20,000, in the case of any foreign state other than either of the two foreign states contiguous to the United States, or

"(B) in the case of either of the foreign states contiguous to the United States, the numerical limitation for that foreign state for that fiscal year described in section 201(a)(2).".

PREFERENCE AND NONPREFERENCE ALLOCATION SYSTEMS

SEC. 202. (a)(1) Section 203 (8 U.S.C. 1153) is amended—

(A) by redesignating subsections (b) through (e) as subsections (e) through (h), respectively, and

(B) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) PREFERENCE ALLOCATION FOR FAMILY REUNIFICATION IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(A) for family reunification immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in section 201(a)(2)(A) for family reunification immigrants shall be allotted visas as follows:

"(1) SPOUSES AND CHILDREN OF PERMANENT RESIDENT ALIENS.—Visas shall first be made available to qualified immigrants, in a number not to exceed 41 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (4), who are the spouses or children of aliens lawfully admitted for permanent residence.

"(2) UNMARRIED SONS AND DAUGHTERS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 15 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (1), who are the spouses or the unmarried sons or unmarried daughters of aliens lawfully admitted for permanent residence.

"(3) MARRIED SONS AND DAUGHTERS OF CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) and (2), who are the married sons or married daughters of citizens of the United States.

"(4) BROTHERS AND SISTERS OF ADULT CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 34 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (3), who are the brothers or unmarried sisters of United States citizens who are at least 21 years of age.

In allocating visa numbers to aliens under this section, aliens born in noncontiguous foreign states and dependent areas shall be treated as one group and aliens born in each of the contiguous foreign states shall be treated as separate groups.

"(b) ALLOCATION FOR INDEPENDENT IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(B) for independents immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in or section 201(a)(2)(B) for independent immigrants shall be allocated visas as follows:

"(1) ALIENS OF EXCEPTIONAL ABILITY.—Visas shall first be made available, in a number not to exceed such respective numerical limitation, to qualified immigrants who because of their exceptional ability in the sciences, arts, professions, or business will substantially benefit prospectively the national economy, cultural interests, or welfare of the United States and whose services in the sciences, arts, professions, or business are sought by an employer in the United States. In determining under this paragraph whether an immigrant has exceptional ability, the possession of a degree, diploma, certificate, or similar award from a college, university, school, or other institution of learning, or of a license to practice or certification for a particular profession or occupation shall not by itself be considered sufficient evidence of such exceptional ability.

"(2) SKILLED WORKERS.—Visas not required for classes specified in paragraph (1) shall next be made available to qualified immigrants who are capable of performing skilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(3) INVESTORS.—Visas not required for classes specified in paragraphs (1) and (2), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available—

"(A) first, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment in a high unemployment area (as defined by the Attorney General, after consultation with the Secretary of Labor, and as determined at the time of the filing of a petition for classification under this paragraph) for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant, and

"(B) then, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant.

"(4) UNSKILLED WORKERS.—Visas not required for classes specified in paragraphs (1) through (3) shall next be made available to qualified immigrants who are capable of performing unskilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(5) NONPREFERENCE IMMIGRANTS.—(A) Visas not required for the classes specified in paragraphs (1) through (4), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available to other qualified immigrants who are not entering the country to perform skilled or unskilled labor in the chronological order in which they qualify.

"(B) No immigrant visa shall be issued under this paragraph to an adopted child or prospective adopted child of a United States citizen or lawful resident alien unless (i) a valid home-study has been favorably recommended by an agency of the State of the child's proposed residence, or by an agency authorized by that State to conduct such a study, or, in the case of a child adopted abroad, by an appropriate public or private adoption agency which is licensed in the United States, and (ii) the child has been irrevocably released for immigration and adoption. No natural parent or prior adoptive parent of any such child shall thereafter, by virtue of such parentage, be accorded any right, privilege, or status under this Act. No immigrate visa shall otherwise be issued under this paragraph to an unmarried child under 16 years of age except a child who is accompanying or following to join his natural parent.

An immigrant visa shall not be issued to an immigrant under paragraph (1), (2), or (4) until the consular officer is in receipt of a determination made by the Secretary of Labor pursuant to the provisions of section 212(a)(14).

"(c) GUIDE FOR ALLOCATION BETWEEN PREFERENCE SYSTEMS.—Where it is determined that the maximum number of visas will be made available under section 202(a)(2) to natives of any single foreign state (defined in section 202(b)) or any dependent area (defined in section 202(c)) in any fiscal year, in determining whether to provide for visas to such natives under the preference system described in subsection (a) or that described in subsection (b), visa numbers with respect to natives of that state or dependent area shall be allocated (to the extent practicable and otherwise consistent with this section) in a manner so that the ratio of—

"(A) the number of family reunification immigrants described in subsection (a) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year, to

"(B) the number of independent immigrants described in subsection (b) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year,

is equal to 3 to 1.

"(d)(1) A spouse or child as defined in subparagraph (A), (B), (C), (D), or (E) of section 101(b)(1) and shall, if not otherwise entitled to an immigrant status and the immediate issuance of a visa under subsection (a) or (b), be entitled to the same status, and the same order of consideration provided in the respective subsection, if accompanying or following to join, his spouse or parent.

"(2) Waiting lists of applicants for visas under this section shall be maintained in accordance with regulations prescribed by the Secretary of State.".

(2) Subsection (e) of such section, as so redesignated, is amended—

(A) by inserting "or under subsection (b)" after "subsection (a)" the first place it appears, and

(B) by striking out "subsection (a)" the second place it appears and inserting in lieu thereof "the respective subsection".

(b)(1) Section 202 (8 U.S.C. 1152) is amended by striking out subsection (e).

(2) Section 204 (8 U.S.C. 1154) is amended by striking out subsection (f).

(3) Section 245(b) (8 U.S.C. 1255(b)) is amended by striking out "202(e) or".

(c)(1)(A) Subsection (f) of section 203 (8 U.S.C. 1153), as redesignated by subsection (a)(1), is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or pursuant to paragraphs (1) through (5) of subsection (b)".

(B) Subsection (g) of such section, as so redesignated, is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or paragraphs (1) through (4) of subsection (b)" each place it appears.

(2)(A) Subsection (a) of section 204 (8 U.S.C. 1154) is amended—

(i) by striking out "paragraph (1), (4), or (5) of section 203(a)" and inserting in lieu thereof "paragraph (3) or (4) of section 203(a)",

(ii) by striking out "section 203(a)(2)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(a)",

(iii) by striking out "section 203(a)(3)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(b)", and

(iv) by striking out "section 203(a)(6)" and inserting in lieu thereof "paragraph (2) or (4) of section 203(b)".

(B) Subsection (b) of such section is amended by striking out "section 203(a) (3) or (6)" and inserting in lieu thereof "paragraph (1), (3), or (4) of section 203(b)".

(d) Section 241(a)(9) (8 U.S.C. 1251(a)(9)) is amended—

(1) by inserting "(A)" after "(9)", and

(2) by adding at the end the following new subparagraph:

"(B) was admitted as (or otherwise acquired the status of) an independent immigrant described in paragraph (3) of section 203(b) and has failed without good cause to maintain such an investment for a period of at least one year after the date of such entry (or of acquiring such status) or after the date such substantial investment was made, whichever date is later;".

Page 49, line 14, strike out "(a)".

Page 50, line 11, strike out "paragraph (3) or (6)" and all that follows through "section 203(a)(7)" on line 13 and insert in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

Page 50, strike out line 21 and all that follows through page 51, line 2.

Page 59, after line 6, insert the following new section (and insert a corresponding item in the table of contents):

EFFECTIVE DATES AND TRANSITION

SEC. . (a) The amendments made by sections 201, 202 (other than subsection (e)), and 203 shall take effect on October 1, 1983. When an immigrant, in possession of an unexpired immigrant visa issued before October 1, 1983, makes application for admission, his admissibility under section 212(a)(20) of the Immigration and Nationality Act shall be determined under the provisions of law in effect on the date of the issuance of such visa. The amendments made by the other provisions of this part shall take effect on the date of the enactment of this Act.

(b)(1) In the case of a petition filed under section 204(a) of the Immigration and Nationality Act before October 1, 1983, such petition shall be deemed, as of such date, to be a petition for the new corresponding classification (as defined in paragraph (2)), and the priority date for such petition shall remain in effect.

(2) purposes of paragraph (1), the term "new corresponding classification" means, in the case of a petition for a—

(A) preference status described in section 203(a)(1) of the Immigration and Nationality Act (as in effect on September 30, 1983), the status as an immediate relative described in section 201(b) of such Act;

(B) preference status described in section 203(a)(2) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(a) of such Act as in effect after such date, as the case may be;

(C) preference status described in section 203(a)(3) of such Act (as in effect on September 30, 1983), the preference status described in Paragraph (1) or (2) of section 203(b) of such Act as in effect after such date, as the case may be;

(D) preference status described in section 203(a)(4) of such Act (as in effect on September 30, 1983), the preference status described in Section 203(a)(3) of such Act as in effect after such date;

(E) preference status described in section 203(a)(5) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(4) of such Act as in effect after such date; and

(F) preference status described in section 203(a)(6) of such Act (as in effect on September 30, 1983), the preference status described in Paragraph (2) or (4) of section 203(b) of such Act (as in effect after such date), as the case may be.

(c) Aliens registered in the nonpreference classification described in section 203(a)(7) of the Immigration and Nationality Act (as in effect on September 30, 1983) shall be transferred, as of October 1, 1983, to the preference status described in section 203(b)(3) of such Act or the nonpreference classification described in section 203(b)(5) of such Act (as such sections are in effect after such date), as the case may be, and the priority date such classification shall remain in effect.

AMENDMENT (35I)

Page 49, after line 12, insert the following new sections (and redesignate the succeeding sections of part A of title II, and the table of contents and cross-references thereto, accordingly):

NUMERICAL LIMITATIONS

SEC. 201. (a)(1) Subsection (a) of section 201 (8 U.S.C. 1151) is amended to read as follows:

"(a)(1) Exclusive of aliens described in paragraph (3), aliens born in a foreign state (other than a contiguous foreign state) or dependent area who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 320,000, plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year and the number of visas issued under that subparagraph during that year, plus (iii) for fiscal years before fiscal year 1989, 66,500, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a relationship described in paragraph (1), (2), (4), or (5) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 65,000, minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, plus (iii) for fiscal years before fiscal year 1989, 13,500, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a paragraph (3) or (6) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"(2) Exclusive of aliens described in paragraph (3), aliens born in a contiguous foreign state who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 83 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year for that foreign state and the number of visas issued under that subparagraph during that year, plus (iii) for fiscal years before fiscal year 1989, 8,300, but only available to aliens born in that contiguous state with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a relationship described in paragraph (1), (2), (4), or (5) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 17 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who were born in that contiguous foreign state and who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, plus (iii) for fiscal years before fiscal year 1989, 1,700, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of paragraph (3) or (6) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"For purposes of this paragraph, the overall numerical limitation for a contiguous foreign state for a fiscal year is 40,000, plus the number by which 40,000 (or, for fiscal years before fiscal year 1989, 50,000) exceeds the number of aliens, who are not described in paragraph (3) and were born in the other contiguous foreign state, who were issued immigrant visas or otherwise acquired the status of an alien lawfully admitted for permanent residence in the previous fiscal year.

"(3) The aliens described in this paragraph, who are not subject to the numerical limitations described in paragraphs (1) and (2), are—

"(A) special immigrants defined in section 101(a)(27),

"(B) immigrants born to permanent resident aliens during a temporary visit abroad,

"(C) immediate relatives specified in subsection (b) of this section,

"(D) immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent who is such an immediate relative,

"(E) aliens who are admitted or granted asylum under section 207 or 208,

"(F) aliens provided records of permanent residence under section 214(d), and

"(G) aliens whose status is adjusted to permanent resident status under section 245A.".

(2) Subsection (b) of such section is amended by striking out "children, spouses, and parents" and all that follows through "years of age" and inserting in lieu thereof "children, unmarried sons, unmarried daughters, spouses, parents, and grandparents of a citizen of the United States".

(3) Section 221 (8 U.S.C. 1201) is amended by adding at the end the following new subsection:

"(j) Notwithstanding any other provision of this Act, no alien shall be eligible to receive an immigrant visa (or to otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence) by virtue of a petition filed under section 204(a) to grant preference status to the alien by reason of the relationship described in section 203(a)(1), 203(a)(2), or 203(a)(5), filed by an individual who was admitted to the United States as an immigrant by virtue of an immediate relative petition filed by the grandson or granddaughter of the individual.".

(b) Section 202(a) (8 U.S.C. 1152(a)) is amended—

(1) by striking out "(a) No person" and inserting in lieu thereof "(a)(1) Except as specifically provided in paragraph (2) of this subsection and in section 101(a)(27), 201(b), 203, and 214(d), no person",

(2) By striking out ", except as specifically" and all that follows up to the period at the end, and

(3) by adding at the end the following new paragraph:

"(2) The total number of immigrant visas made available to natives of any single foreign state under subsections (a) (other than paragraph (1) thereof) and (b) of section 203 shall not exceed in any fiscal year—

"(A) 20,000, in the case of any foreign state other than either of the two foreign states contiguous to the United States, or

"(B) in the case of either of the foreign states contiguous to the United States, the numerical limitation for that foreign state for that fiscal year described in section 201(a)(2).".

PREFERENCE AND NONPREFERENCE ALLOCATION SYSTEMS

SEC. 202. (a)(1) Section 203 (8 U.S.C. 1153) is amended—

(A) by redesignating subsections (b) through (e) as subsections (e) through (h), respectively, and

(B) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) PREFERENCE ALLOCATION FOR FAMILY REUNIFICATION IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(A) for family reunification immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in section 201(a)(2)(A) for family reunification immigrants shall be allotted visas as follows:

"(1) SPOUSES AND CHILDREN OF PERMANENT RESIDENT ALIENS.—Visas shall first be made available to qualified immigrants, in a number not to exceed 41 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (4), who are the spouses or children of aliens lawfully admitted for permanent resident.

"(2) UNMARRIED SONS AND DAUGHTERS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 15 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (1), who are the spouses or the unmarried sons or unmarried daughters of aliens lawfully admitted for permanent residence.

"(3) MARRIED SONS AND DAUGHTERS OF CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) and (2), who are the married sons or married daughters of citizens of the United States.

"(4) BROTHERS AND SISTERS OF ADULT CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 34 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (3), who are the brothers or unmarried sisters of United States citizens who are at least 21 years of age.

In allocating visa numbers to aliens under this section, aliens born in noncontiguous foreign states and dependent areas shall be treated as one group and aliens born in each of the contiguous foreign states shall be treated as separate groups.

"(b) ALLOCATION FOR INDEPENDENT IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(B) for independent immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in or section 201(a)(2)(B) for independent immigrants shall be allocated visas as follows:

"(1) ALIENS OF EXCEPTIONAL ABILILTY.—Visas shall first be made available, in a number not to exceed such respective numerical limitation, to qualified immigrants who because of their exeptional ability in the sciences, arts, professions, or business will substantially benefit prospectively the national economy, cultural interests, or welfare of the United States and whose services in the sciences, arts, professions, or business are sought by an employer in the United States. In determining under this paragraph whether an immigrant has exceptional ability, the possession of a degree, diploma, certificate, or similar award from a college, university, school, or other institution of learning, or of a license to practice or certification for a particular profession or occupation shall not by itself be considered sufficient evidence of such exceptional ability.

"(2) SKILLED WORKERS.—Visas not required for classes specified in paragraph (1) shall next be made available to qualified immigrants who are capable of performing skilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(3) INVESTORS.—Visas not required for classes specified in paragraphs (1) and (2), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available—

"(A) first, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment in a high unemployment area (as defined by the Attorney General, after consultation with the Secretary of Labor, and as determined at the time of the filing of a petition for classification under this paragraph) for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant, and

"(B) then, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant.

"(4) UNSKILLED WORKERS.—Visas not required for classes specified in paragraphs (1) through (3) shall next be made available to qualified immigrants who are capable of performing unskilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(5) NONPREFERENCE IMMIGRANTS.—(A) Visas not required for the classes specified in paragraphs (1) through (4), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available to other qualified immigrants who are not entering the country to perform skilled or unskilled labor in the chronological order in which they qualify.

"(B) No immigrant visa shall be issued under this paragraph to an adopted child or prospective adopted child of a United States citizen or lawfully resident alien unless (i) a valid home-study has been favorably recommended by an agency of the State of the child's proposed residence, or by an agency authorized by that State to conduct such a study, or, in the case of a child adopted abroad, by an appropriate public or private adoption agency which is licensed in the United States, and (ii) the child has been irrevocably released for immigration and adoption. No natural parent or prior adoptive parent of any such child shall thereafter, by virtue of such parentage, be accorded any right, privilege, or status under this Act. No immigrant visa shall otherwise be issued under this paragraph to an unmarried child under 16 years of age except a child who is accompanying or following to join his natural parent.

An immigrant visa shall not be issued to an immigrant under paragraph (1), (2), or (4) until the consular officer is in receipt of a determination made by the Secretary of Labor pursuant to the provisions of section 212(a)(14).

"(c) GUIDE FOR ALLOCATION BETWEEN PREFERENCE SYSTEMS.—Where it is determined that the maximum number of visas will be made available under section 202(a)(2) to natives of any single foreign state (defined in section 202(b)) or any dependent area (defined in section 202(c)) in any fiscal year, in determining whether to provide for visas to such natives under the preference system described in subsection (a) or that described in subsection (b), visa numbers with respect to natives of that state or dependent area shall be allocated (to the extent practicable and otherwise consistent with this section) in a manner so that the ratio of—

"(A) the number of family reunification immigrants described in subsection (a) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year, to

"(B) the number of independent immigrants described in subsection (b) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year,

is equal to 3 to 1.

"(d)(1) A spouse or child as defined in subparagraph (A), (B), (C), (D), or (E) of section 101(b)(1) and shall, if not otherwise entitled to an immigrant status and the immediate issuance of a visa under subsection (a) or (b), be entitled to the same status, and the same order of consideration provided in the respective subsection, if accompanying or following to join, his spouse or parent.

"(2) Waiting lists of applicants for visas under this section shall be maintained in accordance with regulations prescribed by the Secretary of State.".

(2) Subsection (e) of such section, as so redesignated, is amended—

(A) by inserting "or under subsection (b)" after "subsection (a)" the first place it appears, and

(B) by striking out "subsection (a)" the second place it appears and inserting in lieu thereof "the respective subsection".

(b)(1) Section 202 (8 U.S.C. 1152) is amended by striking out subsection (e).

(2) Section 204 (8 U.S.C. 1154) is amended by striking out subsection (f).

(3) Section 245(b) (8 U.S.C. 1255(b)) is amended by striking out "202(e) or".

(c)(1)(A) Subsection (f) of section 203 (8 U.S.C. 1153), as redesignated by subsection (a)(1), is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or pursuant to paragraphs (1) through (5) of subsection (b)".

(B) Subsection (g) of such section, as so redesignated, is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or paragraphs (1) through (4) of subsection (b)" each place it appears.

(2)(A) Subsection (a) of section 204 (8 U.S.C. 1154) is amended—

(i) by striking out "paragraph (1), (4), or (5) of section 203(a)" and inserting in lieu thereof "paragraph (3) or (4) of section 203(a)",

(ii) by striking out "section 203(a)(2)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(a)",

(iii) by striking out "section 203(a)(3)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(b)", and

(iv) by striking out "section 203(a)(6)" and inserting in lieu thereof "paragraph (2) or (4) of section 203(b)".

(B) Subsection (b) of such section is amended by striking out "section 203(a) (3) or (6)" and inserting in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

(d) Section 241(a)(9) (8 U.S.C. 1251(a)(9)) is amended—

(1) by inserting "(A)" after "(9)", and

(2) by adding at the end the following new subparagraph:

"(B) was admitted as (or otherwise acquired the status of) an independent immigrant described in paragraph (3) of section 203(b) and has failed without good cause to maintain such an investment for a period of at least one year after the date of such entry (or of acquiring such status) or after the date such substantial investment was made, whichever date is later;".

Page 49, line 14, strike out "(a)".

Page 50, line 11, strike out "paragraph (3) or (6)" and all that follows through "section 203(a)(7)" on line 13 and insert in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

Page 50, strike out line 21 and all that follows through page 51, line 2.

Page 59, after line 6, insert the following new section (and insert a corresponding item in the table of contents):

EFFECTIVE DATES AND TRANSITION

SEC. . (a) The amendments made by section 201, 202 (other than subsection (e)), and 203 shall take effect on October 1, 1983. When an immigrant, in possession of an unexpired immigrant visa issued before October 1, 1983, makes application for admission, his admissibility under section 212(a)(20) of the Immigration and Nationality Act shall determine under the provisions of law in effect on the date of the issuance of such visa. The amendments made by the other provisions of this part shall take effect on the date of the enactment of this Act.

(b)(1) In the case of a petition filed under section 204(a) of the Immigration and Nationality Act before October 1, 1983, such petition shall be deemed, as of such date, to be a petition for the new corresponding classification (as defined in paragraph (2)), and the priority date for such petition shall remain in effect.

(2) For purposes of paragraph (1), the term "new corresponding classification" means, in the case of a petition for a—

(A) preference status described in section 203(a)(1) of the Immigration and Nationality Act (as in effect on September 30, 1983, the status as an immediate relative described in section 201(b) of such Act;

(B) preference status described in section 203(a)(2) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(a) of such Act as in effect after such date, as the case may be;

(C) preference status described in section 203(a)(3) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(b) of such Act as in effect after such date, as the case may be;

(D) preference status described in section 203(a)(4) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(3) of such Act as in effect after such date;

(E) preference status described in section 203(a)(5) of such Act (as in effect on September 30, 1983), the preference status de-

scribed in section 203(a)(4) of such Act as in effect after such date; and

(F) preference status described in section 203(a)(6) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (2) or (4) of section 203(b) of such Act (as in effect after such date), as the case may be.

(c) Aliens registered in the nonpreference classification described in section 203(a)(7) of the Immigration and Nationality Act (as in effect on September 30, 1983) shall be transferred, as of October 1, 1983, to the preference status described in section 203(b)(3) of such Act or the nonpreference classification described in section 203(b)(5) of such Act (as such sections are in effect after such date), as the case may be, and the priority date for such classification shall remain in effect.

AMENDMENT (35J)

Page 49, after line 12, insert the following new sections (and redesignate the succeeding sections of part A of title II, and the table of contents and cross-references thereto, accordingly):

NUMERICAL LIMITATIONS

SEC. 201. (a)(1) Subsection (a) of section 201 (8 U.S.C. 1151) is amended to read as follows:

"(a)(1) Exclusive of aliens described in paragraph (3), aliens born in a foreign state (other than a contiguous foreign state) or dependent area who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 320,000, plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year and the number of visas issued under that subparagraph during that year, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 65,000, minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"(2) Exclusive of aliens described in paragraph (3), aliens born in a contiguous foreign state who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 83 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year for that foreign state and the number of visas issued under that subparagraph during that year, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 17 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who were born in that contiguous foreign state and who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"For purposes of this paragraph, the overall numerical limitation for a contiguous foreign state for a fiscal year is 40,000, plus the number by which 40,000 exceeds the number of aliens, who are not described in paragraph (3) and were born in the other contiguous foreign state, who were issued immigrant visas or otherwise acquired the status of an alien lawfully admitted for permanent residence in the previous fiscal year.

"(3) The aliens described in this paragraph, who are not subject to the numerical limitations described in paragraphs (1) and (2), are—

"(A) special immigrants defined in section 101(a)(27),

"(B) immigrants born to permanent resident aliens during a temporary visit abroad,

"(C) immediate relatives specified in subsection (b) of this section,

"(D) immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent who is such an immediate relative,

"(E) aliens who are admitted or granted asylum under section 207 or 208,

"(F) aliens provided records of permanent residence under section 214(d), and

"(G) aliens whose status is adjusted to permanent resident status under section 245A.".

(2) Subsection (b) of such section is amended by striking out "children, spouses, and parents" and all that follows through "years of age" and inserting in lieu thereof "children, unmarried sons, unmarried daughters, spouses, parents, and grandparents of a citizen of the United States".

(3) Section 221 (8 U.S.C. 1201) is amended by adding at the end the following new subsection:

"(j) Notwithstanding any other provision of this Act, no alien shall be eligible to receive an immigrant visa (or to otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence) by virtue of a petition filed under section 204(a) to grant preference status to the alien by reason of the relationship described in section 203(a)(1), 203(a)(2), or 203(a)(5), filed by an individual who was admitted to the United States as an immigrant by virtue of an immediate relative petition filed by the grandson or granddaughter of the individual.".

(b) Section 202(a) (8 U.S.C. 1152(a)) is amended—

(1) by striking out "(a) No person" and inserting in lieu thereof "(a)(1) Except as specifically provided in paragraph (2) of this subsection and in section 101(a)(27), 201(b), 203, and 214(d), no person",

(2) by striking out ", except as specifically" and all that follows up to the period at the end, and

(3) by adding at the end the following new paragraph:

"(2) The total number of immigrant visas made available to natives of any single foreign state under subsections (a) (other than paragraph (1) thereof) and (b) of section 203 shall not exceed in any fiscal year—

"(A) 20,000, in the case of any foreign state other then either of the two foreign states contiguous to the United States, or

"(B) in the case of either of the foreign states contiguous to the United States, the numerical limitation for that foreign state for that fiscal year described in section 201(a)(2).".

PREFERENCE AND NONPREFERENCE ALLOCATION SYSTEMS

SEC. 202. (a)(1) Section 203 (8 U.S.C. 1153) is amended—

(A) by redesignating subsections (b) through (e) as subsections (e) through (h), respectively, and

(B) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) PREFERENCE ALLOCATION FOR FAMILY REUNIFICATION IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(A) for family reunification immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in section 201(a)(2)(A) for family reunification immigrants shall be allotted visas as follows:

"(1) SPOUSES AND CHILDREN OF PERMANENT RESIDENT ALIENS.—Visas shall first be made available to qualified immigrants, in a number not to exceed 41 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (4), who are the spouses or children of aliens lawfully admitted for permanent residence.

"(2) UNMARRIED SONS AND DAUGHTERS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 15 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (1), who are the spouses or the unmarried sons or unmarried daughters of aliens lawfully admitted for permanent residence.

"(3) MARRIED SONS AND DAUGHTERS OF CITIZENS.—Visas shall next be made available to qualified immmigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) and (2), who are the married sons or married daughters of citizens of the United States.

"(4) BROTHERS AND SISTERS OF ADULT CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 34 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (3), who are the brothers or unmarried sisters of United States citizens who are at least 21 years of age.

In allocating visa numbers to aliens under this section, aliens born in noncontiguous foreign states and dependent areas shall be treated as one group and aliens born in each of the contiguous foreign states shall be treated as separate groups.

"(b) ALLOCATION FOR INDEPENDENT IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(B) for independent immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens born to the numer-

ical limitation specified in or section 201(a)(2)(B) for independent immigrants shall be allocated visas as follows:

"(1) ALIENS OF EXCEPTIONAL ABILITY.—Visas shall first be made available, in a number not to exceed such respective numerical limitation, to qualified immigrants who because of their exceptional ability in the sciences, arts, professions, or business will substantially benefit prospectively the national economy, cultural interests, or welfare of the United States and whose services in the sciences, arts, professions, or business are sought by an employer in the United States. In determining under this paragraph whether an immigrant has exceptional ability, the possession of a degree, diploma, certificate, or similar award from a college, university, school, or other institution of learning, or of a license to practice or certification for a particular profession or occupation shall not by itself be considered sufficient evidence of such exceptional ability.

"(2) SKILLED WORKERS.—Visas not required for classes specified in paragraph (1) shall next be made available to qualified immigrants who are capable of performing skilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(3) INVESTORS.—Visas not required for classes specified in paragraphs (1) and (2), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available—

"(A) first, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment in a high unemployment area (as defined by the Attorney General, after consultation with the Secretary of Labor, and as determined at the time of the filing of a petition for classification under this paragraph) for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant, and

"(B) then, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant.

"(4) UNSKILLED WORKERS.—Visas not required for classes specified in paragraphs (1) through (3) shall next be made available to qualified immigrants who are capable of performing unskilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(5) NONPREFERENCE IMMIGRANTS.—(A) Visas not required for the classes specified in paragraphs (1) through (4), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available to other qualified immigrants who are not entering the country to perform skilled or unskilled labor in the chronological order in which they qualify.

"(B) No immigrant visa shall be issued under this paragraph to an adopted child or prospective adopted child of a United States citizen or lawfully resident alien unless (i) a valid home-study has been favorably recommended by an agency of the State of the child's proposed residence, or by an agency authorized by that State to conduct such a study, or, in the case of a child adopted abroad, by an appropriate public or private adoption agency which is licensed in the United States, and (ii) the child has been irrevocably released for immigration and adoption. No natural parent or prior adoptive parent of any such child shall thereafter, by virtue of such parentage, be accorded any right, privilege, or status under this Act. No immigrant visa shall otherwise be issued under this paragraph to an unmarried child under 16 years of age except a child who is accompanying or following to join his natural parent.

An immigrant visa shall not be issued to an immigrant under paragraph (1), (2), or (4) until the consular officer is in receipt of a determination made by the Secretary of Labor pursuant to the provisions of section 212(a)(14).

"(c) GUIDE FOR ALLOCATION BETWEEN PREFERENCE SYSTEMS.—Where it is determined that the maximum number of visas will be made available under section 202(a)(2) to natives of any single foreign state (defined in section 202(b)) or any dependent areas (defined in section (c)) in any fiscal year, in determining whether to provide for visas to such natives under the preference system described in subsection (a) or that described in subsection (b), visa numbers with respect to natives of that state or dependent area shall be allocated (to the extent practicable and otherwise consistent with this section) in a manner so that the ratio of—

"(A) the number of family reunification immigrants described in subsection (a) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year, to

"(B) the number of independent immigrants described in subsection (b) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year,

is equal to 3 to 1.

"(d)(1) A spouse or child as defined in subparagraph (A), (B), (C), (D), or (E) of section 101(b)(1) and shall, if not otherwise entitled to an immigrant status and the immediate issuance of a visa under subsection (a) or (b), be entitled to the same status, and the same order of consideration provided in the respective subsection, if accompanying or following to join, his spouse or parent.

"(2) Waiting lists of applicants for visas under this section shall be maintained in accordance with regulations prescribed by the Secretary of State.".

(2) Subsection (e) of such section, as so redesignated, is amended—

(A) by inserting "or under subsection (b)" after "subsection (a)" the first place it appears, and

(B) by striking out "subsection (a)" the second place it appears and inserting in lieu therof "the respective subsection".

(b)(1) Section 202 (8 U.S.C. 1152) is amended by striking out subsection (e).

(2) Section 204 (8 U.S.C. 1154) is amended by striking out subsection (f).

(3) Section 245(b) (8 U.S.C. 1255(b)) is amended by striking out "202(e) or".

(c)(1)(A) Subsection (f) of section 203 (8 U.S.C. 1153), as redesignated by subsection (a)(1), is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or pursuant to paragraphs (1) through (5) of subsection (b)".

(B) Subsection (g) of such section, as so redesignated, is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or paragraphs (1) through (4) of subsection (b)" each place it appears.

(2)(A) Subsection (a) of section 204 (8 U.S.C 1154) is amended—

(i) by striking out "paragraph (1), (4), or (5) of section 203(a)" and inserting in lieu thereof "paragraph (3) or (4) of section 203(a)",

(ii) by striking out "section 203(a)(2)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(a)",

(iii) by striking out "section 203(a)(3)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(b)", and

(iv) by striking out "section 203(a)(6)" and inserting in lieu thereof "paragraph (2) or (4) of section 203(b)".

(B) Subsection (b) of such section is amended by striking out "section 203(a)(3), or (6)" and inserting in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

(d) Section 241(a)(9) (8 U.S.C. 1251(a)(9)) is amended—

(1) by inserting "(A)" after "(9)", and

(2) by adding at the end the following new subparagraph:

"(B) was admitted as (or otherwise acquired the status of) an independent immigrant described in paragraph (3) of section 203(b) and has failed without good cause to maintain such an investment for a period of at least one year after the date of such entry (or of acquiring such status) or after the date such substantial investment was made, whichever date is later;".

Page 49, line 14, strike out "(a)".

Page 50, line 11, strike out "paragraph (3) or (6)" and all that follows through "section 203(a)(7)" on line 13 and insert in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

Page 50, strike out line 21 and all that follows through page 51, line 2.

Page 59, after line 6, insert the following new section (and insert a corresponding item in the table of contents):

EFFECTIVE DATES AND TRANSITION

SEC. . (a) The amendments made by sections 201, 202 (other than subsection (e)), and 203 shall take effect on October 1, 1983. When an immigrant, in possession of an unexpired immigrant visa issued before October 1, 1983, makes application for admission, his admissibility under section 212(a)(20) of the Immigration and Nationality Act shall be determined under the provisions of law in effect on the date of the issuance of such visa. The amendments made by the other provisions of this part shall take effect on the date of the enactment of this Act.

(b)(1) In the case of a petition filed under section 204(a) of the Immigration and Nationality Act before October 1, 1983, such petition shall be deemed, as of such date, to be a petition for the new corresponding classification (as defined in paragraph (2)), and the priority date for such petition shall remain in effect.

(2) For purposes of paragraph (1), the term "new corresponding classification" means, in the case of a petition for a—

(A) preference status described in section 203(a)(1) of the Immigration and Nationality Act (as in effect on September 30, 1983),

the status as an immediate relative described in section 201(b) of such Act;

(B) preference status described in section 203(a)(2) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(a) of such Act as in effect after such date, as the case may be;

(C) preference status described in section 203(a)(3) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(b) of such Act as in effect after such date, as the case may be;

(D) preference status described in section 203(a)(4) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(3) of such Act as in effect after such date;

(E) preference status described in section 203(a)(5) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(4) of such Act as in effect after such date; and

(F) preference status described in section 203(a)(6) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (2) or (4) of section 203(b) of such Act (as in effect after such date), as the case may be.

(c) Aliens registered in the nonpreference classification described in section 203(a)(7) of the Immigration and Nationality Act (as in effect on September 30, 1983) shall be transferred, as of October 1, 1983, to the preference status described in section 203(b)(3) of such Act or the nonpreference classification described in section 203(b)(5) of such Act (as such sections are in effect after such date), as the case may be, and the priority date for such classification shall remain in effect.

AMENDMENT (35K)

Page 49, after line 12, insert the following new sections (and redesignate the succeeding sections of part A of title II, and the table of contents and cross-references thereto, accordingly):

NUMERICAL LIMITATIONS

SEC. 201. (a)(1) Subsection (a) of section 201 (8 U.S.C. 1151) is amended to read as follows:

"(a)(1) Exclusive of aliens described in paragraph (3), aliens born in a foreign state (other than a contiguous foreign state) or dependent area who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 320,000, plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year and the number of visas issued under that subparagraph during that year, plus (iii) for fiscal years before fiscal year 1989, 66,500, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a relationship described in paragraph (1), (2), (4), or (5) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 65,000, minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, plus (iii) for fiscal years before fiscal year 1989, 13,500, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a paragraph (3) or (6) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"(2) Exclusive of aliens described in paragraph (3), aliens born in a contiguous foreign state who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 83 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year for that foreign state and the number of visas issued under that subparagraph during that year, plus (iii) for fiscal years before fiscal year 1989, 8,300, but only available to aliens born in that contiguous state with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of a relationship described in paragraph (1), (2), (4), or (5) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 17 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who were born in that contiguous foreign state and who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, plus (iii) for fiscal years before fiscal year 1989, 1,700, but only available to aliens with a petition filed on their behalf (before the date of the enactment of the Immigration Reform and Control Act of 1982) for preference status by reason of paragraph (3) or (6) of section 203(a) (as such section was in effect on such date), and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"For purposes of this paragraph, the overall numerical limitation for a contiguous foreign state for a fiscal year is 40,000, plus the number by which 40,000 (or, for fiscal years before fiscal year 1989, 50,000) exceeds the number of aliens, who are not described in paragraph (3) and were born in the other contiguous foreign state, who were issued immigrant visas or otherwise acquired the status of an alien lawfully admitted for permanent residence in the previous fiscal year.

"(3) The aliens described in this paragraph, who are not subject to the numerical limitations described in paragraphs (1) and (2), are—

"(A) a special immigrants defined in section 101(a)(27),

"(B) immigrants born to permanent resident aliens during a temporary visit abroad,

"(C) immediate relatives specified in subsection (b) of this section,

"(D) immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent who is such an immediate relative,

"(E) aliens who are admitted or granted asylum under section 207 or 208,

"(F) aliens provided records of permanent residence under section 214(d), and

"(G) aliens whose status is adjusted to permanent resident status under section 245A.".

(2) Subsection (b) of such section is amended by striking out "children, spouses, and parents" and all that follows through "years of age and inserting in lieu thereof "children, unmarried sons, unmarried daughters, spouses, parents, and grandparents of a citizen of the United States".

(3) Section 221 (8 U.S.C. 1201) is amended by adding at the end the following new subsection:

"(j) Notwithstanding any other provision of this Act, no alien shall be eligible to receive an immigrant visa (or to otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence) by virtue of a petition filed under section 204(a) to grant preference status to the alien by reason of the relationship described in sections 203(a)(1), 203(a)(2), or 203(a)(5), filed by an individual who was admitted to the United States as an immigrant by virtue of an immediate relative petition filed by the grandson or granddaughter of the individual.".

(b) Section 202(a) (8 U.S.C. 1152(a)) is amended—

(1) by striking out "(a) No person" and inserting in lieu thereof "(a)(1) Except as specifically provided in paragraph (2) of this subsection and in section 101(a)(27), 201(b), 203, and 214(d), no person",

(2) by striking out ", except as specifically" and all that follows up to the period at the end, and

(3) by adding at the end the following new paragraph:

"(2) The total number of immigrant visas made available to natives of any single foreign state under subsections (a) and (b) of section 203 shall not exceed in any fiscal year—

"(A) 20,000, in the case of any foreign state other than either of the two foreign states contiguous to the United States, or

"(B) in the case of either of the foreign states contiguous to the United States, the numerical limitation for that foreign state for that fiscal year described in section 201(a)(2).".

PREFERENCE AND NONPREFERENCE ALLOCATION SYSTEMS

SEC. 202. (a)(1) Section 203 (8 U.S.C. 1153) is amended—

(A) by redesignating subsections (b) through (e) as subsections (e) through (h), respectively, and

(B) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) PREFERENCE ALLOCATION FOR FAMILY REUNIFICATION IMMIGRANTS.—Aliens subject

to the numerical limitation specified in section 201(a)(1)(A) for family reunification immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in section 201(a)(2)(A) for family reunification immigrants shall be allotted visas as follows:

"(1) SPOUSES AND CHILDREN OF PERMANENT RESIDENT ALIENS.—Visas shall first be made available to qualified immigrants, in a number not to exceed 41 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (4), who are the spouses or children of aliens lawfully admitted for permanent residence.

"(2) UNMARRIED SONS AND DAUGHTERS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 15 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (1), who are the spouses or the unmarried sons or unmarried daughters of aliens lawfully admitted for permanent residence.

"(3) MARRIED SONS AND DAUGHTERS OF CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) and (2), who are the married sons or married daughters of citizens of the United States.

"(4) BROTHERS AND SISTERS OF ADULT CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 34 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (3), who are the brothers or unmarried sisters of United States citizens who are at least 21 years of age.

In allocating visa numbers to aliens under this section, aliens born in noncontiguous foreign states and dependent areas shall be treated as one group and aliens born in each of the contiguous foreign states shall be treated as separate groups.

"(b) ALLOCATION FOR INDEPENDENT IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(B) for independents immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in or section 201(a)(2)(B) for independent immigrants shall be allocated visas as follows:

"(1) ALIENS OF EXCEPTIONAL ABILITY.—Visas shall first be made available, in a number not to exceed such respective numerical limitation, to qualified immigrants who because of their exceptional ability in the sciences, arts, professions, or business will substantially benefit prospectively the national economy, cultural interests, or welfare of the United States and whose services in the sciences, arts, professions, or business are sought by an employer in the United States. In determining under this paragraph whether an immigrant has exceptional ability, the possession of a degree, diploma, certificate, or similar award from a college, university, school, or other institution of learning, or of a license to practice or certification for a particular profession or occupation shall not by itself be considered sufficient evidence of such exceptional ability.

"(2) SKILLED WORKERS.—Visas not required for classes specified in paragraph (1) shall next be made available to qualified immigrants who are capable of performing skilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(3) INVESTORS.—Visas not required for classes specified in paragraphs (1) and (2), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available—

"(A) first, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principle manager and which will benefit the United States economy and create full-time employment in a high unemployment area (as defined by the Attorney General, after consultation with the Secretary of Labor, and as determined at the time of the filing of a petition for classification under this paragraph) for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant, and

"(B) then, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment for not fewer than four eligible individuals (as defined in section 214(c)(3(D)), other than the spouse or children of such immigrant.

"(4) UNSKILLED WORKERS.—Visas not required for classes specified in paragraphs (1) through (3) shall next be made available to qualified immigrants who are capable of performing unskilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(5) NONPREFERENCE IMMIGRANTS.—(A) Visas not required for the classes specified in paragraphs (1) through (4), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available to other qualified immigrants who are not entering the country to perform skilled or unskilled labor in the chronological order in which they qualify.

"(B) No immigrant visa shall be issued under this paragraph to an adopted child or prospective adopted child of a United States citizen or lawfully resident alien unless (i) a valid home-study has been favorably recommended by an agency of the State of the child's proposed residence, or by an agency authorized by that State to conduct such a study, or, in the case of a child adopted abroad, by an appropriate public or private adoption agency which is licensed in the United States, and (ii) the child has been irrevocably released for immigration and adoption. No natural parent or prior adoptive parent of any such child shall thereafter, by virtue of such parentage, be accorded any right, privilege, or status under this Act. No immigrant visa shall otherwise be issued under this paragraph to an unmarred child under 16 years of age except a child who is accompanying or following to join his natural parent.

An immigrant visa shall not be issued to an immigrant under paragraph (1), (2), or (4) until the consular officer is in receipt of a determination made by the Secretary of Labor pursuant to the provisions of section 212(a)(14).

"(c) GUIDE FOR ALLOCATION BETWEEN PREFERENCE SYSTEMS.—Where it is determined that the maximum number of visas will be made available under section 202(a)(2) to natives of any single foreign state (defined in section 202(b)) or any dependent area (defined in section 202(c)) in any fiscal year, in determining whether to provide for visas to such natives under the preference system described in subsection (a) or that described in subsection (b), visa numbers with respect to natives of that state or dependent area shall be allocated (to the extent practicable and otherwise consistent with this section) in a manner so that the ratio of—

"(A) the number of family reunification immigrants described in subsection (a) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year, to

"(B) the number of independent immigrants described in subsection (b) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year,

is equal to 3 to 1.

"(d)(1) A spouse or child as defined in subparagraph (A), (B), (C), (D), or (E) of section 101(b)(1) and shall, if not otherwise entitled to an immigrant status and the immediate issuance of a visa under subsection (a) or (b), be entitled to the same status, and the same order of consideration provided in the respective subsection, if accompanying or following to join, his spouse or parent.

"(2) Waiting lists of applicants for visas under this section shall be maintained in accordance with regulations prescribed by the Secretary of State.".

(2) Subsection (e) of such section, as so redesignated, is amended—

(A) by inserting "or under subsection (b)" after "subsection (a)" the first place it appears, and

(B) by striking out "subsection (a)" the second place it appears and inserting in lieu thereof "the respective subsection".

(b)(1) Section 202 (8 U.S.C. 1152) is amended by striking out subsection (e).

(2) Section 204 (8 U.S.C. 1154) is amended by striking out subsection (f).

(3) Section 245(b) (8 U.S.C. 1255(b)) is amended by striking out "202(e) or".

(c)(1)(A) Subsection (f) of section 203 (8 U.S.C. 1153), as redesignated by subsection (a)(1), is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or pursuant to paragraphs (1) through (5) of subsection (b)".

(B) Subsection (g) of such section, as so redesignated, is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or paragraphs (1) through (4) of subsection (b)" each place it appears.

(2)(A) Subsection (a) of section 204 (8 U.S.C. 1154) is amended—

(i) by striking out "paragraph (1), (4), or (5) of section 203(a)" and inserting in lieu thereof "paragraph (3) or (4) of section 203(a)",

(ii) by striking out "section 203(a)(2)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(a)",

(iii) by striking out "section 203(a)(3)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(b)", and

(iv) by striking out "section 203(a)(6)" and inserting in lieu thereof "paragraph (2) or (4) of section 203(b)".

(B) Subsection (b) of such section is amended by striking out "section 203(a) (3) or (6)" and inserting in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

(d) Section 241(a)(9) (8 U.S.C. 1251(a)(9)) is amended—

(1) by inserting "(A)" after "(9)", and

(2) by adding at the end the following new subparagraph:

"(B) was admitted as (or otherwise acquired the status of) an independent immigrant described in paragraph (3) of section 203(b) and has failed without good cause to maintain such an investment for a period of at least one year after the date of such entry (or of acquiring such status) or after the date such substantial investment was made, whichever date is later;".

Page 49, line 14, strike out "(a)".

Page 50, line 11, strike out "paragraph (3) or (6)" and all that follows through "section 203(a)(7)" on line 13 and insert in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

Page 50, strike out line 21 and all that follows through page 51, line 2.

Page 59, after line 6, insert the following new section (and insert a corresponding item in the table of contents):

EFFECTIVE DATES AND TRANSITION

SEC. . (a) The amendments made by sections 201, 202 (other than subsection (e)), and 203 shall take effect on October 1, 1983. When an immigrant, in possession of an unexpired immigrant visa issued before October 1, 1983, makes application for admission, his admissibility under section 212(a)(20) of the Immigration and Nationality Act shall be determined under the provisions of law in effect on the date of the issuance of such visa. The amendments made by the other provisions of this part shall take effect on the date of the enactment of this Act.

(b)(1) In the case of a petition filed under section 204(a) of the Immigration and Nationality act before October 1, 1983, such petition shall be deemed, as of such date, to be a petition for the new corresponding classification (as defined in paragraph (2)), and the priority date for such petition shall remain in effect.

(2) For purposes of paragraph (1), the term "new corresponding classification" means, in the case of a petition for a—

(A) preference status described in section 203(a)(1) of the Immigration and Nationality Act (as in effect on September 30, 1983), the status as an immediate relative described in section 201(b) of such Act;

(B) preference status described in section 203(a)(2) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(a) of such Act as in effect after such date, as the case may be;

(C) preference status described in section 203(a)(3) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(b) of such Act as in effect after such date, as the case may be;

(D) preference status described in section 203(a)(4) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(3) of such Act as in effect after such date;

(E) preference status described in section 203(a)(5) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(4) of such Act as in effect after such date; and

(F) preference status described in section 203(a)(6) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (2) or (4) of section 203(b) of such Act (as in effect after such date), as the case may be.

(c) Aliens registered in the nonpreference classification described in section 203(a)(7) of the Immigration and Nationality Act (as in effect on September 30, 1983) shall be transferred, as of October 1, 1983, to the preference status described in section 203(b)(3) of such Act or the nonpreference classification described in section 203(b)(5) of such Act (as such sections are in effect after such date), as the case may be, and the priority date for such classification shall remain in effect.

AMENDMENT (35L)

Page 49, after line 12, insert the following new sections (and redesignate the succeeding sections of part A of title II, and the table of contents and cross-references thereto, accordingly):

NUMERICAL LIMITATIONS

SEC. 201. (a)(1) Subsection (a) of section 201 (8 U.S.C. 1151) is amended to read as follows:

"(a)(1) Exclusive of aliens described in paragraph (3), aliens born in a foreign state (other than a contiguous foreign state) or dependent area who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 320,000, plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year and the number of visas issued under that subparagraph during that year, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 65,000 minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"(2) Exclusive of aliens described in paragraph (3), aliens born in a contiguous foreign state who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence are limited to—

"(A) family reunification immigrants described in section 203(a), in a number not to exceed in any fiscal year the number equal to (i) 83 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), plus (ii) the difference (if any) between the maximum number of visas which might have been issued under subparagraph (B) during the prior fiscal year for that foreign state and the number of visas issued under that subparagraph during that year, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year, and

"(B) independent immigrants described in section 203(b), in a number not to exceed in any fiscal year the number equal to (i) 17 percent of the overall numerical limitation for that contiguous foreign state for that fiscal year (described in the next sentence), minus (ii) the number of special immigrants (other than those described in section 101(a)(27)(A)) who were born in that contiguous foreign state and who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence, and not to exceed in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for all of such fiscal year.

"For purposes of this paragraph, the overall numerical limitation for a contiguous foreign state for a fiscal year is 40,000, plus the number by which 40,000 exceeds the number of aliens, who are not described in paragraph (3) and were born in the other contiguous foreign state, who were issued immigrant visas or otherwise acquired the status of an alien lawfully admitted for permanent residence in the previous fiscal year.

"(3) The aliens described in this paragraph, who are not subject to the numerical limitations described in paragraphs (1) and (2), are—

"(A) special immigrants defined in section 101(a)(27),

"(B) immigrants born to permanent resident aliens during a temporary visit abroad,

"(C) immediate relatives specified in subsection (b) of his section,

"(D) immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent who is such an immediate relative,

"(E) aliens who are admitted or granted asylum under section 207 or 208,

"(F) aliens provided records of permanent residence under section 214(d), and

"(G) aliens whose status is adjusted to permanent resident status under section 245A.".

(2) Subsection (b) of such section is amended by striking out "children, spouses, and parents" and all that follows through "years of age" and inserting in lieu thereof "children, unmarried sons, unmarried daughters, spouses, parents, and grandparents of a citizen of the United States".

(3) Section 221 (8 U.S.C. 1201) is amended by addding at the end the following new subsection:

"(j) Notwithstanding any other provision of this Act, no alien shall be eligible to receive an immigrant visa (or to otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence) by virtue of a petition filed under section 204(a) to grant preference status to the alien by reason of the relationship described in section 203(a)(1), 203(a)(2), or 203(a)(5), filed by an individual who was admitted to the Untied States as an immigrant by virtue of an immediate relative petition filed by the grandson or granddaughter of the individual.".

(b) Section 202(a) (8 U.S.C. 1152(a)) is amended—

(1) by striking out "(a) No person" and inserting in lieu thereof "(a)(1) Except as specifically provided in paragraph (2) of this subsection and in section 101(a)(27), 201(b), 203, and 214(d), no person",

(2) by striking out ", except as specifically" and all that follows up to the period at the end, and

(3) by adding at the end the following new paragraph:

"(2) The total number of immigrant visas made available to natives of any single for-

eign state under subsections (a) and (b) of section 203 shall not exceed in any fiscal year—

"(A) 20,000, in the case of any foreign state other than either of the two foreign states contiguous to the United States, or

"(B) in the case of either of the foreign states contiguous to the United States, the numercial limitation for that foreign state for that fiscal year described in section 201(a)(2).".

PREFERENCE AND NONPREFERENCE ALLOCATION SYSTEMS

SEC. 202. (a)(1) Section 203 (8 U.S.C. 1153) is amended—

(A) by redesignating subsections (b) through (e) as subsections (e) through (h), respectively, and

(B) by striking out subsection (a) and inserting in lieu thereof the following:

"(A) PREFERENCE ALLOCATION FOR FAMILY REUNIFICATION IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(A) for family reunification immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in section 201(a)(2)(A) for family reunification immigrants shall be allotted visas as follows:

(1) SPOUSES AND CHILDREN OF PERMANENT RESIDENT ALIENS.—Visas shall first be made available to qualified immigrants, in a number not to exceed 41 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (4), who are the spouses or children of aliens lawfully admitted for permanent residence.

"(2) UNMARRIED SONS AND DAUGHTERS OF PERMANENT RESIDENT ALIENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 15 percent of such respective numerical limitation plus any visas not required for the class specified in paragraph (1), who are the spouses or the unmarried sons or unmarried daughters of aliens lawfully admitted for permanent residence.

"(3) MARRIED SONS AND DAUGHTERS OF CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 10 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) and (2), who are the married sons or married daughters of citizens of the United States.

"(4) BROTHERS AND SISTERS OF ADULT CITIZENS.—Visas shall next be made available to qualified immigrants, in a number not to exceed 34 percent of such respective numerical limitation plus any visas not required for the classes specified in paragraphs (1) through (3), who are the brothers or unmarried sisters of United States citizens who are at least 21 years of age.

In allocating visa numbers to aliens under this section, aliens born in noncontiguous foreign states and dependent areas shall be treated as one group and aliens born in each of the contiguous foreign states shall be treated as separate groups.

"(b) ALLOCATION FOR INDEPENDENT IMMIGRANTS.—Aliens subject to the numerical limitation specified in section 201(a)(1)(B) for independent immigrants and, separately for aliens born in each of the two contiguous foreign states, aliens subject to the numerical limitation specified in or section 201(a)(2)(B) for independent immigrants shall be allocated visas as follows:

"(1) ALIENS OF EXCEPTIONAL ABILITY.—Visas shall first be made available, in a number not to exceed such respective numerical limitation, to qualified immigrants who because of their exceptional ability in the sciences, arts, professions, or business will substantially benefit prospectively the national economy, cultural interests, or welfare of the United States and whose services in the sciences, arts, professions, or business are sought by an employer in the United States. In determining under this paragraph whether an immigrant has exceptional ability, the possession of a degree, diploma, certificate, or similar award from a college, university, school, or other institution of learning, or of a license to practice or certification for a particular profession or occupation shall not by itself be considered sufficient evidence of such exceptional ability.

"(2) SKILLED WORKERS.—Visas not required for classed specified in paragraph (1) shall next be made available to qualified immigrants who are capable of performing skilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(3) INVESTORS.—Visas not required for classes specified in paragraphs (1) and (2), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available—

"(A) first, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment in a high unemployment area (as defined by the Attorney General, after consultation with the Secretary of Labor, and as determined at the time of the filing of a petition for classification under this paragraph) for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant, and

"(B) then, to qualified immigrants who have invested, or are actively in the process of investing, substantial capital (in an amount, not less than $250,000, set by the Attorney General) in an enterprise in the United States of which the alien will be a principal manager and which will benefit the United States economy and create full-time employment for not fewer than four eligible individuals (as defined in section 214(c)(3)(D)), other than the spouse or children of such immigrant.

"(4) UNSKILLED WORKERS.—Visas not required for classes specified in paragraphs (1) through (3) shall next be made available to qualified immigrants who are capable of performing unskilled labor, not of a temporary or seasonal nature, for which qualified workers are not available in the United States.

"(5) NONPREFERENCE IMMIGRANTS.—(A) Visas not required for the classes specified in paragraphs (1) through (4), but in a number not to exceed 10 percent of such respective numerical limitation, shall be made available to other qualified immigrants who are not entering the country to perform skilled or unskilled labor in the chronological order in which they qualify.

"(B) No immigrant visa shall be issued under this paragraph to an adopted child or prospective adopted child of a United States citizen or lawfully resident alien unless (i) a valid home-study has been favorably recommended by an agency of the State of the child's proposed residence, or by an agency authorized by that State to conduct such a study, or, in the case of a child adopted abroad, by an appropriate public or private adoption agency which is licensed in the United States, and (ii) the child has been irrevocably released for immigration and adoption. No natural parent or prior adoptive parent of any such child shall thereafter, by virtue of such parentage, be accorded any right, privilege, or status under this Act. No immigrant visa shall otherwise be issued under this paragraph to an unmarried child under 16 years of age except a child who is accompanying or following to join his natural parent.

An immigrant visa shall not be issued to an immigrant under paragraph (1), (2), or (4) until the consular officer is in receipt of a determination made by the Secretary of Labor pursuant to the provisions of section 212(a)(14).

"(c) GUIDE FOR ALLOCATION BETWEEN PREFERENCE SYSTEMS.—Where it is determined that the maximum number of visas will be made available under section 202(a)(2) to natives of any single foreign state (defined in section 202(b)) or any dependent area (defined in section 202(c)) in any fiscal year, in determining whether to provide for visas to such natives under the preference system described in subsection (a) or that described in subsection (b), visa numbers with respect to natives of that state or dependent area shall be allocated (to the extent practicable and otherwise consistent with this section) in a manner so that the ratio of—

"(A) the number of family reunification immigrants described in subsection (a) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year, to

"(B) the number of independent immigrants described in subsection (b) who are natives of such state or dependent area and who are issued immigrant visas or otherwise acquire the status of aliens lawfully admitted to the United States for permanent residence in that fiscal year,

is equal to 3 to 1.

"(d)(1) A spouse or child as defined in subparagraph (A), (B), (C), (D), or (E) of section 101(b)(1) and shall, if not otherwise entitled to an immigrant status and the immediate issuance of visa under subsection (a) or (b), be entitled to the same status, and the same order of consideration provided in the respective subsection, if accompanying or following to join, his spouse or parent.

"(2) Waiting lists of applicants for visas under this section shall be maintained in accordance with regulations prescribed by Secretary of State.".

(2) Subsection (e) of such section, as so redesignated, is amended—

(A) by inserting "or under subsection (b)" after "subsection (a)" the first place it appears, and

(B) by striking out "subsection (a)" the second place it appears and inserting in lieu thereof "the respective subsection".

(b)(1) Section 202 (8 U.S.C. 1152) is amended by striking out subsection (e).

(2) Section 204 (8 U.S.C. 1154) is amended by striking out subsection (f).

(3) Section 245(b) (8 U.S.C. 1255(b)) is amended by striking out "202(e) or".

(c)(1)(A) Subsection (f) of section 203 (8 U.S.C. 1153), as redesignated by subsection (a)(1), is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a)

or pursuant to paragraphs (1) through (5) of subsection (b)".

(B) Subsection (g) of such section, as so redesignated, is amended by striking out "paragraphs (1) through (6) of subsection (a)" and inserting in lieu thereof "subsection (a) or paragraphs (1) through (4) of subsection (b)" each place it appears.

(2)(A) Subsection (a) of section 204 (8 U.S.C. 1154) is amended—

(i) by striking out "paragraph (1), (4), or (5) of section 203(a)" and inserting in lieu thereof "paragraph (3) or (4) of section 203(a)",

(ii) by striking out "section 203(a)(2)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(a)",

(iii) by striking out "section 203(a)(3)" and inserting in lieu thereof "paragraph (1) or (2) of section 203(b)", and

(iv) by striking out "section 203(a)(6)" and inserting in lieu thereof "paragraph (2) or (4) of section 203(b)".

(B) Subsection (b) of such section is amended by striking out "section 203(a) (3) or (6)" and inserting in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

(d) Section 241(a)(9) (8 U.S.C. 1251(a)(9)) is amended—

(1) by inserting "(A)" after "(9)", and

(2) by adding at the end the following new subparagraph:

"(B) was admitted as (or otherwise acquired the status of) an independent immigrant described in paragraph (3) of section 203(b) and has failed without good cause to maintain such an investment for a period of at least one year after the date of such entry (or of acquiring such status) or after the date such substantial investment was made, whichever date is later;".

Page 49, line 14, strike out "(a)".

Page 50, line 11, strike out "paragraph (3) or (6)" and all that follows through "section 203(a)(7)" on line 13 and insert in lieu thereof "paragraph (1), (2), or (4) of section 203(b)".

Page 50, strike out line 21 and all that follows through page 51, line 2.

Page 59, after line 6, insert the following new section (and insert a corresponding item in the table of contents):

EFFECTIVE DATES AND TRANSITION

SEC. . (a) The amendments made by sections 201, 202 (other than subsection (e)), and 203 shall take effect on October 1, 1983. When an immigrant, in possession of an unexpired immigrant visa issued before October 1, 1983, makes application for admission, his admissibility under section 212(a)(20) of the Immigration and Nationality Act shall be determined under the provisions of law in effect on the date of the issuance of such visa. The amendments made by the other provisions of this part shall take effect on the date of the enactment of this Act.

(b)(1) In the case of a petition filed under section 204(a) of the Immigration and Nationality Act before October 1, 1983, such petition shall be deemed, as of such date, to be a petition for the new corresponding classification (as defined in paragraph (2)), and the priority date for such petition shall remain in effect.

(2) For purposes of paragraph (1), the term "new corresponding classification" means, in the case of a petition for a—

(A) preference status described in section 203(a)(1) of the Immigration and Nationality Act (as in effect on September 30, 1983), the status as an immediate relative described in section 201(b) of such Act;

(B) preference status described in section 203(a)(2) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(a) of such Act as in effect after such date, as the case may be;

(C) preference status described in section 203(a)(3) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (1) or (2) of section 203(b) of such Act as in effect after such date, as the case may be;

(D) preference status described in section 203(a)(4) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(3) of such Act as in effect after such date;

(E) preference status described in section 203(a)(5) of such Act (as in effect on September 30, 1983), the preference status described in section 203(a)(4) of such Act as in effect after such date; and

(F) preference status described in section 203(a)(6) of such Act (as in effect on September 30, 1983), the preference status described in paragraph (2) or (4) of section 203(b) of such Act (as in effect after such date), as the case may be.

(c) Aliens registered in the nonpreference classification described in section 203(a)(7) of the Immigration and Nationality Act (as in effect on September 30, 1983) shall be transferred, as of October 1, 1983, to the preference status described in section 203(b)(3) of such Act or the nonpreference classification described in section 203(b)(5) of such Act (as such sections are in effect after such date), as the case may be, and the priority date for such classification shall remain in effect.

AMENDMENT (37)

Page 57, after line 18, insert the following new section (and redesignate the succeeding section, and conform the table of contents accordingly):

ELIMINATING PER-COUNTRY QUOTAS FOR WESTERN HEMISPHERE COUNTRIES

SEC. 204. (a) Section 202 (8 U.S.C. 1152) is amended—

(1) by inserting "located in the Eastern Hemisphere" in subsection (a) after "single foreign state";

(2) by inserting "located in the Eastern Hemisphere" in subsection (e) after "single foreign state" and after "any dependent area".

(b) The amendments made by subsection (a) apply to the issuance of immigrant visas to aliens, and the acquisition by such aliens of the status of an alien lawfully admitted to the United States for permanent residence, beginning in fiscal year 1984.

AMENDMENT (38)

Page 57, after line 18, insert the following new section (and redesignate the succeeding section, and conform the table of contents accordingly):

VISAS FOR CONTIGUOUS COUNTRIES

SEC. 204. (a) Section 201(a) (8 U.S.C. 1151(a)) is amended by striking out all that follows "shall not" and inserting in lieu thereof the following: "exceed—

"(1) for aliens born in state or area other than a contiguous foreign state, 240,000 in any fiscal year and 65,000 in any of the first three quarters of any fiscal year, and

"(2) for aliens born in either of the contiguous foreign states, the numerical limitation for that contiguous foreign state specified under section 202(a) for that fiscal year and in any of the first three quarters of any fiscal year 27 percent of the numerical limitation for that fiscal year.".

(b) Section 202(a) (8 U.S.C. 1152(a)) is amended—

(1) by striking out "(a) No person" and inserting in lieu thereof "(a)(1) Except as specifically provided in paragraph (2) of this subsection and in section 101(a)(27), 201(b), 203, and 214(d), no person",

(2) by striking out ", except as specifically" and all that follows up to the period at the end, and

(3) by adding at the end the following new paragraph:

"(2)(A) The total number of immigrant visas made available in any fiscal year to natives of any single foreign state under—

"(i) section 201(a)(1) shall not exceed, and

"(ii) section 201(a)(2) shall not exceed 40,000 (or the number determined under subparagraph (B).

"(B) If in any fiscal year the number of aliens chargeable to a contiguous foreign state who are issued immigrant visas or otherwise acquire the status of an aliens lawfully admitted to the United States for permanent residence is less than 40,000, then in the following fiscal year the numerical limitation for the other contiguous foreign state shall be 40,000 plus the amount of the difference.".

(c) Section 202(e) (8 U.S.C. 1152(e)) is amended by inserting "(other than a contiguous foreign state)" after "natives of any single foreign state.".

(d) Section 203(a) (8 U.S.C. 1153(a)) is amended—

(1) in the matter before paragraph (1), by inserting "paragraph (1) or (2) of" before "section 201(a)",

(2) by inserting "respective" before "number specified in section 201(a)" each place it appears, and

(3) by adding at the end the following new paragraph:

"(9) For the purpose of allocating visa numbers to aliens under this section, aliens born in noncontiguous foreign states and dependent areas shall be treated as one group and aliens born in each of the contiguous foreign states shall be treated as separate groups.".

(e) The amendments made by this section apply to the issuance of immigrant visas to aliens, and the acquisition by such aliens of the status of an alien lawfully admitted to the United States for permanent residence, beginning in fiscal year 1984.

AMENDMENT (39A)

Page 57, after line 18, insert the following new section (and redesignate the succeeding section, and conform the table of contents accordingly):

ELIMINATING SEPARATE COLONY QUOTA

SEC. 204. (a) Section 202 (8 U.S.C. 1152) is amended—

(1) by inserting "or dependent area" in subsection (a) after "foreign state" each place it appears;

(2) by striking out subsection (c),

(3) by inserting "or dependent area" in subsection (e) after "any single foreign state", and

(4) by striking out "or any dependent area defined in subsection (c) of this section" and "600 in the case of" in subsection (e).

(b) The amendments made by subsection (a) apply to the issuance of immigrant visas to aliens, and the acquisition by such aliens of the status of an alien lawfully admitted to the United States for permanent residence, beginning in fiscal year 1984.

AMENDMENT (39B)

Page 57, after line 18, insert the following new section (and redesignate the succeeding

section, and conform the table of contents accordingly):

INCREASING SEPARATE COLONY QUOTA

SEC. 204. (a) Section 202 (8 U.S.C. 1152) is amended—

(1) by striking out "six hundred" in subsection (c) and inserting in lieu thereof "3,000". and

(2) by striking out "600" in subsection (e) and inserting in lieu thereof "3,000".

(b) The amendments made by subsection (a) apply to the issuance of immigrant visas to aliens, and the acquisition by such aliens of the status of an alien lawfully admitted to the United States for permanent residence, beginning in fiscal year 1984.

AMENDMENT (40)

Page 59, after line 6, insert the following new subsection:

(d)(1) Section 328 (8 U.S.C. 1439) is amended to read as follows:

"NATURALIZATION THROUGH SERVICE IN THE ARMED FORCES OF THE UNITED STATES

"SEC. 328. (a) A person who has served honorably at any time in the Armed Forces of the United States and who, if separated from such service, was never separated except under Honorable conditions, may be naturalized without having met any of the residency requirements otherwise established for naturalization and without having been physically present in the United States for any specified period.

"(b) A person filing a petition under subsection (a) of this section shall comply in all other respects with the requirements of this title, except that—

"(1) no residence within the jurisdiction of the court shall be required;

"(2) the petitioner shall not be required, under section 312, to pass an examination on the history or government of the United States;

"(3) notwithstanding section 318 insofar as it relates to deportability, such petitioner may be naturalized immediately if, prior to the filing of the petition, the petitioner shall have appeared before and been examined by a representative of the Service; and

"(4) the petitioner shall furnish to the Attorney General, prior to the final hearing upon his petition, a certified statement from the proper executive department for each period of his service upon which he relies for the benefits of this section, clearly showing that such service was honorable and that no discharges from service, including periods of service not relied upon by him for the benefits of this section, were other than honorable. The certificate or certificates herein provided for shall be conclusive evidence of such service and discharge.".

(2) Section 329 (8 U.S.C. 1440), and the item corresponding to that section in the table of contents, is repealed.

(3)(A) Section 318 (8 U.S.C. 1429) is amended by striking out "sections 328 and 329" and inserting in lieu thereof "section 328".

(B) Section 3 of Public Law 90-633 (8 U.S.C. 1440e) is amended by striking out "329" and inserting in lieu thereof "328".

(C) Section 340(f) (8 U.S.C. 1451(f)) is amended by striking out ", or under the provisions of section 329(c) of this title".

AMENDMENT (41)

Page 59, after line 6, insert the following new subsection:

(d)(1) Section 312(1) (8 U.S.C. 1423(1)) is amended by inserting "or other" before "language" each place it appears.

(2) Section 332(a) (8 U.S.C. 1443(a)) is amended by inserting "or other language" after "English".

AMENDMENT (42)

Page 59, after line 6, insert the following new subsection:

(d) Section 312(1) (8 U.S.C. 1423(1)) is amended by striking out "and has been living" and all that follows through "permanent residence" in the first proviso.

AMENDMENT (43)

Page 59, after line 6, insert the following new subsection:

(d) Subsections (a)(1) and (3) of section 316, subsections (a), (c), and (d) of section 328, and section 330(a)(1) (8 U.S.C. 1427, 1439, 1441(a)(1)) are each amended by striking out "five years" each place it appears and inserting in lieu thereof "three years".

AMENDMENT (44)

Page 86, after line 20, insert the following new paragraph:

"(7) An alien's adjustment to permanent resident status under this section shall constitute the lawful admission for permanent residence of the alien, for purposes of section 318.".

AMENDMENT (45)

Page 88, after line 16, insert the following new subsection (and redesignate the succeeding subsections accordingly):

"(e)(1) An alien whose application for adjustment of status under this section is denied and who files a request within a reasonable time (of not less than 30 days, as established by the Attorney General) is entitled to a hearing before an administrative law judge, and appeal of the determination of the judge, in the same manner as such a hearing and appeal may be had under clauses (ii) and (iii) of section 274A(d)(4)(A).

"(2)(A) If such a hearing is timely requested, any further administrative or judicial review (whether in a deportation proceeding or otherwise) of the determination on the application for adjustment shall be based solely upon the administrative record upon which the administrative law judge's order is based and the judge's findings of fact, if supported by substantial evidence on the record considered as a whole, shall be conclusive.

"(B) If no timely request is made for such a hearing, the determination may only be reviewed within a deportation proceeding under section 242.".

AMENDMENT (46)

Page 79, line 7, strike out "JANUARY 1, 1980" and insert in lieu thereof "DATE OF ENACTMENT".

Page 79, line 8, strike out "TEMPORARY OR".

Page 79, lines 17 and 21, strike out "January 1, 1977" and insert in lieu thereof "the date of the enactment of this section".

AMENDMENT (57B)

Page 85, line 17, insert "(19)," before "(20)".

AMENDMENT (58)

Page 85, line 8, strike out "(c)(1)" and insert in lieu thereof "(c)(1)(A)".

Page 85, after line 13, insert the following new subparagraph:

"(B) There shall be no charge to an applicant for the filing, or adjudication, of an application for adjustment of status under subsection (a) or (b)(1).".

Page 89, line 7, strike out "$10,000,000 for fiscal year 1983" and insert in lieu thereof "such sums as are necessary for fiscal year 1983 and each succeeding fiscal year in which the program established under this section is in operation.".

AMENDMENT (59)

Page 86, lines 14 and beginning on 17, strike out "January 1, 1983" and insert in lieu thereof "the end of the period described in subsection (a)(1)".

Page 86, line 17, strike out "may not apply for such adjustment until January 1, 1983" and insert in lieu thereof "has not applied for such adjustment".

AMENDMENT (62)

Page 85, at the end of line 13, insert the following new sentence: "Such voluntary agencies shall report to the Attorney General monthly on the numbers and status of application for adjustment received under this section and on the cost of processing such applications.".

AMENDMENT (63)

Page 87, line 7, strike out "Attorney General in consultation with other".

Page 88, beginning on line 1 and beginning on line 8, strike out "the Attorney General in consultation with".

AMENDMENT (67)

Page 89, beginning on line 11, strike out ", not later than" and all that follows through "program" on lines 13 and 14, and insert in lieu thereof "quarterly on the status, and impact of, of the legalization program".

Page 89, at the end of line 16 insert the following new sentence: "The President shall transmit to Congress a final report after the completion of the legalization program.".

AMENDMENT (68)

Page 89, line 23, and page 90, lines 2, 5, and before line 9, strike out "1973" and insert in lieu thereof "1982" (and conform the table of contents accordingly).

AMENDMENT (68A)

Page 89, line 23, and page 90, lines 2, 5, and before line 9, strike out "1973" and insert in lieu thereof "1975".

AMENDMENT (68B)

Page 89, line 23, and page 90, lines 2, 5, and before line 9, strike out "1973" and insert in lieu thereof "1978".

AMENDMENT (69)

Page 48, strike out line 21 and all that follows through page 49, line 10 and conform the table of contents accordingly.

AMENDMENT (70)

Page 58, strike out line 6 and all that follows through page 59, line 6.

AMENDMENT (72)

Page 72, beginning on line 16, strike out "and executes a waiver of review and appeal described in paragraph (2)(D)".

Page 74, strike out lines 7 through 13.

AMENDMENT (73)

Page 78, after line 25, insert the following new part (and insert corresponding items into the table of contents):

PART C—GENERAL PROVISIONS

INCREASED SERVICE ACTIVITIES OF IMMIGRATION AND NATURALIZATION SERVICE

SEC. 221. (a) It is the sense of Congress that an essential element of the program of immigration control and reform established by this Act is an increase in adjudications and other service activities of the Immigration and Naturalization Service and of other appropriate Federal agencies in order to ensure the smooth and prompt processing of immigration and naturalization cases.

(b) In order to do this in the most effective and efficient manner, it is the intent of Congress to provide, through the annual authorization of appropriations process for the Department of Justice and for other appropriate Federal agencies, for a closely monitored increase in the level of adjudications and other service activities of the Immigration and Naturalization Service and of such other Federal agencies to achieve an effective level of service. It is also the sense of Congress that adjudications staff and other resources of the Immigration and Naturalization Service should be assigned to those field offices in accordance both with the amount of, and proportionate increase in, their workload.

AMENDMENT (74A)

Page 59, after line 6, insert the following new subsection:

(d) Section 212(a)(23) (8 U.S.C. 1182(a)(23)) is amended by inserting "(except simple possession of 30 grams or less of marihuana)" after "marihuana" the first place it appears.

AMENDMENT (74B)

Page 59, after line 6, insert the following new subsection:

(d)(1) Section 212(a)(23) (8 U.S.C. 1182(a)(23)) is amended by inserting "(except simple possession of 30 grams or less of marihuana)" after "marihuana" the first place it appears.

(2) Section 241(a)(11) (8 U.S.C. 1251(a)(11)) is amended by inserting "(except simple possession of 30 grams or less of marihuana)" after "marihuana" the first place it appears.

AMENDMENT (75)

Page 47, line 20, strike out "and".

Page 47, line 24, strike out the period and insert in lieu thereof ", and".

Page 47, after line 24, insert the following new paragraph and subsection (and redesignate the succeeding subsections accordingly):

(9) by adding at the end the following new sentence: "Before an alien departs voluntarily under this subsection, (A) the alien shall be provided and shall acknowledge in writing receipt of a notice (in English or in such other of the five major languages identified by the Attorney General and most likely to be understood by the alien) of the alien's rights under this Act, including the right to be represented by counsel at the alien's own expense, the right to a deportation hearing before an administrative law judge to determine whether the alien is illegally in the United States, his right to apply for political asylum and to become eligible for asylum if he qualifies as a refugee, and the effect on such rights on agreeing to depart voluntarily, and (B) the alien shall be orally notified (in English or such other language) of the requirement that the alien must execute an acknowledgment of receipt of such notice in order to be permitted to depart voluntarily and, if unable to read, such notice shall be read to the alien in English or such other language.".

(g) Section 244(e) (8 U.S.C. 1254(e)) is amended by adding at the end the following new sentence:

"Before an alien departs voluntarily under this subsection, (1) the alien shall be provided and shall acknowledge in writing receipt of a notice (in English or in such other of the five major languages identified by the Attorney General and most likely to be understood by the alien) of the alien's rights under this Act, including the right to be represented by counsel at the alien's own expense, the right to a deportation hearing before an administrative law judge to deter-

mine whether the alien is illegally in the United States, his right to apply for political asylum and to become eligible for asylum if he qualifies as a refugee, and the effect on such rights on agreeing to depart voluntarily, and (2) the alien shall be orally notified (in English or such other language) of the requirement that the alien must execute an acknowledgment of receipt of such notice in order to be permitted to depart voluntarily and, if unable to read, such notice shall be read to the alien in English or such other language.".

AMENDMENT (76)

Add at the end of the bill the following new title (and insert corresponding items in the table of contents):

TITLE IV—PRESIDENT'S COMMISSION ON UNITED STATES-MEXICO

IMMIGRATION POLICY COMMISSION

SEC. 401. (a) There is established a Commission to be known as the President's Commission on United States-Mexico Immigration Policy (hereinafter in this section referred to as the "Commission"), the purpose of which is to conduct studies and develop recommendations on immigration between the United States and Mexico and its effects on domestic and international affairs respecting the United States.

(b) The Commission's studies and recommendations shall cover—

(1) prevailing and projected demographic, technological, and economic trends affecting immigration between the United States and Mexico;

(2) the interrelationships between United States-Mexico immigration and existing and contemplated government programs in the United States;

(3) the effects of United States immigration policies and practices on relations with Mexico;

(4) the effectiveness of the operation of the immigration laws of the United States, with emphasis on the adequacy of such laws from the standpoint of fairness to aliens seeking admission into the United States and from the standpoint of the impact of such laws on social and economic conditions in this country;

(5) present and projected unemployment in the United States, by occupations, industries, and geographic areas and how it is affected by immigration; and

(6) any other matters which the Commission believes to be germane to the purposes for which it was established.

(c)(1) The Commission shall be composed of 18 members as follows:

(A) The Secretary of Agriculture.

(B) The Attorney General.

(C) The Secretary of Education.

(D) The Secretary of Health and Human Services.

(E) The Secretary of Labor.

(F) The Secretary of State.

(G) The Commissioner of Immigration and Naturalization.

(H) The Commissioner of Social Security.

(I) Ten members from the private sector appointed by the President, by and with the advice and consent of the Senate, from among distinguished individuals in the fields of immigration, labor, business, international relations, or education and health, of whom no fewer than four members shall be from community-based groups which deal with immigration problems. The President shall appoint the members described in this paragraph within 90 days after the date of the enactment of this section.

(2) The chairman and the vice chairman of the Commission shall be designated by the President. The term of office of the chairman and vice chairman shall be for the life of the Commission.

(3) The chairman shall invite for the purpose of participating in any meeting or hearing held by the Commission, and for the purpose of contributing to the studies to be conducted and the recommendations to be developed by the Commission, such officials of the Government of Mexico as the Commission deems desirable.

(d)(1) Members shall be appointed for the life of the Commission.

(2) A vacancy in the Commission shall be filled in the manner in which the original appointment was made.

(3) Seven members of the Commission shall constitute a quorum, but a lesser number may hold hearings.

(4) The Commission shall meet at the call of the chairman or a majority of its members.

(e)(1) Each member of the Commission described in subsection (c)(1)(i) of this section shall, subject to amounts made available in advance in appropriations Acts, receive $150 for each day (including traveltime) during which the member is engaged in the actual performance of duties of the Commission.

(2) Members of the Commission described in subsection (c)(1)(A) through (H) shall receive no additional pay on account of their service on the Commission.

(3) While away from their homes or regular places of business in the performance of services for the Commission, members of the Commission shall be allowed travel expenses, including per diem in lieu of subsistence.

(f)(1) The Commission shall have a director who shall be appointed by and whose pay shall be fixed by the chairman.

(2) The chairman may appoint and fix the pay of such additional personnel as the chairman deems desirable.

(3) The director and staff of the Commission may be appointed without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and may be paid without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates.

(g)(1) The Commission may for the purpose of carrying out its duties hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence as the Commission deems advisable.

(2) The Commission may procure, in accordance with the provisions of section 3109 of title 5, United States Code, the temporary or intermittent services of experts or consultants at a rate to be fixed by the Commission, but not in excess of $150 per diem (including traveltime). While away from his home or regular place of business in the performance of services for the Commission, any such person may be allowed travel expenses including per diem in lieu of subsistence.

(3) The Commission may secure directly from any department or agency of the United States information necessary to enable it to carry out its duties. Upon request of the chairman, the head of such agency or department of the United States shall furnish all information requested by the Commission which is necessary to enable it to carry out its duties.

(h)(1) The Commission shall transmit a report to the President and to each House of Congress within one year after the date of the enactment of this section, and annually thereafter. Such report shall contain the findings and recommendations of the Commission and the progress of the Commission in completing the studies being conducted under subsection (b) of this section.

(2) The final report shall be transmitted to the President and each House of Congress within four years after the date of the enactment of this section.

(3) The Commission shall cease to exist on the thirtieth day beginning after the date of the transmission of the final report under paragraph (2).

(i) There are authorized to be appropriated such sums as may be necessary to carry out the purposes of this section.

(j) Notwithstanding any other provision of this section, no payment, or authorization to make payments to enter into contracts under this section, shall be effective except to such extent, or in such amounts, as are provided in advance in appropriations Acts.

AMENDMENT (77)

Add at the end of the bill the following new title (and insert corresponding items in the table of contents):

TITLE IV—SELECT COMMISSION ON UNITED STATES-MEXICO IMMIGRATION POLICY

COMMISSION

SEC. 401. (a) There is established a Commission to be known as the Select Commission on United States-Mexico Immigration Policy (hereinafter in this section referred to as the "Commission"), the purpose of which is to conduct studies and develop recommendations on immigration between the United States and Mexico and its effects on domestic and international affairs respecting the United States.

(b) The Commission's studies and recommendations shall cover—

(1) prevailing and projected demographic, technological, and economic trends affecting immigration between the United States and Mexico;

(2) the interrelationships between United States-Mexico immigration and existing and contemplated government programs in the United States;

(3) the effects of United States immigration policies and practices on relations with Mexico;

(4) the effectiveness of the operation of the immigration laws of the United States, with emphasis on the adequacy of such laws from the standpoint of fairness to aliens seeking admission into the United States and from the standpoint of the impact of such laws on social and economic conditions in this country;

(5) present and projected unemployment in the United States, by occupations, industries, and geographic areas and how it is affected by immigration; and

(6) any other matters which the Commission believes to be germane to the purposes for which it was established.

(c)(1) The Commission shall be composed of 18 members as follows:

(A) The Secretary of Agriculture.

(B) The Attorney General.

(C) The Secretary of Education.

(D) The Secretary of Health and Human Services.

(E) The Secretary of Labor.

(F) The Secretary of State.

(G) The Commissioner of Immigration and Naturalization.

(H) The Commissioner of Social Security.

(I) Ten members from the private sector, four of whom shall be appointed by the President, three by the Speaker of the House of Representatives, and three by the President pro tempore of the Senate, from among distinguished individuals in the fields of immigration, labor, business, international relations, or education and health, of whom no fewer than four members shall be from community-based groups which deal with immigration problems. Appointments to the Commission shall be made within 90 days after the date of the enactment of this section.

(2) The chairman and the vice chairman of the Commission shall be elected from among the members. The term of office of the chairman and vice chairman shall be for the life of the Commission.

(3) The chairman shall invite for the purpose of participating in any meeting or hearing held by the Commission, and for the purpose of contributing to the studies to be conducted and the recommendations to be developed by the Commission, such officials of the Government of Mexico as the Commission deems desirable.

(d)(1) Members shall be appointed for the life of the Commission.

(2) A vacancy in the Commission shall be filled in the manner in which the original appointment was made.

(3) Seven members of the Commission shall constitute a quorum, but a lesser number may hold hearings.

(4) The Commission shall meet at the call of the chairman or a majority of its members.

(e)(1) Each member of the Commission described in subsection (c)(1)(I) of this section shall, subject to such amounts as are provided in advance in appropriations Acts, receive $150 for each day (including traveltime) during which the member is engaged in the actual performance of duties of the Commission.

(2) Members of the Commission described in subsection (c)(1)(A) through (H) shall receive no additional pay on account of their service on the Commission.

(3) While away from their homes or regular places of business in the performance of services for the Commission, members of the Commission shall be allowed travel expenses, including per diem in lieu of subsistence.

(f)(1) The Commission shall have a director who shall be appointed by and whose pay shall be fixed by the chairman.

(2) The chairman may appoint and fix the pay of such additional personnel as the chairman deems desirable.

(3) The director and staff of the Commission may be appointed without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and may be paid without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates.

(g)(1) The Commission may for the purpose of carrying out its duties hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence as the Commission deems advisable.

(2) The Commission may procure, in accordance with the provisions of section 3109 of title 5, United States Code, the temporary or intermittent services of experts or consultants at a rate to be fixed by the Commission, but not in excess of $150 per diem (including traveltime). While away from his home or regular place of business in the performance of services for the Commission, any such person may be allowed travel expenses including per diem in lieu of subsistence.

(3) The Commission may secure directly from any department or agency of the United States information necessary to enable it to carry out its duties. Upon request of the chairman, the head of such agency or department of the United States shall furnish all information requested by the Commission which is necessary to enable it to carry out its duties.

(h)(1) The Commission shall transmit a report to the President and to each House of Congress within one year after the date of the enactment of this section, and annually thereafter. Such report shall contain the findings and recommendations of the Commission and the progress of the Commission in completing the studies being conducted under subsection (b) of this section.

(2) The final report shall be transmitted to the President and each House of Congress within four years after the date of the enactment of this section.

(3) The Commission shall cease to exist on the thirtieth day beginning after the date of the transmission of the final report under paragraph (2).

(i) There are authorized to be appropriated such sums as may be necessary to carry out the purposes of this section.

(j) Notwithstanding any other provision of this section, no payment, or authorization to make payments to enter into contracts under this section, shall be effective except to such extent, or in such amounts, as are provided in advance in appropriations Acts.

AMENDMENT (80)

Page 14, line 23, insert "and make determinations on the merits of such complaints in an expedited manner (no later than 3 months after the date of receipt of the complaint) and provide for appropriate resolution of such complaints" after "section".

AMENDMENT (81)

Page 85, insert at the end of line 13 the following new sentence: "An alien may not be charged, in total for the filing and consideration of an application under subsection (a) or (b)(1), an amount that exceeds the Service's charge in effect at the time of application for the filing and consideration of an application for adjustment of status under section 245.".

AMENDMENT (83)

Page 86, strike out line 21 and all that follows through page 88, line 11.

Page 88, line 12, strike out "(3)" and insert in lieu thereof "(d)".

AMENDMENT (84)

Strike out section 211, and redesignate sections 212 and 213 as sections 211 and 212, respectively, and conform cross-references (and the table of contents) accordingly.

AMENDMENT (85)

Page 93, after line 3, insert the following new section (and conform the table of contents accordingly):

REGIONAL ADVISORY COUNCILS

SEC. 304. (a) The President shall provide, in cooperation with the States and localities, for the establishment of regional advisory councils in each of the five major regions of the United States.

(b) The council for each region shall be composed of State and local officials and community organizations in that region.

(c) Each council shall advise the President and other Federal officials of the impact on the council's region of the various provisions of this Act.

Amend section 201 of H.R. 7357 as follows:

On page 50, line 20, by inserting the following after subsection (a):

(b) Section 212(d) (8 U.S.C. 1181(d)) is amended by adding at the end the following new paragraph:

"(11) The requirement in paragraph (14) of subsection (a) relating to an offer of employment from an employer in the United States may be waived with respect to any alien seeking to enter the United States as an immigrant under section 203(a)(3), if the Attorney General deems it to be in the National interest.".

On page 50, line 21, by striking out "(b) The amendment made by subsection (a)" and inserting in lieu thereof "(c) the amendment made by subsections (a) and (b)".

Amend section 131 of H.R. 7357 on page 48, lines 21-25, and on page 49, lines 1-10, by striking out "Section 131" in its entirety.

Amends section 123 of H.R. 7357 as follows:

On page 29, line 15, by striking out "30 days" and inserting in lieu thereof "90 days".

On page 32, line 18, by striking out "30 days" and inserting in lieu thereof "90 days".

Amend section 123 of H.R. 7357 on page 31, lines 19-25, and on page 32, lines 1-4, by striking out paragraph "(3)" of Subsection "(b)".

Amend section 124 of H.R. 7357 on page 33, line 9 by adding after "proceedings" the following: ", which notice shall inform the alien of the right to apply for asylum and the time limits placed thereon by this subparagraph,".

Amend section 123 of H.R. 7357 on page 31, lines 19-25, and on page 32, lines 1-4, by striking out paragraph "(3)" of Subsection "(b)".

Amend section 122 of H.R. 7357, on page 26 line 1 by striking out "Appeals" and inserting in lieu thereof the following: "Notices of appeal".

Amend section 204(c) of H.R. 7357 as follows:

On page 58, line 8, by striking out "1982" and inserting in lieu thereof "1983".

On page 58, line 20, by striking out "1984" and inserting in lieu thereof "1989".

On page 58, line 25, by striking out "1984" and inserting in lieu thereof "1989".

Amend section 121 of H.R. 7357 on page 21 line 16, by inserting after "hearing" the following: "and shall be provided with written notice of such exclusion and the reasons therefor".

Amend section 121 of H.R. 7357 on page 22, line 1, by inserting within the parentheses after "personally" the following: "with counsel, subject to section 292".

Amend section 212(a)(6) of H.R. 7357 on page 68, line 20 by adding before the comma at the end of paragraph "(2)(A)(ii)" the following: "or a visa as a nonimmigrant described in section 101(a)(15)(h)(i)" and on page 69, line 5, by inserting before the comma in paragraph "(2)(A)(iv)" the following: ", if required thereby".

Amend section 121 of H.R. 7357 on page 21, line 12, by inserting before the comma at the end of "(b)(1)(11)": "and does not claim to be a citizen of the United States or an alien lawfully admitted for permanent residence who is returning from a temporary visit abroad".

Amend section 124(c) of H.R. 7357 on page 38, line 12, by inserting at the end of paragraph (2) the following:

"(3) The provisions of paragraphs (1) and (2) of this section shall not be applicable to the person who is the subject of such application for asylum, refugee status or withholding of deportation."

Page 86, line 13, strike out "(6)" and insert in lieu thereof "(6)(A)".

Page 86, after line 20, insert the following new subparagraph:

"(B) In the case of an alien during the period his application under subsection (a) or (b)(1) of this section is pending—

"(i) the Attorney General shall, in accordance with regulations, permit the alien to return to the United States after such brief and casual trips abroad as reflect an intention on the part of the alien to adjust to lawful permanent or temporary resident statute under subsection (a) or (b)(1), respectfully, and

"(ii) the attorney general shall grant the alien authorization to engage in employment in the United States and provide to that alien an 'employment authorized' endorsement or other appropriate work permit.".

Amend section 131 of H.R. 7357 on page 49, line 4, by inserting after "status" the following: "unless such failure to be in status is caused principally by acts or omissions of officers or agencies of the United States in the course of considering a timely-filed bona fide petition or application with respect to such status".

Amend section 111 of H.R. 7357 as follows:

On page 18, line 10, by inserting a comma "," after "patrol".

On page 18, line 11, by striking out "and other enforcement" and inserting in lieu thereof "processing of applications for benefits, and other enforcement and service".

On page 18, line 13, by inserting after "aliens" the following ", and to provide for the prompt and efficient processing of applications for legal entry,".

On page 18, line 20-21, by striking out "of other appropriate enforcement" and inserting in lieu thereof "of processing of applications for benefits and of other enforcement and service".

On page 18, line 23, by inserting after "illegal" the following "and legal".

Amend section 201 of H.R. 7357 as follows:

On page 49, line 17, by striking out "sufficient qualified workers" and inserting in lieu thereof: "sufficient workers who are able, willing, qualified".

On page 49, line 18 by striking out "workers".

On page 49, lines 23-24, by striking out "available" and all that follows through "employed" and inserting in lieu thereof: ", and available at the time of application for a visa and admission to the United States and at the place where the alien is to perform such skilled or unskilled labor".

Page 85, line 8, strike out "(c)(1)" and insert in lieu thereof "(c)(1)(A)".

Page 85, line 10, strike out "and received" and insert in lieu thereof ", received, and screened".

Page 85, after line 13, insert the following new subparagraph:

"(B) The voluntary agencies designated under paragraph (1) (and agents and employees thereof) shall, pursuant to regulations prescribed by the Attorney General, be prohibited from providing any person or entity with information contained in any alien's application under this section unless the alien has consented in writing to such disclosure or, after screening, the VOLAG determined that the alien has established through the application prima facie eligibility. Any agent or employee of such an agency who knowingly violates such prohibition shall be fined not more than $3,000.".

By Mrs. SCHROEDER:

AMENDMENT (1)

(Substitute for employer sanctions.)

—Page 3, strike out line 8 and all that follows through page 4, line 23, and insert in lieu thereof the following:

"SEC. 274A. (a)(1)(A) It is unlawful for a person or other entity to hire for employment in the United States an unauthorized alien (as defined in paragraph (3)) and to fail to comply, with respect to that alien's employment, with the terms of the National Labor Relations Act (29 U.S.C. 151 et. seq.), the Fair Labor Standards Act of 1938 (29 U.S.C. 203 et. seq.), and the Occupational Safety and Health Act of 1970 (29 U.S.C. 651 et. seq.).

"(B) The Secretary of Labor shall notify the Attorney General whenever an employer has been determined by the Secretary to have failed to comply with a term of the Fair Labor Standards Act of 1938 or the Occupational Safety and Health Act of 1970, and the Chairman of the National Labor Relations Board shall notify the Attorney General whenever an employer has been determined by the Board to have failed to comply with a term of the National Labor Relations Act. For purposes of subparagraph (A), a person or other entity is deemed to have failed to comply with a term of the respective Act if the Attorney General is notified under this subparagraph of the person's or entity's failure to comply with that term of that Act.

"(C) Upon notification under subparagraph (B), the Attorney General may initiate an investigation to determine whether a violation of subparagraph (A) has occurred. If the Attorney General determines that such a violation has occurred, the Attorney General shall commence an administrative proceeding under subsection (b) with respect to that violation.

"(2) Whenever the Attorney General has a reasonable cause to believe that a person or entity has engaged in a pattern or practice of hiring, recruiting, or referring for employment in the United States unauthorized aliens after the date of the enactment of this section, the Attorney General may commence a proceeding under subsection (b).

Page 4, line 24, strike out "(6)" and insert in lieu thereof "(3)".

Page 5, after line 4, insert the following:

"(4) Unless otherwise provided by Act of Congress, this subsection shall not apply to the hiring, recruiting, or referring of individuals for employment on or after the end of the three-year period beginning on the date of the enactment of this section.

"(b)(1) The Attorney General shall commence any proceeding under this subsection by filing a notice of proposed violation with an administrative law judge. The person or entity named in such notice of proposed violation shall be provided an opportunity for a hearing before the judge within 30 days after the date of receipt of the notice.

"(2) In a proceeding initiated against a person or entity pursuant to subsection (a)(1), if the judge determines by a preponderance of the evidence that the person or entity has violated that subsection with respect to an unauthorized alien, the judge shall enter an order imposing on the person or entity a civil penalty of $5,000 for each such unauthorized alien.

"(3)(A) In a proceeding initiated against a person or entity pursuant to subsection (a)(2), if the judge determines by a preponderance of the evidence that the person or entity has violated that subsection, the judge shall enter an order—

"(i) requiring the person or entity to cease and desist from hiring, recruiting, or referring for employment in the United States any alien whom the person or entity knows to be an unauthorized alien with respect to that employment, and

"(ii) prohibiting the person or entity from hiring (during a period of three years from the effective date of the order) for employment in the United States any individual without complying with the requirements of subsection (c) with respect to each individual hired or considered for such employment.

"(B) A person or entity that fails to comply the terms of an order issued under subparagraph (A) shall be subject to a civil penalty of $1,000 for each such failure. Such penalty shall be assessed by an administrative law judge after notice and opportunity for a hearing.

"(C) The Attorney General shall review each order issued under subparagraph (A) for its effectiveness two years after the date of its issuance and may terminate such order at such time.

"(4)(A) If a person or entity against whom a civil penalty is assessed under this section fails to pay the penalty within the time prescribed in such order, the Attorney General shall file a suit to collect the amount in any appropriate district court of the United States. In any such suit or in any other suit seeking to review an administrative law judge's determination or order under this section, the suit shall be determined solely upon the administative record upon which the determination or order was based and the judge's findings of fact, if supported by substantial evidence on the record considered as a whole, shall be conclusive.".

Page 5, amend lines 5 through 9 to read as follows:

"(c) The requirements referred to in subsection (b)(3)(A)(ii) are, in the case of a person or other entity hiring an individual for employment in the United States, that—

".

Page 5, line 13, strike out "is eligible" and all that follows through "(a)(1)(A)" on line 15 and insert in lieu thereof "is not an unauthorized alien".

Page 6, beginning on line 19, strike out ", recruited, or referred".

Page 6, beginning on line 25, strike out ", recruiting, or referral".

Page 7, beginning on line 2, strike out "in the case of the hiring of the individual" and insert in lieu thereof "if later".

Page 7, strike out line 8 and all that follows through page 11, line 15.

Page 11, lines 16 and 23, strike out "(e)" and "(f)", respectively, and insert in lieu thereof "(d)" and "(e)", respectively.

Page 12, strike out line 3 and all that follows through page 13, line 22, and insert in lieu thereof the following:

"(f) Within three years after the date of the enactment of this section, the President shall prepare and transmit to Congress a comprehensive report concerning the implementation and enforcement of this section, including the assessment of the President as to whether the implementation of this section has resulted in—

"(1) a decline in the number of employment opportunities for unauthorized aliens,

"(2) a decline in the number of violations of protective labor laws,

"(3) a pattern of unlawful discrimination against United States citizens and aliens, other than unauthorized aliens, or

"(4) has created an unnecessary regulatory burden on employers,

and whether the provisions of this section have otherwise been carried out satisfactorily.".

(2)(A) The amendment made by paragraph (1) shall apply to the hiring, recruiting, and referring of individuals for employment in the United States on and after the date of the enactment of this Act.

Page 13, line 23, strike out "(D)" and insert in lieu thereof "(B)".

Page 14, strike out lines 9 through 13.

Page 15, beginning on line 5, strike out "the first day of the seventh month beginning after".

AMENDMENT (2)

(3-year sunset to employer sanctions.)

—Page 5, after line 4, insert the following:

"(7) Unless otherwise provided by Act of Congress, this subsection shall not apply to the hiring, recruiting, or referring of individuals for employment on or after the end of the three-year period beginning on the date of the enactment of this section.

AMENDMENT (4)

(Modification of employer penalty provision.)

—Page 8, strike out line 15 and all that follows through page 11, line 15, and insert in lieu thereof the following:

"(d)(1) Whenever the Attorney General has reasonable cause to believe that a person or entity has or is engaged in a violation of paragraph (1) or (2) of subsection (a), the Attorney General shall provide such person or entity with notice and the opportunity to request a hearing respecting the violation within 30 days after the date of receipt of such notice. Any hearing so requested shall be conducted before an administrative law judge in accordance with section 554 of title 5, United States Code.

"(2) If the administrative law judge determines by a preponderance of the evidence that the person or entity has violated paragraph (1) or (2) of subsection (a), the Attorney General shall issue and cause to be served on such person or entity an order to cease and desist from such violation. The Attorney General shall review such order for its effectiveness two years after its date of issuance and may terminate such order at such time.

"(3) If a person or entity fails to comply with an order of the Attorney General under paragraph (2), the Attorney General may commence proceedings in any district.".

AMENDMENT (3)

(Change in continuous employment sanction.)

—Page 3, beginning on line 19, strike out "subsequent to the date of the enactment of this Act and in accordance with paragraph (1)".

AMENDMENT (4)

(Deleting H-2 provisions.)

—Strike out section 211 (that is, page 67, line 11, through page 75, line 20), and strike out the corresponding item in the table of contents and redesignate succeeding sections (and cross references thereto) accordingly.

By Mrs. SCHROEDER:

AMENDMENT (1)

(Substitute for employer sanctions.)

—Page 3, strike out line 8 and all that follows through page 4, line 7, and insert in lieu thereof the following:

"SEC. 274A. (a)(1)(A) It is unlawful for a person or other entity to hire for employment in the United States an unauthorized alien (as defined in paragraph (3)) and to fail to comply, with respect to that alien's employment, with the terms of the National Labor Relations Act (29 U.S.C. 151 et seq.), the Fair Labor Standards Act of 1938 (29 U.S.C. 203 et seq.), and the Occupational Safety and Health Act of 1970 (29 U.S.C. 651 et seq.).

"(B) The Secretary of Labor shall notify the Attorney General whenever an employer has been determined by the Secretary to have failed to comply with a term of the Fair Labor Standards Act of 1938 or the Occupational Safety and Health Act of 1970, and the Chairman of the National Labor Relations Board shall notify the Attorney General whenever an employer has been determined by the Board to have failed to comply with a term of the National Labor Relations Act. For purposes of subparagraph (A), a person or other entity is deemed to have failed to comply with a term of the respective Act if the Attorney General is notified under this subparagraph of the person's or entity's failure to comply with that term of that Act.

"(C) Upon notification under subparagraph (B), the Attorney General may initiate an investigation to determine whether such a violation of subparagraph (A) has involved an unauthorized alien. If the Attorney General determines that such a violation has occurred, the Attorney General shall commence an administrative proceeding under subsection (b) with respect to that violation.

"(2) Whenever the Attorney General has a reasonable cause to believe that a person or entity has engaged in a pattern or practice of hiring, recruiting, or referring for employment in the United States unauthorized aliens after the date of the enactment of this section, the Attorney General may commence a proceeding under subsection (b).".

Page 4, line 7, strike out "(4)" and insert in lieu thereof "(3)".

Page 4, after line 13, insert the following:

"(4) Unless otherwise provided by Act of Congress, this subsection shall not apply to the hiring, recruiting, or referring of individuals for employment on or after the end of the three-year period beginning on the date of the enactment of this section.

"(b)(1) The Attorney General shall commence any proceeding under this subsection by filing a notice of proposed violation with an administrative law judge. The person or entity named in such notice of proposed violation shall be provided an opportunity for a hearing before the judge within 30 days after the date of receipt of the notice.

"(2) In a proceeding initiated against a person or entity pursuant to subsection (a)(1), if the judge determines by a preponderance of the evidence that the person or entity has violated that subsection with respect to an unauthorized alien, the judge shall enter an order imposing on the person or entity a civil penalty of $5,000 for each such unauthorized alien.

"(3)(A) In a proceeding initiated against a person or entity pursuant to subsection (a)(2), if the judge determines by a preponderance of the evidence that the person or entity has violated that subsection, the judge shall enter an order—

"(i) requiring the person or entity to cease and desist from hiring, recruiting, or referring for employment in the United States any alien whom the person or entity knows to be on unauthorized alien with respect to that employment, and

"(ii) prohibiting the person or entity from hiring (during a period of three years from the effective date of the order) for employment in the United States any individual without complying with the requirements of subsection (c) with respect to each individual hired or considered for such employment.

"(B) A person or entity that fails to comply the terms of an order issued under subparagraph (A) shall be subject to a civil penalty of $1,000 for each such failure. Such penalty shall be assessed by an administrative law judge after notice and opportunity for a hearing.

"(C) The Attorney General shall review each order issued under subparagraph (A) for its effectiveness two years after the date of its issuance and may terminate such order at such time.

"(4)(A) If a person or entity against whom a civil penalty is assessed under this section fails to pay the penalty within the time prescribed in such order, the Attorney General shall file a suit to collect the amount in any appropriate district court of the United States. In any such suit or in any other suit seeking to review an administrative law judge's determination or order under this section, the suit shall be determined solely upon the administrative record upon which the determination or order was based and the judge's findings of fact, if supported by substantial evidence on the record considered as a whole, shall be conclusive.".

Page 4, amend lines 14 through 18 to read as follows:

"(c) The requirements referred to in subsection (b)(3)(A)(ii) are, in the case of a person or other entity hiring an individual for employment in the United States, that—
".

Page 4, line 22, strike out "is eligible" and all that follows through "United States" on line 24 and insert in lieu thereof "is not an unauthorized alien".

Page 6, beginning on line 3, strike out ", recruited, or referred".

Page 6, beginning on line 9, strike out ", recruiting, or referral".

Page 6, beginning on line 11, strike out "in the case of the hiring of the individual" and insert in lieu thereof "if later".

Page 7, strike out line 4 and all that follows through page 12, line 24.

Page 12, line 24 and page 13 line 5 strike out "(e)" and "(f)", respectively, and insert in lieu thereof "(d)" and "(e)", respectively.

Page 13, strike out line 10 and all that follows through page 15, line 5, and insert in lieu thereof the following:

"(f) Within three years after the date of the enactment of this section, the President shall prepare and transmit to Congress a comprehensive report concerning the implementation and enforcement of this section, including the assessment of the President as to whether the implementation of this section has resulted in—

"(1) a decline in the number of employment opportunities for unauthorized aliens,

"(2) a decline in the number of violations of protective labor laws,

"(3) a pattern of unlawful discrimination against United States citizens and aliens, other than authorized aliens or

"(4) has created an unnecessary regulatory burden on employers,

and whether the provisions of this section have otherwise been carried out satisfactorily.".

(2)(A) The amendment made by paragraph (1) shall apply to the hiring, recruiting, and referring of individuals for employment in the United States on and after the date of the enactment of this Act.

Page 15, line 5, strike out "(D)" and insert in lieu thereof "(B)".

Page 15, strike out lines 16 through 20.

Page 16, beginning on line 12, strike out "the first day of the seventh month beginning after".

AMENDMENT (4)

(Deleting H-2 provisions.)

—Strike out section 211 (that is, page 59, line 9, through page 67, line 11), and strike out the corresponding item in the table of contents and redesignate succeeding sections (and cross references thereto) accordingly.

—Page 30, line 17, strike "and" and all that follows through "capricious;", on line 18, and insert in lieu thereof, "or the constitutionality of such laws and regulations as applied (iv) whether treaties binding on the United States have been violated, and (v) whether the decision was arbitrary or capricious;".

—Page 14, line 8, strike out "18" and insert in lieu thereof "12".

Page 14, line 15 strike out "Two more such" and all that follows through "section is enacted.", on line 17, and insert in lieu thereof "Five more such reports shall be prepared and transmitted 24, 36, 48, 60 and 72 months after the month in which this section is enacted.".

—Page 6, line 21, strike out "A person or entity" and all that follows through "to be genuine." on line 23.

By Mr. SCHEUER:

—Page 79, line 14, and page 80, line 25, strike out "1983" and insert in lieu thereof "during the 12-month period beginning on the effective date of the legalization program (as described in subsection (e)(3)(D))".

Page 86, beginning on line 3, strike out "the date of the enactment of this section" and insert in lieu thereof "the effective date of the legalization program (as described in subsection (e)(3)(D))".

Page 86, line 11, strike out "January 1, 1983" and insert in lieu thereof "the effective date of the legalization program".

Page 86, line 14, strike out "before January 1, 1983" and insert in lieu thereof "after the date the Commission submits a report under subsection (e)(3)(A) and before the effective date of the legalization program".

Page 86, Beginning on line 17, strike out "January 1, 1983" and insert in lieu thereof "such effective date".

Page 88, after line 16, insert the following new subsection (and redesignate succeeding subsections, and cross-references thereto, accordingly):

"(e)(1) There is established a Select Commission on Immigration Enforcement and Legalization (hereinafter in this subsection referred to as the 'Commission') which shall be composed of—

"(A) eight members appointed by the Speaker of the House of Representatives, of whom four shall be members of the House Committee on the Judiciary and four shall be individuals not officials or employees of the Federal Government, and

"(B) eight members appointed by the President pro tempore of the Senate, of whom four shall be members of the Senate Committee on the Judiciary and four shall be individuals not officials or employees of the Federal Government.

"(2)(A) A majority of the Commission shall constitute a quorum for the transaction of its business, but the Commission may provide for the taking of testimony and the reception of evidence at meetings at which there are present not less than four members of the Commission.

"(B) Each member of the Commission who is not otherwise in the service of the Government of the United States shall be compensated at a rate not to exceed the daily equivalent of the rate then payable for grade GS-18 in the General Schedule under section 5332 of title 5, United States Code, for each day spent in the work of the Commission, be paid actual travel expenses, and per diem in lieu of subsistence expenses, when away from his usual place of residence, in accordance with chapter 57 of title 5, United States Code. Each member of the Commission who is otherwise in the service of the Government of the United States shall service without compensation in addition to that received for such other service, but while engaged in the work of the Commission shall be paid actual travel expenses, when away from his usual place of residence, in accordance with chapter 57 of title 5, United States Code.

"(3)(A) The Commission shall determine and report to Congress when effective programs have been established to interdict the illegal entry of aliens into the United States and to eliminate substantially aliens' violations of their conditions of entry.

"(B) Not later than 30 days after the date such a report is submitted, the Attorney General shall promulgate, on an interim or other basis, a proposed plan to implement the legalization program provided by this section.

"(C) The Commission shall review such plan and shall submit to the Attorney General and Congress, not later than 30 days after the date the plan is proposed, a report on the review and on its judgment as to (i) the fairness and efficiency of the plan in providing for processing of aliens' applications for adjustments, and (ii) assurances under that any credentials concerning periods of residence submitted by aliens under the plan will be carefully scrutinized to deter and prevent the use or acceptance of forged or false documentation.

"(D) For purposes of this section, the effective date of the legalization program is the first date of the first month beginning more than 90 days after the date (if any) on which the Commission transmits the report described in subparagraph (A).

"(4)(A) The Commission is authorized to appoint and fix the compensation of such personnel as may be necessary to enable it to carry out its functions without regard to the civil service laws, rules, and regulations. Any Federal employee subject to those laws, rules, and regulations may be detailed to the Commission without reimbursement, and such detail shall be without interruption or loss of civil service status or privilege.

"(B) Staff members of the Committee on the Judiciary of the Senate or of the Committee on the Judiciary of the House of Representatives may be detailed to serve on the staff of the Commission by the chairman of the respective committee. Staff members so detailed shall serve on the staff of the Commission without additional compensation except that they may receive such reimbursement of expenses incurred by them as the Commission may authorize.

"(5) The Commission may call upon the head of any Federal department or agency to furnish information and assistance which the Commission deems necessary for the performance of its functions, and the heads of such departments and agencies shall furnish such assistance and information, unless prohibited under law, without reimbursement.

"(6) The Commission is authorized to make grants and enter into contracts for the conduct of research and studies which will assist it in performing its duties under this section.

"(7) The Commission shall cease to exist upon the effective date of the legalization program, except that the Commission may continue to function for up to 60 days thereafter for the purpose of winding up its affairs.

"(8) The Commission is authorized to procure temporary and intermittent services of experts and consultants as are necessary to the extent authorized by section 3109 of title 5, United States Code, but at rates not to exceed the daily equivalent of the rate then payable for grade GS-18 in the General Schedule under section 5332 of such title.

"(9)(A) There are authorized to be appropriated such sums as may be necessary to carry out the purposes of this subsection.

"(B) Notwithstanding any other provision of this subsection, no payment, or authorization to make payments or to enter into contracts under this subsection, shall be effective except to such extent, or in such amounts, as are provided in advance in appropriations Acts.".

Page 89, line 12, strike out "the date of the enactment of this Act" and insert in lieu thereof "the effective date of the legalization program under section 245A of the Immigration and Nationality Act".

Page 89, beginning on line 14, strike out "section 245A of the Immigration and Nationality Act" an insert in lieu thereof "such section".

—Page 88, line 6, insert "which either (i) is" after "medical assistance".

Page 88, line 11, insert before the period the following: ", or (ii) is provided for preventive health care services or family planning services (as established by the Secretary of Health and Human Services)".

—Page 89, line 16, insert "and on the population changes in such regions" after "United States".

AMENDMENT (7)

—Page 85, at the end of line 13, insert the following new sentence: "Such applications shall provide for the reporting by applicants of their addresses as of April 1, 1980 (Census Day), and the Attorney General shall compile data on the number of such applicants residing on that date in each census tract and make such data (on an aggregate basis) available to the Bureau of the Census and the public.".

Page 90, strike out line 3.

Page 90, line 5, strike out the period and insert in lieu thereof "; and".

Page 90, after line 5, insert the following new paragraph:

(3) by adding at the end the following new sentence: "The Attorney General shall require that applications under this section (made after the date of the enactment of this sentence) require the reporting by applicants of their addresses as of April 1, 1980 (Census Day), and the Attorney General shall compile data on the number of such applicants residing on that date in each census tract and make such data (on an aggregate basis) available to the Bureau of the Census and the public.".

By Mr. SAWYER:

—Page 79, strike out line 1 and all that follows through page 89, line 22, and insert in lieu thereof the following:

TITLE III—UPDATING REGISTRY DATE

Page 89, line 24, strike out "302" and insert in lieu thereof "301".

Page 90, strike out line 9 and all that follows through page 93, line 3.

Conform the table of contents accordingly.

By Mr. SEIBERLING:

—On page 49, after line 12, insert the following:

NUMERICAL LIMITATION

SEC. 201. (a) Subsection (a) of section 201 (8 U.S.C. 1151) is amended to read as follows:

"(a) Exclusive of special immigrants defined in section 101(a)(27), immediate relatives specified in subsection (b) of this section, aliens who are admitted or granted asylum under section 207 or 208, aliens provided records of permanent residence under section 214(d), and aliens whose status is adjusted to permanent resident status under section 245A, aliens born in a foreign state or dependent area who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence shall not exceed in any fiscal year the number equal to (A) 425,000, minus (B) the number of immediate family relatives specified in subsection (b) of this section who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence and the number of aliens who in the previous fiscal year were provided records of permanent residence under section 214(d).".

(b) Such section is further amended by adding at the end the following new subsections:

"(c) The President shall transmit to the Congress, not later than January 1, 1985 and not later than January 1st of every other year thereafter, a report on the impact on the economy, labor market, housing market, educational system, social services, population, and foreign policy of the United States of admission and other entries of immigrants, refugees, asylees, and parolees into the United States during the preceding two-year period. The President shall include in such report any appropriate recommendations on changes in the numerical limitation on admissions, including a level of total admissions for the next two-year period, and other policies of this title bearing on the admission and entry of such aliens to the United States.

"(d) A hearing to review the report and recommendations of the President shall be held by the Committees on the Judiciary of the House of Representatives and the Senate within 90 days after receipt of such report.".

Sections 201, 202, 203, and 204 of this Act are renumbered Sections 202, 203, 204, and 205, respectively, and the Table of Contents is amended to include "Sec. 201. Numerical Limitation.".

By Mr. SENSENBRENNER:

AMENDMENT (1)

—Page 57, after line 18, insert the following new section (and redesignate the succeeding section, and conform the table of contents, accordingly):

LIMITATION OF FIFTH PREFERENCE STATUS TO UNMARRIED BROTHERS AND SISTERS

SEC. 204. (a)(1) Paragraph (5) of section 202(e) (8 U.S.C. 1152(e)) is amended by striking out "to qualified immigrants" and all that follows through the end and inserting in lieu thereof the following: "to qualified immigrants—

"(A) who are the unmarried brothers or unmarried sisters of citizens of the United States who are 21 years of age, or

"(B) who—

"(i) are the married brothers or married sisters of United States citizens at least 21 years of age and

"(ii) had a petition filed on their behalf for preference status by reason of the relationship described in section 203(a)(5) not later than the priority date (as determined by the Secretary of State to be in effect as of the date of the enactment of the Immigration Reform and control Act of 1982) for petitions filed for such preference status on behalf of natives of foreign states and dependent areas to which this subsection is not being applied.".

(2) Paragraph (5) of section 203(a) (8 U.S.C. 1153(a)) is amended by striking out "to qualified immigrants" and all that follows through the end and inserting in lieu thereof the following: "to qualified immigrants—

"(A) who are the unmarried brothers or unmarried sisters of citizens of the United States who are 21 years of age, or

"(B) who—

"(i) are the married brothers or married sisters of United States citizens at least 21 years of age and

"(ii) had a petition filed on their behalf for preference status by reason of the relationship described in this paragraph not later than the priority date (as determined by the Secretary of State to be in effect as of the date of the enactment of the Immigration Reform and Control Act of 1982) for petitions filed for such preference status on behalf of natives of foreign states and dependent areas to which section 202(e) is not being applied.".

(b) The amendments made by subsection (a) shall take effect on October 1, 1983. When an immigrant, in possession of an unexpired immigrant visa issued before October 1, 1983, makes application for admission, his admissability under section 212(a)(20) and (21) of the Immigration and Nationality Act shall be determined under the provisions of law in effect on the date of the issuance of such visa.

—Page 57, after line 18, insert the following new section (and redesignate the succeeding section, and conform the table of contents, accordingly):

LIMITATION ON NUMBER OF IMMIGRANTS IN FISCAL YEARS

SEC. 204. (a) Subsection (a) of section 201 (8 U.S.C. 1151) is amended to read as follows:

"(a) Exclusive of special immigrants defined in section 101(a)(27), immigrants born to permanent resident aliens during a temporary visit abroad, immediate relatives specified in subsection (b) of this section, immigrants admitted under section 211(a) on the basis of a prior issuance of a visa to their accompanying parent who is such an immediate relative, aliens who are admitted or granted asylum under section 207 or 208, and aliens provided records of permanent residence under section 214(d), the number of aliens born in a foreign state or dependent area who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence shall not—

"(1) in any fiscal year exceed the number equal to 425,000, minus—

"(A) the number of immediate relatives and special immigrants (other than those described in section 101(a)(27)(A)) who in the previous fiscal year were issued immigrant visas or otherwise acquired the status of aliens lawfully admitted to the United States for permanent residence,

"(B) the number of immigrants born in the previous fiscal year to permanent resident aliens during a temporary visit abroad,

"(C) the number of immigrants admitted under section 211(a) in the previous fiscal year on the basis of a prior issuance of a visa to their accompanying parent who is an immediate relative,

"(D) the number of aliens who in the previous fiscal year were provided records of permanent residence under section 214(d), and

"(E) the number of aliens who were admitted or granted asylum under section 207 or 208 in the previous fiscal year, and

"(2) in any of the first three quarters of any fiscal year exceed 27 percent of the numerical limitation computed under paragraph (1) for that fiscal year.".

(b) The amendment made subsection (a) shall take effect on October 1, 1983.

AMENDMENT (1A)

—Page 79, strike out line 1 and all that follows through page 89, line 22, and insert thereof the following:

TITLE III—UPDATING REGISTRY DATE AND REGISTRY ASSISTANCE

Page 89, line 24, strike out "302" and insert in lieu thereof "301".

Page 90, line 9, strike out "LEGALIZATION" and insert in lieu thereof "REGISTRY".

Page 90, line 19, strike out "legalized" and insert in lieu thereof "registered".

Page 91, strike out line 12 and all that follows through page 92, line 3 and insert in lieu thereof the following:

"(C) The term 'eligible registered alien' means an alien who has been provided a record of permanent resident status under section 249 of the Immigration and Nationality Act after the date of the enactment of this Act, but only until the end of the three-year period beginning on the date the alien was granted such status."

Page 92, beginning on line 22, strike out "means" and all that follows through page 93, line 3 and insert in lieu thereof the following: "has the meaning given the term 'eligible registered alien' in subsection (b)(2)(C)".

Conform the table of contents accordingly.

AMENDMENT (1B)

—Page 90, line 9, strike out "LEGALIZATION" and insert in lieu thereof "REGISTRY" (and conform the table of contents accordingly).

Page 90, line 19, strike out "legalized" and insert in lieu thereof "registered".

Page 91, strike out line 12 and all that follows through page 92, line 3 and insert in lieu thereof the following:

"(C) The term 'eligible registered alien' means an alien who has been provided a record of permanent resident status under section 249 of the Immigration and Nationality Act after the date of the enactment of this Act, but only until the end of the three-year period beginning on the date the alien was granted such status.".

Page 92, beginning on line 22, strike out "means" and all that follows through page

93, line 3 and insert in lieu thereof the following: "has the meaning given the term 'eligible registered alien' in subsection (b)(2)(C)".

AMENDMENT (1C)

—At the end of title III, add the following new section:

STATE REGISTRY ASSISTANCE

SEC. 303. (a) There are authorized to be appropriated to carry out subsections (b) and (c) of this section such sums as may be necessary for fiscal year 1983 and for each of the three succeeding fiscal years.

(b)(1) Subject to the amounts provided in advance in appropriation Acts, the Secretary of Health and Human Services shall provide reimbursement to each State (as defined in paragraph (2)(A)) for 100 percent of the costs of programs of public assistance (as defined in paragraph (2)(B)) provided to any eligible registered alien (as defined in paragraph (2)(C)).

(2) For purposes of this subsection:

(A) The term "State" has the meaning given such term in section 101(a)(36) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(36)).

(B) The term "programs of public assistance" means programs existing in a State or local jurisdiction which—

(i) provide for cash, medical, or other assistance designed to meet the basic subsistence or health needs of individuals or required in the interest of public health,

(ii) are generally available to needy individuals residing in the State or locality, and

(iii) receive funding from units of State or local government.

(C) The term "eligible registered alien" means an alien who has been provided a record of permanent resident status under section 249 of the Immigration and Nationality Act after the date of the enactment of this Act, but only until the end of the three-year period beginning on the date the alien was granted such status.

(c)(1) Subject to the amounts provided in advance in appropriation Acts and in accordance with this section, the Secretary of Education shall make payments to State educational agencies for the purpose of assisting local educational agencies of that State in providing educational services for eligible legalized aliens (as defined in paragraph (3)(B)).

(2) The definitions and provisions of titles I through IV of the Refugee Education Assistance Act of 1980 shall apply to payments under this subsection in the same manner as they apply to grants and payments under those titles, except that, in applying this paragraph, any reference in such titles to an "eligible participant" shall be deemed to be a reference to an "eligible legalized alien".

(3) For purposes of this subsection, the term "eligible registered alien" has the meaning given such term in subsection (b)(2)(B).

AMENDMENT (1D)

—At the end of title III, add the following new section:

STATE REGISTRY ASSISTANCE

SEC. 303. (a) There are authorized to be appropriated to carry out subsections (b) and (c) of this section such sums as may be necessary for fiscal year 1983 and for each of the three succeeding fiscal years.

(b)(1) The Secretary of Health and Human Services shall provide reimbursement to each State (as defined in paragraph (2)(A)) for 100 percent of the costs of programs of public assistance (as defined in paragraph (2)(B)) provided to any eligible registered alien (as defined in paragraph (2)(C)).

(2) For purposes of this subsection:

(A) The term "State" has the meaning given such term in section 101(a)(36) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(36)).

(B) The term "programs of public assistance" means programs existing in a State or local jurisdiction which—

(i) provide for cash, medical, or other assistance designed to meet the basic subsistence or health needs of individuals or required in the interest of public health,

(ii) are generally available to needy individuals residing in the State or locality, and

(iii) receive funding from units of State or local government.

(C) The term 'eligible registered alien' means an alien who has been provided a record of permanent resident status under section 249 of the Immigration and Nationality Act after the date of the enactment of this Act, but only until the end of the three-year period beginning on the date the alien was granted such status.

(c)(1) Subject to the amounts provided in advance in appropriation Acts and in accordance with this section, the Secretary of Education shall make payments to State educational agencies for the purpose of assisting local educational agencies of that State in providing educational services for eligible legalized aliens (as defined in paragraph (3)(B)).

(2) The definitions and provisions of titles I through IV of Refugee Education Assistance Act of 1980 shall apply to payments under this subsection in the same manner as they apply to grants and payments under those titles, except that, in applying this paragraph, any reference in such titles to an "eligible participant" shall be deemed to be a reference to an "eligible legalized alien".

(3) For purposes of this subsection, the term "eligible registered alien" has the meaning given such term in subsection (b)(2)(B).

—On page 1 strike out all after the enacting clause and insert in lieu thereof the following:

SHORT TITLE; REFERENCES IN ACT; TABLE OF CONTENTS

SECTION 1. (a) This Act may be cited as the "Immigration Improvements Act of 1981".

(b) Except as otherwise specifically provided in this Act, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Immigration and Nationality Act.

TABLE OF CONTENTS

Sec. 1. Short title; references in Act; table of contents.

TITLE I—CHANGE IN NUMERICAL LIMITATIONS AND ENTRY OF ALIENS INTO THE UNITED STATES

Sec. 101. Annual immigration plan and change in numerical limitations.
Sec. 102. Restriction on parole authority.

Sec. 221. Limitation on aid to families with dependent children and medicaid benefits to citizens and permanent residents.

PART D—FUNDING

Sec. 231. Fees and charges.

TITLE I—CHANGE IN NUMERICAL LIMITATIONS AND ENTRY OF ALIENS INTO THE UNITED STATES

ANNUAL IMMIGRATION PLAN AND CHANGE IN NUMERICAL LIMITATIONS

SEC. 101. (a)(1) Chapter 1 of title II (8 U.S.C. 1151 et seq.) is amended by inserting before section 201 the following new section:

"ANNUAL IMMIGRATION PLAN

"SEC. 200. (a)(1)(A) The President shall transmit to the Congress, not later than 90 days before the beginning of each fiscal year, a proposed plan for immigration for that fiscal year.

"(B) Any time during the period of 20 calendar days of continuous session of Congress after the date plan under subparagraph (A) (hereinafter in this section referred to as an 'annual immigration plan') is transmitted to it, but before any resolution described in subsection (e)(2) has been ordered reported in either House, the President may make amendments or modifications to the plan, consistent with subsection (b) and (c), which modifications or revisions shall thereafter be treated as a part of the annual immigration plan originally transmitted and shall not affect in any way the time limits otherwise provided for in this section.

"(2)(A) If both Houses of Congress are not in session on the day an annual immigration plan is received by the appropriate officers of each House, for purposes of this section, the plan shall be deemed to have been transmitted on the first succeeding day on which both Houses are in session.

"(B) An annual immigration plan shall take effect unless, between the date of the transmittal of such plan and the end of the first period of 30 calendar days of continuous session of Congress after such date, each House of Congress passes a resolution stating in substance that the House does not favor the plan.

"(C) For purposes of this subsection and subsection (e)—

"(i) continuity of session is broken only by an adjournment of Congress sine die, and

"(ii) the days on which a House is not in session because of an adjournment of more than 3 days to a day certain are excluded in the computation of a calendar-day period of continuous session with respect to that House.

"(b)(1) Each annual immigration plan for a fiscal year shall contain a specification of—

"(A) an overall numerical limitation (of not less than 300,000 and not more than 420,000) on the number of aliens (other than special immigrants and aliens who are admitted to the United States as emergency situation refugees under section 207(b)) born in a foreign state or dependent area who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence or as refugees in the fiscal year; and

"(B) an allocation within such overall numerical limitation of—

"(i) a numerical limitation for aliens may be admitted (or provided permanent resident status) as immediate relatives (as defined in section 201(b)) in the fiscal year;

"(ii) a numerical limitation, based on humanitarian concerns or other concerns in the national interest, for aliens who may be admitted as refugees under section 207 or granted asylum under section 208 in the fiscal year; and

"(iii) a numerical limitation for all other such aliens who may be admitted (or provided permanent resident status) in the fiscal year.

"(2) In making the allocations under paragraph (1)(B), the President shall provide that—

"(A) the sum of the three numerical limitations described in such paragraph equals the overall numerical limitation specified in paragraph (1)(A), and

"(B)(i) the numerical limitation specified in paragraph (1)(B)(i) is not less than 25 per centum, or more than 45 per centum, of such overall numerical limitation,

"(ii) the numerical limitation specified in paragraph (1)(B)(ii) is not less than 10 per centum, or more than 20 per centum, of such overall numerical limitation, and

"(iii) the numerical limitation specified in paragraph (1)(B)(iii) is not less that 33⅓ per centum, or more than 60 per centum, of such overall numerical limitation.

"(c) Each annual immigration plan shall also include information on the anticipated impact of admission of such aliens on the economy of the United States and, in particular, on the rate of unemployment and conditions of employment in the United States.

"(d) As soon as possible after the President transmits an annual immigration plan to Congress, the chairman of the Committee on the Judiciary of the House of Representatives and the chairman of the Committee on the Judiciary of the Senate shall cause to have printed in the Congressional Record a summary of the plan.

"(e)(1) This subsection is enacted by Congress—

"(A) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such it is deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of resolutions described by paragraph (2), and it supersedes other rules only to the extent that it is inconsistent therewith; and

"(B) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of the House.

"(2) For purposes of this subsection, the term 'resolution' means only a resolution of either House of Congress the matter after the resolving clause of which is as follows: 'That the disapproved the annual immigration plan for fiscal year transmitted by the President to the Congress, under section 200 of the Immigration and Nationality Act.', the first blank space in each case being filled with the name of the resolving House and the other blank space being filled with the date of the fiscal year involved.

"(3) A resolution once introduced with respect to a determination shall immediately be referred to the Committee on the Judiciary by the President of the Senate or the Speaker of the House of Representatives, as the case may be.

"(4)(A) If the Committee on the Judiciary has not reported a resolution referred to it at the end of 20 calendar days after its referral, it shall be in order to move to discharge the committee from further consideration of such resolution.

"(B) A motion to discharge may be made only by an individual favoring the resolution, shall be highly privileged (except that it may not be made after the committee has reported a resolution with respect to the same determination), and debate thereon shall be limited to not more than one hour, to be divided equally between those favoring and those opposing the resolution. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to.

"(C) If the motion to discharge is agreed to or disagreed to, the motion may not be renewed, nor may another motion to discharge the committee be made with respect to any other resolution with respect to the same annual immigration plan.

"(5)(A) When the committee has reported, or has been discharged from further consideration of, a resolution, it shall be at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the resolution. The motion shall be highly privileged and shall not be debatable. An amendment to the motion shall not be in ordcr, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to.

"(B) Debate on the resolution shall be limited to not more than 4 hours, which debate shall be divided equally between those favoring and those opposing such resolution. A motion further to limit debate shall not be debatable. An amendment to, or motion to recommit, the resolution shall not be in order, and it shall not be in order to move to reconsider the vote by which such resolution was agreed to or disagreed to.

"(6)(A) Motions to postpone, made with respect to the discharge from a committee, or the consideration of a resolution and motions to proceed to the consideration of other business, shall be decided without debate.

"(B) Appeals from the decision of the Chair relating to the application of the rules of the Senate or the House of Representatives, as the case may be, to the procedure relating to a resolution shall be decided without debate.".

(2) The table of contents is amended by inserting immediately before the item relating to section 201 the following new item:

"Sec. 200. Annual immigration plan.".

(b) Subsection (a) of section 201 (8 U.S.C. 1151) is amended—

(1) by striking out "seventy-two thousand and shall not in any fiscal year exceed two hundred and seventy thousand" and inserting in lieu thereof "26 per centum of the numerical limitation specified in section 200(b)(1)(B)(iii) for that fiscal year and shall not in any fiscal year exceed such numerical limitation for that year",

(2) by inserting "(1)" after "(a)", and

(3) by adding at the end of subsection (a) the following new paragraph:

"(2) The number of aliens born in any foreign state or dependent area who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence as immediate relatives specified in subsection (b), shall not in any of the first three quarters of any fiscal year exceed a total of 26 per centum of the numerical limitation specified in section 200(b)(1)(B)(i) for that fiscal year and shall not in any fiscal year exceed such numerical limitation for that year.".

(c) Section 203(a) (8 U.S.C. 1153(a)) is amended by striking out "section 201(a)" and inserting in lieu thereof "section 201(a)(1)" each place it appears.

(d)(1) Subsection (a) of section (8 U.S.C. 1157) is amended—

(A) by striking out paragraphs (1) and (2) and inserting in lieu thereof the following paragraph:

"(1) Except as provided in subsection (b), the number of refugees who may be admitted under this section in any fiscal year shall be the numerical limitation on refugees specified under section 200(b)(1)(B)(ii) for that year.", and

(B) by redesignating paragraph (3) as paragraph (2).

(2) Subsection (b) of such section is amended to read as follows:

"(b)(1) If the President determines, after appropriate consultation, that—

"(A) an emergency refugee situation exists,

"(B) the admission of a specified number of such refugees in response to the emergency refugee situation is justified by grave humanitarian concerns or is otherwise in the national interest, and

"(C) the admission to the United States of these refugees cannot be accomplished under subsection (a), the President shall transmit such determination to Congress and shall include in such determination a recommendation as to the number of refugees who should be admitted, subject to paragraph (2) and without regard to the numerical limitations specified in section 200, to the United States in response to such emergency refugee situation. As soon as possible after the President transmits such a determination to Congress, the Chairman of the Committee on the Judiciary of the House of Representatives and the chairman of the Committee on the Judiciary of the Senate shall cause to have printed in the Congressional Record a summary of such determination and a statement as to whether or not the determination is one respecting a minor refugee crisis or a major refugee crisis (as defined in paragraph (2)(C)(i).

Subject to paragraph (2), such specified number of additional refugees may be admitted to the United States in response to the emergency refugee situation.

"(2)(A) If both Houses of Congress are not in session on the day a determination under paragraph (1) (hereinafter in this paragraph referred to the the 'determination') is received by the appropriate officers of each House, for purposes of this paragraph, the determination shall be deemed to have been transmitted on the first succeeding day on which both Houses are in session.

"(B)(i) If—

"(I) a determination respecting a minor refugee crisis is transmitted to Congress for a fiscal year, and

"(II) the number of alien refugees covered by such determination and by previous determinations respecting minor refugee crises transmitted and not disapproved under this subsection for such fiscal year is less than 15,000,

the determination and shall take effect unless, between the date of such transmittal and the end of the first period of 45 calendar days of continuous session of Congress after such date, each House of Congress passes a resolution described in subparagraph (D)(ii)(I) disapproving such determination.

"(ii) If—

"(I) a determination respecting a major refugee crisis is transmitted to Congress for a fiscal year, or

"(II) a determination respecting a minor refugee crisis is so transmitted and subclause (II) of clause (i) is not met,

the determination shall not take effect unless, between the date of such transmittal and the end of the first period of 45 calendar days of continuous session of Congress after such date, each House of Congress passes a resolution described in subparagraph (D)(ii)(II) approving such determination.

"(C) For purposes of subparagraph (B)—

"(i)(I) the term 'determination respecting a minor refugee crisis' means a Presidential determination under paragraph (1) which recommends the admission of not more than 5,000 aliens in a fiscal year in response to an emergency refugee situation,

"(II) the term 'determination respecting a major refugee crisis' means a Presidential determination under paragraph (1) which recommends the admission of more than 5,000 aliens in a fiscal year in response to an emergency refugee situation,

"(ii)(I) continuity of session is broken only by an adjournment of Congress sine die, and

"(II) the days on which a House is not in session because of an adjournment of more than 3 days to a day certain are excluded in the computation of the 45-cadendar-day period with respect to that House.

"(D)(i) This subparagraph is enacted by Congress—

"(I) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such it is deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of resolutions described by clause (ii), and it supersedes other rules only to the extent that it is inconsistent therewith; and

"(II) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of the House.

"(ii) For purposes of this subparagraph, the term 'resolution' means only a resolution of either House of Congress the matter after the resolving clause of which is either—

"(I) as follows: 'That the disapproves the determination of the President transmitted to the Congress, under section 207(b)(1) of the Immigration and Nationality Act, on , 19 .', or

"(II) as follows: 'That the approves the determination of the President transmitted to the Congress, under section 207(b)(1) of the Immigration and Nationality Act, on , 19 .',

the first blank space in each case being filled with the name of the resolving House and the other blank space being filled with the date of transmittal of the respective determination.

"(iii) A resolution once introduced with respect to a determination shall immediately be referred to the Committee on the Judiciary by the President of the Senate or the Speaker of the House of Representatives, as the case may be.

"(iv)(I) If the Committee on the Judiciary has not reported a resolution referred to it at the end of 30 calendar days after its referral, it shall be in order to move to discharge the committee from further consideration of such resolution.

"(II) a motion to discharge may be made only by an individual favoring the resolution, shall be highly privileged (except that it may not be made after the committee has reported a resolution with respect to the same determination), and debate thereon shall be limited to not more than one hour, to be divided equally between those favoring and those opposing the resolution. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to.

"(III) If the motion to discharge is agreed to or disagreed to, the motion may not be renewed, nor may another motion to discharge the committee be made with respect to any other resolution with respect to the same determination.

"(v)(I) When the committee has reported, or has been discharged from further consideration of, a resolution, it shall be at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the resolution. The motion shall be highly privileged and shall not be debatable. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to.

"(II) Debate on the resolution referred to in subclause (I) and described in clause (ii)(I) shall be limited to not more than 2 hours and debate on the resolution referred to in subclause (I) and described in clause (ii)(II) shall be limited to not more than 4 hours, which debate in each case shall be divided equally between those favoring and those opposing such resolution. A motion further to limit debate shall not be debatable. An amendment to, or motion to recommit, the resolution shall not be in order, and it shall not be in order to move to reconsider the vote by which such resolution was agreed to or disagreed to.

"(vi)(I) Motions to postpone, made with respect to the discharge from a committee, or the consideration of a resolution and motions to proceed to the consideration of other business, shall be decided without debate.

"(II) Appeals from the decision of the Chair relating to the application of the rules of the Senate or the House of Representatives, as the case may be, to the procedure relating to a resolution shall be decided without debate.

"(4) Admissions under this subsection shall be allocated among refugees of special humanitarian concern to the United States in accordance with a determination made by the President after appropriate consultation.".

(e) The amendments made by this section shall first apply to admissions for fiscal year 1983.

RESTRICTION ON PAROLE AUTHORITY

SEC. 102. Section 212(d)(5)(B) (8 U.S.C. 1182(d)(5)(B)) is amended by adding at the end thereof the following new sentence: "The Attorney General shall not exercise his parole authority on behalf of a group or class of aliens, but only in the case of individual aliens.".

LIMITING FIFTH PREFERENCE IMMIGRANTS TO UNMARRIED BROTHERS AND SISTERS

SEC. 103. (a) Section 202(e)(5) (8 U.S.C. 1152(e)(5)) is amended by inserting "unmarried" before "brother or sisters".

(b) Section 203(a)(5) (8 U.S.C. 1153(a)(5)) is amended by inserting "unmarried" before "brothers or sisters".

(c) The amendments made by this section shall apply to petitions filed on or after the date of the enactment of this Act.

BASIS FOR ASYLUM CLAIMS

SEC. 104. Section 208 (8 U.S.C. 1158) is amended—

(1) by adding at the end of subsection (a) the following new sentence: "In making such determination, the Attorney General shall not take into account actions taken by the alien after the alien's departure from his country of nationality or, in the case of an alien without nationality, from a country in which the alien last habitually resided.", and

(2) by adding at the end the following new subsection:

"(d) The Attorney General, with the advice and assistance of the Secretary of State and the Secretary of Health and Human Services, shall prepare contingency plans for the processing of large groups of applicants for asylum who have unlawfully entered the United States, and shall incorporate into such plans the establishment of reception and processing centers outside the United States to which such applicants can be transported and where the asylum applications of such aliens will be processed.".

QUARTERLY REPORTS ON ENTRY OF ALIENS INTO THE UNITED STATES

SEC. 105. (a) Subsection (b) of section 240 (8 U.S.C. 1230) is amended—

(1) by striking out "such record" and inserting in lieu thereof "a record", and

(2) by inserting "in such form and containing such information" before "as the Attorney General".

(b) Such section is further amended by adding at the end the following new subsection:

"(c) The Attorney General shall provide for the reporting to the chairman of the Committee on the Judiciary of the House of Representatives and to the chairman of the Committee on the Judiciary of the Senate, not later than 45 days after the end of each calendar quarter, the number of—

"(1) aliens admitted to the United States during such quarter as immigrants, by classes listed in each of the paragraphs of sec-

tion 203(a) and by immediate relatives (described in section 201(b));

"(2) aliens admitted to the United States during such quarter as refugees under section 207 or granted asylum in the United States under section 208, by their country of origin;

"(3) aliens paroled into the United States during such quarter for or over a period of 6 months or longer, by their country of origin; and

"(4) aliens admitted to the United States during such quarter as nonimmigrants, by classes described in each of the subparagraphs of section 101(a)(15) and by whether or not they are authorized to be employed while in the United States.

Upon receipt of such a report, the chairmen shall cause the report to be printed in its entirety in the Congressional Record.".

(c) The Attorney General shall first provide for reports under section 240(c) of the Immigration and Nationality Act for calendar quarters beginning with the fourth calendar quarter that begins after the date of the enactment of this Act.

TITLE II—IMPROVED ENFORCEMENT

PART A—RESPECTING ILLEGAL EMPLOYMENT OF ALIENS

DISREGARDING ILLEGAL WORK EXPERIENCE IN VISA APPLICATIONS

SEC. 201. (a) Section 204(b) (8 U.S.C. 1154(b)) is amended by adding at the end the following sentence: "Work experience gained by an alien in the United States during a period in which the alien's employment was not authorized under this Act or by the Attorney General shall not be considered in determining whether or not the alien is qualified to be accorded status under section 203(a) (3) or (6) or in making a determination and certification under section 212(a)(14).".

(b) The amendment made by subsection (a) applies to aliens seeking to enter the United States, or adjust status, on or after the date of the enactment of this Act.

RESTRICTIONS ON IMPROPER EMPLOYMENT OF ALIENS

SEC. 202. (a) Subsection (a) of section 274 (8 U.S.C. 1324) is amended—

(1) by striking out "subsection" and "section" and inserting in lieu thereof "paragraph" each place it appears;

(2) by redesignating paragraphs (1) through (4) as subparagraphs (A) through (D), respectively;

(3) by inserting "(1)" after "(a)"; and

(4) by adding at the end the following new paragraph:

"(2)(A) It is unlawful for any employer (or agent thereof) to knowingly recruit, hire, or employ any alien in the United States who has not been lawfully admitted for permanent residence unless the employment of such alien is authorized under this Act or by the Attorney General.

"(B) Any employer or agent thereof which violates paragraph (1) shall be subject to a civil penalty of not more than—

"(i) $500, for the first such violation, and

"(ii) $20,000, if a previous penalty has been assessed under this paragraph with respect to that employer or agent,

for each such alien with respect to whom a violation has occurred.

"(C) The Attorney General may assess a civil penalty under this paragraph only pursuant to an order issued after the person charged with the violation has been given an opportunity for a hearing before an immigration officer in accordance with the procedures of section 554 of title 5, United States Code, and only after the Attorney General has determined that a violation has occurred and that the amount of the penalty is warranted.

"(D) If the person against whom a civil penalty is assessed fails to pay the penalty within the time prescribed in the order of assessment, the Attorney General shall file an action to collect the amount in any appropriate district court of the United States. In any such action or in any other action seeking to review the Attorney General's determination under subparagraph (C), the action shall be determined solely upon the administrative record upon which the civil penalty was assessed and the Attorney General's findings of fact, if supported by substantial evidence on the record considered as a whole, shall be conclusive.

"(E)(i) This paragraph shall not be construed as authorizing any employer or agent to discriminate in the recruiting, hiring, or employment of individuals on the basis of race, color, religion, sex, handicap, or national origin.

"(ii) This paragraph shall not be construed as preempting States and localities from the adoption and enforcement of laws prohibiting or restricting the employment of aliens in the United States (who are not lawfuly admitted for permanent residence) who the Attorney General has not authorized to be employed.

"(F) The district courts of the United States shall have jurisdiction to enjoin violations of subparagraph (A). Such actions may be brought by the Attorney General in any United States district court of a district wherein any act, omission, or transaction constituting the violation occurred, or any such court for the district wherein the defendant is found or transacts business.".

(b) Subsection (b) of such section is amended by striking out "subsection (a)" in paragraphs (1) and (3) and inserting in lieu thereof "subsection (a)(1)".

(c)(1) The heading to section 274 is amended by inserting "; IMPROPER EMPLOYMENT OF ALIENS" at the end thereof.

(2) The item in the table of contents relating to section 274 is amended by adding before the period at the end the following: "; improper employment of aliens".

ELIMINATING TAX CREDIT FOR EARNED INCOME FOR ALIENS WHO ARE NOT LAWFUL PERMANENT RESIDENTS OF THE UNITED STATES

SEC. 203. (a) Section 43(c)(1) of the Internal Revenue Code of 1954 (relating to credit for earned income) is amended by adding at the end the following new subparagraph:

"(D) CITIZENSHIP.—The term 'eligible individual' does not include an individual who is not a citizen of the United States or an alien lawfully admitted to the United States for permanent residence.".

(b) The amendment made by subsection (a) applies to taxable years ending on or after January 1, 1982.

DISALLOWING DEDUCTION FOR COMPENSATION FOR ILLEGALLY EMPLOYED ALIENS

SEC. 204. (a)(1) Part IX of subchapter B of chapter 1 of the Internal Revenue Code of 1954 (relating to items not deductible) is amended by adding at the end the following section:

"SEC. 280E. COMPENSATION OF CERTAIN ALIENS.

"No deduction otherwise allowable under this chapter shall be allowed for any amount paid or incurred as salary or other compensation with respect to personal services performed by an alien individual in the United States if the taxpayer (at the time such services were performed) knew or had reason to believe that the alien individual was in the United States in violation of the immigration laws or in an immigration status in which the individual's employment was not authorized.".

(2) The table of sections for that part is amended by adding at the end the following new item:

"Sec. 280E. Compensation of certain aliens.".

(b) The amendment made by subsection (a)(1) shall apply to personal services performed on or after January 1, 1982.

PART B—IN GENERAL

STATE AND LOCAL COOPERATION IN APPREHENSION OF ALIENS WHO HAVE ESCAPED CUSTODY

SEC. 211. Section 103(a)(8) U.S.C. 1103(a)) is amended by adding at the end the following new sentence: "He may enter into cooperative agreements with State and local government law enforcement agencies under which such agencies, in the case of an alien who is in the custody of the Service but who escapes from such custody, are authorized to apprehend and detain the alien and return the alien to the custody of the Service.".

PLAN FOR EXPANDING SIZE OF BORDER PATROL

SEC. 212. Section 103 (8 U.S.C. 1103) is amended by adding at the end the following new subsection:

"(c) The Attorney General shall, not later than one year after the date of the enactment of this subsection, submit to the Congress a plan providing for the establishment of a border patrol force of not less than 6,000 border patrol officers, for the purpose of patrolling the land and sea borders of the United States, and providing such force with such administrative services, equipment (including such appropriate electronic monitoring equipment), and training as may be necessary to enable the force to carry out its duties.".

EXCLUSION AND DEPORTATION FOR ALIENS KNOWINGLY INVOLVED IN SMUGGLING OF ILLEGAL ALIENS

SEC. 213. (a) Section 212(a)(31) (8 U.S.C. 1182(a)(31) is amended by striking out "and for gain, encouraged,".

(b) Secton 241(a)(13) (8 U.S.C.1251(a)(13)) is amended by striking out "and for gain, encouraged,".

BURDEN OF PROOF IN DEPORTATION PROCEEDINGS

SEC. 214. (a) Section 291 (8 U.S.C. 1361) is amended by inserting "(a)" after "291." and by adding at the end the following new subsection:

"(b) Except as otherwise provided in subsection (a), in any deportation proceeding under this Act the burden of proof shall be upon the Attorney General to establish deportability by a preponderance of the evidence.".

(b) The amendment made by subsection (a) shall apply to determinations of deportability made on or after the date of the enactment of this Act with respect to deportation proceedings initiated after the date of the enactment of this Act.

PROHIBITING COUNTERFEITING OF CERTAIN IMMIGRATION DOCUMENTS

SEC. 215. The first paragraph of section 1546 of title 18, United States Code, is amended—

(1) by striking out "or other document for entry into" and inserting in lieu thereof "border-crossing card, alien registration re-

ceipt card, or other document prescribed by statute or regulation for entry into or as evidence of authorized stay in", and

(2) by inserting "card," before "or document".

PART C—DISALLOWING CERTAIN BENEFITS FOR ILLEGAL ALIENS

LIMITATION ON AFDC AND MEDICAID BENEFITS TO CITIZENS AND PERMANENT RESIDENTS

SEC. 221. (a)(1) Subsection (a) of section 406 of the Social Security Act (42 U.S.C. 606) is amended—

(A) by striking out "and" before "(2)", and

(B) by inserting before the semicolon at the end the following: "; and (3) who is either a citizen of the United States or an alien lawfully admitted to the United States for permanent residence".

(2) Subsection (c) of such section is amended—

(A) by striking out "and" and inserting in lieu there of a comma, and

(B) by inserting before the period at the end the following: ", and who is either a citizen of the United States or an alien lawfully admitted to the United States for permanent residence".

(3) Section 407(a) of such Act (42 U.S.C. 607(a)) is amended—

(A) by inserting "and (3)" after "section 406(a)(2)", and

(B) by inserting "(and described in section 406(a)(3))" after "any of the relatives specified in section 406(a)(1)".

(b) Section 1902(a)(10) of such Act (8 U.S.C. 1396b(a)(10)) is amended by striking out "and" before "(III)" and by inserting before the semicolon at the end the following: ", and (IV) the plan must not make available medical assistance to, or with respect to services furnished by, any individual who is not a citizen of the United States or an alien lawfully admitted to the United States for permanent residence".

PART D—FUNDING

FEES AND CHARGES

SEC. 231. (a) Section 281 (8 U.S.C. 1351) is amended—

(1) by amending the heading to read as follows:

"FEES AND CHARGES",

(2) by striking out "SEC. 281." and inserting in lieu thereof "(b)", and

(3) by inserting after the heading the following:

"SEC. 281. (a) Except as provided in subsection (b), the Attorney General shall prescribe a uniform schedule of fees and charges for applications, petitions, processing, services, issuance of documents, and proceedings under this Act, including any proceeding with respect to the inspection, admission, investigation, detention, or deportation of an alien.".

(b) The item in the table of contents relating to section 281 is amended to read as follows:

"Sec. 281. Fees and charges.".

By Mr. SHUMWAY:

AMENDMENT (1)

—Page 59, line 15, page 60, lines 3 and 24, page 62, line 19, page 63, line 5, page 64, line 5, strike out "Labor" and insert in lieu thereof "Agriculture".

Page 60, beginning on line 18, strike out "and includes" and insert in lieu thereof "except that it means".

Page 61, line 20, page 65, line 1, and page 66, line 13, strike out "Secretary of Labor" and insert in lieu thereof "Secretaries of Labor and Agriculture".

Page 61, line 24, insert "or the Secretary of Agriculture (as the case may be)" after "Secretary of Labor".

Page 62, line 7, strike out "Secretary of Labor" and insert in lieu thereof "the respective Secretary".

Page 65, line 2, and page 66, line 14, strike out "and the Secretary of Agriculture".

Page 65, beginning on line 16, strike out "Secretary of Labor is authorized" and insert in lieu thereof "Secretaries of Labor and Agriculture are each authorized".

Page 65, beginning on line 24, strike out "Secretary of Labor" and insert in lieu thereof "Secretaries of Labor and Agriculture".

Page 66, line 14, insert "jointly" after "report".

(Substitute to amendment 6 of the Committee on Education and Labor.)

—Page 59, strike out line 8 and all that follows through page 67, line 11, and insert in lieu thereof the following:

H-2 WORKERS

SEC. 211. (a) Paragraph (15)(H) of section 101(a) (8 U.S.C. 1101(a)) is amended by striking out "to perform temporary services or labor, if unemployed persons capable of performing such service or labor cannot be found in this country" in clause (ii) and inserting in lieu thereof "(a) to perform agricultural labor or services, as defined by the Secretary of Agriculture in regulations and including agricultural labor defined in section 3121(g) of the Internal Revenue Code of 1954 and agriculture defined in section 3(f) of the Fair Labor Standards Act of 1938, of a temporary or seasonal nature, or (b) to perform other temporary services or labor".

(b) Section 214 (8 U.S.C. 1184) is amended—

(1) by adding at the end of subsection (a) the following new sentences:

"An alien may not be admitted to the United States as a nonimmigrant—

"(1) under section 101(a)(15)(H)(ii)(a) for an aggregate period longer than the period (or periods) determined by regulations of the Secretary of Agriculture, or

"(2) under section 101(a)(15)(H)(ii) if the alien was admitted to the United States as such a nonimmigrant within the previous five-year period and the alien during that period violated a term or condition of such previous admission.

The Attorney General shall provide for such endorsement of entry and exit documents of nonimmigrants described in section 101(a)(15)(H)(ii) as may be necessary to carry out this section and to provide notice for purposes of section 274A.",

(2) by inserting "(1)" after "(c)" in subsection (c), and

(3) by adding at the end of subsection (c)(1), as so redesignated, the following:

"For purposes of this paragraph the term 'appropriate agencies of Government' means the Department of Labor, except that it means, with respect to nonimmigrants described in section 101(a)(15)(H)(ii)(a), the Department of Agriculture.

"(2)(A)(i) A petition to import an alien as a nonimmigrant under section 101(a)(15)(H)(ii)(a) may not be approved by the Attorney General unless the petitioner has applied to the Secretary of Agriculture for a certification that—

"(I) there are not sufficient workers who are able, willing, and qualified and who will be available at the time and place needed to perform the labor or services involved in the petition, and

"(II) the employment of the alien in such labor or services will not adversely affect the wages and working conditions of workers in the United States similarly employed.

"(ii) A petition to import an alien as a nonimmigrant under section 101(a)(15)(H)(ii)(b) may not be approved by the Attorney General unless the petitioner has applied to the Secretary of Labor for a certification that—

"(I) there are not sufficient qualified workers available in the United States to perform the labor or services involved in the petition, and

"(II) the employment of the alien in such labor or services will not adversely affect the wages and working conditions of workers in the United States similarly employed.

"(iii) The Secretaries of Labor and Agriculture may require by regulation, as a condition of issuing the certification, the payment of a fee to recover the reasonable costs of processing applications for certification.

"(B) The Secretary of Labor or the Secretary of Agriculture (as the case may be) may not issue a certification under subparagraph (A)—

"(i) if there is a strike or lockout in the course of a labor dispute which, under the regulations, precludes such certification, or

"(ii) with respect to an employer if the employer during the previous two-year period employed nonimmigrant aliens admitted to the United States under section 101(a)(15)(H)(ii) and the respective Secretary, has determined, after notice and opportunity for a hearing, that the employer at any time during that period substantially violated a material term or condition of the labor certification with respect to the employment of domestic or nonimmigrant workers.

No employer may be denied certification under clause (ii) for more than three years for any violation described in such clause.

"(3)(A) In the case of an application for a labor certification for a nonimmigrant described in section 101(a)(15)(H)(ii)(a)—

"(i) the Secretary of Agriculture may not require that the application be filed more than 50 days before the first date the employer requires the labor or services of the alien;

"(ii) the employer shall be notified in writing within seven days of the date of filing if the application does not meet the standards (other than that described in paragraph (2)(A)(i)(I)) for approval and if it does not, such notice shall include the reasons therefor and permit the employer an opportunity to resubmit promptly a modified application for approval; and

"(iii) the Secretary of Agriculture shall make, not later than 20 days before the date such labor or services are first required to be performed, the certification described in paragraph (2)(A)(i) if the employer has complied with the criteria for certification, including criteria for the recruitment of eligible individuals as prescribed by the Secretary, and if the employer does not actually have, or has not been provided with referrals of, qualified eligible individuals who have indicated their availability to perform such labor or services on the terms and conditions of a job offer which meets the requirements of the Secretary, except that the terms of such a labor certification remain effective only if the employer continues to accept for employment, until the date the aliens depart for work with the employer, qualified eligible individuals who apply or are referred to the employer.

"(B) A petition to import an alien as a nonimmigrant described in section 101(a)(15)(H)(ii)(a), and an application for a labor certification with respect to such an alien, may be filed by an association representing agricultural producers which use agricultural labor or services. The filing of such a petition or application on a member's behalf does not relieve the member of any liability for representations made in such petition or application.

"(C)(i) The Secretary of Agriculture shall provide for an expedited procedure for the review of a denial of certification under paragraph (2)(A)(i).

"(ii) The Secretary of Agriculture shall expeditiously, but in no case later than 72 hours after the time a new determination is requested, make a new determination on the request for certification in the case of importing a nonimmigrant described in section 101(a)(15)(H)(ii)(a) if able, willing, and qualified eligible individuals are not actually available at the time such labor or services are required and a certification was denied in whole or in part because of the availability of qualified eligible individuals. If the employer asserts that any eligible individuals who have been referred are not able, willing or qualified, the burden of proof is on the employer to establish that the individuals referred are not able, willing, or qualified because of employment-related reasons as shown by their job performance.

"(D) For purposes of this paragraph, the term 'eligible individual' means, with respect to employment, an individual who is not an unauthorized alien (as defined in section 274A(a)(4)) with respect to that employment.

"(4) The Secretaries of Labor and Agriculture, in consultation with the Attorney General, shall annually report to the Congress on the certifications provided under this subsection, the impact of aliens admitted pursuant to such certifications on labor conditions in the United States, and on compliance of employers and nonimmigrants with the terms and conditions of such nonimmigrants' admission to the United States.

"(5) There are authorized to be appropriated for each fiscal year, beginning with fiscal year 1983, $10,000,000 for the purposes (A) of recruiting domestic workers for temporary labor and services which might otherwise be performed by nonimmigrants described in section 101(a)(15)(H)(ii), and (B) of monitoring terms and conditions under which such nonimmigrants (and domestic workers employed by the same employers) are employed in the United States. The Secretaries of Labor and Agriculture are each authorized to take such actions, including imposing appropriate penalties and seeking appropriate injunctive relief and specific performance of contractual obligations, as may be necessary to assure employer compliance with terms and conditions of employment under this subsection.

"(6) There are authorized to be appropriated for each fiscal year, beginning with fiscal year 1983, such sums as may be necessary for the purpose of enabling the Secretaries of Labor and Agriculture to make determinations and certifications under this subsection and under section 212(a)(14).".

(c) The amendments made by this section apply to petitions and applications filed under section 214(c) of the Immigration and Nationality Act on or after the first day of the seventh month beginning after the date of the enactment of this Act (hereinafter in this section referred to as the "effective date").

(d) Notwithstanding any other provision of law, final regulations implementing the amendments made by this section shall first be issued, on an interim or other basis, not later than the effective date.

(e) The Secretaries of Labor and Agriculture, in consultation with the Attorney General, shall report jointly to the Congress not later than 18 months after the effective date on recommendations for improvements in the temporary alien worker program amended by this section, including recommendations—

(1) improving the timeliness of decisions regarding admission of temporary foreign workers under the program,

(2) removing any current economic disincentives to hiring United States citizens or permanent resident aliens where temporary foreign workers have been requested, and

(3) improving the cooperation among government agencies, employers, employer associations, workers, unions, and other worker associations to end the dependence of any industry on a constant supply of temporary foreign workers.

(f) It is the sense of Congress that the President should establish an advisory commission which shall consult with the Government of Mexico and advise the Attorney General regarding the operation of the alien temporary worker program established under section 214(c) of the Immigration and Nationality Act.

By Mr. SOLARZ:

AMENDMENT (1)

—Page 38, after line 12, insert the following new subsection:

(d) The Attorney General shall provide for the extension of voluntary departure status for aliens who are natives of Poland and who have extended voluntary departure status as of the date of the enactment of this Act until December 31, 1983, or such date as the Attorney General determines that such aliens will not be subject to persecution if returned to Poland.

AMENDMENT (2)

—Page 38, after line 12, insert the following new subsection:

(d) The Attorney General shall provide for the extension of voluntary departure status for aliens who are natives of Poland and Ethiopia who have extended voluntary departure status as of the date of the enactment of this Act until December 31, 1983, or such date as the Attorney General determines that such aliens will not be subject to persecution if returned to their homeland.

AMENDMENT (3)

—Page 38, after line 12, insert the following new subsection:

(d) It is the sense of the Congress that the Attorney General should provide an extension of voluntary departure status for aliens who are natives of Poland and Ethiopia and who have extended voluntary departure status as of the date of the enactment of this Act until December 31, 1983, or such date as the Attorney General determines that such aliens will not be subject to persecution if returned to their homelands.

AMENDMENT (4)

—Page 38, after line 12, insert the following new subsection:

(d) It is the sense of the Congress that the Attorney General should provide for the extension of voluntary departure status for aliens who are natives of Poland and who have extended voluntary departure status as of the date of the enactment of this Act until December 31, 1983, or such date as the Attorney General determines that such aliens will not be subject to persecution if returned to Poland.

AMENDMENT (5)

—Page 38, after line 12, insert the following new subsection:

(d) It is the sense of the Congress that aliens from countries such as Poland, Ethiopia, and El Salvador who require a safe haven should be aided through the generous use of extended voluntary departure status until conditions in their native countries change so as to enable them to return home safely.

By Mr. WASHINGTON:

AMENDMENT (1)

—Page 9, line 12, strike out "$2,000" and insert in lieu thereof "$5,000".

AMENDMENT (2)

—Page 9, line 17, strike out "$3,000" and insert in lieu thereof "$10,000".

AMENDMENT (3)

—Page 8, strike out lines 15 through 25.

Page 9, amend lines 1 and 2 to read as follows:

"(d)(1) In the case of a person or entity which is determined".

Page 9, lines 5, 10, and 15, strike out "(i)", "(ii)", and "(iii)", and insert in lieu thereof "(A)", "(B)", and "(C)", respectively.

Page 9, lines 6, 11, and 16, strike out "subparagraph" and insert in lieu thereof "paragraph".

AMENDMENT (4)

—Page 86, strike out line 21 and all that follows through page 88, line 11.

Page 88, line 12, strike out "(3)" and insert in lieu thereof "(d)".

AMENDMENT (5)

—Page 86, line 22, strike out "and during" and all that follows through "(b)(3)" on line 25.

By Mr. WHITE:

AMENDMENT (1)

—Page 61, lines 7 and 18, strike out "in the United States" and insert in lieu thereof "in the area of intended employment".

AMENDMENT (2)

(To amendment 6 of the Committee on Education and Labor.)

—In the matter proposed to be added by subsection (b)(3) (of the section 211 inserted by the amendment), strike out "in the United States similarly employed" in paragraph (2)(A)(i)(II) and insert in lieu thereof "in the area of intended employment similarly employed".

EXTENSIONS OF REMARKS

NUCLEAR ARMS VERSUS NUCLEAR FREEZE

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. HUBBARD. Mr. Speaker, I have received an excellent letter from one of my constituents, Ronnie Whitmer, of Hopkinsville, Ky. I believe my colleagues would be interested in Mr. Whitmer's comments concerning the great debate that is continuing in our Nation with regard to nuclear arms versus the nuclear freeze. As the House debates the President's requested budget for the Defense Department, I believe that his concerns are timely and worthy of our consideration and deliberation. The letter follows:

OCTOBER 5, 1982.

DEAR CONGRESSMAN HUBBARD: I am a thirty-three-year old Democrat who has voted in Hopkinsville, Kentucky, in every election since becoming eligible to vote in 1968.

This is my first letter to you or any politician in ten years. But my concern for my family and country has caused me to write. I am against the massive nuclear arms build-up proposed by President Reagan. I consider the nuclear freeze concept to be the best step to peace.

Would you please answer the following questions for me so I will know how you stand on this critical issue?

(1) Did you support the Zablocki resolution in the House?

(2) Do you support the building of President Reagan's proposed new generation of first-strike nukes, qualitatively more dangerous than the overkill stockpile that already exists, before we reduce?

I thank you for your time and hope that you give this "pro-freeze" issue serious thought.

Yours truly,

RONNIE WHITMER.●

TRIBUTE TO THE HONORABLE BO GINN

HON. TOM BEVILL

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. BEVILL. Mr. Speaker, I am especially saddened that my good friend and colleague, Bo GINN, of Georgia, will be leaving the House of Representatives at the end of this term.

It has been my great pleasure to serve on the Appropriations Military Construction Subcommittee, under Bo's able chairmanship. While there, I have developed a deep respect for his abilities and for his concern for the continued military security of America.

In addition to being an effective and concerned representative of his constituents, Bo GINN became one of this body's most respected voices on the military needs of America.

Since I come from Georgia's neighboring State of Alabama, I am very familiar with Bo's extensive efforts to make known the views and desires of the people of Georgia. We have had the opportunity of working together on many issues of mutual concern to the people of our two States, and I have always been impressed with Bo's dedication and sincerity in his work in Congress.

I know that Bo GINN will continue to achieve great success in the future and I share the pride of all our colleagues that Bo GINN served with us in the U.S. House of Representatives.●

REDS AND THE PEACE MOVEMENT

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. McDONALD. Mr. Speaker, opponents of the nuclear freeze, who are as sincere about peace as advocates, have suffered numerous slurs with little basis in fact. The attack began with an article in The Nation magazine attacking the concept of Soviet involvement in the peace movement, which has been thoroughly documented in the Western Goals Foundation study "The War Called Peace: The Soviet Peace Offensive." The Nation article was written by Frank Donner, who has a propensity to attack anyone opposing pro-Soviet policies, and was subsequently picked up by several other publications, including the Atlanta Constitution, the Baltimore Sun, the Cox newspaper chain, and, as one would expect, the Daily World, the official paper of the Communist Party, USA.

Despite these numerous smears, the fact of Communist and pro-Soviet involvement remained unchallenged. One journalist has been prominent in investigating and publicizing the nature of Soviet involvement in the American and European peace movements: John Rees. Most recently, Mr. Rees, publisher of the authoritative Information Digest, reviewed the questions raised by Donner & Co., in the weekly news magazine The Review of the News for December 8, 1982. Titled "Reds and the Peace Movement," Mr. Rees' article is another example of the mounting evidence of Soviet involvement in the nuclear freeze movement.

I strongly commend this excellent article to my colleagues. The article follows:

[From the Review of the News, Dec. 8, 1982]

REDS AND THE PEACE MOVEMENT

(By John Rees)

"Oh, those demonstrations; you could have used newsreels from the Sixties in America. These are all sponsored by a thing called the World Peace Council, which is bought and paid for by the Soviet Union," said President Reagan in an interview a year ago. He had been asked about anti-American demonstrations in Europe whose stated goal was to prevent the United States from modernizing the N.A.T.O. deterrent.

Now we know that the World Peace Council was not content to operate only in Europe. By early spring this Moscow front was moving forcefully in the United States of America, through its affiliate U.S. Peace Council and the Communist Party, U.S.A., to promote and manipulate "peace" groups and the "nuclear freeze" campaign.

As the activities of the World Peace Council escalated, the issue was joined by publications ranging from the Wall Street Journal, Barron's, and The American Spectator through Human Events, American Opinion, Commentary, and this magazine, to National Review, Reader's Digest, and scores of other outraged media. The first detailed monograph on the subject was a Western Goals Foundation book, The War Called Peace: The Soviet Peace Offensive, prepared in association with the Information Digest and first distributed in March 1982. As the months passed, others developed more details on the Soviet role in the U.S. "peace" movement; particularly John Barron in his October Reader's Digest article, "The KGB's Magical War For 'Peace.'"

In November, with the respectability of the "nuclear freeze" movement in question, the friends of the Reds fought back with a campaign of calumny, distortion, and slander against the responsible press.

The first salvo was written by Frank J. Donner. This is the same Frank Donner who appeared before the House Committee on Un-American Activities in 1956 and 1959 and was identified in sworn testimony by Mortimer Riemer, Herbert Fuchs, and Harry Cooper as a member of the Communist Party, U.S.A. More recently head of the American Civil Liberties Union Project on Political Surveillance and a constitutional law specialist at Yale, Donner served in the mid-1970s on the advisory board of CounterSpy magazine which sought openly to disrupt U.S. intelligence operations.

Publisher of this opening smear of journalists who have been writing about the Soviet role in the "freeze" campaign was The Nation, a magazine which is a frequent outlet for materials supporting Soviet propaganda and which more than four decades ago was even defending Stalin's Moscow purge trials.

The editorial board of The Nation includes World Peace Council member Archie

W. Singham, who helped found the U.S. Peace Council in 1979. Yet another is Richard Falk, a Princeton professor active in the Soviet-run International Association of Democratic Lawyers. With Roger Wilkins, Alan Wolfe, and Norman Birnbaum, Professor Falk rounds out the Institute for Policy Studies apparant on The Nation's board which takes its direction from I.P.S. cofounder Marcus Raskin. Mr. Raskin earlier this year was in Moscow meeting with officials of the Central Committee of the Communist Party of the Soviet Union at a "think-tank" called the Institute of the U.S.A. and Canada. This Soviet agency plays an important role in the Soviet "peace" campaign and has provided a cover for certain K.G.B. operations and officials.

A LOOK AT TERRY PROVANCE

Typical of Donner's distortions and evasions in The Nation is his defense of Terry Provance, disarmament coordinator of the American Friends Service Committee (A.F.S.C.) Mr. Donner wrote:

"In particular, the authors attack the A.F.S.C.'s disarmament director, Terry Provance, claiming he is a 'sponsor' of the U.S. Peace Council, the Kremlin's arm in America, and, worse, 'is one of 40 official U.S. members of the World Peace Council,' elected 'at the W.P.C.'s 1977 meeting in Warsaw.' These charges . . . are falsehoods. The truth—which the authors could have readily discovered—is that the W.P.C. in 1977 listed Provance as a member without his permission, an error which was remedied after he wrote two letters of protest. Nor was he a U.S. Peace Council sponsor: he attended a founding meeting in Philadelphia and supported the convening of the organizing conference, but then explained that his presence—for all of two hours—should not be construed as either membership or an endorsement."

The facts are quite different. Terry Provance claims that his name appeared by mistake, and says that in 1977 he asked the W.P.C. to remove his name and that they agreed. If so, one wonders, why does the W.P.C.'s current listing of members elected at Sofia, Bulgaria, for the years 1980-1983 still include the name "Terry Provance, Director of Disarmament Programme of American Friends Service Committee." Is the Soviet apparat so incompetent that the name of an unwilling associate who had quit all contact with the W.P.C. in 1977 was listed on the "re-elected" membership roster by mistake? Or did Provance just not expect to be asked about his activities with this international Communist front?

If Terry Provance of the American Friends Service Committee is embarrassed over his listing as a W.P.C. member, he must also be red-faced about the Mobilization for Survival demonstration he led on the steps of the United States Capitol on October 29, 1979, at which his fellow speakers were Dutch Communist Party leader Nico Schouten, head of the W.P.C.-related "Ban the Neutron Bomb" campaign; and a man he introduced as "my friend," Warner Rumpel, general secretary of the East German Peace Council.

Several days later, Provance attended the founding convention of the U.S. Peace Council. The conference call, issued weeks in advance and also distributed at the meeting, listed Provance as a "sponsor." While Donner in The Nation presents Provance's "two hours" at the U.S. Peace Council's founding conference as almost a matter of virtue and not construing "either membership or an endorsement," the fact is that U.S.P.C. documents also list Provance as a panelist in a workshop on "New Weapons" with James Jackson, a Politburo member of the Communist Party, U.S.A., and Provance's fellow member of the World Peace Council; and the Reverend William Hogan, a member of the Chicago Peace Council (C.P.C.), another Communist Party, U.S.A., front.

As co-convenor of the Mobilizaiton for Survival's International Taskforce and a coordinator of the anti-nuclear World Information Service on Energy, Provance was also a featured speaker on April 4, 1981, at an anti-N.A.T.O. protest in Bonn, West Germany. Rally posters showed its sponsors as the German Communist Party (D.K.P.) and the West German affiliates of Soviet-controlled international Communist fronts.

Joining Terry Provance on the speakers' platform in Bonn was Nino Pasti, an Italian Peace Council Leader and member of the Italian Senate elected on the Communist Party coalition ticket. While the Italian Peace Council is probably the least effective European branch of the W.P.C., Pasti is a former general and N.A.T.O. deputy comander. As such he has more than compensated the Comrades by his many pro-Soviet pronouncements and through his work with the pro-Soviet gang known as Generals for Peace and Disarmament.

Given these many and continuing associations with the World Peace Council and the U.S. Peace Council, why would a skilled propagandist like donner work so hard to exonerate Terry Provance? Could it have anything to do with Provance's role as a founder of the "nuclear freeze" campaign, coordinator of the International Taskforce of the National Campaign for a Nuclear Weapons Freeze, and head of the International Taskforce of the febrile Mobilization for Survival? Or could it be that this is an attempt to conceal World Peace Council and other communist influences in the leadership of the "peace" movement?

HOW THE FRONT WORKS

A 1978 Report by the C.I.A. published by the House Select committee on Intelligence termed the W.P.C. "the Soviet Union's single most important international front organization" and "an effective instrument of Kremlin ploicy." It is indeed.

The current (published) roster of World Peace Council members includes Kate Abell, secretary of the Trade Union Committee for Economic Conversion and the Transfer Amendment; Barbara Armentrout of the Women's International League for Peace and Freedom, and editor of its newsletter, *Peace And Freedom;* Dee Bates of the Reverend Jesse Jackson's Operation PUSH, Washington, D.C.; Josephine Butler, head of the D.C. Statehood Party; convicted murderer and armed robber Frank Chapman, St. Louis field secretary of the American Friends Service Committee until his 1980 move to New York to take top posts in two Communist Party, U.S.A., fronts; Venceremos Brigade leader Johnetta Cole, teaching at the University of Massachusetts, Amherst; Carlton Goodlett, the frenetic joiner of Communist fronts who was founder of the National Newspaper Publishers Association; Frank Jackalone, president of the radical U.S. Student Association; SANE national treasurer Joseph Miller; Robert Prince, vice president of Colorado C.C. Federation of Teachers; Edwin Vargas, vice president of the Connecticut Federation of Labor; and Edith Villastrigo, Washington "legislative representative" of Women Strike for Peace.

This list provides an interesting example of how a Soviet front like the World Peace Concil brings other "peace" organizations into its orbit by recruiting thier leaders.

But even more significant is the W.P.C. membership of elected public officials who have been in the lead of the "nuclear weapons freeze" campaign. Among them are Irving Stolberg, Connecticut State legislature; Mel King, Massachusetts State Legislature; Saundra Graham of the Cambridge, Massachusetts, City Council and Massachusetts State Legislature; and New York City Councilman Gilberto Gerena Valentin.

Of course the U.S. membership roster of the W.P.C. also includes names associated with the Communist Party and its youth arm, the Young Workers Liberation League (Y.W.L.L.). Among them are Helen Winter, international affairs secretary, Communist Party, U.S.A.; veteran member of the Communist Party, U.S.A., Pauline Rosen; Sandy Pollock of the Y.W.L.L., solidarity coordinator of the U.S. Peace Council; Carl Bloice, Central Committee member of the Communist Party, U.S.A., and editor of the Party's West Coast newspaper, *People's World;* James E. Jackson, Communist Party, U.S.A., Politburo; Sarah Staggs of the Y.W.L.L., executive director, Chicago Peace Council; and, Jack O'Dell, also known as Hunter Pitts O'Dell, International Affairs director of Operation PUSH and former member of the National Council of the Communist Party, U.S.A.

COMRADES ON THE LOCAL LEVEL

Communist Party members of both the W.P.C. and U.S.P.C. were present at a Communist Party, U.S.A., "Extraordinary Conference," held April 23-25, 1982, in Milwaukee. During these closed and guarded meetings, Communist Party leaders provided frank reports on the Party's participation in local "nuclear freeze" initiatives. Some of these reports have since been published in *Party Organizer,* a "members only" document.

Joelle Fishman, a Communist Party, U.S.A., Central Committee member, reported on C.P.U.S.A. activities in grassroots organizing campaigns. She singled out "the Connecticut Nuclear Freeze Campaign, and similar freeze campaigns through New England." Comrade Fishman explained that the first step was "collecting signatures on petitions asking elected officials to endorse the campaign. Then names from the petitions were divided out by town. Local committees were set up."

Communist official Fishman noted that the "nuclear freeze" campaign was particularly important "because of the thorough way the mass sentiment fearing nuclear holocaust was organized." She then provided her fellow Communists with a concrete example:

"One of the first towns to get started is small and generally conservative, in the shadow of the Trident Submarine Naval Base. The organizers, primarily retirees, arranged for a town meeting to vote on the freeze. In preparation they invited a retired Admiral to speak in favor of the resolution at the high school. All petition signers were called and invited to supper at one of several homes before going to the high school together. The auditorium was packed and at the town meeting a week later the resolution was passed."

Comrade Fishman noted with satisfaction: "This has been duplicated in small town after small town since, as well as the State Legislature."

In February 1982, the Connecticut House of Representatives and Senate passed "nuclear freeze" resolutions. Passage of the "freeze" was organized by State Representative Irving J. Stolberg of New Haven. Stolberg is one of a number of elected U.S. state and local legislators who have been active with the World Peace Council since the mid-1970s. As a member of the W.P.C. he was founder of the U.S. Peace Council.

Naturally the Soviets and their comrades in the local Communist parties who oversee these fronts do not like the light of public attention turned on their behind-the-scenes activities—operations the Soviets call active measures. As "freeze" critic Rael Jean Isaac has said, "They try to fool all of the people all of the time, and those they can't fool, they call 'McCarthyites.'"

Doubtless this is what lies at the heart of attacks on the distinguished author and journalist John Barron. For his excellent article in the October Reader's Digest. Barron had interviewed Stanislav Aleksandrovich Levchenko, who late in 1979 left his post with the K.G.B. and took political asylum in the United States. In the interview, Mr. Levchenko explained such active measures as follows:

"So by Active Measures, the KGB distorts reality. The trick is to make people support Soviet policy unwittingly by convincing them they are supporting something else. Almost everybody wants peace and fears war. Therefore by every conceivable means, the KGB plans and coordinates campaigns to persuade the public that whatever America does endangers peace and that whatever the Soviet Union proposes furthers peace. . . . That's the art of Active Measures, a sort of made-in-Moscow black magic. It is tragic to see how well it works."●

JOYCE HAWS—CONCERNED MOTHER AND ACTIVE LEADER

HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. MOTTL. Mr. Speaker, once again I would like to bring your attention to the struggle against judicial tyranny being waged by the National Association of Neighborhood Schools (NANS), and especially to the career of a dedicated leader of that struggle, Mrs. Joyce Haws of the city of Cleveland.

Joyce is a teacher by profession, and as a mother of two daughters, she has always been active in the schools of the communities where her family has lived. Fourteen years ago she returned to Cleveland, and she soon found herself and her family faced with the problems resulting from court decisions ordering busing in the local school districts. Her first efforts to halt this displacement of neighborhood children led Joyce to PTA groups and, in 1976, an organization called Citizens for Neighborhood Schools.

Joyce and CNS were aware that the sole means of removing the cases of court-ordered busing was, and is, congressional action, preferably in the form of an amendment to the Constitution. They were not alone. Citizens across the country who opposed the judicial verdicts were united in the National Association for Neighborhood Schools. They were determined to let it be known that grassroots Americans did not want distant schools and long bus rides for their children, nor higher taxes for themselves.

Becoming more active with NANS as the years passed, Joyce became one of its energetic national directors. She has appeared on TV editorials and shows, organized fundraisers, published articles, spoken to church and social groups, all in a strenuous campaign to encourage those who oppose busing to become active, and make their voices heard in Washington. NANS collected over 1 million signatures for the Mottl amendment to end court-ordered busing of children. Joyce is still working tirelessly to achieve the goal of returning children to their own neighborhoods, and NANS is fortunate to have this committed and concerned parent direct its fight.

Mr. Speaker, my colleagues in the House, please join me in recognizing the hard work of Mrs. Joyce Haws, and the people she represents—NANS and the parents of America.●

THE PEOPLE'S PARADISE

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. FIELDS. Mr. Speaker, some form of socialism/communism is dominant in many nations and every continent. The idea of socialism is especially attractive to intellectuals who are able to maintain a comfortable distance from actual socialist practices.

Though socialism is a god that fails continuously, and causes more human suffering and tragedy than any idea or practice in history, there are those who stubbornly cling to its high-minded idealism. They religiously close up their eyes to the reality that the socialist promise of instant utopia brings only the tyranny of a real dystopia.

It is for them that the following glimpse of reality is provided.

[From the Washington Times]

A VISIT TO EAST BERLIN

(By Walter Williams)

The first mistake was made back in 1945. Gen. George S. Patton wanted to take all of Germany, but the White House wouldn't let him. Now we have a divided Germany—East and West. Berlin, the capital of Germany before defeat, is surrounded by Soviet-controlled East Germany. Berlin, in turn, is divided West and East. The allied (France, England and U.S.) sector of Berlin is free. The Eastern sector is dominated by the Soviets. In August, this writer had a chance to visit this part of the world.

West Germany and West Berlin are indistinguishable from the U.S. These citizens enjoy basically the same standard of living as do Americans. The cities are vibrant. And West Germans are free to come and go as they please. Having enjoyed the luxury of West Berlin, my wife and I hired a driver to take us into East Berlin.

Before we got to one of its key entry points—Checkpoint Charlie—we viewed the infamous Berlin Wall. In full view, we saw machinegun towers, barbed wire, minefields, anti-tank traps and fences that automatically fire bullets when touched. Then we proceeded through Checkpoint Charlie. After going through the East Berlin red tape, which is a whole story in itself, we were admitted.

The contrast was incredible. The fancy cars of West Berlin were not to be seen. Absent also were the numerous shops. The colorful dress was gone. And the people weren't smiling. In West Berlin there was little or no readily apparent evidence of World War II's devastation; but in East Berlin you could still see the ruins of bombed-out buildings.

Why this difference? East and West Germans are indistinguishable as people. Both had incredible devastation visited upon them in World War II. A personal observation from looking at the age of buildings was that West berlin was bombed more heavily than East Berlin. Furthermore, there's no great natural resource advantage of one over the other. The difference is freedom. West Germans are much freer to make decisions over their lives than their Eastern brethern. This freedom not only grants them more material goods, it also frees them from arbitrary control by the state.

If only more Americans could visit East Berlin, particularly those who advocate more and more government controls. They would see the requirements for socialism. And the most basic requirement is that people cannot be free, Why? Because if they are free, they can't be trusted to do what the powerful elite thinks they should do. Anyway, before returning to Checkpoint Charlie we had to go through further East German red tape. And now we could view the wall from the communist side. From this vantage point, one could readily see that the anti-tank traps were not installed to protect East Berlin from a Western attack. They were to prevent East Berliners from running the barricades in tanks or trucks. The East Germans searched our car. They didn't bother the glove compartment, visors, door pockets, etc. why? Because people can't hide there. Instead, they lifted the rear seat, opened the trunk, and wheeled a mirror under the car looking for anyone 'crazy' enough to want to leave the communist paradise.

Well, we got back to the other side of the wall. And there I mulled over our country's second mistake: when the communists built it, we should have leveled it with our bulldozers. Isn't it a sad confession of the moral and economic bankruptcy of a system when such elaborate provisions must be made to keep citizens from leaving.●

WHALING WITH THE COLD HARPOON

HON. DON BONKER
OF WASHINGTON
IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. BONKER. Mr. Speaker, the International Whaling Commission (IWC) has banned the use of the cold (nonexplosive) harpoon for the taking of all whales. Nevertheless, nearly 11,000 minke whales may be killed with the cold harpoon in the coming year. Although the whaling countries have had more than 2 years to develop an alternative to this cruel weapon, they have indicated that they are not only unable but unwilling to comply with the ban. Japan, the Soviet Union, Iceland, Brazil, and Norway each filed objections to the cold harpoon ban, and thereby exempted themselves from this important IWC regulation.

The article I wish to submit for the RECORD, an excerpt from the 1982 Greenpeace publication "Outlaw Whalers," discusses the issue of humane killing of whales and presents an eye-witness account of the cruelty of killing minke whales with the cold harpoon.

COLD HARPOON BAN LONG OVERDUE

The issue of humane killing has always been a difficult one for those who exploit whales. The simple fact is that there is no way to humanely kill any creature as large as a whale and still have the body intact. The best compromise between speed of killing and wastage of the carcass has been the standard 90 mm explosive-tipped harpoon, a weapon that does not always kill cleanly. After reading reports, questioning witnesses and going out on a catcher boat to observe whaling first hand, Sidney Frost, Chairman of the Australian Inquiry into Whales and Whaling came to this conclusion:

"Although death is brought about by a most horrible method, in the cases where it occurs instantaneously, the act of killing may be said to be not inhumane. But if the death is not instantaneous, or does not happen quickly, the animal is required to suffer from these truly terrible injuries for at the least three minutes and more usually up to five or seven minutes until a killer harpoon can be fired. There can be only one conclusion: that in these cases death is caused most inhumanely. The fact that these cases are a significant proportion of the total leads to the inevitable conclusion that the technique for killing whales at present used is not humane."

If the killing of whales by explosive harpoons is cruel, the use of non-explosive ones, particularly those of low caliber, is horrendous. It is very difficult for conversationists to observe the killing of whales by these weapons since the whalers are understandably reluctant to allow them on board their vessels. The following account is by a whale researcher who succeeded in talking his way onto the Brazilian catcher boat, the *Katsu Maru #10.*

"Around 6:30 a.m., a whale was spotted from the crow's nest as we reached our twentieth mile from shore. Minke whales come north from the Antarctic during the spring and summer months of the Southern Hemisphere to breed and sometimes have their calves. As the ship bore down on the whale now losing strength, Sakaguchi made his way to the bow on the elevated walkway. The light-green painted harpoon cannon mounted on the foredeck was the only noticeable aspect of the vessel which wasn't rusty. Frequent clipped reports of the whale's position were relayed to the captain from observers high up on the main mast. Sakaguchi swiveled the gun back and forth and braced himself—waiting for the perfect moment for the exhausted whale to surface for air before firing. The blast of the cannon jolted the entire ship, and a cloud of brownish-pink smoke enveloped the black-capped figure standing along at the bow. A few seconds later the whale lunged up through a wild churn of white water straining on 50 yards of rope attached to the prow of the ship. A chimney of bloody fire erupted from its blow-hole; the 70 mm harpoon had torn veins and arteries deep inside the whale's body.

"Deeply resonant but uneven whale cries vibrated through the water. Tattered roses of scarlet blossomed in the blue, then faded into mottled pools of ruddy brown sinking below the surface. Another harpoon was tightly secured into the cannon and much less ceremoniously fired to try and end the whale's agony a little earlier. A bit of relief set in 20 or 30 minutes later after the giant tail had been lashed further aft to the rail and its erratic thrashing against the side of the steel boat finally ceased.

"Two whales were caught within an hour of each other, and up until that point the captain didn't seem to have shown any emotion to anyone. After the second minke was roped to the starboard side, he picked up a long handled flensing spade and made two deep cuts into their bellies to bleed them so the meat would stay fresher. Sakaguchi returned to the bridge, rinsed his hands in a bucket of water and while coming back to his seat, he caught the eye of another Japanese fellow on the bridge smiling at him. The captain smiled back and flicked some water in the other man's face. He wiped his brow and for the first time took off his sunglasses revealing a light strip of skin sharply contrasting the rest of his deeply-tanned face.

"A school of spinner dolphins came shushing into view. They bow-surfed for a while and did some incredible leaps high into the air. Smiling, Roberto said, "bonita ne" (beautiful eh?), I wondered how they felt about their giant cousins strapped to the side with their intestines hanging out.

"I photographed and photographed. Looking through my lens was the only way I could create a little space between my feelings and the whales' pain. By the fourth whale I had all the shots I needed of harpoons being fired, and all I could do was watch. This time only one harpoon was required. The violent thrashing seemed to last only 10 minutes before the animal was subdued at the waterline of the bow. It took every bit of chutzpah I could muster to produce a smile in recognition of the broad smile and thumbs up Roberto flashed me signalling his approval of the excellent shot.

"The fifth whale was the largest and most lively of the day. The previous quarries had been only 25 feet long—about three-year-old minkes. Early in the pursuit we could see it bobbing its head far out of the water. Even as we came closer, it continued to partially breach and heave down on the water. When the time approached for Sakaguchi to fire, all on the bridge waited tensely. The whale lunged up out of the water 10 feet in front of the bow, and a voice inside me almost emerged involuntarily as a violent scream of STOP! A split second later the ear shattering explosion came, and something very heavy sank back inside of me as this cry for life had been suppressed and extinguished so quickly. Never having felt so helpless before, I curled up on a corner of the bridge, staring out to the ocean with my binoculars, and prayed we would find no more whales that day."

It is not only NGO observers who are concerned about the inhumane killing of whales by the cold harpoon. The following excerpt is taken from a letter sent October 6, 1981 from the Norwegian Department of Agriculture to that country's Department of Fisheries.

"Doubts have been raised as to whether the use of the non-explosive harpoon in small whaling satisfies the requirements for humane killing. In considering this question, the Department of Agriculture must rely on the reports from controllers who have participated aboard whaling vessels. These reports seem to conclude that when the non-explosive harpoon hits vital organs such as the heart, lungs and main arteries (mortal wounds), death occurs quickly. However, such mortal wounds only rarely occur—perhaps, in only 20 percent of the cases. Most hits go through the whale without causing death. In such cases, the whale, while being winched towards the vessel, will undertake a death fight which can vary in time. Under difficult circumstances, it may last up to one hour. All of our experience on the killing of animals indicates that this death battle is very painful. In view thereof, whaling with the non-explosive harpoon can hardly be said to satisfy the requirements for humane killing as prescribed in the Animal Protection Legislation.

"It is the opinion of the Department of Agriculture that active efforts must be made to find alternative methods of killing to replace the non-explosive harpoon. Since the use of anesthesia has been mentioned in this context we would like to draw your attention to the fact that the use of drugs as such would disqualify the meat for purposes of consumption. Based upon what we know today of the available methods of whaling, the explosive harpoon appears to be the method which ensures humane killing."

The concern of the letter was not misplaced. Three observer reports for the 1981 Norwegian minke season were obtained by Outlaw Whalers; all referred to long times to death seen during the voyages covered. Norwegian whaling vessels now carry powerful rifles such as the Mannlicher 9.3 mm to finish off any whale not killed quickly by the harpoon. Despite this, times to death on one boat observed in 1981 were generally around 10 minutes, and two whales took up to 50 minutes to die despite the presence of auxiliary weapons and an expert marksman. The other two vessels had longer times to death.

The presence of auxiliary weapons in no way guarantees even a 10 minute death time. On the *M/S Baragutt,* observed by a Norwegian inspector between June 9 and June 21, the average time to death for nine of the 10 whales harpooned was 27 minutes. The tenth broke the lines and escaped with the harpoon still embedded in it. The captain of the *Baragutt* had the following statement entered into the official report on this voyage.

"Concerning the time of killing of the nine whales witnessed by Mr. Kjesbu, I wish

to state that we were unfortunate with our shooting. The time element in killing is usually considerably shorter."—EILIF HANSEN.

In the killing of minke whales with cold harpoons there must be many such "unfortunate" shots. All of the reports make it clear that Norway's whalers are concerned about the suffering of the whales and do their best to kill them as quickly as possible. After all, it is in their own interest that the whale be landed as quickly as possible so they can resume the hunt. Still, many whales die very slowly. Expert marksmen miss their aiming point as the boat rolls and the wounded whale thrashes in the water. The use of auxiliary weapons fails to pass the test that if a significant minority of the kills cause great pain, then the whole process is inhumane.

Attempts have been made to develop alternative methods of killing, but without much success. In fact, the alternatives have proven even worse than the explosive harpoon. Drugs powerful enough to kill the whale have also killed whalers handling the products. Paralyzing drugs like succinylcholine do not hurt the meat but merely paralyze the whale, leaving it fully conscious and sensitive to pain.

Injection of compressed gases has been considered and this year Norway experimented with a carbon dioxide harpoon, carrying in its tip two liters of liquid carbon dioxide under pressure which is vented into the whale when the harpoon strikes home. This is clearly inhumane, for although it does produce quick cessation of movement and a fairly quick death, it does so by causing massive gas embolisms throughout the body of the unfortunate creature. The gas pressure causes muscles to become rigid; the animal ceases moving but is still conscious and aware of pain. The quick cessation of movement may look good in a report, but the horrendous suffering caused by literally exploding a living body with compressed gas is not acceptable to those who oppose the use of cold harpoons on humane grounds.

There have been experiments with killing by electrocution, but this requires that the whale first be harpooned and dragged by a cable back to the catcher boat so that the electrodes can be implanted, during which time the animal is conscious.

It is clear that the cold harpoon is the most inhumane way of killing and that high technology "humane" killing weapons that have been developed are not reliable. These devices are usually tested under ideal conditions which fail to simulate the worst case conditions.

Cold harpoons should not be used on any species of whale. Given the level of technology possessed by many IWC members, it should not be difficult to develop a humane alternative. The complete ban on this archaic and inhumane hunting weapon should be enforced and nations that have objected to the ban should agree on a date to stop using the cold harpoon and withdraw their objections.●

LEE NAMED INTERIM FAMILY COURT JUDGE

HON. JOHN L. NAPIER

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. NAPIER. Mr. Speaker, I come from the small town of Bennettsville, S.C., in the northeastern part of the State. Bennettsville is located in one of the smaller counties in the State in terms of population.

Until I was elected to Congress, Marlboro County had not been the home of a Congressman in this century. Congressman John L. McLaurin served in the Congress just prior to the turn of the century, and later served in the U.S. Senate.

Likewise, until recently, Marlboro County had not been the residence of a State judicial officer for over 100 years. Last week, however, Bennettsville attorney Jamie Lee was selected to fill the vacancy on the Fourth Circuit Family Court to succeed Judge LeRoy M. Want of Darlington who died in November.

Mr. Speaker, I want to congratulate Jamie Lee on his selection and wish him much success as he approaches his new assignment. His new position is an extremely important one in the South Carolina judicial structure. His court has jurisdiction over domestic matters and include divorces, adoptions, termination of parental rights, juveniles, and support and other such matters—matters which go to the heart of our family institution.

As one who has practiced law on the opposing side from Jamie Lee, I feel extremely comfortable as he assumes this important post. Jamie Lee has the temperament of a judge. He is knowledgeable. He is extremely fair. He is firm. He is compassionate.

Mr. Speaker, the people of Marlboro County are proud of Judge Lee for his accomplishment, and I wish to call to the attention of my colleagues in the House a recent news account and an editorial in the Marlboro-Herald Advocate of December 2, 1982, which detail the announcement of his selection, his background, and his accomplishments.

LEE NAMED INTERIM FAMILY COURT JUDGE

Bennettsville attorney Jamie Lee has been selected to fill the vacancy in the 4th Circuit Family Court. That vacancy occurred when Judge LeRoy M. Want of Darlington died in November.

Lee, 52, learned of his interim appointment on Monday from S.C. Gov. Richard Riley. Lee will still have a couple of obstacles to hurdle as any opposition that would file against him has until Friday to do so. Lee's interim term lasts until the legislature acts in 1985 to fill the unexpired term, which ends March 1, 1984.

"It is a great honor for me. I am very grateful for the appointment and confidence that has been shown in me by the governor and the Chief Justice," Lee said.

"I realize that Judge Want's shoes will not be easy to fill, but I will do the best job that I can," Lee said. Want had served as Family Court Judge since 1977 and died on November 9 after a long illness.

FIRST IN 105 YEARS

Lee will be the first state judge to come from Marlboro County in over 100 years.

Judge Joshua H. Hudson was the last to be named in 1878. "I hope that I can be a credit to the county and to the community. This is my home and it is an honor to have the chance to serve," Lee said.

Coincidentally, Jamie Lee is a great-great nephew of Judge Hudson, as is Fourth Circuit Solicitor DuPre Miller, also of Bennettsville.

Lee has been a practicing attorney here since graduating from the University of South Carolina Law School in 1959. Lee and his wife, the former Mary Breeden, have three childern.

Lee served in the S.C. House of Representatives 1962-1966 and is a veteran of the Korean War. He currently holds the rank of Lieutenant Colonel in the U.S. Air Force Reserve.

Lee has also been an active member of the Marlboro community as a Shriner, Mason, in Boy Scouts and the United Way.

Lee has also served as attorney for the City of Bennettsville and also for the Marlboro County School Board. He has also been chairman of the Marlboro County Board of Elections.

Lee has informed the Herald-Advocate that he will resign from these jobs and also will close his law practice. Work on that had already started on Wednesday morning.

"Whenever you receive a Judgeship you have to close down your practice and also remove yourself from all other duties." Lee said.

His new position would mean, Lee said, that as a Family Court Judge he would have jurisdiction over all domestic claims like divorce, adoption, support and juvenile cases.

"This means anyone under 17 years old and would include anything from not going to school to robbing a store," Lee said.

Lee said that he would be the resident judge in Marlboro County and his work would take him to the four counties in the district (Marlboro, Chesterfield, Darlington, and Dillon) and wherever else he might be assigned by the Chief Justice of the S.C. Supreme Court.

DIFFERENT FEELING

After so many years of being on the other side of the courtroom, how will it feel to be behind the bench?

"It will be a different feeling to be sure, but an awful lot of people have made the adjustment and I am looking forward to it. I would like to say thanks to all the people that helped me and I will try to do my best," Lee said.

A CREDIT TO US ALL

The "Marlboro Herald-Advocate" hails the appointment of Bennettsville attorney Jamie F. Lee to an interim appointment as Family Court Judge for the Fourth Judicial Circuit.

Lee's appointment by Gov. Richard W. Riley this week is a historic one in that it has been more than 105 years since the last Marlboro County attorney was named to a state bench.

In 1878, Joshua Hillary Hudson of Bennettsville was named Fourth Judicial Circuit Judge on Feb. 14, 1878, succeeding another Bennettsville attorney Charles Pinckney Townsend, who sat as circuit judge since 1873.

This is not the first time that Lee's name has surfaced for consideration for such a judgeship. When the family court system was inaugurated in S.C., Lee was then considered a likely candidate for such a seat, but was not then named.

It seems very appropriate to us that he should be named to fill the interim for the

late Judge Leroy Want of Darlington, who died in office last month.

Lee's credentials are many, illuminating his career: State Champion B.H.S. Basketball Team member, honor guard to Gen. Douglas McArthur, University of S.C. and USC Law School graduate, former member of the S.C. House of Representatives, attorney in private practice here as well as serving as attorney for the Marlboro County Board of Education and City of Bennettsville, and election commissioner for Marlboro County.

We congratulate Jamie Lee on this signal selection and express to him our appreciation for bringing this coveted position home to Marlboro County once again.●

PERSONAL EXPLANATION

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. BARNES. Mr. Speaker, I was absent from the House on official business on Monday, December 6, 1982. I am using this opportunity to indicate my positions on some of the votes conducted on that day in relation to H.R. 6211, the Surface Transportation Act.

Rollcall No. 416, "no"; rollcall No. 417, "no"; rollcall No. 418, "no"; rollcall No. 419, "no"; rollcall No. 420, "aye"; rollcall No. 421, "aye."

On rollcall No. 422, on Tuesday, December 7, I would have voted "aye."●

TELECOMMUNICATIONS FOR THE DISABLED

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. WIRTH. Mr. Speaker, the Committee on Energy and Commerce has unanimously reported S. 2355, the Telecommunications for the Disabled Act of 1982. This bill accomplishes two vital purposes. It changes an intrusive and ill considered Federal regulation that would prevent telephone companies from supplying equipment to deaf and other handicapped individuals under the approval of State regulatory commissions. Second, the legislation resolves a longstanding dispute within the telephone industry by directing the Federal Communications Commission to establish a technical standard for the manufacture of telephones that are compatible with hearing aids.

The regulation that S. 2355 modifies is scheduled to become effective on January 1, 1983. Unless Congress acts this session, disabled Americans will be unable to obtain tariffed new terminal equipment after that date. Many disabled persons rely on this equipment to lead productive, self-sufficient, and independent lives. Therefore, I am pleased that the major telephone carriers—and unaffiliated manufacturers of telephone equipment—have joined with the handicapped community and State utility commissions to support this consensus legislation. Mr. Speaker, I ask unanimous consent to insert in the RECORD a selection of their letters, which explain the urgency of this legislation.

DISABLED AMERICAN VETERANS,
Washington, D.C., September 23, 1982.

Hon. TIMOTHY E. WIRTH,
U.S. House of Representatives, Chairman, Subcommittee on Telecommunications, Consumer Protection and Finance, Committee on Energy and Commerce, Washington, D.C.

DEAR CHAIRMAN WIRTH: I am writing to you in response to the legislation you are proposing that would amend the Communications Act of 1934 to provide reasonable access to telephone service for persons with impaired hearing and enable telephone companies to accommodate persons with other physical disabilities.

Quite frankly, the Disabled American Veterans has supported efforts to improve the lives of all American citizens with physical and mental disabilities, particularly, those disabled while in the wartime service to the United States.

A review of the legislation which you are proposing reveals that essential and frequently used coin operated telephones will be made compatible for specially equipped hearing aids utilized by the hearing impaired.

As equally important, your bill will finally permit telephone companies to make special telephone communications equipment available to the seriously handicapped at affordable costs.

Chairman Wirth, the DAV believes that your proposal will, if enacted, go a long way towards improving the quality of life for millions of hearing impaired and physically handicapped Americans.

On behalf of the 687,000 members of the Disabled American Veterans, I am pleased to strongly endorse your proposal and thank you for your endeavors to enable handicapped citizens to gain greater freedom and access to the mainstream of American society.

Sincerely yours,

EDWARD G. GALIAN,
National Commander.

PARALYZED VETERANS OF AMERICA,
Bethesda, Md., September 22, 1982.

Hon. TIMOTHY E. WIRTH,
Chairman Subcommittee on Telecommunications, Consumer Protection, and Finance Committee on Energy and Commerce, U.S. House of Representatives, Washington, D.C.

DEAR REPRESENTATIVE WIRTH: On behalf of the 11,000 members of Paralyzed Veterans of America, I want to express appreciation for your efforts to promote access to the telephone comunications system for individuals with physical impairments. Your recognition of the importance of improved and available communications for disabled citizens and the essential role modern communications play in assisting disabled people to achieve maximum independence is gratifying.

Your legislative proposal clearly addresses many problems presently facing disabled citizens regarding the acquisition and payment for specialized communications equipment. The recent Federal Communications Commission decision, Computer II, would preclude many individuals from obtaining this necessary, and often only means of contact with other people including vital medical and emergency personnel. Additionally, this FCC decision serves to retard technological innovations which benefit disabled people by drastically restricting their use and potential market.

Under the Computer II decision telephone companies would be prevented from subsidizing special and unique equipment which meet the needs of handicapped individuals. This not only will sever their primary means of communications but will also, in certain cases, prevent their gainful employment. This decision is unduly harsh and restrictive as it applies to devices for disabled people and presents a great hardship and peril to many of the most catastrophically disabled citizens.

Again, thank you for your recognition of this issue. If I or any member of my staff can further assist you in securing passage of this legislation, please contact us.

Sincerely yours,

R. JACK POWELL,
Executive Director.

NATIONAL EASTER SEAL SOCIETY,
Washington, D.C., September 27, 1982.

Hon. TIMOTHY E. WIRTH,
Chairman, Subcommittee on Telecommunications, Consumer Protection and Finance, Committee on Energy and Commerce, Washington, D.C.

DEAR REPRESENTATIVE WIRTH: I am writing of behalf of the National Easter Seal Society to express support for the "Telecommunications for the Disabled Act of 1982". We believe that this bill, H.R. 7168, amends the Communications Act of 1934 so that the Federal Communications Commission (FCC) will address two issues of critical importance to persons with disabilities. With respect to individuals with hearing impairments, the bill provides for reasonable access to telephone services. Moreover, H.R. 7168 provides states with the flexibility needed to allow telephone companies to continue to meet the unique needs of individuals with disabilities.

The National Society has consistently promoted efforts to provide persons with disabilities every opportunity to achieve fully productive and independent lives. For this reason, efforts by the Bell System and other telephone companies to render the telephone network accessible to persons with disabilities have been viewed very favorably. In the past, these companies have readily developed and distributed special telephone equipment for private and public use. By incorporating the costs associated with special terminal equipment into the regular rate structure, telephone companies have enabled thousands of individuals with hearing, speech, vision or mobility impairments to purchase telephone service at a reasonable cost.

The National Easter Seal Society is concerned, however, that recent action by the FCC to deregulate terminal equipment will jeopardize access to the telephone network for persons with disabilities. The FCC's Computer II decision prohibits state communications commissions from allowing telephone companies to subsidize terminal equipment. We believe that this ruling, although apparently not directed at the equipment used by persons with disabilities, could, nonetheless, have a devastating impact on their access to the telephone system. Unless states are once again allowed to permit telephone companies to recover a

portion of the development and distribution costs of special terminal equipment, individuals with disabilities may soon be confronted with exorbitant telephone equipment costs. Disabled consumers will be forced to either forego the use of the telephone or pay charges considerably higher than those borne by the general public.

The National Society believes that H.R. 7168 provides the necessary statutory flexibility to permit telephone companies to continue to meet the unique needs of persons with disabilities at a reasonable charge to the disabled consumer. Access to the telephone system is crucial to the lives of persons with disabling conditions and should not be threatened.

Furthermore, the National Easter Seal Society is fully supportive of provisions within the "Telecommunications for the Disabled Act of 1982" ensuring reasonable access to telephone services for person with hearing impairments. Telephones provided for emergency use or that are used frequently by persons with hearing impairments should be made compatible for use with a hearing aid as soon as possible. We are also encouraged by those sections of H.R. 7168 regarding rulemaking activity and consumer education. These provisions will further enhance access to telephone services for persons with impaired hearing.

We were pleased that H.R. 7168 received such strong and favorable support from the Committee on Energy and Commerce. We would urge the House to act in an expeditious and equally positive manner.

Sincerely,

JOSEPH D. ROMER,
Director of Governmental Affairs.

AMERICAN ASSOCIATION OF RETIRED PERSONS,
Washington, D.C., September 23, 1982.

Hon. TIMOTHY E. WIRTH,
Chairman, Subcommittee on Telecommunications, Consumer Protection, and Finance, Washington, D.C.

DEAR CONGRESSMAN WIRTH: The American Association of Retired Persons is writing in support of H.R. 7168, the Telecommunications for the Disabled Act of 1982, designed to promote access to the telephone network for persons with physical impairments.

We are pleased that this legislation recognizes and begins to address the problem of telephone receiver incompatibility with hearing aid telephone pickups. The Association is concerned that incompatible telephone equipment is restricting certain individuals' access to the use of the telephone—an integral part of everyday life.

Hearing impairment among the elderly is a widespread disability which threatens the quality of life of our elderly by inhibiting their communication with others. The hearing aid, although not a panacea, is a rehabilitative device which provides assistance to many hearing impaired elderly. Hearing aids should serve the hearing impaired elderly in as many different situations as possible; using the telephone is one method of communication which should not be denied this population.

Nor should access to the telephone be denied to those individuals with other physical impairments who need different types of specialized telephone equipment. Therefore, as contained in section (g) of H.R. 7168, it is important that telephone companies be allowed and encouraged to provide that specialized telephone equipment in a manner which is affordable to those who need access to the telephone most.

The lack of access to telephones has far-reaching implications in such problem areas as freedom from isolation, emergency protection, equal employment opportunities, and freedom of mobility. For example, there are elderly individuals who suffer from severe chronic conditions which restrict their mobility and cause them to be confined to their homes. For them, the telephone is an essential tool for communication. It may be the only or major means for them to have contact with others and thereby provide protection from social isolation. In an emergency situation, the telephone may be their only resource for obtaining assistance.

Again, AARP supports H.R. 7168, the Telecommunications for the Disabled Act of 1982, and urges that this legislation be acted upon favorably during this session of Congress.

Sincerely,

PETER W. HUGHES,
Legislative Counsel.

STATE OF MICHIGAN,
DEPARTMENT OF COMMERCE,
Lansing, Mich., September 24, 1982.

Hon. TIMOTHY WIRTH,
Chairman, U.S. House of Representatives, Subcommittee on Telecommunications, Consumer Protection and Finance, Washington, D.C.

DEAR REPRESENTATIVE WIRTH: I am writing to you today to express my support for H.R. 7168. This bill will provide access to telephone service for persons with impaired hearing and it will also enable telephone companies to provide other specialized terminal equipment needed by persons whose hearing, speech, vision or mobility is impaired. In the latter instance, the bill authorizes State commissions to allow carriers to recover in their regulated service tariffs reasonable costs of this equipment not charged directly to the users of this equipment. I commend you for introducing this legislation and support you in your efforts to enact this bill.

Sincerely,

ERIC J. SCHNEIDEWIND,
Chairman.

CENTEL,
Washington, D.C., September 24, 1982.

Hon. JOHN D. DINGELL,
Chairman, House Energy and Commerce Committee, Washington, D.C.

DEAR MR. DINGELL: We understand that your committee has been very receptive to newly introduced H.R. 7168, the Telecommunications for the Disabled Act of 1982.

H.R. 7168 is a bill designed to achieve a worthwhile objective. Moreover, it involves minimal regulatory involvement and limited cost to telephone manufacturers, telephone companies and ratepayers. A similar bill, S. 2355, was recently passed by the Senate, and we supported that bill.

Central Corporation supports your actions and the efforts of Mr. Wirth and the bill's other cosponsors to move this legislation to the full House. I shall be happy to encourage support for H.R. 7168 as incorporated into S. 2355 among our representatives in the full House.

Very truly yours,

MARTIN T. MCCUE.

AMERICAN SPEECH-LANGUAGE-HEARING ASSOCIATION,
Rockville, Md., October 13, 1982.

Hon. JAMES T. BROYHILL,
U.S. House of Representatives
Washington, D.C.

DEAR REPRESENTATIVE BROYHILL: The American Speech-Language-Hearing Association (ASHA) supports S. 2355 as amended to incorporate the changes provided by H.R. 7168, the Telecommunications for the Disabled Act of 1982. We agree with the four points discussed under Section 2 of the bill and find that the new section, Telephone Service for the Disabled, appropriately resolves many of the difficulties the speech, language and hearing impaired have had with obtaining and funding the correct telephone.

The telephone is an important part of the lives of most Americans and, therefore, the telephone should be as accessible as possible for those Americans who have communicative disorders. As ASHA testified on May 6, 1982, before the Senate Subcommittee on Communications, there is a rise in incidence of hearing loss in our country. The National Center for Health Statistics reported that in 1971 there were 14.5 million individuals with hearing impairment and that by 1977 the figure rose to well over 16 million. We need to be certain that those who have a hearing loss serious enough to warrant the wearing of a hearing aid find that telephones are compatible with the induction coils of their hearing aids. ASHA would like to see the telephone companies required to insure availability of induction coil telephones in all settings. These induction coil units are readily available at present and all consumers and telephone personnel should be made aware that ordering a more useful telephone for their home or office is possible. The bill calls for the labeling of packaging material and this action should remedy the situation in the homes and workplaces of the hearing impaired. The necessity of compatible essential telephones mandated by the bill would improve ease of telephones by the hearing impaired when outside of their homes and work environments.

It is our hope that you will support the prompt passage of S. 2355 during the post-election session of the 97th Congress.

Sincerely,

STEVEN C. WHITE, Ph. D.,
Director, Reimbursement Policy Division.

AMERICAN COUNCIL FOR THE BLIND,
Washington, D.C., September 27, 1982.

Re Telecommunications for the Disabled Act.

Hon. TIMOTHY WIRTH,
U.S. House of Representatives,
Washington, D.C.
Attention: Scott Rafferty

DEAR REPRESENTATIVE WIRTH: On behalf of the thousands of members of the American Council of the Blind, please let me take this opportunity to express our support for the Telecommunications for the Disabled Act. We believe that this legislation will be of benefit not only to hearing impaired people but also to other handicapped persons such as deaf-blind individual's who need costly, highly specialized telephone equipment.

We believe that the local telephone companies should be permitted to subsidize the cost of special equipment and installation from the general rate base.

We appreciate your efforts in connection with this legislation and hope that this bill will be passed by the House without delay.

Very truly yours,

J. SCOTT MARSHALL,
Director of Governmental Affairs.

Washington, D.C., September 27, 1982.

Hon. TIMOTHY E. WIRTH,
Chairman, Telecommunications and Finance Subcommittee, Washington, D.C.

DEAR CONGRESSMAN WIRTH: The undersigned organizations appreciate your efforts in developing and introducing the Telecommunications for the Disabled Act of 1982. We support the bill in its extension of the compatibility requirements of S. 2355 to emergency phones, hospital phones and similar phones. We are also very supportive of the provisions which enable state utility commissions to allow telephone companies to recover costs of special terminal equipment for the disabled such as those who are deaf, vision-impaired or immobile. Technology has developed at a rapid rate in telecommunications for the disabled. These advances can permit severely disabled people to live independent lives; lives that might otherwise be relegated to institutions. This kind of technological development, together with architectural and design developments and developments in medical technology permit the disabled to lead much more productive lives.

The membership of our organizations provides health care and related services to disabled people. The goal of our services—the rehabilitation of the physically disabled—is dependent on the access of disabled people to communications systems. Your bill is important to us for it makes telecommunications advances financially feasible to the disabled.

Sincerely,

American Congress of Rehabilitation Medicine; American Academy of Physical Medicine & Rehabilitation; and Association of Academic Psychiatrists.

By Their Counsel:

RICHARD E. VERVILLE, Esq.

NORTH AMERICAN
TELEPHONE ASSOCIATION,
Washington, D.C., November 30, 1982.

Hon. TIM WIRTH,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN WIRTH: Your staff has asked for the views of the North American Telephone Association on H.R. 7168, The Telecommunications for the Disabled Act of 1982. As you perhaps know, we were pleased to have been invited to participate in the development of this important legislation. Upon review of the final provisions of the Bill and its Report issued by Congressman Dingell for the House Committee on Energy and Commerce on September 28, 1982, we wish you to know that we strongly endorse enactment of the legislation in the form it is now submitted.

We have particularly appreciated the cooperation of your staff in working with us to accomplish this task!

Sincerely,

EDWIN B. SPIEVACK,
Executive Director.●

LAW OF THE SEA TREATY

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. FIELDS. Mr. Speaker, I commend this article from Reason magazine to the attention of my colleagues:

LIFE WITHOUT THE TREATY

What happens if the US government stands firm in its decision not to sign the United Nations law of the Sea treaty? Does it leave the United States in international isolation? Will it be impossible for US firms ever to mine the seabed?

It is true that on April 30 the United States was joined by only three other nations in voting against the Conference treaty. In the aftermath, the words *"isolated"* and *"isolation"* have shown up frequently in news reports and former diplomats' comments on the US vote and on President Reagan's July announcement that the United States would not be signing the agreement.

Yet 17 other nations—*including the Soviet Union, Britain, and West Germany*—failed, by abstaining, to vote for the treaty. Although greatly outnumbered by the 130 nations voting for the agreement, the abstaining and nay-voting countries are the source of 60 percent of world production and of contributions to the United Nations. In fact, the only major industrial nations voting for the treaty were France and Japan—and both pointed out that they were not saying whether they would ultimately ratify the treaty.

Sixty ratifications are needed for the treaty to go into effect, but analysts now speculate that they may be a long time in coming. Moreover, if 60 ratifications do come through, they may well be mainly from small nations. If so, the US government's desire for further negotiations on an alternative "minitreaty" could bear fruit. The now-defunct Reciprocating States Agreement (RSA)—negotiated by France, West Germany, Britain, and the United States within the context of UNCLOS—could be the starting point.

The aim of the RSA was to provide a framework for harmonizing national oceanmining legislation among its signatories and for delineating mine sites. It was to be open to signing by any nation, signatory or nonsignatory to the law of the Sea treaty, industrial or developing. It attempted, not to regulate seabed mining, but to provide an international legal environment in which development of oceanbed resources might proceed.

Critics of the US stance against the UN treaty worry that, without it, US firms will be unable to obtain financing for the huge capital investments needed to explore and mine the ocean floor. The mining industry itself, however, has enthusiastically supported the Reagan administration's refusal to sign the treaty. As pointed out in a Heritage Foundation report ("The Law of the Sea Treaty: Can the US Afford to Sign?"), it seems doubtful that financing would be forthcoming anyway under the restrictive conditions imposed by the treaty; and with or without the Law of the Sea treaty, credit would be extended to ocean-mining firms on the basis of their existing assets and not their ability to produce seabed minerals.

The advantage of a treaty, then, would not be in the area of financing but in providing the climate in which potential seabed developers might risk their capital on such ventures. And the industry seems willing to bet on there being a viable alternative to the Law of the Sea regime.●

HON. HENRY S. REUSS

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 7, 1982

● Mr. LA FALCE. Mr. Speaker, for the past 8 years, I have had the privilege of serving with a truly gifted man, an individual who will leave his mark on this body when he retires at the end of the 97th Congress. Today, Mr. Speaker, I wish to take a few moments to pay tribute to the work and the genius of my dear friend and colleague, HENRY REUSS.

During his 28 years as the U.S. Representative from Wisconsin's fifth Congressional District, HENRY REUSS has employed his intellectual gifts to improve our banking system, to enhance international relations, to speed pollution control efforts and, in his last term, to focus special attention on the chronic needs of our economy. It has been a career marked by brilliant ideas, and this chamber will be at a loss to replace the man and his genius.

Even a cursory review of those 28 years reveals the extent of this brilliance. As a young Congressman from Milwaukee, HENRY developed the idea of the Peace Corps and saw it bloom into one of America's best-known and admired tools of foreign aid. Several years later, as America's attention focused on the problems of pollution, he unearthed the unused Refuse Act of 1899, which prohibited the dumping of pollutants into navigable waters. He used the act to file hundreds of lawsuits and turned over the money won to Wisconsin's Department of Natural Resources to help its antipollution programs.

His leadership as chairman of the House Banking Committee built the groundwork for major changes in Federal regulation of the financial institutions industry. Having worked closely with Chairman REUSS on such matters as the Depository Institutions Deregulation and Monetary Control Act of 1980, I know that his vision for a modernized banking system has been instrumental in the changes now underway in this industry.

I also know that his leadership skills were instrumental in creating and passing the financial package necessary to save New York City from bankruptcy in the mid-1970's. As a young member of the Economic Stabilization Subcommittee, I took a special interest in this legislation because of its potential effects on my home State of New York and other cities across

America. Thinking back to those times, it is difficult to recall a more complex and emotional battle at the subcommittee and committee level. It was a privilege to serve on a committee led by an individual who allowed all parties to be heard and who forced the committee to produce a strong and reasoned bill.

On the Joint Economic Committee, both as chairman during this Congress and as a member during previous sessions, HENRY's strong and forceful voice has been heard often. Over a decade ago, HENRY authored a controversial JEC subcommittee report urging the Nixon administration to close the gold window and move to a system of floating exchange rates. During this Congress, with our economic future uncertain, Chairman REUSS has conducted one of the most aggressive and broadminded hearing schedules in this history of the committee. During the Reuss era, the JEC has held over 170 days of hearings and issued approximately 15 percent of the total number of publications—studies, reports, hearing records—in the 36-year history of the committee. Those hearings have touched virtually every facet of the national and international economic scene. Included among those hearing topics have been agricultural policy, the Nation's economic outlook, deregulation of natural gas, defense spending, the economic status of women, President Reagan's New Federalism proposals, urban policy, international trade, income distribution, and the Federal budget. The committee has published reports on Poland, studies of the economic situation in Cuba, and researched the status of the semiconductor industry in Eastern Europe and its effect on our trade with Soviet bloc nations.

Chairman REUSS's strong and consistent efforts to focus on issues affecting the stability and growth of America's economy are symbolic of his personal commitment to this Chamber. Even as he began the work of packing 28 years of work, he developed and proposed a program of infrastructure investment and job creation that the House will consider during this special session.

Mr. Speaker, in The Other America, author Michael Harrington wrote that—

> The millions who are poor in the United States tend to become increasingly invisible. * * * It takes an effort of the intellect and will even to see them.

For over a quarter of a century, HENRY REUSS has commanded his intellect to see the pressing needs of this Nation. The legacy he leaves behind is one of vigor and brilliance in pursuit of improved economic conditions for all people.●

HENRY S. REUSS

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 7, 1982

● Mr. CONYERS. Mr. Speaker, we have all benefitted enormously from the presence of HENRY REUSS. I hope that we will continue to have his perspectives and ideas on economic policy. Among his many achievements in this body I will always remember an overriding one. The Humphrey-Hawkins Full Employment Act was originally the Reuss-Hawkins-Humphrey bill. He stood as a major force for creative change in economic policy. He formulated the original concepts behind the act. His involvement was absolutely crucial in the passage of the full employment law. I wish him good fortune in his new pursuits, and encourage him to keep his sound and sensible economic views before the public.●

HUMAN RIGHTS POLICY

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. BONKER. Mr. Speaker, I would like to commend to the attention of my distinguished Colleagues Mary McGrory's column in yesterday's Washington Post. She provides an excellent overview of the Reagan administration's human rights policy and a good example of what happens when strategic interests and human rights conflict.

In May 1979, Warren Christopher, who was serving as the Deputy Secretary of State during the Carter administration, appeared before the Subcommittee on Human Rights and International Organizations. I asked him to cite a few examples where the administration had decided to reduce or cut aid to any country on the basis of its human rights violations. Among the several countries mentioned by Mr. Christopher was Pakistan, both for its human rights record and violations of our nonproliferation policies. Seven months later the Soviet Union invaded Afghanistan. Whatever restrictions had been imposed on Pakistan were immediately ignored as the Carter administration rushed in with a military assistance program. Human rights considerations were superseded by strategic interests. Subsequently, the Reagan administration has greatly increased that military assistance program, despite documented reports that human rights violations continue on a much larger scale than in previous years.

Surely it is in our strategic interest to nurture democratic institutions in the Third World and to maintain a strong human rights policy which is responsive to the yearnings of human beings for dignity and freedom. How long will it be before administrations learn that our strategic interests will be badly damaged if the victims of repression associate our country with their oppressors.

The column follows:

[From the Washington Post, Dec. 7, 1982]

ZIA NEED NOT WORRY, HE'S THE KIND OF GENERAL REAGAN LIKES

Gen. Mohammed Zia ul-Haq, the president of Pakistan, made a few gestures in advance of his official visit here.

He didn't really have to as far as President Reagan is concerned. Zia was doubtless playing to Congress when, after months of delay, he allowed the widow of Zulfiqar Ali Bhutto—the predecessor he deposed and executed—to seek treatment for cancer in the West.

Nor did he, for Reagan's sake have to release five of the dozen opposition leaders whom he arrested last week for making critical statements about his U.S. trip.

Bhutto knew, from the red-carpet reception accorded President Marcos of the Philippines, who also jails and executes his opponents, that Reagan has an exceptionally high tolerance for human rights violators.

If there had been any doubt in Zia's mind, it should have been resolved by Reagan's weekend performance during which he embraced the murderous leader of Guatemala, Gen. Efrain Rios Montt.

Amnesty International, America Watch and other human rights organizations have attested and documented the slaughter of thousands of peasants and Indians since the general seized power last March.

But Reagan, having looked him in the eye and studied the charts the general brought with him, is convinced that the Great Exterminator is getting "a bum rap." After their meeting, Reagan declared that his visitor is "totally dedicated to democracy in Guatemala" and deserves more U.S. military aid.

Rios Montt expressed his political philosophy in more robust terms: "We have no scorched-earth policy. We have a policy of scorched communists."

Nonetheless, Zia, who makes much of "mutual" U.S.-Pakistan "strategic interests," thought it politic, before setting out, to say that elections, which he has been promising and postponing since he took power 5½ years ago, might not be the worst thing that could happen to his country.

For some members of Congress, who remember that Zia looked on while his countrymen burned down our embassy three years ago, the fact that Pakistan is on the border of Afghanistan is not the beginning and the end of the question. Sen. Mark O. Hatfield (Ore.), for instance, would like Zia to explain his policy of jailing his critics, without charges, and subjecting them to military trials that employ summary judgment procedures for which there is no appeal.

According to Amnesty International, the human rights situation has deteriorated markedly, with political imprisonment and torture on the rise.

Congress would also like to question Zia about his surreptitious development of nuclear weaponry. They are not convinced that the $3.2 billion in military aid Reagan proposes to bestow on him during the next

six years will necessarily be used in the interests of the United States.

India is dubious about the sale of 40 F16s equipped with electronic countermeasure equipment, although Zia recently stopped in for lunch and a little stroking session with Prime Minister Indira Gandhi.

Some senators want to ask him specifically about the case of Irshad Rao, editor of a pro-Bhutto newspaper, who has been in jail and maltreated for almost two years for "printing objectional literature, creating unrest among the masses and disaffection with the armed forces."

Zia's transgressions were overlooked even by the pro-human rights Carter administration when the Soviets marched into Afghanistan two years ago. The visit to the Reagan White House gives him full "allied status"—which to Hatfield shows that "we are prepared to abandon everything to our consuming and myopic anti-Sovietism."

Zia can play the communist card with Reagan. He attended Leonid Brezhnev's funeral and met with Yuri Andropov. Pakistan is a member of a U.N. commission on Afghanistan. Reagan could urge him to help find a solution through a face-saving Soviet exit.

But perhaps the best thing Reagan and Zia could do is to watch the new British film, "Gandhi," together. It is a work of dumbfounding excellence.

Reagan, who consorts with bullies and views military action as the only way to stop "international terrorism," his term for communism, would greatly benefit from watching the uses of non-violence. It would do him good, in the light of his Latin American policies, to hear Gandhi saying that people would rather have a bad government of their own than a good government imposed by an alien power.

As for Gen. Zia, who, like his soul brother, Gen. Rios Montt, believes that political activity is murder, he needs all the instruction he can get in the art of benevolent leadership.

Sir Richard Attenborough, the producer and director, could doubtless arrange a screening of "Gandhi" for the pair. It's the kind of "quiet diplomacy" that might make a difference.●

CAROL ST. CLAIR, HONORED BY THE AMERICAN RED CROSS

HON. NORMAN E. D'AMOURS

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. D'AMOURS. Mr. Speaker, I would like to share with my colleagues the following article reprinted from one of the newspapers in my district, Foster's Daily Democrat, which describes the prompt action of Carol St. Clair, a lifeguard, in saving the life of a 2-year-old child. Ms. St. Clair will be receiving the American Red Cross Certificate of Merit for her heroic actions, which as you may know, is the highest award given out by the American Red Cross.

Not only would I like to add my congratulations to the others she has received but I hope that during this season of the year when we reflect upon our blessings, that we also remember that the techniques used to save this child are easy to learn and can save lives, as Ms. St. Clair's actions testify.

THANKS TO LIFEGUARD, KAREN RETURNS HOME

(By Nora Irvine, Democrat Staff Writer)

Rochester.—A little girl whose seemingly lifeless body was pulled from two and a half feet of water at Milton Town Beach on Tuesday is nearly her normal self today, thanks to the cool head and able ministrations of lifeguard Carol St. Clair.

Ms. St. Clair, 23, was the only guard on duty Tuesday afternoon at the public swimming area at Milton's Three Ponds. The beach and the roped-off swimming area she was supervising from the lifeguard chair were particularly crowded, because a local restaurant was having a picnic for its employees and their families.

Recalled Ms. St. Clair, "I was looking out to the raft, which was filled with people, when two little girls came running up to me and said, 'Lifeguard, lifeguard, there's a dead person in the water!'

"My heart just sank. I looked over to where they were pointing and could just see a skimp of pink, so I dove out of the chair and swam out there."

The child, 2-year-old Karen Lemay of Somersworth, was floating totally submerged just beyond the rope of buoys that divides the shallow area for non-swimmers from the deeper section. Ms. St. Clair grabbed the child, who was clad in a pink bathing suit, out of the water and raced back to shore with her.

"When I took her out of the water, she was blue and she wasn't breathing," said Ms. St. Clair. "I immediately started giving her mouth-to-mouth resuscitation. It was about a minute and a half before she started breathing."

An ambulance called to the scene by an onlooker rushed the child to Frisbie Memorial Hospital, where she was given emergency care and kept overnight for observation. She was discharged from the hospital today. Her parents, Larry and Linda Lemay, said the doctor attending her expects her to recover completely.

Karen was in the care of a relative at the time of the incident Tuesday afternoon, Lemay said.

Today Ms. St. Clair marveled at her calm response to the near-tragedy, the first time she has been called on to apply lifesaving techniques.

"You know, you're trained for just this kind of emergency, but before it happens you don't know how you'll actually handle it," she said. "It was amazing to me that I didn't have to stop and think at all about what I needed to do; I just did everything automatically. I was so happy to be able to save her."

She was concerned, however, that the child was apparently unattended in the water at the time of the mishap.

"Usually with such a young child, the parents are right there in the water with them all the time, but occasionally a mother will come up to me and say, 'I'm leaving my children here for three hours, will you watch them?' Of course I have to say, 'No.' Parents have to understand that a lifeguard can't possibly pay special attention to a few children when there are so many to watch," she said.

Ms. St. Clair, who lives with her mother, Cynthia St. Clair, at 34 Twombly Road in Rochester, has been lifeguarding at Milton Town Beach for about a month. In previous years she worked as a guard at the East Rochester pool.

A 1976 graduate of Spaulding High School, she got a bachelor's degree in education from Keene State College in May and hopes to find a teaching job for this fall.●

LEGISLATION REGARDING THE FEDERAL DESALINIZATION FACILITIES IN WRIGHTSVILLE BEACH, N.C., AND ROSWELL, N. MEX.

HON. CHARLES ROSE

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. ROSE. Mr. Speaker, today I have introduced legislation which would transfer two Federal desalinization plants to the respective towns in which they are now located. This transfer would only be authorized on the stipulation that the town's involved continued to use the facilities for desalinization and other related research for a period of at least 5 years.

This transfer would allow this research to be conducted without cost to the Government, while the upkeep, maintenance, and responsibility for the facilities would now be placed upon the local jurisdictions as opposed by the Federal Government.

I feel it is important that the Government should continue to encourage this type of research, in view of the implications such studies could have for this Nation's future. This bill would allow this research to continue, while relieving the Federal Government of the cost for the operation of these plants. These two towns have shown that local jurisdictions are willing to assume some of the burden of certain Federal programs, and I feel that is in the best interest of the Government to allow them to do so.

It is my hope and expectation that this legislation will help to focus the attention of the Congress on the importance of desalinization research. In view of the necessity for alternative water supplies that this country is now experiencing, I feel that it is vital that we continue to encourage desalinization and other related studies.●

THE SUFFERING OF 120,000 JAPANESE-AMERICANS

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. DYMALLY. Mr. Speaker, today I plan to focus attention on an injustice that has lasted 40 years too long, and by introducing two bills designed to redress a grievance. The injustice about which I speak was the suffering

of 120,000 Japanese-Americans who were hastily relocated into internment camps following the signing of Executive Order No. 9066, on February 19, 1942.

The losses these Americans incurred were enormous, including jobs, careers, communities, property, freedom, and sometimes life. The passage of these two bills, next year, could begin to restore the actual financial losses, and help redress this grievance.

I am fully aware these bills have no chance of passage in this special session. But by introducing them today, I hope the staffs of the appropriate committees will study the legislation during the recess, and the sponsors will have an opportunity to organize support for passage during the regular session in 1983 when I plan to reintroduce them. In addition, I hope to create public discussion and an awareness of the injustices.

There are two bills: One provides outright cash payments to individuals; and the other provides a community restoration fund. Benefits to individuals would be paid to the actual evacuee, or if deceased, the surviving spouse, or the surviving children in the amount of $25,000. Evacuees who suffered losses in excess of $25,000 could appeal for more and provide documenting evidence of losses.

Compensation could be paid for actions, including: loss of property, and property interests; loss of earnings, earning capacity, and vocational opportunity; loss of education opportunity; loss of life; physical or mental disability; severe emotional distress; deprivation of rights secured by the Constitution of the United States and several States; and all other losses sounding in contract or in tort resulting from the implementation of Executive Order 9066.

The other bill, the Internment Community Redress Act, provides for a community restoration fund for those communities which sustained loss would be established with eight regional boards and one national board. Evacuee communities could apply, under the act's provisions, to one of the regional boards for benefits in the following categories: Education and training; business and agricultural development loans; health care for the elderly; mental health, alcoholism, and drug abuse care and treatment; low-income housing; health care; child day care; cultural maintenance, research and expression; and improvement of communications within the evacuee community.

The appropriation for establishing the community fund and the regional and national boards would be $3 billion.

These bills represent the culmination of years of surveys and research and testimony by citizens of the Japanese-American community. Although about 120,000 Japanese-Americans were relocated from the coastal States of California, Oregon, and Washington, and forced to live in relocation centers, the U.S. Government was never able to substantiate the action as a military necessity, and not one incident of Japanese-American aid to the enemy was ever documented. While scholars, elected officials, and boards of inquiry repeatedly implore the injustice, there has been no formal apology and little action.

It is time for Congress to redress this grievance.●

BETTER WEAPONS IN LESS TIME FOR LESS MONEY

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. McDONALD. Mr. Speaker, everyone professes to be concerned about cost overruns in new weapons. One of the major contributions to these extra costs is the multilayered and cumbersome method we have of acquiring weapons. The system, designed by former Secretary of Defense McNamara, insured that nothing took place quickly and that blame was so spread around that no one was responsible. This now results in 6 years to make a decision as to whether or not to produce a weapon and then 12 years to actually get a production line going. Prior to Secretary McNamara, the time periods were 1 year and 6 years respectively. This process is so lengthy that the Soviets now come out with two or three different models of a weapon to our one in such a period and also have adequate time to learn of, and steal the technology for our new weapons and apply it to their own. It is high time the Congress and the Department of Defense pruned this process and its attendant bureaucracy. An analysis of this problem and some suggested solutions appeared in the Washington Report of the American Security Council for November 1982. The author is Brig. Gen. Robert C. Richardson, U.S. Air Force (retired). I commend this item to the attention of my colleagues who are looking for ways to save defense dollars and still insure an adequate defense of this Nation.

[From Washington Report, November 1982]

BETTER WEAPONS IN LESS TIME FOR LESS MONEY

Everyone knows the old proverb: "For want of a nail the shoe was lost, for want of a shoe the horse was lost, for want of a horse the battle was lost." That proverb dealt with the dull and undramatic side of warfare—the getting of weapons, rather the the using of them. That proverb applies today as it did centuries ago. For want of bold, decisive, presidential and congressional policies regarding how we develop and buy new weapons—the so-called defense systems acquisition process—we are in danger of losing the battle for our national survival and the survival of human liberty worldwide.

INSISTING ON IMPROVEMENT

How new weapons are bought and how long on average it takes to develop and build new weapons are still considered tedious and uninviting matters that should best be left to management experts and technocrats. The fact is, however, that the policies and procedures devised by our experts and technocrats during the last 20 years have raised the cost of new weapons several times and stretched the average length for acquiring new weapon systems to twelve years. In the 1950's new weapon systems were brought into the force in an average of six years. If the American people, particularly the movers and shakers, do not seek to learn something about the systems acquisition process and insist on improvements in it, we may be lucky in the future to have a supply of nails for shoes for horses.

A prime result of this doubling of the length of the acquisition cycle is to make it impossible for the President to achieve the "margin of safety" in our national defense structure he promised when elected. It even raises the question whether the United States can ever restore an acceptable military balance vis-a-vis the U.S.S.R. without finding a way back to somewhere near a six-year acquisition cycle, at least for major new systems.

THE TAIL WAGGING THE DOG

It is fair to say that the current systems acquisition process has become the tail that wags the dog in resolving such major national security problems as: how to cope with the growing Soviet threat at a cost the United States can afford; how to achieve party platform and presidential defense goals; how to keep the Soviets from exploiting U.S. technology to our disadvantage; and how to deal with the growing public pressure to change U.S. strategy in order to reduce the likelihood of nuclear war while still retaining a valid defense posture for America.

FROM A SIX-YEAR TO A TWELVE-YEAR CYCLE

A brief examination of the major consequences of today's twelve-year acquisition cycle and why it has doubled in the past two decades will offer some insight into what needs to be done to improve the process—and it will also explain the growing concern among those who are convinced that U.S. defense goals can only be achieved by changing U.S. strategies and by building the new and advanced systems necessary to implement the new strategies.

Within the Department of Defense there is recognition of the need to improve the acquisition process. Numerous studies have been made by defense management experts, and many recommendations have been proposed. Most have been ignored. But so far, none of the recommendations have sought to correct the basic problem of the time it now takes to decide upon, select, develop, procure, and build new, technologically sophisticated, weapon systems. In order to reduce substantively the present twelve-year acquisition time for vital new systems, major policy and management changes must be made. These changes can only come about if the President and Congress address this apparently minor, but in fact major, problem area.

LENGTHY ACQUISITIONS ARE COSTLY

It is difficult to overstate the impact of today's lengthy acquisition process, not only on the prospects for establishing the President's "margin of safety" in national security, but also on the size of the defense budgets. The waste of time and resources resulting from an acquisition cycle of ten years or more can be quantified. Of greater importance, however, are the debilitating and demotivating effects of such a lengthy cycle on the programs. The five most serious consequences of ever-lengthening lead time in the development and procurement of new weapon systems are:

THE DEBILITATING EFFECTS

First, it results in a tremendous increase in the cost of all new systems. Studies of costs versus years in development and production of new systems show that 30 percent can be added to the life cost of a major advanced weapon system for every year added to its acquisition cycle.

This means that a system that could be built for $15 billion, in, say, five years from the authority to go ahead—as was the case with the first ICBM's and Polaris missiles—will cost at least $50 billion if acquired under today's elongated procurement procedures.

Were it possible to return all major defense procurements to an average of six years, as was the case in the 1950's, yearly savings of $6 billion or more could be realized.

Second, such a lengthy acquisition cycle limits any President's ability to meet new threats, changing world conditions, or election commitments.

Lead times that exceed two or more presidential tours obviously make it impossible for any Administration to make changes in U.S. strategy or the U.S. defense posture if new hardware is required to carry out those changes.

The ability of the current Administration to introduce a new strategy to replace the largely discredited Mutual Assured Destruction (MAD) strategy, which it inherited with a preferred strategy of Assured Survival would require new military capabilities in space which cannot be made available during Reagan's term because it will take 12 years or more to build the necessary new offensive and defensive space systems.

Regardless of who is President, there are only two ways to regain or maintain an acceptable military balance. One is to buy roughly equivalent quantities of comparable weapons; the other is to offset Soviet quantitative superiority with more advanced, higher performing, "cutting-edge" technology systems. This first approach requires throwing massive amounts of money at defense, which we can now ill afford the second requires that we quickly build and field advanced new weapons which today's long acquisition cycle makes impossible.

Third, ten or more years of lead time will preclude effectively competing with the Soviets for superior, higher performance weapons in the future.

The combination of lack of security in U.S. research and development activities coupled with excessive studies and prolonged debates on all decisions gives the Soviets ample time to discover what we are doing, to steal our technology, and to produce comparable or offsetting weapons before ours can be built.

For example, the Soviet Backfire bomber, first deployed by the Soviets in the 1970's, was built in response to our B-70 and subsequent B-1 programs. A similar countering effort by the Soviets can be predicted in regard to our promising "Stealth" bomber, if we take ten or more years to build it.

Fourth, public and congressional support, let alone enthusiasm, cannot be sustained for any weapon system over a period of a decade or more.

What appears to be an attractive and essential new development to the majority of the people today—and is therefore approved by Congress—is not likely to be as attractive six to eight years later when the big money for production must be authorized. Classically, at that point, we have a great debate, as in the case of the B-1, with proposals, for cancellation; and we face a Hobson's choice between buying a system most people no longer consider the best or accepting a risky gap in military capability if we opt for a next-generation program with another ten-year acquisition time frame.

Lastly, a ten or more year acquisition cycle all but precludes efficient management, especially in the case of high-technology weapon systems.

The longer the life cycle of a weapons program, the more difficult it is to keep the same people on the job through the critical development and test portions of the program. Any high-technology, multimillion dollar program, especially where the state of the art is being pushed, requires continuity of management if it is to be efficiently pursued. This factor requires that the key managers stay with the program for its duration. The inevitable turnover of people in a ten-to twelve-year program is very costly, wasteful, and inefficient.

WHY IT TAKES SO LONG TODAY

If we are to correct a condition, we first need to understand what caused it.

Given all the disadvantages resulting from today's elongated acquisition cycle, it is fair to ask, why did the cycle go from a six-year average in the late 1950's to a twelve-year average in the 1970's—and what can be done about it? The U.S.-built pioneering, high-technology systems, such as our first ICBM (Atlas), or first nuclear-powered submarine (Polaris), or our first manned satellite (Apollo), in five to six years from a standing start. We flew the first prototype of a high-technology jet bomber, the B-47, 18 months after the start of the program. Why can't we do the same for new systems, such as the Stealth bomber or space-based ABM's, in the 1980's?

There are four basic reasons for the change from a six-year to a twelve-year acquisition cycle—or, to put it another way, there were four time-saving procedures used in the 1950's, that were abandoned during the past two decades, to which we must return.

TIME-SAVING PROCEDURES

First, we must make a total commitment to new programs from the onset and at all levels of government. Once a "go" decision is reached on a major weapons program, it should be named, given sustained priority, authorized multiyear funding, and provided special management to prevent bureaucratic delays and meddling. All required research must be focused toward achieving production on schedule.

Second, we must accept the financial risks that are involved in high-technology programs, rather than follow the procedures of limiting designs to off-the-shelf technology and proving all system characteristics in the prototype before agreeing to production.

These particular procedures were introduced in the 1960's by then Secretary of Defense, Robert McNamara, under the guise of managerial improvement. What they guarantee is obsolete end products.

When we wait until all technology is in hand before committing ourselves to a new system, we not only fail to push and focus R&D, but we preclude concurrency in the development and procurement effort. The result of the McNamara procedures has been to add costly years to the acquisition process and to ensure obsolescence at time of delivery, since no new technology can now be introduced into a new program during engineering, test, and production. The first opportunity for new technology to be added is during subsequent retrofitting.

A return to the admittedly high-risk approach of the Eisenhower years does entail possible overruns and even failures, but the cost of these is far less than the higher costs resulting from added years under the low-risk approach—along with the need for more weapons to offset technological obsolescence.

The Third procedural change is to reduce the time necessary to reach the initial decision to proceed with a new system once a need has been perceived. This time factor has been gone from 12 months or less in the 1950's, to over six years today. This can be attributed largely to overcentralization of the authority to make decisions coupled with the need for all proposals to be subjected to innumerable analyses, studies, and reviews. Untold government agencies, offices, and committees get involved in the process, with the result that all sorts of influences are brought to bear from vested interest groups, who are totally lacking military experience or technical knowledge. They are allowed to delay progress and to ensure that the final decision will be a form of Gallup Poll, in which all participants will have carefully protected themselves from criticism should anything go wrong at a later date.

The Fourth procedural change that must be made is to eliminate the cumulative effect of 20 years of Parkinson's Law.

There are now over 63,000 pages of defense procurement regulations, and the bureaucrats keep writing more.

There is too much for any senior official to read, let alone understand, in a life-time. These regulations generate rigidity, preclude initiative and innovation, and substitute the completing of tons of forms for real work. It is no exaggeration to say that there would be plenty of aerospace engineers today if most of them were not writing tome-length proposals or answering tedious and irrelevant queries from empire-building bureaucrats. Specifications give contractors are far too detailed. They preclude innovation and guarantee higher costs. The "source selection" procedure for choosing the prime contractor has become an "apples to apples" comparison, which simplifies the ultimate selection but does so at the expense of a staggering degradation in weapon system cost effectiveness.

Paul Thayer, Chairman of the Board of LTV Corporation summarized the effect of excessive regulations on cost in an interview with Time of February 1st. He said: "Forty cents out of every dollar we charge for every airplane delivered to the government is attributable to bureaucratic redtape, paperwork, and duplication."

The current Administration has conducted extensive studies into the problem of weapons procurement. Deputy Secretary of Defense, Frank Carlucci, in both April and November of 1981 ordered institutional re-

forms aimed at accelerating the acquisition process. These were commendable efforts; they helped many people to understand the problems; but they produced few results. The only significant step that has been made during the past two years is to arrange with Congress for some multiyear funding.

WHAT TO DO ABOUT THE PROBLEM

At the highest level, some flexibility must be returned to the President in the management of the Defense budget. At a lower level, appropriate management decision-making authority must be returned to the System Program Offices. To make these changes will require decisions and actions by authorities, Executive and Legislative, and well above the Defense Department's management technocrats.

In the more mundane areas the following steps are recommended, all of which have historical precedent:

(1) Eliminate lower-level government agencies and offices with tangential interest from the initial decision to build or not to build a new weapon system.

(2) Reduce regulations and attendant reports related to the full acquisition cycle.

(3) Accept multiyear funding for major weapons system programs.

(4) Permit concurrent R&D and component production, i.e., the high-risk management approach.

(5) Assign a priority to all major weapons programs, to apply through the acquisition cycle.

A TIME OF CHANGE

The time is propitious for such changes. Several "cutting-edge" technologies can and should be applied to new weapons, such as lasers, directed-energy beams, space-based ABM's, and others. Most of these are defensive in nature, and therefore nonprovocative. If the nation could select one or two of these, commit to their production, admitting that all the technology is not in hand (although most of it is), give the systems the necessary priority and funding, and streamline the management procedures, then within a half dozen years, the United States could dramatically improve our chances for national survival—and save billions of dollars of taxpayers money in the process.

Unless these or equivalent measures are soon taken, it is clear that this Administration will not be able to reestablish a "margin of safety" within its tenure. Moreover, the military balance will further deteriorate in favor of the Soviets to the detriment of U.S. security, and a continuing plea for more and more dollars for defense will further divide the country.●

HENRY REUSS

HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 7, 1982

● Mr. PANETTA. Mr. Speaker, I want to join my colleagues in paying tribute to a man who has truly been one of the great leaders of the Congress. Over a career spanning nearly three decades, Chairman REUSS has contributed enormously to every major piece of banking and economic legislation considered by the Congress, either through his ideas or through his direct work on the measures. His work as chairman of the Committee on Banking and then as chairman of the Joint Economic Committee has earned him great respect both within and outside of the Congress.

During difficult economic times, it is important for the Nation to have strong leaders to steer us in the direction of rational and compassionate solutions to national problems. Chairman REUSS has served admirably in that role, particularly over the past few years, and we will truly miss him here in the Congress.

Of course, the entire Nation, and particularly his constituents in Wisconsin, will miss HENRY REUSS. I know my colleagues join me in wishing him the very best of luck and good fortune in the years ahead. He should be proud of his long and fruitful career here in the House of Representatives.●

TRIBUTE TO THE MEMBERS OF THE PENNSYLVANIA CONGRESSIONAL DELEGATION WHO ARE CONCLUDING THEIR SERVICE IN THE HOUSE OF REPRESENTATIVES

HON. AUSTIN J. MURPHY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. MURPHY. Mr. Speaker, I rise today to pay tribute to three of my colleagues in the Pennsylvania Congressional Delegation who will be retiring at the end of the 97th Congress. The citizens of Pennsylvania and I will sorely miss the leadership, the dedication, and the contributions of these men to the Federal legislative process. The colleagues to whom I am referring are DON BAILEY, JOE SMITH, and ALLEN ERTEL.

DON BAILEY, represents the 21st District of Pennsylvania, just to the east of my own district. When he was first elected in 1978, I had the pleasure of serving with DON on the Education and Labor Committee. His dedication and competence were recognized when he was awarded a seat on the prestigious Ways and Means Committee after only one term in Congress. Mr. Speaker, but for the unfortunate necessities of reapportionment, DON BAILEY would be continuing to serve the citizens of Westmoreland County with distinction. DON came to the Congress as the most decorated Vietnam veteran to serve in the House of Representatives, and as a member of the Veterans' Committee, I was always able to count on DON's support for legislation that would benefit all veterans.

Although my good friend, JOE SMITH, has only been here since July 1981, I will miss his friendship and his support on steel and coal issues. It was my pleasure to serve in the Pennsylvania State Senate with JOE from 1971 to 1976. During his tenure in the Pennsylvania State Senate, he served with distinction as the chairman of the Appropriations Committee in the Pennsylvania Senate from 1977 until his election to the House of Representatives.

While in the Congress, he carried out his responsibilities on the Armed Services and Merchant Marine and Fisheries Committees with the same degree of dedication and evenhandedness that characterized his service in State government. I always admired JOE for his concern for people, and his dedication to furthering the interests of all the citizens of Pennslyvania. He is a man of good character whose integrity is beyond reproach. I will always value my friendship with him and wish him well in private life.

ALLEN ERTEL was the first Democrat elected from his congressional district in 35 years, and came very close to being the Governor of Pennsylvania. His decision to leave the House of Representatives in order to accept the challenge of running for Governor is typical of his tenure in the House of Representatives where he never ducked an issue or compromised his principles. Although he will best be remembered for his tenacious pursuit of funds to provide adequate funding for flood control on the Susquehanna River, and a reasonable Federal response to the problems associated with the Three Mile Island incident, his contributions to the Federal legislative process as a dedicated and enlightened member of the Public Works and Transportation and the Science and Technology Committees will be sorely missed by his colleagues. Much of the success of the Democratic congressional candidates in the 1982 general election in Pennsylvania reflects the excellence he brought to the top of the ticket in his race for Governor.

The sadness I feel today that three distinguished Congressmen from Pennsylvania will not return to the 98th Congress is tempered with the knowledge that the same dedication, integrity, and excellence with which they served in the House of Representatives will make it possible for them to make significant and positive contributions to the State of Pennsylvania in private life.

Although these men, DON BAILEY, JOE SMITH, and ALLEN ERTEL, will be missed, their contributions insure that they will not be forgotten.●

THE MAGNIFICENT SEVEN

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. LAGOMARSINO. Mr. Speaker, I remember a movie several years back starring, I think, Yul Brenner, called "The Magnificent Seven." In it, a bunch of veteran gunslingers got together to rid a town of a gang of cutthroats, and they did it in magnificent fashion. I do not remember everything about the movie, but I do remember it was a big hit, and it left you with kind of a sad, but warm feeling.

I cannot help but think of that movie today, as we gather to pay tribute to our own "Magnificent Seven," our seven retiring Members from California. CLAIR, DON, BOB, BARRY, WAYNE, PETE, JOHN—you are as unique and magnificent a group of individuals as any I have ever had the pleasure to know. Collectively—if JOHN will pardon the expression—you have done more for our Nation and for California than any dozen lawmakers. Individually, you have provided unique and valuable insights and made us all a little wiser, a little richer, and a lot happier for having known you.

There is a special bond that develops between people who serve in Congress—a little like war buddies. It is an experience you do not forget. And when you are a member of the minority, the parallal to a war are even more vivid. But I cannot think of seven other guys that I would rather have in a foxhole with me, so I hope you will not be leaving the scene entirely. Some of you have served as advisers to me, others as colleagues, but I regard you all as friends.

So the next time I hear that theme music from the White House, calling us to battle on the floor, I will think again of our own "Magnificent Seven"—the guys in the white hats. And I know it will make it a little easier. Thank you all.●

H.R. 7044—THE MAIL FRAUD BILL IS A FRAUD

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. DANNEMEYER. Mr. Speaker, it takes little imagination to conclude that something entitled the "Mail Order Consumer Protection Amendments of 1982" is going to command a largely favorable impression. After all, it is both publicly and politically acceptable to protect the consumers' interest.

Conversely, it is a well-established rule of thumb that opposition to such legislation invites vilification for being against the elderly and the poor, and for catering to unscrupulous trashpeddlers and con artists.

But it is not quite so simple. As is often the case with such legislation, the title sounds a great deal better than the bill actually is.

We are not arguing over intent. I believe we are all aware of the many schemes designed to bamboozle the unsuspecting public, especially our senior citizens with limited resources. The distinguished and respected gentleman from south Florida, Mr. PEPPER, the principal sponsor of H.R. 7044 and its predecessor H.R. 3973, is known to harbor no small affinity for causes benefiting the elderly.

I submit, however, that what the gentleman intended is not what we have ended up with. What we will be voting on here is not a consumer protection bill but rather a postal inspection bill. We are not combating fraud, we are invading privacy.

H.R. 7044 vests with the Postal Service the authority to infringe upon the constitutional rights of all citizens, principally first and fourth amendment guarantees of freedom.

In a letter dated September 16, and signed by John Shattuck, director of the American Civil Liberties Union it states:

> The revised bill does not provide a judicial officer to determine in advance if there is a sufficient evidentiary basis to justify a search and inspection, nor does it limit inspections to circumstances where there is "probable cause" to believe that the materials contain evidence of a violation. Instead, it places a burden of proof upon the person whose documentary materials are to be inspected to seek to have the investigative demand invalidated after it has been served. The result is an almost unbridled discretion for postal service officials, particularly those in the field, to initiate documentary inspections.

Not only is there failure to adhere to the doctrine of showing probable cause prior to initiating action, the fact that the defendant whose records are being expropriated must attempt to prove his innocence of wrongdoing in order to stop the investigative demand runs counter to our prevailing system of justice: That one is innocent until proven guilty. Under H.R. 7044, the reverse is essentially true: One is presumed guilty until proven innocent. This legislation sanctions unreasonable search and seizure.

During hearings on the predecessor bill, H.R. 3973, the ACLU, the National Health Federation and the Association of American Publishers numbered among the witnesses who testified against the bill, essentially on the grounds that the new investigatory authority poses a dual threat to individual liberties. Subsequent opposition—to H.R. 7044—has surfaced from Moral Majority, the Non-Profit Mailers Federation, the "700 Club," and Seventh Day Adventists.

On June 3, Mr. Ian Volner, counsel of the Association of American Publishers stated that "Postal Service records and information available to the AAP indicated that roughly 20 books have been banned from the mails." This revelation certainly contradicts the Postal Service position that they are not interested in pursuing a policy of censorship.

Particularly vulnerable to postal scrutiny are publications and products which can be considered unorthodox or nonestablishment. Many new health regimens, diets, and medical procedures fall into this category.

Now protecting the public from deception and dangerous drugs and methods is one thing. But telling me I cannot send for material describing a new but unaccepted cure for the common cold is an infringement on my rights as a citizen. It may not work. It may not work for all people. But I have the right to send for it. Not under this legislation, however. I would not even have a guarantee against unreasonable search and seizure should I manage to obtain it.

Supporters of the bill are quick to point out that, sure, I have the right to buy it, but what about the poor unwitting consumer who is lured into squandering his life savings on some quack "live to age 150" pill?

There is no guarantee that H.R. 7044 will prevent such scams from occurring. Proponents argue that these new investigatory powers would enable the Postal Service to scrutinize would be mail order defrauders by serving notice on enterprises thought most likely to contain a high incidence of fraud.

This is like saying you are out to eliminate shoddy auto mechanics by shutting down the dealers. Even the fact that a particular dealer's service department may have a 30-percent complaint rate, does not warrant preventing that dealer from conducting any business altogether. It is precisely for this reason that we have entities such as Better Business Bureaus, consumer information services, and guides like the Good Housekeeping Seal of Approval and AAA. What is the saying—an educated consumer is good business?

The key element is, of course, that once a fraud has been perpetrated, you can sue, return the merchandise, complain to relevant authorities—most dealers do not relish their complaint-ridden service departments being rated D-minus by business and consumer groups—or raise a ruckus. And then there are contracts, money back guarantees, and other insurance devices.

But in H.R. 7044 we have a different story. When asked why a particular book was banned, the Postal Service replied:

It was noted in the course of routine monitoring of mail order advertisements by a Postal Inspector. As is typical of false representation cases involving medical regimens allegedly capable of achieving long term medical results, no customer complaints were received. Rather, our belief that the book was falsely advertised derived from expert evaluation that this advertising claim was false.

Expert evaluation. The expert who was called in to verify the legitimacy of this admittedly unorthodox and nonestablishment regimen was a representative of one of our unabashedly orthodox medical establishments.

And no customer complaints were received. The reason for this, according to the Postal Service, is that too many scam artists vanish before Postal authorities can reach them in the first place. Having to wait for complaints enables some of the worst offenders to move on unscathed. This is a very real problem and one which needs to be addressed. But, with this legislation, it would be a little like stopping a skyjacker by shooting down the plane.

Moreover, I hasten to add, the fear among unorthodox practitioners is not limited to what some might refer to as off-the-wall crackpots. One of them is the Gerson Institute of San Diego, which has built a reputation around finding cures for incurable diseases according to a nutrition-based therapy. Dr. Max Gerson in fact—some 36 years ago—was called to appear before then Senator CLAUDE PEPPER'S subcommittee at which he presented five incurable cancer patients who had been cured by the Gerson therapy. Nobel prizewinner Dr. Albert Schweitzer hailed Gerson as "one of the most eminent geniuses in medical history." Well, this is the same Gerson Institute which is opposed to H.R. 7044 because of the threat it poses to their medical practice.

If medical science and informed opinion cannot definitely distinguish among accepted, valid, unproven, or quack practices, how on earth can the Postal Service?

Furthermore, in a Postal Service response to one of my inquiries, it is declared that:

HR 7044 and USC Section 3005 (false representation) are not concerned with "fraud." The objective of the fraud statute (18 USC 1341) is to punish persons who intentionally use the mails to defraud. Section 3005 and HR 7044 are concerned with the avoidance of consumer losses resulting from use of the mails to obtain money through misrepresentation.

Mail fraud legislation is already on the books. If there are shortcomings—and there are, given the original reason for this legislation in the first place—then it is the fraud statute which ought to be strengthened. H.R. 7044, therefore, is not necessary from that standpoint.

But what, then, is the implication of "use of the mails to obtain money through misrepresentation?" If it is not fraud they are after, and if there is no need to prove intent to defraud, the implications are indeed ominous. It need not be medically related. It could be religious. Or political. Can you imagine the consequences if, under this legislation, a campaign mails a fundraising letter which states the candidate's intention to balance the budget but is followed, upon election, by his voting to increase both spending and taxes?

Oh, of course, political expressions, free speech, and religion are all guaranteed by the Constitution. We cannot be denied them. But what about ideas? Are they not an integral part of those expressions? But if I happen to believe that a certain diet and lifestyle will prolong life by improving health, who is the Postal Service to tell me I am misinformed?

Intent to defraud must be a prelude to actions undertaken pursuant to any postal inspection bill. But the Postal Service has denied that fraud is the chief concern. H.R. 7044 never even mentions fraud. Instead, we find terms such as "misleading, not materially false, false representations"—all begging for accurate definitions—and all to be defined by the Postal Service. This is not protecting the consumer. It is a prelude to censorship.

H.R. 7044 would amend 39 USC 3005a to read:

(a) Whenever the Postmaster General or his designee has reason to believe that any person may be in possession, custody, or control of any documentary materials relevant to the investigation of an alleged violation of section 305 of this title, he may issue in writing, and cause to be served upon such person, a civil investigative demand requiring such person to produce such material for examination.

Any person. Not just the purveyor of whatever it is the Postal Service wants confiscated, but anybody who has possession of it. And that is unreasonable search and seizure.

As Mr. Shattuck noted in his subcommittee testimony:

The target of a federal administration search is generally entitled to full Fourth Amendment protection. Persons who engage in mail transactions do not relinquish their legitimate expectation of privacy as to the sanctity of their personal and business belongings.

In criminal investigations of fraud, a search warrant must be obtained—unless there is a certified emergency—before records are confiscated. Under this bill, the Postal Service, in a civil, not criminal, investigation without fraud, can confiscate records. This, I believe, is an unconstitutional abuse of authority.

It is not often we find such normally juxtaposed organizations such as the ACLU and Moral Majority espousing the same cause. But they are both alarmed at the implications if H.R. 7044 is passed. Obviously, this is not an ideological battle. And it certainly is not one of indifference to the plight of elderly victims of mail fraud. But, as I stated at the outset, the intent of the bill, and its content are two different things.

Perhaps most ominously, the appended "hit list" of 149 publications contain those which are routinely monitored for false representations by Postal Inspectors at 17 divisional headquarters. The Postal Service is quick to point out that these publications are not themselves scrutinized for attack, but rather their advertisements. I would merely observe that once the advertisers are out of business, the publications are not far behind.

The list is certainly varied if not exclusive. I am confident that there are any number of items which some of us would not mind seeing put out of business. But that is for the public to decide, not the post office.

To qualify for the list, according to the Postal Service, there must be considerable mail-order ad lineage. Many of the publications do, in fact, contain large amounts of advertising, some largely mail-order oriented. But not all. I perused one of these magazines, Paraplegia News, which is published by the Paralyzed Veterans of America. Why on earth, I thought, are they of all people included on a hit list? Advertisements? In the October issue, there were 96 advertisements, only 18 of which solicited any money—18.75 percent. That is supposed to be grounds for monitoring? Now I am sure that the LA Times, the Washington Post, or the New York Times each has a thousand times greater volume of advertising. The December 5, LA Times, in fact, contains 68 full pages of advertisements. Yet they are not on the list. Nor should they be.

When contacted by my office, the question was asked if there was any reason why a magazine published by and for paralyzed veterans could conceivably be on anybody's hit list. There was not the slightest hesitation in responding. Sure there is a reason. The Paraplegic Veterans of America have two lawsuits pending against the Postal Service, charging the USPS with not proceeding on a timely enough basis to install wheelchair ramps at their facilities.

Whatever the merits of other organizations or their publications which are on the list, the inescapable fact is that, under this bill, the Postal Service will have power they ought not to have.

On May 10, 1967, the present chairman, the gentleman from Michigan, Mr. FORD, remarked on a similar bill:

I generally am of the view that any enactment of legislation that restricts the freedom to act on the part of individuals by a grant of power to the Government should only be granted when the end sought to be attained is most justifiable, and then the

power so granted should be carefully circumscribed by legislative controls to assure that abuses in the exercise of that power by Government officials will not occur.

The truth of that statement stands out as clearly and as indisputably now as it did 15 years ago.

In addition, if the Postal Service were truly concerned with preventing ripoff schemes and not with censorship of ideas, one would think they would excuse nonprofit, charitable, religious, and educational organizations which qualify for 501(c) tax-exempt status according to Internal Revenue Service regulations. I even offered such an amendment in committee. I feel that these organizations—the ones most threatened by a postal clampdown on mail delivery—already pass more stringent scrutiny of their operations by virtue of having to pass muster before the IRS. Alas, this did not come to pass.

The evidence is compelling. Despite the need for corrective action to combat mail fraud and despite all protestations to the contrary, H.R. 7044 is an open invitation to a constitutional nightmare. My colleague, Mr. PEPPER, had good intentions when he drafted the bill. The chairman of the Post Office and Civil Service Committee, Mr. FORD, shepherded the bill through committee fairly and honorably. And Postal officials have been more than willing to be helpful and informative. One person in particular, Mr. George C. Davis, Assistant General Counsel, Consumer Protection Division, has consistently and conscientiously responded to my many inquiries. We quite obviously have a difference of opinion on the bill's impact, but Mr. Davis has cooperated in providing information whenever I have requested any. I thank him.

Unfortunately, honorable intentions and sincere cooperation do not necessarily result in good legislation. This bill is bad. It attacks our liberties through blatant and real invasion of privacy and the sinister specter of censorship. I urge its demise. The Postal Service ought to deliver mail, not read it.

TRIBUTE TO JAMES M. HAWLEY III

HON. GREGORY W. CARMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. CARMAN. Mr. Speaker, I wish to give special commendation to Mr. James M. Hawley III, an exceptional member of the American Embassy in New Delhi, India. Mr. Hawley recently assisted me during a special factfinding mission on behalf of the U.S. House of Representatives Banking Committee to promote international trade.

I was very impressed by the organization of the American Embassy in India. Through Mr. Hawley's efforts my meetings with trade officials in the public and private sectors in New Delhi were successful.

Sharing with you a little of Mr. James M. Hawley's history is my pleasure. Mr. Hawley was born in 1937 in Wheeling, W. Va. He holds a degree from Pennsylvania State University and has served in the U.S. Army. Mr. Hawley has been an economic officer in Afghanistan and in Sri Lanka and presently holds the post of First Secretary in the Economic Section of the American Embassy in New Delhi.

Mr. Hawley's exceptional efforts bring credit to himself, the American Embassy in New Delhi, and to the United States. We are truly fortunate to have Mr. James M. Hawley as a member of the U.S. Foreign Service.●

MR. PEPPER LAUDS NCSC

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. PEPPER. Mr. Speaker, I wish to bring to the attention of my colleagues an article from a recent issue of Fortune and—more importantly—a letter to the editor of that magazine from the subject of the article, the National Council of Senior Citizens. I also wish to take this opportunity to commend the council for its vigorous and continuing support of efforts to assist America's elderly, including social security, the senior jobs program, and programs to assure adequate and healthful housing for the aged. All of these programs have considerable bipartisan support in the Congress, and the council merits the gratitude of all of us who are concerned with assuring older Americans a life of dignity and respect.

[From Fortune, Dec. 13, 1982]

KEEPING UP

(By Daniel Seligman)

THE SENIOR CITIZENS SCORE AGAIN, FRASER'S FOLLIES * * * SENIORITY, IT'S WONDERFUL

For quite a few years now, your correspondent has been just barely making it from one payday to the next, and yet he has hardly ever whimpered aloud and never once thought to ask for federal funding. He thereby offers a striking contrast to the National Council of Senior Citizens (NCSC), an organization of professional complainers that gets funded regularly by the U.S. Department of Labor and then uses its pumped-up influence to lobby for budget-busting social programs. Friends, life if not fair.

We must confess to not having known about this deal the NCSC has going with the government until apprised of it by certain reactionary friends over at the Conservative Caucus Inc. On stationery bearing a "Defund the Left" imprint, the reactionaries called our attention to an incredible-seeming fact—that even today, under the Reagan Administration, the federal government continues to provide financial support for some lib-lab advocacy organizations, which then turn around and support causes that are anathema to Ron. To be sure, the various laws authorizing this support have a lot of friends in Congress, so the Reaganites' views about ladling out the loot are not necessarily controlling. In September, the Administration tried to cut the program under which the NCSC is funded, but the cutback efforts were thwarted by a Congress acting scared, as usual, of the old folks. In this case, the relevant legislation is Title V of the Older Americans Act, under which Great Society masterpiece the council is getting about $35 million to run a program providing jobs for the elderly. In principle, none of this money can be used for lobbying or other forms of advocacy, but experience tells us that few things are as fungible as green money.

On a rough estimate, we would say that the National Council of Senior Citizens is responsible for about 42 percent of what's wrong with this country. Pawing over the clips, we could see instantly that the council has been out front on a sizable number of the entitlement programs that every respectable economist now yearns to cut. Here is a 1981 clip reporting on a mass meeting of oldsters in New York City that was addressed by the council's executive director, who was complaining about Ron's wish to cut some $40 billion from 83 major programs. Jacob Clayman, president of the council, had a highly counterfactual letter in the New York Times recently arguing that enormous prospective deficits in the Social Security system are a myth and that there is accordingly no reason to contemplate legislation adjusting anybody's benefit levels. The council has supported subsidized housing for the elderly. Also subsidized heating. It has opposed any efforts to tinker with those ridiculously expensive federal regulations requiring all sorts of special reconstruction of public facilities to make them more accessible to the handicapped. We cannot prove this but nevertheless take it for granted that the legislators who recently gave us tax withholding on interest and dividend payments were being leaned on by the council when they put in the part about an exemption for the elderly. Why shouldn't the elderly suffer like everybody else on the withholding front? You could argue, in fact, that they should have extra withholding because (according to a 1979 report of the General Accounting Office) they are disproportionately represented among Americans who are delinquent in filing tax returns. Why, it's enough to make one whimper.

NATIONAL COUNCIL OF SENIOR CITIZENS,
Washington, D.C., December 6, 1982.

FORTUNE,
Time & Life Building, Rockefeller Center, New York, N.Y.

DEAR EDITOR: Re "The Senior Citizens Score Again. . . ." (December 13) the National Council of Senior Citizens (NCSC) pleads guilty to the charges that we help "old folks" by supporting "subsidized housing" and "subsidized heating," by opposing efforts to tinker with reconstruction of public facilities "to make them more accessible to the handicapped," and by running a program "providing jobs for the elderly." Yes, we do all these things deliberately and will continue to do so at every opportunity.

Writer Daniel Seligman charges that these actions make the National Council of Senior Citizens "responsible for about 42 percent of what's wrong with this country." We strongly disagree with his premise that helping to improve the quality of life for America's elderly is "wrong." If that's a crime, we're guilty!

We can only regret that Mr. Seligman and his Research Associate Andrew Kupfer chose to consult "certain reactionary friends over at the Conservative Caucus Inc." in lieu of doing some real research, particularly with regard to the statements on Title V, the Senior Community Service Employment Program. If they had, they would have learned that NCSC is only one of several national sponsors of this program, which provides 54,200 low-income seniors with part-time jobs.

The article also fails to note that the senior jobs program is one of the most successful of all government programs and enjoys wide-spread bi-partisan support on Capitol Hill. In fact, it was support for the jobs program that brought about the veto override last fall by both the Democratic-controlled House and the Republican-controlled Senate.

We do, however, agree with the assertion that life isn't fair. It certainly isn't fair to the poor, the elderly, or the handicapped. But, the National Council of Senior Citizens is doing everything it can to change the situation.

Sincerely,

WILLIAM R. HUTTON,
Executive Director.●

THE 300TH ANNIVERSARY OF THE ASHBROOK FAMILY

HON. JEAN S. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mrs. ASHBROOK. Mr. Speaker, today December 9, 1982, marks the 300th anniversary of the arrival of the Ashbrook family on the continent of North America.

On December 9, 1682, the family's first American, John Ashbrook, landed in Pennsylvania, having sailed from Belfast, Ireland, on the good ship *Antelope.*

Today the descendents of John Ashbrook are observing the tricentennial of his arrival with solemn thanks for the bounty of the land to which he came and a firm resolve to cherish and defend the freedom they have found here.●

MAYOR JACK EVANS—DALLAS

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. COLLINS of Texas. Mr. Speaker, my home city of Dallas has been fortunate over the years to be blessed with exceptionally fine civic leaders. We have relatively low unemployment, a high standard of living, and excellent cultural, sports, education, and business resources.

Mayor Jack Evans, Dallas' leader today, continues a fine tradition of great leadership that continues to make Dallas grow, prosper, and build for the future.

Jack W. Evans began his business career at the age of 14 as a stock clerk and later as a butcher in the meat department in a small grocery store operated by W. R. "Uncle Bob" Evans. He entered business in 1947 after serving 3½ years in the U.S. Air Force as an instrument-flying instructor. With a foundation in food retailing, it was natural for Jack to enter the grocery business. He opened 10 Evans Food Marts, and later merged with Wyatt Food Stores. The Kroger Co. acquired Wyatt in 1958. Jack resigned from Kroger in 1966 to join Cullum Cos., Inc. Evans was elected president and chief operating officer of Cullum Cos.,

Inc., in 1977, the position he currently holds.

Jack Evans is an achiever as mayor of Dallas. Under Evans' stewardship, Dallas voters approved a $247 million bond-financed capitol improvement program last August for Dallas.

Mayor Evans initiated the Dallas 2000 project, a project in which citizens can offer solutions to problems facing the city in the areas of housing, transportation, neighborhood quality, and development.

Jack seeks to serve the needs of all the people from Dallas, including those with handicaps. Under his direction, the mayor's committee on employment of the handicapped was formed in May 1982 to fill the need for a citywide volunteer organization that will increase public awareness of the needs of persons with disabilities.

Toward the goal of increasing the city's stature as a place of learning and the performing arts, Mayor Evans led the fight for approval of $25 million in bond funds in 1978, the procurement of a $5 million Federal grant, and the donation of $12 million in gifts so that the central library could be dedicated in April of this year.

After his successful work on last August's bond package, Mayor Evans announced the donation by Borden, Inc., of 25,000 square feet of land to be used on the site for Dallas Symphony Orchestra's long-awaited concert hall.

In conjunction with the State of Texas Sesquicentennial Commission, the mayor appointed Mr. William Seay to chair the Greater Dallas Sesquicentennial Committee in honor of this 1986 celebration. Plans are underway for the celebration to be at the Dallas Fair Park.

Under Mayor Evans' direction, Billy Prince became the new Dallas police chief and was selected after an extensive nationwide search.

Reacting to the unusually high increase in residential burglary offenses, Mayor Evans took steps in November 1981, in cooperation with the police department, to appoint a burglary task force. Offenses in those selected areas declined 31.7 percent in 14 days after the deployment of the task force.

Jack Evans gives unselfishly of his time and energies to civic and community organizations. He is past president of the Richardson School Board, member and past president of the Salesmanship Club of Dallas, member of the Dallas Citizen's Council, president of United Way of Metropolitan Dallas, and is on the Board of Directors of the Greater Dallas Community Council and Goals for Dallas. He is chairman of the Dallas Better Business Bureau and vice chairman and treasurer of the Dallas Children's Medical Center. Jack is a member of the St. Paul Hospital Advisory Board, the Foundation Board for the SMU School of Business Administration, and the Foundation Board for the Dallas County Community College District.

Jack Evans is a great mayor for Dallas. We can look forward to years of prosperity, development, and cultural advancement under his leadership. I nominate Jack Evans as the best mayor in America.●

AIRCRAFT SALES TO JORDAN

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Ms. MIKULSKI. Mr. Speaker, we are again hearing reports that the Reagan administration intends to sell sophisticated aircraft to Jordan. I am opposed to that sale. Jordan has refused time and again to join the Camp David peace process or to open a dialog with Israel. I will not support arms sales to any country that refuses to talk peace in the Middle East and refuses to recognize Israel's right to exist.

We have a responsibility to insure the existence of our democratic ally in the Middle East. That democracy cannot exist by simply establishing borders—there is no such thing as a defensible border—especially when it touches upon a hostile nation.

We have a responsibility to do all that we can to insure that the process of the Camp David accords goes forward. Jordan has rejected those accords. The sale of fighter planes to such a country makes hollow our commitment to the peace process.

Our role in the Middle East is one of negotiator. But that does not mean that we must abandon our long-standing and true friends, or that we must passively allow barriers to that peace to remain intact. We must continue to supply aid to Israel as evidence of our commitment to our democratic ally, the State of Israel. Years of military expenditures have drained the Israeli economy, expenditures made to protect borders that Jordan freely admits it will not honor.

This is the time to decide as a nation if we are peacemakers or arms merchants. It is time for us to decide if we are a nation of principle, and if we have the strength to live by our principles.

I urge my colleagues to reject immediately and emphatically any attempt to sell weapons to Jordan.●

GOING ON RECORD TO STOP COVERT ACTION AGAINST NICARAGUA

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. BARNES. Mr. Speaker, there are many times when I have been proud to be a Member of this body and yesterday was one of them. When the House voted 411 to 0 to prohibit funding of efforts to overthrow the Government of Nicaragua or provoke a military exchange between Nicaragua and Honduras, all Americans had reason to be proud. The House of Representatives made clear that the United States should not be in the business of overthrowing governments or starting wars. I know that all Members recognize that this type of legislative action has been rare. It has been 6 years since the House has acted to specifically prohibit a covert action. In this instance, I am convinced that we needed to act. As chairman of the Subcommittee on Inter-American Affairs, I have watched the conflict along the Nicaraguan-Honduran border escalate. I have become convinced that the United States is acting in a fashion that damages our long-term national interest and expands the conflict, rather than helps to resolve it. In adopting this amendment, the House has spoken in a unified voice that cannot be misinterpreted or taken lightly. Whatever the United States has been doing to destabilize the Government of Nicaragua, it must stop.

I hope that my colleagues will also join me in expressing our appreciation to the gentleman from Massachusetts, Mr. BOLAND, and the gentleman from Iowa, Mr. HARKIN, for their leadership on this issue. We have taken the first step toward correcting the course of American foreign policy in Central America, and hopefully the Senate will join us. If there is any doubt about the danger and urgency of swift action, one has only to read the article on the situation which was published today by the New York Times. It quotes the top commander of the exile forces now attacking Nicaragua as saying that the aims and operations of his troops were not subject to control by the United States. So that my colleagues will not miss this interesting article, I request that it be included in the RECORD.

The article follows:

[From the New York Times, Dec. 9, 1982]

NICARAGUAN EXILE LIMITS ROLE OF UNITED STATES—ANTI-SANDINIST LEADER ASSERTS TROOPS ARE NOT SUBJECT TO WASHINGTON'S CONTROL

(By Philip Taubman)

MIAMI, December 8.—The top commander of exile forces seeking to overthrow the left-

ist Government in Nicaragua said today that the aims and operations of his troops were not subject to control by the United States.

Enrique Bermúdez, a former colonel in the Nicaraguan National Guard who now commands 3,000 to 6,000 irregular troops in Honduras and Nicaragua, said in an interview: "We would never accept the role of American mercenary. It is not acceptable to us to carry out missions to interdict Cuban and Russian supply lines to El Salvador. We are Nicaraguans and our objective is to overthrow the Communists and install a democratic government in our country."

American intelligence officials have said Mr. Bermúdez' forces, operating under the banner of the Nicaraguan Democratic Front, a coalition of anti-Sandinist exile groups, are the main American-supported paramilitary organization in the region.

A year ago, according to national security officials, President Reagan approved plans for covert operations by the Central Intelligence Agency in Central America that called for the financing of paramilitary groups that would interdict the flow of arms to guerrilla forces in El Salvador. Administration officials said at the time that the Soviet Union and Cuba, with help from Nicaragua, were shipping weapons and ammunition to El Salvador.

C.I.A ACTIVITIES STEPPED UP

The covert activities have since become the most ambitious paramilitary and political action operation mounted by the C.I.A. in nearly a decade, according to intelligence officials.

Mr. Bermúdez said he could not discuss the sources of assistance to his forces. When asked whether or not the C.I.A. had provided help, he declined to comment.

"We will accept any help to establish democracy in Nicaragua," he said.

"If we can help our friends interfere with supply lines to El Salvador while we are fighting to overthrow the Sandinists, we will do it," he added. "But we will not accept assistance simply to do somebody else's business and will not permit outsiders to set our goals."

In recent days, leaders of the anti-Sandinist coalition have lifted some of the secrecy surrounding their activities in an effort to broaden their base of support. At a press conference on Tuesday, they said they did not support the policies of Gen. Anastasio Somoza Debayle, the Nicaraguan leader who was ousted in 1979.

SOME REFUSE TO JOIN

Some exile leaders, most prominently Edén Pastora Gómez, a former Sandinist leader who left Nicaragua last year, have refused to join the front because of its identification with the national guard.

Mr. Bermúdez contended today that he was not an ardent Somoza supporter. "I accept responsibility for serving in the national guard," he said. "The only regret I have is that there wasn't enough leadership among the senior officers to prevent the abuses and repression that occurred."

From 1976 to 1979, when the revolution was building in Nicaragua, Mr. Bermúdez served as Nicaragua's defense attaché in Washington. In 1975 he was a student at the Inter-America Defense College in Washington.

After the Sandinists seized power in 1979, Mr. Bermúdez moved to Guatemala where he began organizing paramilitary forces. "There were many young national guard officers who were trapped in the struggle before Somoza fell," he said. "They didn't like Somoza but they hated the Sandinists. I thought they could play a role in the future of Nicaragua if they fought to bring democracy to the country."

Mr. Bermúdez said that if the anti-Sandinist forces were successful, he would not seek a leadership role in a new government. "The military will play a secondary role," he said. Other leaders of the coalition, while saying they take Mr. Bermúdez at his word, acknowledged there was a risk he might one day try to take power.

GUERRILLA TACTICS USED

Mr. Bermúdez, who is 49 years old, joined the national guard in 1952 after graduating from the Nicaraguan Military Academy. He became a colonel in 1977, he said.

He said that the paramilitary troops, which are now based primarily in Honduras and Nicaragua, were using "guerrilla tactics" in their campaign against the Sandinist. "When I studied counterinsurgency strategy in the United States, I also learned about insurgency," he said.

Mr. Bermúdez said that the paramilitary forces were being used in attacks against economic and industrial targets to try to galvanize opposition to the Government.

He described economic and social conditions inside Nicaragua as "ripe" for a popular uprising against the Government. "We cannot win in set battles with Government troops," he said, "so we are counting on a popular uprising."

Mr. Bermúdez, like other coalition leaders, said he was reluctant to talk while in the United States about military operations because American law, specifically the Neutrality Act, prohibits privately organized efforts to overthrow foreign governments.

Coalition leaders, who have used southern Florida as a base of operations, said their lawyers advised them not to discuss military matters.●

DELTA EMPLOYEES: EXAMPLE FOR ALL

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. GINGRICH. Mr. Speaker, once again, Delta Air Lines employees have set an example for all of us. They wanted to thank their company for years of consistent good treatment and consideration. They chose a creative way to do it: Buying Delta a Boeing 767.

As Lewis Grizzard describes it in his Atlanta Constitution column, Delta employees have set up project 767. The program allows them to donate a certain percentage of their paycheck toward the purchase of a 767. The plane costs $30 million. That averages out to an $810 donation per employee.

Through smart management, excellent service, and hard work, Delta and its employees are surviving and prospering in these difficult times. Those characteristics alone are a formula for success. But project 767 teaches another important lesson to employers. As Lewis Grizzard puts it, "Treat your employees right and they will ask not what their company can do for them, but what they can do for their company."

The example Delta employees have set is not going unnoticed. Workers at the Ford plant in Hapeville, Ga., have now set up a Delta Committee to see how they can say thanks and help their company at the same time.

In these tough economic times, employees/employer relations are often strained. It is reassuring to see the mutual respect and gratitude Delta and its employees have for each other. I applaud and admire their example, and that is why I am sharing Mr. Grizzard's column with my colleagues:

[From the Atlanta Constitution, Oct. 8, 1982]

ALLOW ME TO TELL YOU A STORY THAT'LL WARM REAGAN'S COCKLES

(By Lewis Grizzard)

The story has been around for a while. It even made the New York Times and the Wall Street Journal. It had reason to.

First, a Delta airlines pilot retires and pays nearly $8,000 to take out an ad in the newspaper thanking the company for allowing him the opportunity to work for it.

A lot of people probably would like to take out an ad and give a message to their companies, but how many of the ads would read, "Take This Job and Shove It?"

Then, a group of Delta flight attendants announce it is their intention to raise $30 million from their fellow employees to buy Delta one of those new fuel-saving 767s. The tab comes to $810 per employee.

In these rotten times for the airline industry, Delta recently surprised its employees with a raise, and it has not furloughed any employees as other airlines have been forced to do.

"We wanted to say thanks," said one of the Delta fund-raisers, "so we decided to buy an airplane."

NOT EVERYBODY'S THRILLED

I don't want this to sound like a commercial for Delta. If I had a choice, I wouldn't fly anybody's airline. I'd take the train.

But I've spent the last couple of weeks flying around the country for one reason or the other and because I live in Atlanta and because Delta airlines employees tend to smile a lot, most of the flights were on Delta.

I talked to a number of their employees about how they feel about the Atlanta-based airline, how they feel about forking over 810 big ones to buy the company a plane.

Not everbody thinks it's such a terrific idea, of course.

"I'd rather use the money to pay off my VISA bill," a flight attendant told me one morning somewhere between Amarillo and Dallas.

"I think it's a big joke," said another attendant.

But then there was the man checking baggage in New Orleans.

"Every time I've asked Delta for something," he said, "they've come through. I don't mind giving them a little something back."

DOING THINGS THE OLD WAY

I sat next to a 25-year Delta mechanic on his way home to West Palm Beach. He was ready to do his part for the new plane, too.

"I still remember Mr. C. E. Woolman, who started this company," he said. "He'd walk out on the flight line in his $200 suit and climb up on the dirty table and ask us how things were going. He called everbody 'son,' and he'd listen to what we had to say.

"That hasn't changed. If something is bothering me now, I just call up Dave Garret, the president, and ask to see him. He says, 'Come on by any time.' That makes you feel good."

Delta flies the same type of airplanes as the other major airlines. It flies over the same routes as many other major airlines. Yet it is healthy and growing when others are sick and, in many cases, dead or dying.

That's because it has discovered a long-forgotten secret: Treat your employees right and they will ask not what their company can do for them, but what they can do for their company.

The great minds of our nation search for ways to cure our economic ills, to lift our failing production, to "get this country working again," in the words of our president.

They need to search no further than Delta.●

TRIBUTE TO JOAN M. PLAISTED

HON. GREGORY W. CARMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. CARMAN. Mr. Speaker, I wish to give special commendation to Ms. Joan M. Plaisted, an exceptional member of the American Consulate in Hong Kong. Ms. Plaisted recently assisted me during a special factfinding mission on behalf of the U.S. House of Representatives Banking Committee to promote international trade.

I was very impressed by the organization of the American Consulate in Hong Kong. Through Ms. Plaisted's efforts my meetings with trade officials in the public and private sectors in Hong Kong were successful.

Sharing with you a little of Ms. Plaisted's history is my pleasure. Ms. Plaisted was born on August 29, 1945, in Minnesota. She holds a degree from the American University and has studied at the University of Grenoble in France. Ms. Plaisted has served as an international economist for the Organization for Economic Cooperation and Development and at the U.S. Department of Commerce and presently holds the post of Deputy Chief of the Economic Section of the American Consulate in Hong Kong.

Ms. Plaisted's exceptional efforts bring credit to herself, the American Consulate in Hong Kong, and to the United States. We are truly fortunate to have Ms. Joan M. Plaisted as a member of the U.S. Foreign Service.●

JAPANESE TRADE BARRIERS

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. DINGELL. Mr. Speaker, the House will shortly consider, H.R. 5133, the Fair Practices in Automotive Products Act. The purpose of that legislation is not protectionism, nor is it intended as a tool to open up other countries' barriers to U.S. products. Rather, its purpose is to encourage foreign automakers to manufacture their vehicles in the United States with American labor and to utilize more American-built parts. It is also aimed at discouraging outsourcing by U.S. domestic automakers. At the same time, I believe that this needed legislation will help to convince other nations that we mean business and that they must open their economy to U.S. goods, services, and investments.

The latter has already begun ever so slowly. I noted, for example, that a December 8, 1982, Washington Post news story (page D-10) indicates that Japan's new Prime Minister, Mr. Yasuhiro Nakasone, has reportedly ordered his Cabinet to work out a new set of steps to reduce Japan's trade barriers and open its markets to American goods before he comes here next month for talks with the President. That is a sign, an important one, but it is only a preliminary one. Moreover, it may be aimed more at trying to discourage passage in Congress of H.R. 5133 than any real effort to remove some formidable trade barrier.

On November 10, 1982, the Deputy U.S. Trade Representative, Mr. David R. MacDonald, submitted a report to the chairman of the Subcommittee on Trade of the Ways and Means Committee entitled, "Japanese Barriers to U.S. Trade and Recent Japanese Trade Initiatives."

The report states:

Although the Japanese market in 1982 is substantially more open to foreign goods, services, and investment than it was only a few years ago, barriers to imported goods, services, and foreign investment still remain. Needless to say, Japan is not unique in maintaining barriers to foreign goods, services, and investment in its economy. All countries, including the United States, maintain certain barriers to trade and investment. Nor are all the barriers maintained by Japan inconsistent with her international obligations. However, a widespread perception persists among Japan's trading partners, including the United States, the European Community, and others, and not incorrectly, that the Japanese market remains relatively less open to foreign suppliers when compared to access for Japanese goods and services in their markets. This perception has resulted in increasing friction between Japan and her trading partners in recent years as the volume of Japanese exports and their percentage of world trade has grown considerably.

The following are some illustrations from this 75-page report and other sources of instances of barriers, both direct and indirect, to U.S. exports to Japan, as well as Japan unfair practices regarding imports into the United States.

TARIFFS

The Japanese still maintain onerous tariffs on U.S. goods imported into Japan. These tariffs make U.S. goods overly expensive and restrict the market even where the U.S. product is much better than the Japanese equivalent.

Even with the administration's much publicized May 28 package of tariff reductions, Ambassador David MacDonald reported to a congressional committee on September 14, 1982, that significant tariff reductions were needed on: Wood and wood products; paper and paper products; unwrought magnesium; refined copper; beef; citrus; egg products; chocolate confectionery; feather and down bedding; harvesting equipment; tobacco product; leather and fur skins; computers and computer parts; cash registers; photographic enlargers; and photograph files.

While there might be some justification for some tariffs on some of these goods, it should not be as high. Also, it is hard to believe that the Japanese cannot fairly compete in photographic goods.

QUOTAS THAT VIOLATE THE GATT

The November 10, 1982, report by the U.S. Trade Representative indicated that Japan currently maintains quotas on 27 items which the United States believes violate the tariff provisions of the GATT. These include:

Leather.—

Beef.—In addition to a 25-percent Japanese tariff on imported beef, the use of a quota has the effect of raising the price of beef to over $12 per pound.

Citrus.—Japan uses general and seasonal quotas to exclude U.S. imports of citrus. Most quota allocations are to about 95 Japanese trading firms. In addition, seasonally adjusted tariffs range from 20 to 40 percent, and the tariff on juices range from 22.5 to 30 percent.

Fruits and Vegetables.—Quotas limit imports of U.S. grape and apple juice; tomato juice, ketchup, and sauce; as well as other products available for U.S. export. These quotas are sometimes announced on an emergency basis, so U.S. exporters cannot predict or plan for them.

The May 28 reductions in quotas on four items (herring, prepared and preserved pork, high-test molasses and canned pineapples) are not of major interest to the United States.

RESTRICTIVE STANDARDS, TESTING, LABELING, AND CERTIFICATION REQUIREMENTS

Japan's restrictive standards and approval procedures exclude foreign products from the market because of the prohibitive cost of establishing at the border that the product meets the requirements or delaying their entry, often long enough to allow Japanese manufacturers to introduce a competitive product.

Foreign companies are excluded from the Japanese voluntary standards-writing process operated through the Japanese Industrial Standards Committee so they often learn about prospective new or revised standards well after their Japanese competitors.

Japanese standards are often written in terms of design criteria rather than performance specifications. As a result an American-made product may not be acceptable because of minor differences in design, even though these variations do not affect the product's compliance with the performance objective of the standards.

Japan refuses to accept test data developed outside Japan for many products, including pharmaceuticals and medical equipment. Testing is very expensive, as complete samples must be provide. Backlogs in Japan for starting testing on electrical and medical products, for example, are up to 5 to 6 months. The testing process itself can take another 3 to 4 months, and delays of 1 to 2 years have been cited in cases of medical equipment products. These difficulties would be resolved if inspectors from Japan visited and inspected the manufacturing site, or accepted U.S. product approval, but they will not do so.

According to the U.S. Trade Representative other standards barriers apply to: Cherries, sake, dried fruit, concentrated fruit juice, processed foods, frozen bull semen, pharmaceuticals, cosmetics, autos, sporting goods, plywood, and other chemical substances.

Examples of specific product standard issues from the November 10 report:

PLYWOOD

The Japanese agricultural standard (JAS) on structural plywood, written for domestic makers that use a hardwood to make plywood, specifies how the plywood should be put together—for example, how the plies should be assembled and bonded—rather than how the plywood should perform in use. The lowest grade plywood most commonly used for construction in the United States does not meet the standard, partly because it is made from softwood and partly because of U.S. production methods. For example, if the knothole in the wooden panels exceeds the limit in the Japanese standard, the panel is rejected despite the fact that U.S. technical data demonstrate that the U.S. product equals or exceeds the performance characteristics of the Japanese-produced product.

The U.S. plywood products industry has pushed for 8 years for a new Japanese standard on structural plywood; 3 years ago Japan agreed with the United States to develop a mutually acceptable performance standard for structural plywood by 1980; 2 years after the deadline has passed, we continue to hear about complex negotiations on knothole size and the white speck problem, but U.S. exports still have not increased.

AUTOMOBILES

The Japanese Ministry of Transportation (MOT) has repeatedly turned down a U.S. request to recognize U.S. manufacturers' self-certification of automobiles to Japanese standards. The United States permits all auto manufacturers to self-certify compliance with U.S. regulations. The MOT still has not adopted administrative procedures to implement a May 1980 commitment to accept U.S. notaries' public affirmations of the dates of manufacture of U.S. automobiles. Dates of manufacture are necessary in Japan to determine which year's regulations tests must be performed on U.S. imported automobiles.

There has been more than a 2-year delay in resolving this standard issue, which is one of many in the automobile area.

TOBACCO PRODUCTS

The Japan Tobacco and Salt Public Corp. (JTS) is a Government monopoly. JTS is obligated to buy all domestically produced tobacco leaf—some 140,000 tons annually—at prices three times the world price. It also purchases some 70,000 tons of imported leaf. In addition, JTS strictly controls sales of imported cigarettes, cigars, and pipe tobacco, permitting them to be distributed at only 20,000 of 250,000 tobacco products shops and selling them at much higher prices than domestic cigarettes. It enforces a ceiling on advertising expenditures that makes it difficult for U.S. brands, new to the Japan market, to gain market share. In addition, Japan imposes 35-percent tariff on imported cigarettes. The effect is that imported cigarettes sell in Japan for 55 percent more than comparable Japanese brands, even though their pretariff price when entering Japan is about the same as the price of Japanese brands.

As a consequence of these tariff and nontariff barriers, the U.S. share of the Japanese cigarette market is still only slightly over 1 percent.

U.S. industry estimates of our potential share of the Japanese market in the absence of any barriers range upward from 25 to 50 percent. Since each percent of market share is roughly equal to $50 million, the potential value of increased U.S. exports in this sector is between $1.2 and $2.5 billion.●

JIM STEFAN—AN EDUCATOR'S EDUCATOR

HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. PANETTA. Mr. Speaker, it is a special pleasure for me to pay tribute to the work of a fine educator and public servant who is retiring after 30 years of service in the Monterey County Office of Education. Jim Stefan, superintendent of schools in Monterey County since 1976, will be leaving at the end of 1982, and will no doubt be sorely missed by the students, teachers, and parents of Monterey County.

Jim Stefan is a native of San Francisco. In addition to his impressive academic qualifications, he served in the merchant marine for 9 years and has taught on the elementary, high school, and college levels. He held a variety of administrative positions in the Monterey County Office of Education, including director of special education, before accepting the position of superintendent. Mr. Stefan's credentials range from school administration to psychology and audiometry, and he has served not only in a long list of education and special education groups, but also in such community organizations as the Easter Seal Society, the Salinas Optimists Club, the Monterey County Alcoholism Advisory Board, and the Salinas Chamber of Commerce.

One example may serve to illustrate the imagination and perseverance which Jim Stefan has brought to his job. The Monterey County International Studies Program began operation in September of this year. This program, under which students from five area high schools participate in advanced language and culture courses in three languages at four different sites, epitomizes the kind of innovative programing which is so desperately needed not only in the field of international studies, but in other areas of education as well. Jim Stefan's determination in the face of overwhelming financial and other obstacles serves as an inspiration to those of us in government who are committed to innovation and excellence in education and in all areas of public policy.

Mr. Speaker, it has been a privilege for me to work with Jim, particularly in this time of special challenge to local educators. I commend his competence and dedication, and wish him well in all his future endeavors.●

HAPPY 70TH

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. MURTHA. Mr. Speaker, I submit an article which I cannot embelish with any added comments:

HAPPY 70TH, MR. SPEAKER, YOU'VE ALWAYS BEEN TRUE

(By David Nyhan)

Not the least reason to marvel at Tip O'Neill is the simple fact that he hasn't made much money, when he's had vast opportunity to do so.

In 46 scandal-free years of winning elections, 30 in Congress, 6 as Speaker of the House, he's proved almost totally inept at padding his own income and salting something away on the side.

Politicians with far less potential for pelf than he, have become millionaires on the sly, but O'Neill's net worth is embarrassingly meager. He's got about what a public school teacher would have, if his kids were grown and his wife worked. Not much, but something.

His wealth is in coin of a different realm. He is much loved by those who know him. When he threw a party for his campaign workers, what was astonishing about the crowd in the old Cambridge Hotel was that so many were of his generation. The man, whose highest accolade is "Old Pal," kept the friends he began with.

When Tip got up in front of the band, singled out his Millie, and knocked out a better than passable rendition of "Apple Blossom Time," you couldn't picture any New Wave Democrats doing likewise.

O'Neill is a living political monument for a lot of reasons, but some of them are: He's kept the same wife, the same friends, the same lifestyle, the same values and the same philosophy he began with in the Thirties.

His mother died of TB before he was a year old, and he was raised by a father who was a city councilor and superintendent of sewers in Cambridge. "He taught me loyalty," O'Neill said years ago, "to live a good, ethical, honest life, that I'm truly my brother's keeper; and to always remember from where I came."

In a lifetime of political horse trading, O'Neill could be accused of many things, but none can say he forgot his roots. The Irish yield to no one when it comes to badmouthing a social climber. Those who moved out of the three-deckers risked being labeled "two-toilet Irish," "lace curtain Irish," and most spiteful of all, "cut-glass Irish."

O'Neill never went high-hat, either in lifestyle or in his politics. The hardest thing he's said of Ronald Reagan was that the President had forgotten where he'd come from, the Depression-era poverty of working-class Illinois, where most people needed a government handout to get by.

When Reagan blew into Washington, scattering demoralized Democrats like fallen leaves, the middle class was beguiled by the sonorous siren song of tax cuts. O'Neill warned it would be open season on the poor.

"People seem to hate the poor, that's the kind of thing that got us into deep trouble in the 1930s.

The O'Neill losses of 1981 have become the O'Neill victories of 1982, and the incoming Congress will line up much more behind the Speaker than the President, a fact that bodes well for the 12 million unemployed.

The right wing still hates Tip O'Neill and all he stands for. They see him as the symbol of the bloated government that forces some redistribution of wealth in this country, a process Reagan has managed to reverse.

There is not a man alive today who has done more good for more people, in trying to impose a semblance of fairness and sharing the wealth on Congress, than this man who turns 70 today.

A pillar of his party, a model to his profession, he's a testament to the best the Irish brought to this country's politics.

James Michael Curley taught him to give the crowd some words to remember. John F. Kennedy taught him that when it comes to raising dough, running for President was no different than running for alderman. And it is an old Irish legend that teaches us the central fact of democratic congressional rule today. "Where the O'Neill sits, that is the head of the table."

David Nyhan is a member of The Globe staff.●

CONGRESSMAN ROBERT MOLLOHAN

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. UDALL. Mr. Speaker, I rise today to pay tribute to a fellow Member and friend, BOB MOLLOHAN, with whom I have had the privilege of serving in the Congress during the last two decades.

The job of a Congressman, a Member of the House of Representatives, is multifaceted, and an individual who devotes himself to this body, as BOB MOLLOHAN has done, carves his own special niche.

Some are called to be experts, others leaders, and still others tireless workers. Although BOB MOLLOHAN served in each of these capacities, it was on a few visits to Parkersburg, W. Va., that I came to know and appreciate his special niche—an unflagging interest, sense of duty and service, on a very personal level, to the people he represents. To farmers, coal miners, steel workers, business people, and others, he has demonstrated his personal concern and considerable accomplishment in solving their problems. And his efforts have earned him their respect and affection.

BOB MOLLOHAN's achievements in the Congress are notable. He devoted himself to building a sound and solid national defense, ably serving on the Armed Services Committee throughout his 18 years in the House.

BOB MOLLOHAN was the author of the Emergency Medical Services Systems Act, putting into place a lifesaving plan for improved emergency health care for our Nation's communities.

As a member of the Congressional Steel Caucus and the congressional coal group, BOB MOLLOHAN worked actively to promote American industry, especially the welfare of workers.

He executed skillfully—and often without adequate thanks—his job as chairman of the House Operations Subcommittee on Office Systems, making all our jobs and our lives a little easier and more effective.

When he leaves this body, BOB MOLLOHAN will return to his friends and his family in "wild, wonderful West Virginia." Down the road, we may find him overseeing one of his farms, streamlining his own business offices for a change, and most likely traveling as a private citizen or as a former Member of the House of Representatives. I know that whatever his pursuits, he will continue to serve the democratic process with the same dedication and skill that he has exhibited in his years of service in this body.

BOB can be proud, and we are fortunate, indeed, that his son, Alan Mollohan, won election this year in West Virginia's First Congressional District. I had the pleasure of getting to know the younger Mollohan, and I know that he will carry on his father's record of service and make his own distinguished mark as a Congressman.

BOB MOLLOHAN will be missed—by his constituents and by his colleagues here—whom he has served so well. Most of all, he will be missed as a friend. I hope we will not forget those with whom he has served. We certainly shall not forget him or his accomplished service to the House of Representatives.●

U.S. POLICY TOWARD CENTRAL AMERICA: A DEMOCRATIC ALTERNATIVE

HON. GERRY E. STUDDS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. STUDDS. Mr. Speaker, on behalf of a number of my colleagues who have been actively involved in congressional oversight of our Nation's foreign affairs, I would like to announce today a proposal for a Democratic alternative to U.S. Central American policy. It is our feeling that the Reagan administration's development of U.S. relations with the Central American nations has been seriously flawed, and that the consequences of this policy are dangerous not only to U.S. interests, but to the causes of peace and democracy for which our Nation stands. For these reasons we have formulated an alternative proposal, which is a comprehensive approach to U.S. relations with the region, and which we believe will prove far more effective. In addition to

myself, Senator CRANSTON, Congressmen BARNES, SOLARZ, MCHUGH, OBEY, DIXON, HARKIN, WOLPE, BONKER, GEJDENSON, EDGAR, BONIOR, OBERSTAR, and LELAND, and Congresswoman OAKAR, have endorsed this statement. The statement follows:

CENTRAL AMERICAN POLICY: A DEMOCRATIC ALTERNATIVE

We believe that the course of U.S. foreign policy in Central America should be changed. The Reagan Administration's extreme approach is fostering not peace and democracy, but increased polarization and radicalization.

Since January 1981, brutal civil wars have intensified in El Salvador and Guatemala, the threat of war between Nicaragua and Honduras has increased partly because of U.S. actions, and moderate and democratic elements have lost influence in Nicaragua and throughout the region. Neither "quiet diplomacy" with respect to human rights nor massive doses of military aid have accomplished their intended purpose.

The ability to make a free and open choice of political allegiance is the essence of democracy, but it is becoming less and less possible to make such a choice in Central America. Those seeking to rule by coercion rather than consent reside on both extremes of the region's political spectrum. These extremes are not opponents, but rather allies; they gather strength from each other, and they must equally be opposed.

Unfortunately, the Reagan Administration has chosen a policy which lends confidence to the terrorist right; which motivates and strengthens the terrorist left; which contributes in doing so to further violence; and which has provided nothing but bitter discouragement for those genuinely committed to peace and democracy in the region.

After two years and hundreds of millions of dollars of aid, the United States is further than ever from achieving its goals in El Salvador. Although the elections last March confirmed the deep desire of the Salvadoran people for participatory democracy, the electoral initiative was too narrowly based to move El Salvador toward national reconciliation. Rather, it weakened those advocating a moderate course, and left competition for power in the hands of brutal and historically undemocratic military cliques. The Reagan Administration has failed dismally to demonstrate strength or seriousness of purpose in pushing for economic reforms and respect for human rights in El Salvador, and has explicitly opposed a dialogue without preconditions between the government and opposition groups.

The Administration's support for covert military action against Nicaragua has produced a propaganda bonanza for the radical left, an excuse for a military build-up by Managua, and a growing threat of regional war. It has also shifted the focus of world attention from Nicaragua's errors in policy to ours, and contributed to a political atmosphere inside that country within which moderate and democratic elements may not long survive.

The Administration has persisted in viewing Honduras as a convenient staging ground for regional military initiatives, rather than a fragile democracy needing insulation from the conflicts engulfing its neighbors. The result is an increasingly divided and fearful country, unable to derive internal confidence from its recent transition to civilian democratic rule.

Only the opposition of the American people, and in their behalf, the Congress, prevented the investment of U.S. arms, aid and prestige on the side of the previous Guatemalan government's war against the Indian population of that country. There are some reports of improved human rights conditions under President Rios Montt and, obviously, we hope that these reports are correct. Unfortunately, the Administration has responded to reports that serious human rights violations continue to be committed by the Guatemalan military, not by condemning the violations, but instead by attacking those issuing the reports.

Finally, the Administration, has refused to recognize the nature and source of the tensions which threaten to destroy all of Central America. It has sought to apply a simplistic economic and political world view to a region the majority of whose inhabitants view such a perspective as indifferent to their interests and irrelevant to the modern world. One of the most explosive forces on the globe today is the frustrated desire of impoverished and disenfranchised people to obtain a decent standard of living and to have a voice in determining their own destiny. No policy which fails to address these concerns will, in the long term, adequately, protect our interests or preserve our influence in Central America.

In short, because its highly ideological orientation fails to appreciate the realities of the region, the Administration is pursuing policies which increase the legitimacy and strength of armed opposition groups in El Salvador, Guatemala, and possibly in the future—Honduras. Additionally, they encourage the further evolution of Nicaraguan politics in a direction inimical to our interests, further identify the United States with forces tied closely to the discredited Somoza regime and diminish prospects for pluralism and democratic rule.

We believe that the influence and the available resources of the United States can be used to further our interests far more effectively in Central America in the future. Accordingly, we now propose an alternative U.S. foreign policy toward Central America. The goals of that policy are (a) to make a contribution to the peaceful resolution of political and military conflicts both between and within the states of the region; (b) to foster economic progress in the short term and to facilitate long-term improvement in the living conditions of the area's poor, and (c) to support and advance human rights and democratic institutions in the region.

Specifically:

1. We urge the Administration to join with Mexico and Venezuela in encouraging the prompt initiation of discussions between and among our own government and the governments of Honduras, Nicaragua and El Salvador for the purpose of ending all acts of subversion and aggression and achieving a just and lasting peace in the region.

2. We urge the Administration to lend its full support to negotiations without preconditions, aimed at resolving peacefully the internal political disputes presently existing between the populations and the governments of El Salvador and Guatemala. Additionally, we believe that an effort to reconcile Nicaraguan opposition groups, including democratic exile groups, with the government of that country through a negotiating process or other mutually acceptable means should be strongly encouraged. In each of these countries our purpose should be to facilitate the creation of an open democratic electoral process and genuine political pluralism;

3. The U.S. should cease assisting covert military activities directed at Nicaragua. Any accusations concerning Nicaragua's alleged support for subversive activities in El Salvador, Costa Rica, or Honduras, should—if private discussions fail to resolve the matter—be made public and brought promptly to the attention of the United Nations or the Organization of American States.

4. We reiterate our belief that respect for internationally recognized human rights, including the rights of indigenous peoples, should be a cornerstone of American foreign policy, both in Central America and around the globe. The foreign assistance laws of the United States are clear on this point. Security assistance may not be provided to governments—such as that currently in power in Guatemala—which are engaged in a consistent pattern of gross violations of internationally recognized human rights. Nor may military aid to El Salvador continue unless a series of legal conditions are met concerning human rights, economic reforms and investigations into the cases of murdered Americans.

5. We propose a new and expanded inter-American development program, aimed at encouraging multilateral efforts in behalf of economic and agricultural self-sufficiency, and at providing emergency aid to democratic governments such as those of Costa Rica, Honduras, and the Dominican Republic. This program will be designed to build on and improve upon the Caribbean Basin Initiative of 1982, and to strengthen the U.S. commitment to improving the quality of life of the poor majorities throughout the region. In developing this proposal, we will take into account the fact that in countries where serious political and military repression exists, no amount of economic assistance will, in itself, be sufficient to produce meaningful social development or reform.

We believe the time has come to stop the killing and start the talking in Central America. We reject the view that violence is inevitable or endemic to the region's culture. We have witnessed—and place great faith in—the courage, the persistence, and the wisdom of those in each of these countries who have been working for peace, democracy and social justice.

We believe that the present Secretary of State, George Shultz, is well equipped to understand the positive uses of diplomacy. We will be pleased to work with him to develop a policy toward Central America which accurately responds both to the views and the ideas of the American people, to the complexities of the region, and to the true interests of the United States. We pledge, also, our own continued interest and involvement in the debate over this issue, and we express our commitment to pursue these proposals vigorously, and to explore every available legislative and political option to see them prevail.●

CALIFORNIA DELEGATION

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. FUQUA. Mr. Speaker, seven Members of the delegation from California will be gone from our midst

when the 98th Congress convenes, and I would like to take the opportunity to express my appreciation to them collectively for the honored service they gave in this House.

Congressmen CLAIR W. BURGENER, DON H. CLAUSEN, ROBERT K. DORNAN, BARRY M. GOLDWATER, Jr., WAYNE R. GRISHAM, PAUL N. MCCLOSKEY, and JOHN H. ROUSSELOT, have each given much of themselves to serve their constituents, their State, and their Nation.

Though these men all represented a different party than I do, their sincere interest in their work and the quality of their product made them a significant factor in this body which they served as members of the minority party.

We will miss their active participation in our deliberations and wish each of them success in their future endeavors.●

THE IMPORTANCE OF LOCOMOTIVE ENGINEERS

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. HUBBARD. Mr. Speaker, I received an excellent letter from my good friend and constituent, Terry W. Beadles, of Fulton, Ky. Terry is the secretary-treasurer of Division 508 of the Brotherhood of Locomotive Engineers. He has taken the time to personally share his concerns as a locomotive engineer with regard to the critical jobs that are provided to the railroads by the members of his profession. I am certain that my colleagues remember the difficulties that faced the country earlier this year with the railroad strike. I would like to share Terry's letter as I am certain that the Members of Congress will be interested in his comments. The letter follows:

TERRY W. BEADLES,
Fulton, Ky., September 27, 1982.

Congressman CARROLL HUBBARD,
Rayburn House Office Building,
Washington, D.C.

DEAR CONGRESSMAN HUBBARD: In these troubled economic times, the decision to call a nation-wide strike by the Brotherhood of Locomotive Engineers was apparently misunderstood by a great majority of the American people, including the members of Congress. The failure of the national news media to make clear and concise statements as to the reasons for striking also contributed to this mis-understanding.

As I am not aware, to date, as to how you voted on the issue of calling an end to the strike, I am going on the assumption that you were one of the 17 Congressman who felt that our Government should not interfere in the freedom of bargaining by labor unions. I hope this letter may clarify some of our reasons for striking over the difference in pay and the no-strike clause.

It's obvious that the decision to strike was a last measure on the part of the Brotherhood of Locomotive Engineers. Our old contract expired as of April, 1981, yet we continued to work while the collective bargaining process took place. Until the strike was called, the great majority of us felt that the contract would be settled.

By tradition, the Engineer has always been the highest paid member of a train crew. But many people, including Congressmen, are simply not aware as to the reasons for this difference in pay, so I will attempt to explain what we do.

Engineers of the Illinois Central Gulf Railroad, of which I am one, are subjected to an intensive training program at Paducah, Ky. Included in this program are classes on proper train handling, air brakes, mechanical, electrical, and our book of operating rules. We are continually tested on all these phases and must pass required tests on each before our promotion to Locomotive Engineer. We are also placed under the auspices of promoted Engineers for a period of 6 to 18 months before our final promotion. On the other hand, a man hired as a trainman will make a few trips as a student brakeman to acquaint himself with a few basics and then is allowed to work as a full-fledged member of a train crew. Tradition aside, is there any wonder as to why we feel, as Engineers, we are entitled to be the highest paid member of a crew?

As Engineers, we are the men instructed to take extraordinary precautions during foggy or stormy weather to insure the safe movement of our train (Operating Rule 815). We are the men empowered to move many thousands of dollars worth of lading across this country, not the brakeman. It is in our hands that the human factor is involved as we move passengers across the country on Amtrak, and not the brakeman's.

Because of all the factors involved in the safe and efficient handling of a train, an Engineer cannot afford one lax moment when on duty. Decisions requiring our instant attention are constantly being made that depend upon our being well trained. As an Engineer, I have yet to see any prestige associated with my job. The word stress might better apply towards explaining my job! Each time I approach a public road crossing, the thought goes through my mind that this might be the time someone attempts to make it over the crossing before I arrive and does not succeed. I seriously doubt that a brakeman entertains such thoughts.

Congressman Hubbard, there are just a few of the reasons that we feel we should continue to be the highest paid crew member. There are many others that can be explained by people more well-versed than I. However, if in any way this letter can help any member of Congress to understand the complexities of our job, please don't hesitate to use it. There is much more involved in being an Engineer than merely blowing a whistle or ringing a bell.

Please remember that we don't want to strike, but if the issue of the difference in pay between Engineers and other crew members cannot be assuaged by 1984, it will again become a factor to be reckoned with. Next time, I hope the venerable members of Congress understand our point of view.

With every good wish for your continued success as our First District Representative, I am,

Most sincerely yours,

TERRY W. BEADLES.●

HON. HENRY REUSS

HON. JACK BRINKLEY

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 7, 1982

● Mr. BRINKLEY. Mr. Speaker, I wish to thank the gentleman from Wisconsin, Mr. ZABLOCKI, for arranging this special order on our dear friend and trusted colleague, HENRY REUSS, who is retiring at the end of this term. For 4 years my office was next door to HENRY's and I got to know him well. I soon discovered that he was a graduate of "Upatoi University," as HENRY affectionately referred to the Fort Benning Officers' Candidate School.

In 1980 I asked HENRY REUSS to return to Columbia, Ga., as principal speaker of an appreciation dinner in my behalf and while there to renew his acquaintance with his Fort Benning alma mater. HENRY accepted and the Columbus Iron Works and Convention Center roared its approval when he spoke of labor, management, and government pulling together and working together as entities with common goals and common interests.

This remarkable man from Wisconsin captured this southern stronghold when he spoke in the same breath of the historical structures in Milwaukee and the excellence of the restored iron works in which we met.

Other Members of Congress joined us that evening: BILL NICHOLS, from Alabama; BO GINN, DOUG BARNARD, NEWT GINGRICH, and DAWSON MATHIS, of Georgia. HENRY singled each of them out in his remarks and made the evening very personal and very special.

The next morning we had breakfast together at Fort Benning and the circle was complete.

As chairman of the Banking Committee, HENRY accepted my recommendation to hire an outstanding minority youth from Columbus who had come to me for assistance. As a neighbor, HENRY was a friend and helper. I shall always count it special to have served in Congress, and to have served with men like him.●

RECOMMENDATIONS ON THE AMERICAN DEFENSE EDUCATION ACT

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. KILDEE. Mr. Speaker, the House Education and Labor Subcommittee on Elementary, Secondary, and Vocational Education, of which I am a member, recently held 3 days of hearings to assess the condition of mathe-

matics and science programs in our schools. Testimony at these hearings added to our growing recognition of the fact that these programs are in serious need of attention and improvement. On November 29, the House Education and Labor Committee reported H.R. 7130, the National Engineering and Science Manpower Act, with amendments intended to address this need.

As Congress proceeds with consideration of this bill and other solutions to this problem, the advice and comments of individuals and organizations with expertise in the area of science and mathematics education must be sought. One such organization, the American Personnel and Guidance Association, has prepared an analysis of the role of guidance personnel in any legislative solution. Although directed specifically to H.R. 6674, the American Defense Education Act, it also applies to many measures now being considered in this area. I commend this analysis, which follows, to the attention of my colleagues:

AMERICAN PERSONNEL AND GUIDANCE ASSOCIATION RECOMMENDATIONS ON THE AMERICAN DEFENSE EDUCATION ACT (ADEA)

The American Personnel and Guidance Association (APGA) wishes to go on record in support of, and in recognition of, the importance of current Congressional deliberations on the American Defense Education Act. ADEA and those related bills which emphasize better mathematics and science instruction in the schools, better preparation of teachers for the instruction of mathematics and science and increased emphasis on career development of students by counselors are vital in this technological age for a strong America.

The Association is confident that the Congress will give careful attention to the need for more technicians, mathematicians, scientists and engineers during the waning days of the 97th Congress and on into the 98th Congress. Any legislation dealing with the technology question must address the central role which professional counselors play in advising students in their career development, assisting teachers and administrators in curriculum improvement and creating awareness in parents and youth about the employment needs of the business, industrial and defense establishment which utilize high technology. The counselor and strengthened guidance and counseling programs provide a structure for this to occur.

To this end, the American Personnel and Guidance Association offers the following recommendations in order to enhance the impact of ADEA legislation:

1. IN-SERVICE TRAINING OF EXISTING GUIDANCE PRACTITIONERS, SUPERVISORS AND TRAINERS

In-service training of counselors should emphasize the intermediary role counselors play in bringing together teachers, parents, students and the community. Counselors must be given a variety of opportunities to become familiar with the technological employment opportunities in business and industry and in the military as well as technology needs of these employers so as to better inform and advise students, teachers, administrators and parents. Hands on experiences, summer intitutes, exchange programs and paid internships within industrial and military settings are some possible ways of accomplishing this goal.

The emphasis throughout any in-service program should be the counselor's role in maximizing the mathematics, science, foreign language potential of all youth, especially through early intervention programs in elementary school and continuing on through high school and college. Attention should be paid to the reduction of any job bias in counselors based on personal attitudes. Also, the in-service training should further those counseling skills and techniques which are free of any stereotypes (e.g. race, sex, culture).

In-service and re-training programs for counselors and other guidance specialists should stress skill development in non-school setting work. Examples of in-service programs might include those which develop counselor skills in working with clients, in the community or industry, experiencing job obsolescence or who need re-direction of career development; those who are second careerists or returning to the work force; and those experiencing job dissatisfaction or needing advice on re-training for emerging new job clusters. This area is fertile ground for cooperative efforts between schools and industry and/or assistance from private industrial councils.

2. PRE-SERVICE TRAINING OF COUNSELORS

Encouragement and incentives must be provided to institutions of higher education, by ADEA legislation, which experiment with changes and curricular modification in the counselor education preparation programs. Internships and practicum situations which have component giving experience working in non-traditional settings (e.g., business, industry, military) must be piloted. Course work which emphasizes occupational and educational information, emerging technological and business trends should be integrated into the core curriculum preparing counselors. The creation of counselor sub-specialties for direct employment in industrial and technological settings should be encouraged legislatively. Counselors should be trained to understand emerging technology, equipment and talent/skills necessary so they may counsel, inform, and advise people for a high technology society. Experiences with computer assisted guidance, occupational information and retrieval systems and use of new methods of assessment and evaluation are essential to such training.

In addition, counselor training should have a strong component which focuses on skills, in networking; in coordination of diverse groups; in consultative techniques for working with teachers, parents, administrators; and on skills and techniques for utilization of community resources.

3. ADVISORY COUNCILS

Any federal, state, local advisory or industrial council formed by ADEA legislation should include a professionally trained counselor within its membership. Such participation by professionally trained counselors is critical to the success of a turn around in the technological training and employment shortages in this country. Counselors must be fully informed of industrial needs, employment shortages and policy shifts which address the problems of the workplace. This can occur only through participation with advisory and industrial councils.

4. RESEARCH AND EVALUATION

The American Defense Education Act should further and encourage (through grants, fellowships and special programs), research on new techniques, practices and programs, which increase the counselor's knowledge and skills in unlocking the potential of all youth and adults. These citizens must attain maximum personal and career fulfillment if this nation is to achieve its employment policy goals and insure national security.

More research is needed on effective data gathering, assessment, goal setting and information dissemination techniques. Research is also needed on early intervention counseling strategies with children as these concern career planning and exploration. Pilot projects on innovations in counselor educator preparation and in-service education need to be initiated which emphasize non-traditional programs, internships, practice and placements.

Evaluation devices, both periodic and long range, need to be tested to determine the efficacy of any modifications in training, retraining and practice as such concern improved counselor performance in achieving national priorities brought about by the ADEA legislation.●

HON. WILLIAM BRODHEAD

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. FUQUA. Mr. Speaker, few individuals can cite a climb as rapid as that of WILLIAM BRODHEAD within the U.S. House of Representatives where, in just 8 years, he has distinguished himself as a sound, thoughtful legislator and a leader.

In each of the tasks he has undertaken, WILLIAM BRODHEAD has excelled. And the tasks he undertook were never the easy ones.

As a member of the House Ways and Means Committee, the House Budget Committee, and chairman of the Democratic Study Group, WILLIAM BRODHEAD has served with distinction and credit not only to himself but to this House of Representatives and to the people who elected him from the 17th District of Michigan.

Though we will miss WILLIAM BRODHEAD's legislative initiative and his personal leadership, most of us can certainly understand that at 41 years of age, he must take account of the needs of his growing family and thus his decision to return to the more lucrative practice of law.

I wish him great success in his future endeavors.●

A CASE FOR FAIR TRADE AND H.R. 5133

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. DINGELL. Mr. Speaker, the House is scheduled to consider American jobs producing legislation, H.R.

5133, the Fair Practices in Automotive Products Act. It is a bill designed to protect and increase jobs in U.S. automotive industries. It requires all manufacturers of automobiles to achieve gradually increasing levels in the use of American made automotive parts and use of American labor in the production of automobiles.

In connection with the importance of this legislation, there have been several articles on the subject of the unfair trade restrictions against American products destined for export to foreign countries. One country with severe import limitations is Japan. Good documentation on the seriousness of the problems facing U.S. industries is contained in the presentation by Mr. Richard D. Copaken, Esq., of the firm of Covington & Burling in Washington, D.C. regarding the Houdaille Industries, Inc., petition for relief as filed with the U.S. Trade Representative's office. A portion of that presentation is set forth at the end of my remarks.

The presentation to the International Business Council of the Electronic Industries Association, October 11, 1982, in Los Angeles, discusses the serious trade restrictions confronting U.S. industries which are trying to expand their markets to other countries and at the same time are concerned with the unfair and increasing penetration of the American market by foreign made products.

Both problems, notably in automobile production and the related automotive industries, are major causes of the deplorable loss of jobs in the United States.

The Houdaille petition is a good case in point illustrating the absolute need for U.S. action to correct trade imbalances. H.R. 5133 is a proper approach, carefully crafted, to help American jobs and markets.

I urge our colleagues' review of Mr. Copaken's presentation which follows in part:

HOUDAILLE'S INVESTIGATION OF JAPANESE GOVERNMENTAL POLICIES AND PRACTICES

We undertook this challenging task. With the assistance of Japanese counsel, we carried out a comprehensive investigation in Japan that included meetings with many officials of the Government of Japan and the translation and review of hundreds of pages of Japanese language documents, many of which had never before been translated into English.

We learned that the penetration of the United States market by Japanese machine-tool manufacturers results not from free and fair competition, but from unfair cartel practices sanctioned and encouraged by the Government of Japan.

The Japanese machine-tool cartel was formed in response to the first of a series of three special laws for the promotion of the machinery industry. In enacting these laws the Government of Japan launched an ambitious crusade to seize the higher value-added and most technologically advanced market segment of this fundamental industry. Although these laws were officially characterized as temporary measures, they have remained in effect since 1956—one "temporary" measure following on the heels of another.

The Japanese Ministry of International Trade and Industry ("MITI") used the free hand given to it by these laws to weed out manufacturers with small market shares. Each firm whose production of a particular machine tool was less than 5 percent of the Japanese market in that tool and less than 20 percent of the company's total production was directed to stop manufacturing these tools. The market shares thereby relinquished were turned over to a limited number of more successful producers. Under MITI's guidance these companies then exploited the consequent economies of scale and specialization to penetrate export markets, secure in the knowledge that these advantages would be protected against competitive erosion in the Japanese market.

In taking these actions the Government of Japan catapulted the cartel into the high-technology end of the market. MITI successfully pressed the Japanese machine-tool manufacturers to act jointly to concentrate their efforts in developing and producing NC machine tools. Each company in the cartel was directed by MITI to increase to 50 percent the NC share of its total production of machine tools. In addition, the cartel was directed to expand its collaborative activities to include related industries and customers.

The Government of Japan also aided and abetted the Japanese machine-tool cartel by failing to enforce against it Japan's Law Concerning Prohibition of Private Monopoly and Maintenance of Fair Trade ("the "Anti-Monopoly Law"). Japanese machine-tool manufacturers currently combine with each other and with the Government of Japan to fix prices on exports of NC machine tools to the United States. In addition, through the cartel each Japanese manufacturer regularly notifies all of its fellow members of its intention to produce new machine tools. Many of these notifications in recent years concern NC machining centers and other NC machine tools. All cartel members then have an opportunity to comment on and otherwise influence the production of new machine tools by their Japanese competitors. The price-fixing activity is formally immunized from Japan's Anti-Monopoly Law.

Of potentially even greater consequence, the Government of Japan has covertly accorded the machine-tool cartel informal immunity from Japan's Anti-Monopoly Law for its other equally important joint anti-competitive conduct undertake "voluntarily" in response to MITI guidance and for the purpose of penetrating export markets.

These acts and policies are the most significant, although by no means the only methods by which the Japanese Government has nurtured, supported, and promoted development of the Japanese machine-tool cartel. The Government of Japan has also backed this cartel with tax advantages, concessionary loans, research grants and other direct and indirect subsidies.

With the long-range goal of selectively penetrating and dominating important export markets as its guiding principle, the Government of Japan devised imaginatives strategies for financing that objective. In the mid-50's MITI gave to certain officially favored export industries, including machinery, valuable licenses to import raw sugar. This highly profitable arrangement enabled those industries to purchase sugar at prevailing world prices and sell it in the domestic Japanese market at prices that were artificially inflated ($40–$150 per ton higher) as a consequence of the Government's sugar import quota. As MITI officials explained it to me, by utilizing this price differential the Government could compensate the exporters for their deficits attributable to dumping in foreign countries.

When this mechanism was discovered and protests from abroad mounted, the Government of Japan shifted to other means of achieving the same objective. Hundreds of millions of dollars worth of yen generated by wagering on bicycle and motorcycle races in Japan were funneled into the Japanese machinery industry, including the machine-tool cartel.

MITI officials confirmed the Government's use of this mechanism to support Japan's machinery industry, including specifically the machine-tool segment, but we were assured that the level of subsidy involved was quite small—less than one-half million dollars a year for the entire machinery industry of Japan. In preparing the Houdaille Petition we relied upon these assurances given to us in two Tokyo meetings, separated by several months, in response to quite specific written questions we provided in advance of each meeting.

We remained skeptical, however, because MITI would not provide documentation for the figures it cited and these figures did not square with substantially larger figures in secondary sources which we supplied to MITI along with our written questions. We were also troubled by MITI's refusal to make available to us for questioning officials of Japan's Bicycle Rehabilitation Association.

After our Petition was filed, I returned to Japan, determined this time to approach the Japan Bicycle Rehabilitation Association officials directly, without the benefit of a MITI introduction. What I discovered in documents I obtained and in meetings I openly recorded on video tape shocked me. MITI had misled us. The bicycle- and motorcycle-race-wagering grants to the Japanese machinery industry were far in excess of the one-half million dollars a year admitted by MITI. These grants were well over 100 million dollars a year and are growing.

In 1980, the one year for which we were able to obtain documentary evidence of both bicycle- and motorcycle-race-wagering grants, such subsidies to the Japanese machinery industry totaled more than 104 million dollars. In addition, nearly one-half billion dollars is made available each year to Japanese municipalities that sponsor the bicycle races under a statutory scheme that directs the municipalities to spend these funds on the promotion of the Japanese machinery industry and the export of its products as well as for other public purposes.

Of the more than 104 million dollars lavished on the Japanese machinery industry by the two national racing associations in 1980, bicycle-race-wagering-funds accounted for 85.64 million dollars and motorcycle-race-wagering funds accounted for 18.64 million dollars. We know that the bicycle race wagering fund grants increased to 93.91 million dollars in 1981, but we have not yet been able to obtain documentation on motorcycle-race-wagering grants for this more recent period. Presumably it has also increased.

I also learned in a video-taped interview with officials of the Technical Research Institute of the Japan Society for the Promo-

tion of Machine Industry that this research facility receives annually 2.8 billion yen, or approximately 13 million dollars, in direct grants from the bicycle-race-wagering funds to conduct joint, anti-competitive research. I was told that no foreign machine tool companies could participate, except those owned by Japanese companies. Until recently, the official explained, approximately 40 percent of the total resources of this facility were dedicated to research on numerically-controlled machine-tool technology. Although this research has tapered off some, it still accounts for fully 25 percent of the current effort by this facility.

When we brought these documented facts to the attention of MITI and sought some explanation and more detailed information, our inquiries met with a stone wall of silence. Only after we submitted this Japanese documentary evidence in Comments filed with the United States Trade Representatives on July 31, 1982, did the Government of Japan belatedly and reluctantly concede the 104 million dollar figure for 1980 in a September 16, 1982 diplomatic note to the United States. The Government of Japan still has not been willing to provide any detailed breakdown of this annual, growing subsidy to enable us to get a clear picture of how much of these funds benefit directly or indirectly the machine-tool segment of the Japanese machinery industry.●

BUY AMERICAN

HON. CARDISS COLLINS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mrs. COLLINS of Illinois. Mr. Speaker, in February of this year, I introduced H.R. 5511, legislation amending the "Buy American" provision of the Defense Appropriations Act to include the packaging phase of the procurement of food for the Armed Forces. The reason for introducing this measure was to clarify the fact that Congress had intended, and does intend today, to include the packaging of combat rations within the scope of the protection afforded by the act. Such clarification is particularly important because the Department of Defense (DOD) is in the process of replacing the traditional canned food combat rations with a new form of combat food ration contained in a light weight, flexible retort pouch.

The complex process of manufacturing or producing thermostabilized food in retort pouches is only in its infancy in this country. Yet there are already seven or eight companies employing hundreds of people in this aspect of the procurement phase alone. Unfortunately, the DOD, supported by the General Accounting Office (GAO), has not recognized the wisdom of developing and protecting this important defense industry. Indeed, in September, DOD awarded production contracts to a foreign firm.

After submitting testimony urging support of my legislation before the Defense Appropriations Subcommittee in May of this year, my office has been in constant touch with the subcommittee in order to address this whole issue. Chairman ADDABBO has graciously consented to include language in the report of the fiscal year 1983 Defense appropriations legislation requiring DOD to review its procurement practices to insure that American businesses receive as much of the food procurement and packaging business as they can handle and report on the impact foreign companies who are subsidized by their government's competing on U.S. defense contracts for food products and equipment.

While I am clearly appreciative of Chairman ADDABBO's efforts to address my concerns, let the record clearly show that if the "Buy American" provision was clarified to encompass food packaging, none of this would be necessary.●

CORPORATE PAC MAN

HON. BOB TRAXLER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. TRAXLER. Mr. Speaker, much of our business news has been taken up this year with the news of Corporate Pac Man: how many other firms can he gobble up before being eaten himself.

Prof. Walter Adams of Michigan State University, one of my favorite former college professors has written a very lucid article entitled "Mergers Stress Wrong Kind of Risks" which emphasizes the sad fact that much of the imaginative drive of the leaders of our major corporations has been turned toward acquisition and away from methods of improving productivity, risking the future of our Nation's businesses in a doubtful fashion.

I commend this article which appeared in the October 5 edition of the Los Angeles Times to my colleagues who are interested in obtaining a better understanding of one of the major problems plaguing American business, and ask unanimous consent that it be inserted in the RECORD at this point.

The article follows:

[From the Los Angeles Times, Oct. 5, 1982]

MERGERS STRESS WRONG KIND OF RISKS

(By Walter Adams)

The spectacle of the Martin-Marietta/Bendix affair is the latest episode in the megamerger follies. It is the ultimate proof, if such be needed, that American entrepreneurship is afflicted with a case of contagious progressive atrophy, which is undermining our capacity to reindustrialize America and restore American industry to its erstwhile competitiveness in world markets.

To some, megamergers simply reflect management's desire to maximize profits by capturing "undervalued assets" or gaining available tax advantages. To others, they constitute a form of "corpocide"—the elimination of an independent business capable of standing on its own feet—designed merely to satisfy insatiable managerial egos.

Take the oil industry. For years, it argued that decontrol of oil and gas prices was imperative to provide the oil giants with the necessary incentives and resources to search for new oil and gas reserves. Yet these companies have continued to divert much of their massive cash flows into mergers and acquisitions. Mobil spent $1.5 billion to buy Montgomery Ward; Exxon acquired Reliance Electric; ARCO acquired the (London) Observer and Anaconda Copper; Sohio acquired Kennecott Copper; Occidental bought Cities Service and Iowa Beef Processors; Getty flirted with Home Box Office television, and the Hunt brothers, Herbert and Nelson Bunker, used their oil fortune to speculate in silver.

Can anyone seriously claim that these multi-million-dollar combinations contributed a single new barrel of oil, or a single new cubic foot of natural gas, to the nation's energy reserves? Or that promoted the national goal of energy independence?

Steel is another pertinent case study. For more than 20 years, this industry has demanded government protection from foreign competition, which would permit the steel giants to accumulate sufficient investment capital to replace and modernize their antiquated facilities. Modernization, the companies claimed, was indispensable if they were to compete effectively against their more advanced Japanese and European rivals.

Yet U.S. Steel, a notorious laggard in a technologically lethargic industry, somehow found $6.3 billion—not to buy new machinery or new plants, but to buy Marathon, the 17th-largest U.S. oil company. Instead of upgrading efficiency in its own operations and acquiring the capacity to defend the domestic steel market, U.S. Steel chose to bring its monumental inexperience to an industry in which it had neither managerial expertise nor technical competence.

At best, this kind of corporate empire building involves little more than the reshuffling of existing assets into a new controlling hierarchy. It does not create any new capital, new factories, new technologies or new jobs. It provides no new stimulus to an ailing economy, nor does it help regenerate an aging industrial infrastructure in crying need of productive investment.

Most serious, in the long run, is the effect of this merger spree on the quality of American entrepreneurship. Managerial talent and ingenuity are diverted from the basic task of increasing operating efficiency enhancing productivity and promoting technological advancement. Instead, creativity is squandered on a game of financial razzle, dazzle. Managers become wheeler-dealers instead of concentrating on their industrial responsibilities. It is significant, for example that in each of the last three years, U.S. corporations have spent more on mergers and acquisitions than they have on research and development.

It is a supreme irony that most of the megamergers of the past two decades have not produced significant efficiencies indeed, many have been demonstrably unprofitable and counterproductive. This is especially true where a corporation acquires a firm in an unrelated line of business. According to a survey conducted by McKinsey & Company (a leading management consulting firm), the companies that "stick to their own knit-

ting" tend to have particularly effective management, and companies that stray even a little out of their bailiwick tend to have problems. One reason of course, is that the more gigantic a company grows the more layers of bureaucracy it creates. And bureaucracy creates inefficiency in the private as well as the public sector.

The time has come for American industry to recapture its historic preeminence. It must redirect its talent into entrepreneurship and risk-taking—the building of new factories, the development of new technologies and the creation of new jobs.

The time has come to stop playing megamerger games.

(Walter Adams is a distinguished university professor of economics at Michigan State University, of which he is also past president.)●

HON. HENRY REUSS

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 7, 1982

● Mr. MARKEY. Mr. Speaker, I join today with my fellow Representatives to pay tribute to my distinguished colleague from the Fifth District of Wisconsin, Congressman HENRY S. REUSS. The regret I feel about his departure is surpassed only by the amount of respect that I have for him.

Of all the people I have met during my 6 years in Congress, HENRY REUSS is the one man with whom I have instinctively agreed on virtually every issue. His sound judgment on economic and public policy issues is something which I have often sought and which he has never failed to give. HENRY and I often sat together, many times at great length, to discuss in detail issues and problems faced by our Nation. His knowledge and understanding of economics helped me to form coherent public policy arguments. Surely, his leadership on and insightful discussions of the economic issues facing our Nation will be sorely missed.

I urge my colleagues to review the most recent newsletter sent out by our distinguished colleague. A detailed study of Congress—past, present, and future—should stimulate thought and discussion as to the role of government in our society. Long after he has departed from these buildings, HENRY REUSS and his vision of our country will continue to play an important role for all Americans.

There is but one job for which HENRY REUSS is qualified as he leaves Congress. That is the Presidency of the United States. His record would stand head and shoulders over that of the incumbent President. I wish him the very best as he leaves the U.S. House of Representatives.●

THE CIA WAR IN NICARAGUA

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. DELLUMS. Mr. Speaker, I would like to bring to the attention of my colleagues today's lead editorial of the New York Times.

We hear that the President's recent trip has been widely described as an "eye-opener" for Mr. Reagan, and yet his administration continues to pursue a myopic and dawn-patrol-bravado approach to foreign policy in Central and South America.

As the United States decries foreign interventionism, our Central Intelligence Agency continues to wage a secret war in Nicaragua which is in defiance of the Neutrality Act and, as this editorial explains, is very likely to produce results which are counter to America's best interests.

[From the New York Times, Dec. 8, 1982]

THE WORST-KEPT SECRET WAR

When asked the other day if he could confirm a report in The Times that the C.I.A. is mobilizing a secret war against Nicaragua, President Reagan replied: "No, and I don't think The New York Times can." But the growing evidence of American involvement can't be shrugged off so blandly. There's nothing secret any more about the training of exile armies in Florida and the recurrent border raids into Nicaragua by insurgents claiming C.I.A. help; all this has been widely reported for months.

Whatever American agents may be doing to help Honduras prevent the use of its territory for arms smuggling to El Salvador, it seems beyond doubt that they are also engaged in some direct actions in Nicaragua. The manifest purpose is to threaten a frontal assault on the leftist Sandinist regime. Undeniably, some of the leaders of the insurgent force are Nicaraguans associated with the discredited Somoza dictatorship.

These are, to begin with, illegal activities. The Neutrality Act expressly forbids the raising of secret armies to unseat a regime that the United States recognizes as lawful. Flouting that law is no way to rally the hemisphere against meddling by Cuba and Nicaragua in other nations' conflicts.

Even if these secret armies were never meant to be used in a big way, they are a dangerous instrument of diplomacy. Give people with a political grudge a gun and they maneuver to fire it. If they do, they are impossible to disown. Even it they don't, they are extremely difficult to disband.

If the idea here was to use the threat of insurgency to win bargaining concessions from Nicaragua, the idea is bound to misfire. Such threats tend to confirm the darkest fears of suspicious adversaries and make them more truculent, not accommodating.

It is perfectly true that an acceptable doctrine of non-intervention has to be respected by all parties. If it were proven that Nicaragua is indeed violating the territory of Honduras to funnel weapons to El Salvador, some reprisal in kind might be justifiable. But the evidence suggests that it is Nicaraguan territory, not Honduran, that is being systematically violated.

A final justification for covert warfare might be a clear showing that truly vital American interests are at risk, and beyond the reach of diplomacy. No such showing has been made, either to the American people or to our Latin friends. To the contrary, President Betancur of Colombia, an independent-minded conservative, last week risked Mr. Reagan's displeasure by appealing for negotiations with both Nicaragua and Cuba.

That was a foretaste of how Latin America would react to unilateral United States interventions. Mr. Reagan, by way of polite reply, expressed his wish to see "the withdrawal of all—I repeat all—foreign military advisers in Central America."

Nicaragua contends that it is prepared to negotiate. A proper response would find Washington testing that claim, documenting its charges of Nicaragua's interference in other countries and persuading other Latin nations to join in condemning the import of Communist arms. The improper response is to deny the undeniable, in the false hope that the C.I.A. hand can somehow be hidden. That illusion should have died at the Bay of Pigs.●

CIVIC LEADER

HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. MOTTL. Mr. Speaker, I would like to salute one of Greater Cleveland's most talented boosters.

William H. Bryant, president of the Greater Cleveland Growth Association, has been at the helm of that metropolitan chamber of commerce since 1980.

He took the job when the city of Cleveland had a very low bond rating because of a default on some loans. The image of the business community was sagging and Cleveland had become the urban scientists' favorite example of a declining central city.

Now Cleveland is back in the bond market, promptly paying its bills and balancing its books. The business community has been active in this ongoing recovery by lending technical and financial support. A number of people are responsible for this comeback and Bill Bryant is certainly one of them.

Bryant has emphasized the importance of business, labor, and government working together. Two recent major programs he was responsible for are the Cuyahoga County management study and the community capital investment strategy. The county study involved a volunteer task force that offered 89 recommendations that could lead to $18 to $20 million in annual savings. The capital investment strategy gives Cleveland a blueprint to present to Federal officials as soon as funds to improve the infrastructure of our Nation's cities are provided.

A native Ohioan, the 49-year-old Bryant came to the growth association after serving as director of the State of Ohio's research and development

department of industrial and economic development. Prior to that he was director of research and planning for the tricounty regional planning commission of Akron.

Bryant and his wife, Nancy, reside in Fairview Park. Those of us interested in Cleveland's continued recovery hope he stays in the best location in the Nation as it faces a new generation of hope, cooperation, and prosperity.●

PRESERVING THE HECTOR LAND USE AREA

HON. STAN LUNDINE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. LUNDINE. Mr. Speaker, during last week's consideration of the Interior appropriations bill (H.R. 7356), I brought to the attention of the House a problem that recently came to my atttention involving a tract of Forest Service land in central New York State.

In a recent news briefing, the Department of Agriculture announced that it is in the process of completing a review of some 140 million acres of Forest Service land for possible identification as surplus property. This review is to be followed by an extensive study of specific tracts of land to determine their suitability for public sale.

Exempted from this process, however, are more than 60,000 acres of public-owned land in New York and California—13,000 acres of which constitute the Hector Land Use Area in the Finger Lakes Region of New York. According to the Forest Service, this land has already been determined to be excess to departmental needs and is subject to sale without specific authorization by Congress. This determination has been made without the thorough review procedures prescribed for all other Forest Service land.

During consideration of the Interior appropriations bill, which includes funding for the Forest Service, I joined with my colleague from New York, Mr. HORTON, in expressing the view that standard review and evaluation procedures should be applied uniformly to all public lands under consideration for disposal and no exception should be made for the 60,000 acres in question. The chairman of the Interior Appropriations Subcommittee (Mr. YATES) and the subcommittee's ranking minority member (Mr. MCDADE) concurred in this view and agreed that no funding provided in the appropriations bill should be used to promote the sale of any Forest Service property that is not subject to the prescribed procedures for all federally owned land.

The Hector Land Use Area is extremely important as a recreation and grazing area, as well as one of the leading agriculture and forest research areas in the Northeast. It would be a mistake to remove this property from public use and is certainly contrary to the public interest to do so without extensive review. It is my firm conviction that careful analysis will clearly show that the benefits of retaining the Hector tract under the Forest Service far exceed any short-term gains that could derive from its sale.

Since the Hector Land Use Area may be one of the first public tracts offered for the sale by the administration, I think it important that the membership understand the nature of the property and its current uses. I insert in the RECORD the following Forest Service report that outlines the history of public ownership of the Hector Land Use Area and its current status and management.

The report follows:

HECTOR LAND USE AREA

AREA DESCRIPTION

The Hector Land Use Area is located in Seneca and Schuyler Counties in the Finger Lakes Region of New York State. The area is generally bounded by four New York Highways: 96, 414, 79, and 224. The area is accessible by one of these four highways; then via a grid of north-south and east-west gravel roads, which cross the unit at one mile intervals.

Land Ownership is somewhat broken with scattered parcels of private land occurring within the unit. Federally owned lands comprise 13,232 acres.

The nearest population center is the City of Ithaca, 15 miles to the southeast. The Administrative Office for the Unit is located in the Town of Montour Falls, 7 miles south of the unit.

Topography is gently rolling as the area occurs on a plateau between Seneca and Cayuga Lakes, the two largest of the Finger Lakes. Elevations range from 1,000 to 1,800 feet, a maximum relief of 800 feet.

The area has been intensely glaciated. Existing landscape is the result of the last glacial advance during the Wisconsin Period, about 10,000-25,000 years ago. Soils are generally acid, fine texture, and in many areas, have a basal till or hardpan layer. Because of the hardpan, water does not quickly penetrate into the soil, resulting in the wet depressions and basins. Droughty conditions exist in the summer in shallow soil along the steeper sideslopes.

A past history of farming is revealed in the vegetation covering the unit. Thirty-three individually fenced pastures encompass 4,990 acres or 37 percent of the area, 2,217 acres, 17.8 percent of the area, are in old fields which vary from grassy openings to thickets of shrubs and scattered small trees. The remaining area is forested. One thousand acres, 7.6 percent, are conifer plantations, the remaining 5,025 acres or 37.9 percent, are hardwood or mixed hardwood and conifer stands.

Climate in the Hector Area is strongly influenced by the prevailing wind from the west. During the summer the wind comes from the southwest, bringing with it warm, humid weather. The weather becomes more pleasant in the fall as the wind direction gradually changes to the northwest, bringing the cold dry air masses common in the winter. The weather is occasionally modified by oceanic storms, causing cool, cloudy, wet weather. During the winter, snow squalls occasionally result from air masses absorbing moisture as they pass over the Great Lakes.

Temperatures average a monthly maximum of 77°F in July and drop to an average monthly minimum of 13°F in January. A 130 day frost-free growing season extends from mid-May to the first of October.

Annual precipitation averages 34". Average annual snowfall is 75". Snow covers the ground from mid-December to mid-March. Due to mild winters, snow depths seldom remain more than 12-15", and during some winters, bare ground may be briefly seen.

Greatest storm hazard present is heavy snowfall, although local areas may be affected by high winds and lightning during summer thunderstorms.

Freezing rain during the winter may damage utility lines and crop trees as well as making highway travel hazardous.

HISTORY AND LAND STATUS

The Hector Land Use Area originated in the 1930's as a sub-marginal land adjustment project purchased primarily under authority of the National Industrial Recovery Act of 1933, the Emergency Relief Act of 1935, and Title III of the Bankhead-Jones Farm Tenant Act of 1937.

It is estimated that more than 100 farms were included in the 13,259 acre purchase. Lands at that time were seriously eroded due to poor farm practices.

From 1938 to 1954, the area was managed by the Soil Conservation Service as a project for public grazing and other land use developments, including reforestation. The Hector Grazing Association was formed in 1946 to facilitate grazing on the public lands. This association is still in existence today.

From 1954-1957, the land was placed under management of the U.S. Forest Service in Upper Darby, Pennsylvania. In 1957, management of the area was assigned to the Green Mountain National Forest, located in Vermont. Grazing and reforestation continued to dominate management activities on the land until 1961.

In 1961, a professional forester was assigned as the unit manager with a title of Forester in Charge. A multiple use program was initiated following an evaluation by the Forester Supervisor, staff, and the Forester in Charge.

In the following 21 years, a wildlife habitat improvement program has taken place in cooperation with the New York State Department of Environmental Conservation; the recreation program and use had steadily increased; timber management activity, although modest in scale, has intensified; and grazing use, through cooperation with the Hector Grazing Association, has been improved. In the past five years, the Hector Land Use Area has proven to be of significant value for environmental education. A large nearby population and the unit's intensive management and physical resources provide a sound base for outdoor education efforts. Current educational programs are designed for school children, college students, and the general public.

In 1978, the Forester in Charge was designated as a District Ranger. For administrative purposes, the Hector Land Use Area is considered similar to a National Forest Ranger District. However, the lands at Hector do not have the same status as National Forest System lands and the U.S.

Forest Service management authority is somewhat limited on these lands.

PRESENT MANAGEMENT SITUATION

Over the years the Hector Land Use Area lands have been restored to productivity as directed and now serve as a visible demonstration of good land management. They are the only federal lands in New York State that are administered for multiple wild land uses. As such they provide not only a unique land use and management demonstration but they provide opportunities for endeavors that help support the local economy plus extensive opportunities for outdoor public recreation. The available resources are already committed to general public use and local residents. Many user groups and individuals have helped in constructing and maintaining the various facilities they now use.

The Area contains nearly 7,000 acres of commercial forest land. These forests are valuable for fuelwood, lumber and other forest products and are also important for wildlife cover and various forms of outdoor recreation including hunting. Some 1,700 acres of wildlife opening are managed within the forested area. Also, 200,000 board feet of timber are harvested annually. The commercial fuelwood market is good. In addition, nearly 200 fuelwood permits were sold to local residents in fiscal year 1982.

Grazing is permitted on 4,648 acres under a Grazing Agreement between the Forest Service and the Hector Cooperative Grazing Association, Inc. Since 1961, the 100 member association has assumed the major responsibility for the maintenance and improvement of the land. Thirty-three pastures are maintained within 76 miles of fence with 30 corrals and 46 stockwater ponds.

The Area is very popular with recreationists. Use during 1981 was 23,200 visitor days, compared to 17,706 in 1978. These activities include camping and picnicking at existing developed sites; hunting, fishing, hiking, horseback riding and cross country skiing. Some hiking is on the Area's 25 mile trail system including the 12 mile Interloken Trail System, (now a National Recreation Trail) and 13 miles of additional trails. These trails are a part of the Finger Lakes Trail System which is popular in the area.

There is also no current mineral activity in the Area, but the entire federal ownership is covered by federal oil and gas leases.

The Area has become a focal point for environmental and conservation education activities and is used regularly by schools and other conservation and educational agencies and groups.

THE RESOURCES

Soil

The soil, more than any other factor, has influenced the development of the physical, economic, and social history of the unit. In the past, limiting soil factors caused the "Hill Farms" to be less and less competitive with farms on better soils. The overall landscape is very gentle, which combined with medium to fine textured soils and the widespread presence of a basal till hardpan layer (from which a fragipan may form), creates land conditions requiring careful management. Several soil characteristics in particular affect management activities. Soils are very wet once frost leaves from March to June. Internal permeability of most of the soils is very slow, primarily due to fine texture, but also because of the presence of basal till, which is essentially impermeable to water. The long, smooth, gentle slopes accumulate a large amount of run-off (especially when the soils are saturated about the basal till) creating an erosion hazard. Nearly all soils are silt-loam soils containing a large content of clay and silt.

Chemical characteristics of the soil also affect their management. Typically the soils are quite acid. Phosphorus is uniformly insufficient. Liming and application of phosphorus fertilizers are needed to produce good crop yields.

Water

The Unit lies astride a plateau known as the "Hector Backbone." About half of the land drains to the east toward Cayuga Lake and half to the west toward Seneca Lake. These are the two largest Finger Lakes (about 40 miles long and two to three miles wide). The 13,232 acres in the Unit are intermingled with an equivalent amount of private land which means that the Forest Service manages only about half of the watershed area. Average annual precipitation is 34 inches. Estimated water yield for the unit is 26,000 acre feet. Most streams are intermittent since the unit is at the top of the watershed and only extends an average of four miles from east to west. There are no natural bodies of water, but 46 livestock ponds have been constructed on the pastures and 27 wildlife ponds built throughtout the remainder of the unit. These ponds average one-half to one acre in size. The wildlife ponds are visited by many recreationists for fishing, nature study, or for strolling and relaxation.

There are public water supplies at Blueberry Patch Campground and Potomac Group Campground in the form of drilled wells with hand pump. Each is about 100 feet deep. One spring located off Picnic Area Road is under special use permit to supply a residence.

Vegetation

The Hector Unit consists of 13,232 acres; 5,025 acres are composed of hardwood timber stands, primarily of red oak, white oak, red maple, white ash, basswood and hickories. The remaining 8,207 acres were in farm lands prior to the 1930's when the land was purchased. Today there are some 4,990 acres in pastures with grass cover, about 1,000 acres of conifer plantations, particularly red pine, Japanese larch, white spruce and jack pine. The balance of 2,200 acres consists of old fields, some of which are primarily goldenrod and low shrubs, such as hawthorn and gray dogwood, with other areas rapidly filling aspen, white pine and other tree species.

There is a great diversity of hardwood and softwood tree species as mentioned above. In addition, among the species are the following: black walnut, hophornbeam, arrowhead, sugar maple, black cherry, black locust, chestnut oak, apple, multi-flora rose, elm, witchhazel, beech, Norway spruce, boneset, wild cranberry, blueberry, raspberry, map apple, lilac, teasel, partridge berry, service berry, pin cherry, healall, maple-leaved viburnum, blackberried elder, chicory, and burdock. Primary species within pastures are birdsfoot trefoil, white clover, red clover, timothy, orchard grass, bluegrass, redtop, and fescue.

Fire

Fire potential is highest in May when the snow has melted and before green-up occurs. Periods of high winds usually occur during this time and areas of dead grass and weeds are available as fuel. Most of the fires at Hector cause little damage due to the lack of heavy fuels. Because of light fuels and rapid spreading nature of the fire, high temperature fires are a rarity and vegetation, especially trees, is not killed.

Prescribed burning was used on the Hector Area in 1982 for blueberry management and wildlife improvement.

Responsibility for fire suppression is assigned to adjacent towns based on a Cooperative Agreement between the Forest Service and the towns involved. This agreement was revised in the summer of 1978. In situations where a fire develops on the Hector Area, the Forest Service would secure help from the town in which the fire occurred and would pay suppression costs.

Minerals

There is no known past history of mineral exploration on the Hector Area including sand or gravel removal. However, each deed to the federal lands includes a statement that all gold and silver is reserved to the State of New York. There has never been any evidence of gold and silver found on the Unit.

In 1971, a representative of the oil and gas industry, obtained BLM oil and gas leases for the entire Hector Unit. However, no activity or exploration has taken place as yet. There are currently no other mineral activities on the area. There is a possibility that gravel deposits are available on the southern end of the area.

There has been some oil and gas drilling within 20 miles of the Hector Area, and it is very possible that similar exploration could take place on the area within the next 10 years.

Recreation

The basic reason people visit the Hector Area is to seek an atmosphere of solitude yet be able to find enough facilities and activities to satisfy their needs. For example, visitors to Blueberry Patch Campground often say that they enjoy both the smallness and simplified development of the site and the large amount of undeveloped land surrounding it. They say it is difficult to find situations similar to this in Central New York. Similarly, families with smaller children who like to catch panfish in the ponds at Hector can not find this pursuit readily available elsewhere since most public fishing is in the large lakes and streams. By the same token, those on horseback are hard pressed to find areas where there are trails, gravel roads, and fields in desirable combinations to satisfy their riding pleasures. State Parks to the west and east of the area are designed for high density use, as are private developments. The Hector program complements rather than competes with these areas, by providing something different.

The majority of visitors to the area come from within 40 miles. However, there are people vacationing in the summer and deer hunters in the fall who live more than 100 miles away.

Blueberry Patch is designed for family camping to accommodate both small camping vehicles and tents. This site is very popular as attested by over 3,300 visitor-days use in 1981. Potomac Group Campground is designed for walk-in tent camping and picnicking and use in 1981 was 3,700 visitor-days. Both sites have tables, vault toilets, fire rings, and drilled wells with hand pumps. The Backbone Trailhead is designed primarily for use by horsemen who camp overnight.

The 25 miles trail system is composed of the main Interloken Trail (12 miles), which joins the Finger Lakes Trail on the south-

ern end of the area. The Finger Lakes Trail crosses New York State and joins the Appalachian Trail in eastern New York. There are six side loop trails connecting with the Interloken Trail so visitors can make short trips of one to three miles.

Fishing is a popular recreational activity at the ponds as attested by the number of people seen fishing and the pathways around ponds having fish in them. Many of those fishing are families with small children.

Timber

Prior to the 1930's, the Hector Unit was comprised of a large number of farms. Many of the farmers had sold a large percentage of the merchantable sawlogs from their woodlots prior to government purchase. These woodlots were cut without regard to good silvicultural practices, leaving stands in poor condition. Even after government purchase, stands were cut with little concern for silviculture until 1961 when a forester was assigned to the Unit. Therefore, these hardwood stands have been under professional management for only about 19 years. Some 1000 acres of conifers were planted under the direction of SCS from 1938 to the early 1940's. From 1961 to 1974 timber harvest was confined to hardwood sawlogs at the rate of approximately 50 thousand board feet per year since no market for other products existed. In 1974, a market developed for red pine poles used in construction of cabins by local individuals. This resulted in the sale of 50 thousand board feet of red pine in 1981 which provided a means of commercial thinning of plantations. Over the last 17 years from 50 to 200 acres have been precommercially thinned in hardwood stands each year.

The major forest type of the Unit is Appalachian mixed hardwoods (see Silvicultural Systems for the major forest types of the United States, Forest Service, U.S.D.A., Ag Handbook 445). Species composition includes a large proportion of northern red oak and white oak, sugar maple and hickories. There is some representation of aspen, white pine, eastern hemlock, American beech and black cherry scattered throughout most stands. A limited amount of black walnut is also found in some stands. The regenerative potential of many of the hardwood species is very high. Most sprout vigorously when small. Species classified as very shade tolerant are American beech, eastern hemlock and sugar maple. Intermediate in shade tolerance are oaks, hickories and white ash. These intermediates will not reproduce and survive under a closed canopy. Intermediates, particularly the mast producing oaks and hickories, are very important to wildlife. Therefore, it is desirable to use silvicultural systems to provide future stands which contain a sizable component of these species.

Wildlife

The Hector Unit was covered with unbroken forest until the late 1700's when settlers cleared the land to raise crops and livestock. 1887 marked the peak of farming in central New York, and by 1925, much of the farmland was being abandoned. As former fields became forested, the resulting vegetation provided a variety of wildlife cover and food. Wildlife species steadily increased as the habitat became suitable for them.

When the Hector Unit was purchased by the government during the 1930's about 9,500 acres, or 75% of the unit, was in open fields. The management decision at that time of purchase was to develop pastures on 5,000 acres, plant 1,000 acres to conifers and allow natural succession to occur on 3,500 acres. Over the past 40 years, these 3,500 acres of open fields have gradually become covered with forbs, shrubs, and trees. Over much of the area, invasion of trees has caused the disappearance of shrubs and forbs, resulting in a decline in the quality and variety of wildlife food and cover. Around 2,200 acres of the original 3,500 acres still have shrubs or forbs on them; the remainder are now mixed hardwood and conifer stands.

Since 1963, debrushing, by hand and by machine, has been used to encourage sprouting of browse plants and to maintain openings on 50-90 acres per year.

Big game species include the white-tailed deer and turkey. The turkey is a relative newcomer to the area, having expanded into the unit 5-6 years ago, presumably from Connecticut Hill to the south. Many of the existing stands are approaching sawtimber size and several of the oak-hickory stands within the Unit are producing mast, which may partially explain why turkey find the area attractive. An estimated 2-5 turkeys are harvested each year within the unit.

Once farmland was abandoned, white-tail deer numbers began to increase as the habitat became suitable. One winter deer yard is known to exist within the southwestern portion of the unit, although most deer winter in areas to the west. These wintering areas are used during periods of deep snows, but generally, winter snow depths within the unit permit free movement by the animals during most winters.

Small game species include ruffed grouse, ring-necked pheasant, woodcock, cottontail rabbit, gray squirrel, woodchuck, Canada goose, and several species of ducks. Snowshoe hare were introduced a few years ago, but did not increase. A few individuals may still be found within the unit.

Waterfowl habitat is extremely limited in Schuyler County and Seneca County. Hector is no exception—a few areas have wood duck production and an occasional mallard may raise a brook within the unit, but otherwise the existing ponds are either too deep and small or too accessible for waterfowl production.

Furbearers include red and gray fox, raccoon, opposum, coyote, and mink. No beaver are known to occur within the Unit. Most of the fur harvest involves fox, muskrat, and raccoon. The area provides some of the better red fox habitat in Schuyler County.

The greatest diversity of vegetation within the Hector Unit has resulted in habitat suitable for a large number of nongame bird species. However, due to the relatively young forest stands, species requiring mature to overmature forests and large snags are not found in large numbers. Species present include: eastern chipmunk, voles, shrews, star-nose moles, bats, flying squirrels, jumping mice, raptors (hawks and owls), warblers, fireos, flycatchers, nuthatches, and sparrows.

The raptor population is high and is quite noticeable around the many open areas.

The New York State Department of Environmental Conservation has constructed 25 ponds through a cooperative wildlife agreement between the State and the U.S. Forest Service. This agreement was signed in 1959. The ponds average 0.5 acres in size and most are less than seven feet deep. Most of the ponds have been stocked with bullheads and sunfish. Three of the ponds are stocked with trout. Many ponds at Hector experience at least partial die-off of fish during most winters.

No wildlife species classified as endangered or threatened under Public Law 93-205, the Endangered Species Act of 1973, are known to occur within this planning unit.●

TRIBUTE TO HENRY REUSS

HON. DAVID W. EVANS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 7, 1982

● Mr. EVANS of Indiana. Mr. Speaker, I would like to take this moment to share in the tribute to my distinguished colleague from Wisconsin, HENRY REUSS, who will be leaving the House at the end of this term after 28 years of outstanding service.

Through our joint assignment on the Banking Committee, I have gained a tremendous amount of respect for HENRY REUSS, both as a person and as an effective legislator. His foresight and intelligence have been valuable assets to the House during his tenure. He has shown a remarkable ability to transmit his political idealism into public policy. His accomplishments have included such diverse projects as equitable tax reform, water pollution control, and the inception of the Peace Corps. As chairman of the Banking Committee, HENRY REUSS was instrumental in establishing loan guarantees to New York City and the Chrysler Corp. Innovative ideas such as these were characteristic of HENRY REUSS. His ability to mold broad concepts into workable projects became a REUSS trademark.

The absence of HENRY REUSS' wisdom and leadership abilities will be felt throughout the House. I would like to extend my very best wishes to Chairman REUSS in his future endeavors, and add my personal appreciation for his dedicated public service.●

HOUSING: HISPANIC AMERICA'S UNFULFILLED DREAM

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. GARCIA. Mr. Speaker, the present administration's policies, the tremendous cuts in federally assisted housing and the recession have produced the worst housing crisis since the depression. Many Americans, especially low income and minority housing consumers, confront a living environment that is alienating and stifling.

Inadequate housing is a pressing concern to the Hispanic community. The rate of substandard housing for Hispanics is between two and three times higher than that for the rest of the U.S. population. Segregationist and discriminatory practices decrease

housing alternatives while they increase the cost of housing to Hispanic consumers.

There is a need for greater cooperation between major corporations and Hispanic community-based nonprofit organizations. We must take action to create productive economic activity in communities targeted for housing rehabilitation and new construction. It is our responsibility to respond to the needs of the Hispanic community and to insure that it receives equal economic and social opportunities.

For the benefit of my colleagues, I include an article, written by a former president of the National Hispanic Housing Coalition, outlining the inequities of Hispanic housing in America.

HOUSING: HISPANIC AMERICA'S UNFULFILLED DREAM

(By Jose S. Garza)

Housing is an integral part of the total environment that affects the way humans feel and behave. The characteristics of this environment are especially significant because they condition the development of young people and thereby of society. Precisely because it has such profound effects on personal and social life, decent housing is vital to everyone. Current housing policies and trends are not representative of what many people need and want; rather, they reflect the limited choices many people actually have. Many Americans, especially low income and minority housing consumers, do not enjoy a quality living environment. Instead they confront one that is alienating and stifling.

This is illustrated in the deplorable housing conditions that a majority of Hispanic families are forced to live in. Simply stated, next to the American Indian, Hispanics are the worst housed people in this country. It is important to note however, that Puerto Ricans are housed even worse than American Indians.

Contrary to common belief, Hispanics are an extremely urbanized population. Over 84 percent of all Hispanics reside in metropolitan areas, compared to 68 percent of the overall population. Consequently, Hispanic families pay a higher price for their shelter since housing is more expensive in urban areas. In the past, 25 percent of a family's income has been held as the maximum amount that should be spent toward adequate housing. Based on this rule, 80 percent of all Americans obtain adequate housing. However, less than 70 percent of all Hispanics are able to get adequate shelter for a quarter of their income, and only a shocking 48 percent of Puerto Ricans can obtain adequate housing with 25 percent of their income.

Hispanics are less likely to own the housing unit they occupy. Only 43 percent of the housing units occupied by Hispanics were owned by them, as compared to 65 percent for the total population. Because they lack the economic means to purchase housing, Hispanics as a group more frequently rent (58 percent do) than does the overall population (35 percent of whom rent housing). As renters, they are forced to rely upon landlords for improvements and, therefore are more vulnerable to policy and market fluctuations.

Inadequate housing is a pressing, priority concern to the Hispanic community. The rate of substandard housing for Hispanics is between two and three times higher than for the rest of the United States population. More than 20 percent of the housing units occupied by Hispanics have physical inadequacies, including lack of heating, poor plumbing and sewage disposal, and faulty electrical systems. Overcrowding is much more severe for Hispanics than for other Americans. They are more than three times as likely to be overcrowded as is the overall population. Finally, Hispanics continue to suffer from discrimination and segregation which directly affects the cost and quality of housing. These practices decrease housing alternatives while they increase the cost of housing to Hispanic consumers.

The present Administration's policies, the tremendous cuts in federally assisted housing and the recession have produced the worst housing crisis since the Depression. The impact of this crisis on Hispanic housing consumers, community-based non-profit organizations and businesses has been devastating. As Hispanic unemployment continues to rise, nonprofit public-oriented organizations have declined and Hispanic businesses are encountering serious financial problems—thereby exacerbating the Hispanic housing crisis.

HOUSING SOLUTIONS

There is a need for greater cooperation between major corporations and Hispanic community-based nonprofit organizations. What the business sector can provide in such areas as business skills and financial leverage, a nonprofit organization can offer in related areas such as promoting local community development opportunities, political leveraging and expertise in government contract procedures and contacts. A balanced combination of the two can produce affordable housing to Hispanics and profits to the private sector.

The federal government should take action to create productive economic activity in communities targeted for housing rehabilitation and new construction. It must ensure that Community Development Block Grant funds are used by local governments to develop economic and housing revitalization projects in Hispanic communities. The federal government must strengthen fair housing and equal opportunity laws by passing a Fair Housing bill containing strong enforcement mechanisms. In addition, it should stimulate the utilization of pension funds to develop low and moderate income housing in Hispanic communities. The production of "no-frills" housing to meet the basic needs of low income Hispanic families must be initiated by the government. Further, it should use federal credit programs to finance low and moderate income housing. Finally, a performing Minority Business Enterprise Program should be established to ensure Hispanic entrepreneurs are represented in the housing development field.

All the evidence suggests that a disproportionate and large number of Hispanics in the United States remains poorly housed. It is clear that the Hispanic community needs alternatives from which to select a living environment best suited to personal, social and cultural needs, functional capacities and financial resources. Thus, it is our responsibility to ensure that the private sector and government respond to these needs and that the Hispanic community receives its fair share.●

BILL BRODHEAD

HON. RICHARD A. GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. GEPHARDT. Mr. Speaker, it has been my pleasure to serve with BILL BRODHEAD on the Ways and Means Committee since I came to the Congress and on the Budget Committee during his 2-year tenure there. In our frequent contacts, I have always been impressed by his dedication to principle.

BILL has repeatedly championed the needs of the underprivileged in our country, even though it often meant swimming against the tide and sometimes battling a tidal wage against continued funding of social services. The needy in this country will be forever grateful to him for his willingness to stand his ground for principles he believes are right.

BILL's very decision to leave the Congress is testimony to this dedication to his own beliefs. He has said he would prefer spending his time with his family rather than battling special interests and the perpetual threat of corruption money in politics. Even as he leaves Washington, BILL is clearly demonstrating he is a man who will not compromise himself.

We in the Congress will surely miss BILL BRODHEAD and regret his departure, but he will always have the respect and admiration of his colleagues that he has so conscientiously earned.●

ILLEGAL IMMIGRATION

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. SCHEUER. Mr. Speaker, in view of the fact that the House will shortly take up consideration of the Simpson-Mazzoli immigration bill, I would like to bring to the attention of my colleagues two articles that recently appeared in the New York Times. The focus of these articles is central to my concern with this legislation as presently written.

The enactment of immigration reform that fails to address the extreme vulnerability of our borders is an exercise in futility. The article of October 20 details the extent of the problems caused by just one surge of illegal immigration from Bangladesh. The November 20 article illustrates the ease with which pregnant illegal aliens cross our southern borders so their new born infants will automatically become U.S. citizens. Apart from describing these specific instances, the

following articles are indicative of the porous nature of our borders.

Establishing firm control over our borders will be a matter of the utmost importance in our debate, and for that reason I commend these articles to my colleagues for their consideration.

[From the New York Times, Oct. 20, 1982]

NEW ASIAN ALIENS CONCERN OFFICIALS—BANGLADESH REFUGEES ENTERING U.S. ILLEGALLY, IMMIGRATION AIDES IN FLORIDA ASSERT

MIAMI, Oct. 19.—Refugees from the impoverished South Asian country of Bangladesh have begun making their way illegally into the United States by way of the Bahamas, the immigration authorities here said today.

Officials of the Immigration and Naturalization Service estimate that as many as 400 Bangladesh citizens may have arrived illegally in Florida since June and then fanned out through the country, and they say thousands more may follow.

Dwayne Peterson, the chief of the antismuggling unit of the Border Patrol in Miami, said the Bangladesh aliens who had come here so far were from a community of some 15,000 Bangladeshis who had been living in West Germany. He said they had also entered West Germany illegally, but after years of legal appeals had been told they must leave.

The estimate of 400 illegal aliens from Bangladesh comes from interviews with 57 caught while attempting to enter this country. To immigrate to the United States legally can be a long and complicated process and relatively few who apply are accepted.

As an initial step toward ending the influx in the early stages, Mr. Peterson said, the Federal Government has asked the Bahamian Government to begin requiring visas of the Bangladeshis.

The Bahamas and Bangladesh, formerly known as East Pakistan, are former British colonies, and Bangladesh citizens can travel to the Bahamas without obtaining visas.

The Bahamian island of Bimini, about 50 miles southeast of Florida, has been a "notorious jumping-off point" for many illegal aliens heading for Florida, Mr. Peterson said. It is relatively easy, he said, to hire a small boat or airplane in Bimini that will deliver aliens to Florida.

Mr. Peterson said the Bangladesh refugees have been taking commercial flights from West Germany to the Bahamas, then taking commuter flights to Bimini, where they pay about $950 for a clandestine journey to Florida. A regular one-way seaplane trip from Bimini to Miami costs $45.

In late 1981, Mr. Peterson said, the State Department presented evidence to the Bahamian Government that Colombians were using the islands as a base for illegal immigration to the United States. In response, he said, the Bahamian Government acted within five days to require Colombian tourists to the islands to obtain visas.

That move significantly slowed the smuggling of Colombians, he said.

He said that unlike other refugee groups entering South Florida, the Bangladeshis were generally well educated and "capable of taking technical jobs away from U.S. citizens."

Beverly McFarland, a Miami spokesman for the immigration service, said one group of six Bangladesh men had made their way to Fort Lauderdale, then offered a taxi driver $1,500 to take them to New York.

About half of the 57 Bangladeshis under arrest are in the custody of Federal marshals as material witnesses since they were caught in the company of their smugglers. The rest are being held in the Krome Detention Center in Miami awaiting deportation hearings.

[From the New York Times, Nov. 21, 1982]

MEXICAN WOMEN CROSS BORDER SO BABIES CAN BE U.S. CITIZENS

(By Wayne King)

BROWNSVILLE, TEX., Nov. 17.—Ilda Leal, a small, shy, 27-year-old woman, is fairly typical of the Mexican women, now numbering in the thousands, who are coming across the border every year to have their babies in the United States.

They come, many of them, so the baby will be born an American citizen, with all the advantages that that brings. But the practice also raises thorny problems, ranging from a court case over deportation of parents through fears of unregulated care for the mothers to charges that some of the babies are being sold in a black market.

Mrs. Leal is hesitant at first, but she grows talkative as she looks on her fine boy, Abiel Leal Jr., dozing and gurgling on the bottom bunk of a double-decker bed in the cramped but spotless five-room house of Margarita Garcia. Mrs. Garcia, a stocky, strong woman of 47 whose broad face is usually split by an equally broad smile, is a lay midwife, or a "partera," as she is called in Spanish, the only tongue that she and most of her clients speak.

After Mrs. Leal became pregnant, she began seeing a doctor in Mexico, she said through an interpreter, "but then got the idea to have the baby in the United States, because they have better rights, protect the children more."

Her husband, she said, had reservations at first about having the baby at all, but she insisted, convincing him that if they ever wanted to "fix the papers," to get a visa and perhaps eventually apply for United States citizenship themselves, "it would be better if we have an American baby."

Many women make similar journeys to Mrs. Garcia and about 35 other parteras in Cameron County, just across the narrow Rio Grande River from Matamoros on the Mexican side. The midwives attract pregnant women because, among other reasons, they charge less than hospitals and offer natural childbirth. Last year, the midwives delivered 2,303 babies, almost a third of the 7,082 born in Cameron County. Half or more of those delivered by the parteras, according to county health officials and the midwives, were born to Mexican nationals like Mrs. Leal.

In adjoining Hidalgo County, lay midwives accounted for 1,095 deliveries, or 12.7 percent of the attended births in that county in 1981; in Webb County, which includes Laredo, for 790, or 20.9 percent; in El Paso 1,163, or 9 percent.

In each county, half the mothers whose deliveries were attended by lay midwives were from outside the county. "And most of those, almost all, were folks coming across the border," said Tony Grigsby, administrative assistant to Hector Uribe, a Texas State Senator who has been trying for three years to pass legislation providing for the training and regulation of midwives.

Except in instances in which the mother enters the United States illegally, the practice of crossing the border to have a baby is entirely legal.

"If she has a document for entry and there is no reason to deny that entry, she can come in," said Berl Williams, acting agent in charge of the Immigration and Naturalization Service at Brownsville. "The local crossing card is good for 72 hours. We don't stop pregnant women at the border."

Although the children are citizens by virtue of being born on American soil, their parents are not.

Thus, while new Americans like seven-month-old Abiel Leal have the same rights and entitlements as any other citizen, including free public education, Social Security, Medicare, voting, qualification to hold public office and so forth, his parents have little if any advantage.

"It does not aid the parents in gaining citizenship," said Mr. Williams.

A BUS TRIP TO BROWNSVILLE

Nonetheless, Mrs. Leal thought that the opportunities were great enough on the day when she began to feel the contractions that signaled that the birth was near. She walked out of her house in Matamoros and caught a dusty local bus to the bridge leading to Brownsville and the United States. There she got out and walked across, showing the border guards her 72-hour visitor's pass.

At the end of the bridge, she walked the five blocks to the home of Mrs. Garcia, who had been recommended to her as "the best."

Mrs. Garcia's little house, crammed with knick-knacks, ceramic dolls and pictures of Jesus, is both home and birth clinic, with two tiny rooms with a cot in each for delivering babies.

On the front of the house, which is painted bright yellow and trimmed with blue, is a vivid blue sign decorated with a pair of storks bearing bundles and the words "Se Atendien Partos," meaning "Births attended here."

"I'M NOT THE ONLY ONE"

By the time Mrs. Lea reached the house at 7 A.M., the contractions had quickened, and four hours later, with Mrs. Garcia's help, she gave birth to Abiel.

"I'm not the only one to do this," she said during her postnatal visit to Mrs. Garcia today. "One of my best friends did it last month."

As Mrs. Leal spoke with Mrs. Garcia, another young woman, 18-year-old Alicia Torres, arrived at the door. She, too, had crossed the bridge from Matamoros, heavy with her first child, her dark eyes moist with concern, believing the birth was near.

Placing the young woman on one of the cots, Mrs. Garcia checked her pulse and blood pressure, talked easily with her in rapid Spanish, and held a stethoscope to her stomach, listening to the faint flutter of the heartbeat inside. Smiling, she said, "Eight days."

"HERE, THE CARE IS BETTER"

Reassured, the woman said she had come to the midwife to have her baby because, "over here, the care is better."

Asked if American citzenship for the child was also a factor, she shyly said yes.

No one is quite sure how many women cross the border to have their babies each year, but it is a phenomenon that occurs at major crossing points all along the 1,950-mile border between the United States and Mexico.

Until a change in immigration law in 1977, a child born in the United States could be a sponsoring agent to gain resident status and eventual citzenship for his parents regardless of his age.

Now that cannot be done until the child is 21 years old. As a result, alien parents of

American citizens who have no legal reason for remaining in this country are subject to deportation.

Because of a civil suit brought in Federal District Court in Chicago, a moratorium was declared on such deportations until the question could be resolved legally.

A suggestion by the Reagan Administration that the moratorium might be revoked generated an uproar among Latin Americans. Last Mother's Day, there was a protest march by some 2,000 Mexican-Americans in Dallas.

A class action suit seeking to stop any further deportations is now pending in Federal District Court in Dallas.

MEDICAL QUESTIONS RAISED

There are also serious medical questions as well as instances of selling birth certificates and allegations of a black market in babies born to alien parents.

"It's a humongous problem and it's gotten worse," said Dr. Jesus Caquias, director of the Brownsville Community Health Clinic, whose midwife program, staffed by six trained nurse-midwives and serving only county residents, almost exclusively Mexican-Americans, is booked through March.

Besides the staff midwife program, the clinic provides screening and prenatal and postnatal care to the clients referred by the lay midwives.

Dr. Caquias, who is of Puerto Rican descent and was brought up in the Bedford-Stuyvsant section of New York City, said: "When I first came here, I was appalled by some of the stories I heard about dead babies being carried across the bridge, all sorts of horror stories, the selling of babies. There was no medical support."

"A good portion came from the Mexican side and most presented themselves late in the trimester," he said, speaking of past practices. "Now we do screen them to make sure none with complications go to the lay midwives."

"In my opinion," he said, "the midwives are quite competent. Anyone can deliver a baby. I did it myself in New York as a cabdriver, on the sidewalk. The problem is when they are presented practically in labor, just to have their baby born here."

While Dr. Caquias concedes that his worst fears about the midwife program have not been realized, he remains concerned about the lack of training and regulation of the lay midwives.

For the past five years, through local legislation, Brownsville has had a program for training and certifying the lay midwives. Without the certification, they cannot practice in the city.

However, of 35 lay midwives who enrolled in the program five years ago, only eight remain. The rest simply moved out of the city into the country, where there are no regulations.

"HANG OUT A SHINGLE"

"All you have to do is hang out a shingle and start delivering babies," said John P. Schaaf, executive director of the Brownsville clinic.

Because of what many consider a poorly regulated system of registering births in Texas, there have been some sales of falsified birth certificates, a method of gaining instant citizenship.

In September, three women, including 29-year-old Estelas Guzman Gallegos, one of the city's licensed lay midwives, were sentenced to three years in prison for selling falsified birth certificates to 13 Mexican nationals to make it appear that they were born in Brownsville and were thus American citizens.

The Mexican nationals paid from $300 to $2,400 for the false documentation.

Health officials and others here say that the legal authority of the lay midwives to fill out birth certificates has led to traffic in "black-market babies."

The practice came to light two years ago when it was discovered that a lay midwife had accepted a fee of $250 to falsify the birth certificate of a baby girl born to a 19-year-old woman who was an illegal alien.

The midwife testified in court that she had told the mother that the child had died. Instead, the midwife made out a birth certificate listing another couple, American citizens, as the natural parents, and gave the baby to them. She received a fee of $250, and another $250 was given to the Mexican mother.

In another such case, a mother who had sold her child to an American couple and was receiving a monthly payment decided she wanted the child back and went to the authorities.

"WAY TO MAKE EXTRA INCOME"

No one has determined the extent of the black market in babies born to aliens, many unmarried, but Dr. Caquias at the Brownsville Community Health Clinic said a few unscrupulous midwives apparently saw it as "a good way to make some extra income—an agreement between the mother and the partera."

Despite medical problems and other abuses, Dr. Caquias and other medical people here say the lay midwife system is largely beneficial, if properly regulated, particularly because most midwives charge from $150 to $200, as against about $800 for a hospital birth attended by a physician.

Too, many Hispanic women have far more confidence in the midwives than they do in doctors and hospitals.

Another factor is that many mothers prefer a natural birth. Parteras use no drugs—"no aspirin, no nothing," said Mrs. Garcia, a trained nurse who is regarded as one of the best of the Brownsville midwives.

A half-mile away from Mrs. Garcia's home another midwife, Josefina Salinas, a second-generation partera whose mother delivered babies until she was 79, more than 4,000 of them, had just delivered Mario Alberto Flores, the first child of 19-year-old Rosaura and Alfred Flores.

For Mrs. Flores, an American citizen, the attractions of the midwife were * * * personal preference.

"I wanted to know how it felt," she said, looking at nine and a half pound Mario sleeping contentedly on a cot under the watchful eye of Mrs. Salinas.

"Everybody told me it was going to be hard," she said. "It wasn't. I am happy."●

A TRIBUTE TO JAY C. EHLE

HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. MOTTL. Mr. Speaker, I take this opportunity to pay tribute to Mr. Jay C. Ehle, one of the most successful businessmen in the Greater Cleveland area. He is the current president and chairman of the Cleveland Builders Supply Co.

Jay was born in 1917 in Cleveland. He graduated from Kenyon College in 1938. He married Janet Greiner in 1939 and is the proud father of three children. He joined the Cleveland Builders Supply Co. in 1938 and became the vice president of operations in 1953. In 1958, he became the vice president and general manager of the company and then its president in 1963. He also assumed the chairmanship of the company in 1966.

The Cleveland Builders Supply Co. has annual sales of approximately $45 to $50 million. They are the distributors of many building products and have plants throughout northern and central Ohio as well as in the Detroit, Mich., area.

Jay has a long and impressive record of service to the community as well. He is a member of the Masons, Shriners, and Jesters. He has worked on various civic drives including fund raisers for Kenyon College, Case Western Reserve University, and the Boy Scouts of America. He has served on the board of trustees of Lakewood Hospital and the board of the Greater Cleveland Growth Association.

Currently, he is the vice president of the Boy Scouts of America, the director of BancOhio National Bank in Cleveland, the chairman of the Cleveland-Cuyahoga County Port Authority, and the director of the Great Lakes Historical Society. He was the commodore of the Cleveland Yachting Club in 1965 and has done continuing work on recreational boating facilities. He belongs to the following boat clubs: The Cleveland Yacht Club, the Catawba Island Club, and the Old Club. He is also a member of the Union Club and the Hermit Club.

Jay Ehle is truly an inspiration to all who meet and know him. I salute him for a brilliant career and wish him the best of luck in the future. Cleveland is indeed proud of this exceptional man who has lived in and served the area so well.●

DISASTER ASSISTANCE IN TEXAS

HON. CHARLES W. STENHOLM

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. STENHOLM. Mr. Speaker, In September of this year a 38-county area in west Texas was declared a disaster area for purposes of offering assistance to legitimate small business affected by poor crop performance. Severe hail and rain storms earlier this year preceded the declaration. Because otherwise normal free market conditions were affected due to this natural disaster, economic intervention was necessary. The assistance that was ordered in the area included

economic injury disaster loans also known as EIDL (pronounced "idle"). These EIDL loans are offered to small businesses affected by poor crop performance due to the disaster. Since the Small Business Act is intended for the purposes of aiding small business only, it is legitimate for the Small Business Administration to have a determining procedure. This is known as size standard determination.

In the case of small agriculture cooperatives, size standards are not limited to the size of the operation, but also to the size of each and every member of the cooperative. To those who understand the intention of the Capper-Volstead Act that established the farm cooperative, it is apparent there is no major economic interest in the cooperative that a member would have which should require the member to submit financial disclosure forms. This is not to mention that many of these cooperatives have several hundred members, some of whom are landlords and have no connection with the co-op directly. To require that each member provide SBA with financial statements to substantiate its size is unreasonable, due to the size of the membership and their financial relationship with the co-op.

The Small Business Administration, admittedly, has tried to find a solution to this dilemma. This is not the first year and west Texas is not the only area in which these rules have unjustly disqualified cooperatives from small business assistance. The SBA just last year was communicating with its regional offices in search of an answer to these policy issues. The fact is: The law is not clear on agriculture cooperatives, and the SBA has no intention of reviewing these regulations in light of the conditions that I have presented.

SBA regional offices have waived this paperwork requirement in the past, as one regional counsel stated, "because a pragmatic approach would be in the best interests of the cooperative and the Small Business Administration." It is obvious by the regional applications of these rules that an early review would be warranted. However, SBA insists that its current regulations will stand as is, unless corrective legislation is passed.

For this reason, I am today introducing legislation that finally offers the necessary language to satisfy the SBA regulators. They can proceed with legitimate exemptions of small farm cooperatives that are no larger and sometimes smaller than their competition, yet which would not be assisted in the same way with economic injury loans.

It should be understood that these loans would continue to be made under the premise that participation of small agricultural concerns in the free market process has been hampered by uncontrollable forces, namely a natural disaster. This would not require SBA to waive size standards for the co-op in the event of a disaster. And it would continue to allow SBA to seek size standards of the co-op members when otherwise normal market conditions exist.●

WHALE PROTECTION WILL BE ENHANCED THROUGH THE GOVERNING INTERNATIONAL FISHERY AGREEMENT WITH JAPAN

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. BONKER. Mr. Speaker, as the House considers H.R. 3942, which contains the new governing international fishery agreement with Japan, I would like to enter into the RECORD two items to amplify and to clarify the legislative history of this GIFA. One is a letter of December 3, from Senator PACKWOOD to the Acting Secretary of State which sets forth concerns that I share about Japan's continuing disrespect for the International Whaling Commission's decisions on commercial whaling. The other is the Acting Secretary of State's response of December 4.

At the 1982 IWC meeting, the United States led the conservationist countries to a major victory in the decade-long struggle for increased whale protection: the IWC voted overwhelmingly to place a moratorium on all commercial whaling in 3 years. However, Japan has filed an objection whose purpose is to exempt Japan from compliance with the commercial whaling moratorium. Japan's decision to file an objection demonstrates once again its intent to ignore important whale conservation measures. Last year, Japan filed objections to two key IWC provisions banning the use of the cold harpoon and sperm whaling. As the leader of the whaling nations and as the country that has most consistently sought to undermine the IWC's regulations, Japan's requests for fisheries allocations in the U.S. 200-mile zone deserve special scrutiny.

I support the GIFA with Japan as providing a sound basis for promoting and enhancing the interests of our domestic fisheries industry. However, I believe that in addition to the needs of our fisheries industry Japan's conduct on whaling should be taken into account when we consider the sharing of our fisheries resources. That is the point of the exchange of letters between Senator PACKWOOD and the State Department. The State Department's letter says, in part: "We are also prepared to use available laws and regulations, beginning this spring, to prevent Japan from thwarting the IWC cessation decision." My understanding of the State Department's letter is that future U.S. Government decisions on fisheries allocations under the GIFA will depend upon whether Japan decides to abide by the IWC's regulations and withdraw the objection it filed to the 3-year deferred cessation of commercial whaling.

Mr. Speaker, the administration's commitment to consider Japan's conduct on whaling when allocating our fisheries resources under the GIFA will strengthen our country's longstanding pledge to support whale protection efforts. The letter follows:

U.S. SENATE, COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION,
Washington, D.C., December 3, 1982.

Hon. KENNETH DAM,
Acting Secretary of State, Department of State, Washington, D.C.

DEAR MR. SECRETARY: In our letter of August 31, 1982, to Secretary of Commerce Malcolm Baldrige, signed by 66 U.S. Senators, we called for the United States to strive vigorously to prevent whaling nations from filing objections against the IWC decision to impose a moratorium on commercial whaling beginning in 1986.

"If we succeed in preventing objections against the IWC cessation decision," the letter concludes, "we will avoid a period of tension and uncertainty with respect to fisheries. This will permit U.S. fishermen and processors to conclude fishing agreements which promote the interests of the majority of citizens, including fishermen from both whaling and non-whaling countries . . ."

Unfortunately, objections have now been filed by several nations. The period of "tension and uncertainty (in) our relations with whaling nations with respect to fisheries," which we had hoped to avoid, is clearly upon us.

However, despite the fact that the largest whaling nations have already filed objections, we do not feel that acceptance by all nations of the cessation decision is necessarily unobtainable.

Paragraph five of our August 31 letter urges that "In addition to a clear statement on the Pelly and Packwood amendments . . . (the U.S.) . . . assure the whaling nations that other means available to us to reinforce the IWC will not be ignored. For example, the allocation process within FCMA provides ample discretion to adjust allocations (either up or down) in response to a wide spectrum of U.S. objectives and concerns. This means of lending substance to U.S. policy on whaling should certainly be considered. GIFA's under FCMA are, of course, another area subject to review by Congress."

In the case of Japan, we note that the decision to object was made during the final weeks of a "lame duck" government, after intense internal debates. The incoming government is committed to improving relations with the United States. The incoming regime may be induced to reconsider the prior government's objection to promote improvement in Japanese-United States relations. The intense nervousness among Japanese officials, the Japanese fishing industry, and the Japanese press over fisheries relations with the United States, makes it inevitable that the new Japanese GIFA, and allo-

cations to be made under the GIFA, will be very much on the minds of Japan's new leaders as they review the whaling policy adopted by the previous regime.

The U.S. Senate and House are currently in the process of reviewing the GIFA within the 60 days provided by FCMA. As you know, the current GIFA will expire before this 60-day period has elapsed which makes action during the "lame duck" session imperative. Given the intense public concern over whaling reflected in the August 31 letter, our conclusions with respect to the GIFA cannot be entirely divorced from the whaling question. It is necessary for us before reaching any final conclusion on the GIFA, to have a clear statement on whether the Administration is willing to use measures such as those mentioned in paragraph 5 of our August 31, letter to Secretary Baldridge (referenced earlier in this letter).

In making this statement we realize that any use of these measures must only be done after full consideration of the likely effect on the United States fishing industry. It is not our intent that this policy result in harm to this very critical sector of the American economy.

Lastly, we must stress the time constraints we face on this issue. Due to the pending expiration of the Japanese GIFA, it is crucial tht this issue be resolved during the "lame duck" session. Therefore, we must ask that your response to this inquiry be received by December 8 at the very latest. Any delay past that point could well threaten our ability to ensure action on the GIFA during the "lame duck" session.

Cordially,

CHARLES H. PERCY.
BOB PACKWOOD.

DEPARTMENT OF STATE,
Washington, December 4, 1982.

Hon. BOB PACKWOOD,
Chairman, Committee on Commerce, Science and Transportation, U.S. Senate.

DEAR MR. CHAIRMAN: I am writing with regard to the United States-Japan Governing International Fisheries Agreement (GIFA) which is before the current special session of Congress for approval. As you know, we strongly advocate approval of the GIFA at the current session. The Agreement should be approved on its own merits. It will provide substantial and direct benefits to the United States fishing industry.

At the same time, we share your commitment to the full and effective implementation of the International Whaling Commission (IWC) decision providing for a cessation of commercial whaling. It is our intention to use the means at our disposal to secure this objective. In this regard, however, we believe that disapproval of or failure to act upon the new GIFA with Japan will serve neither this objective, nor the range of U.S. interests at stake in this area.

We are encouraged by the seriousness with which the Government of Japan has responded to our interest in timely and constructive consultations on this matter. Further discussions will, however, be necessary over the next several months. Obviously, we are very hopeful that these discussions will be successful. We will review their progress and, if they are not productive, we will undertake every diplomatic means open to us. We are also prepared to use available laws and regulations, beginning this spring, to prevent Japan from thwarting the IWC cessation decision.

Sincerely,

KENNETH W. DAM,
Acting Secretary.●

HON. DON H. CLAUSEN

HON. JOHN T. MYERS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. MYERS. Mr. Speaker, I want to join with my colleagues who have already participated in a special order honoring Representative DON H. CLAUSEN of California.

DON was first elected to Congress in 1963 from California's Second Congressional District. The Redwood Empire, as it is sometimes called, stretches from the Marin County line, a few miles north of the Golden Gate, to the Oregon border. His district includes the beautiful California coast as well as the famous Napa Valley known for some of the best wine in the world.

Prior to his election to the House of Representatives, DON served for 7 years at the level of government as a member of the Del Norte County Board of Supervisors. Before his entry into public service, DON was a Navy pilot and actively involved in banking, insurance, and commercial aviation.

During his 20 years in the House DON moved up the ladder to become the ranking Republican member of the Public Works and Transportation Committee and second ranking Republican member on the Interior and Insular Affairs Committee. He has shown great leadership on both of these committees.

In recent years, I have often gone to DON for help and advice about projects and programs from his committee. I have learned that his advice has always been most appropriate and honest. We will all miss his help, his advice, and his counsel.

DON CLAUSEN has been a hard worker, dedicated public servant, and a good friend. I will greatly miss having him as a colleague. My wife Carol and I wish DON and his beautiful wife, Ollie, success and happiness in the future.●

SOUTH BRONX NEIGHBORS HOLD DEVASTATION AT BAY

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. GARCIA. Mr. Speaker, the South Bronx is in the early stages of undergoing a dramatic economic revitalization. I would like to address a recent New York Times article that speaks of the potential of resurging urban areas, such as the South Bronx.

The Longwood Community, designated as a historic district, has little in common with what many think of the South Bronx. It is a community born in the 19th century and composed of homeowners who have lived in one house for 30 or 40 years. The neighborhood spirit that has nurtured in Longwood has also served to deter crime because residents protect each other in the fashion of a traditional, small-town, mutual support group.

If one looks at the South Bronx, neighborhood by neighborhood, one can see it beginning to come together, and can get an image of how the South Bronx can be restored. The Longwood area is one of the most visible symbols of that now.

I would like to introduce this article, a tribute to the optimistic spirit of the Longwood Community of the South Bronx, for the benefit of my colleagues.

[From the New York Times]

SOUTH BRONX NEIGHBORS HOLD DEVASTATION AT BAY

(By David W. Dunlap)

There are many times when Beck Street is so quiet you can hear the wind in the maples.

"I was looking for a nice place with a country-like atmosphere," recalled Ann Wiggins, standing before the 82-year-old house on Beck Street that has been her home since 1946. "I found this—with trees along the street. I love this area. There was no reason to run."

Mrs. Wiggins lives in the South Bronx.

But her tiny neighborhood, known as Longwood, has little in common with the prevailing image of the South Bronx. Hers is a community born in the 19th century and composed of homeowners, of acquaintances who know every face on the block, of people who have lived in one house for 30 or 40 years.

DESIGNATED A HISTORIC DISTRICT

It is also a seven-block historic district, so designated by the city's Landmarks Preservation Commission in 1980 because it "contains some of the best of the turn-of-century architecture that transformed the Bronx into an urban extension of Manhattan."

Most all of the two- or three-family houses in Longwood come in pairs—bay-front twins joined by their roofs, many of which are capped by cone-shaped peaks. Different pairs have their own nuances, but the ensemble is unusually and pleasantly harmonious.

Longwood's distinction is much more than architectural. It was one of the South Bronx neighborhoods that survived—scarred at the edges but largely intact.

"When Harlem had its problems in the 1940's, my family came up here and fell in love with this house," said Thomas J. Bess, the co-chairman of the Longwood Historic District Community Association. He lives at 947 East 156th Street.

"We wound up bringing in the whole family from New York," Mr. Bess said. "When the problem period began, a lot of us felt it would never hit us; it would just skirt us. But by the late 60's, I said, 'My God, we'd better get out of here.'"

"I wanted to stay in the Bronx and began to look for other housing," he continued, "but there was nowhere nearly as good as what we had. My aunt and I decided we were going to stay."

Mr. Bess said the neighborhood group's nucleus was the band of homeowners who chose not to leave Longwood.

CHANGE BATTLED BY COMMUNITY

It was four years ago that the association pursued designation and two years ago that the Landmarks Commission bestowed it.

Kent L. Barwick, the commission chairman, said: "The architecture, in effect, became the 'organizing tool,' as social workers call it. It was something to build on."

"We're speaking an entirely new language," said Marilyn Smith, the other co-chairman of the neighborhood association—" 'polygonal roofs,' 'halfmansards,' 'fenestration,' 'lintels,' 'porticoes.'"

One of the most recent community battles was an esthetic one, involving a Dawson Street homeowner who had replaced the lacy iron gate to his driveway with a solid, roll-down one.

"When I see something going wrong, I talk with my neighbor," said Agnes E. McTurner Holloway, who lives a few doors down. But this conflict went all the way to the Landmarks Commission.

Mr. Barwick rather marveled at the circumstance, explaining: "The community came all the way down here and said, 'We're not against our friend, but we're trying to build our neighborhood.' The guy, without waiting for us, agreed to take it down. It's a little instance of neighborliness that wouldn't have gone that way three years ago."

Such a spirit means more than success in esthetic fights. It is also a help against crime. Mr. Bess credited many of the older people with keeping the traditional, small-town vigil.

"My car was burglarized twice," Mrs. Smith said, "but one of those burglaries was aborted because a neighbor called out. You have a community of people who look out for one another. That's a spirit that's been lost in urbanization."

Beyond neighborliness, what also helped keep Longwood together was Prospect Hospital, a 175-bed proprietary institution that grew while the South Bronx declined and now admits some 10,000 patients a year.

Its executive director, Dr. Jacob B. Freedman, was born in the neighborhood. After a number of years away, he returned to Longwood and in 1963 built a modern facility.

"I felt that the future for a new hospital in the community existed," he said.

Dr. Freedman likes the fact that his old neighborhood is a historic district. "It's bringing to our community recognition and growth," he said, "and it's attracting good people to move into our brownstones. The community is only undervalued because it's undiscovered."

One of those who has discovered Longwood is Anita Miller, director of the South Bronx program at the Local Initiatives Support Corporation in Manhattan, which supports community groups, directed by advisors from 10 corporations and four foundations.

COSTS CONSIDERED FOR ELDERLY

"When you look at the South Bronx as a whole, it's mind blowing," she said. "But if you look at it neighborhood by neighborhood, you can see it beginning to come together, you can get an image of how the South Bronx is going to be restored. And I think the Longwood area is the most visible symbol of that now."

The neighborhood association has done well getting money from the city's Facade Improvement Program, the New York State Division of Housing and Community Renewal and the Inner City Ventures Fund operated by the National Trust for Historic Preservation.

But no one is so bold as to call it a happy ending yet, particularly in a community whose aging population is trying to get along, in many cases, on fixed incomes.

Ernestine L. Jackson, the association's project director, said that, of the 127 homes in the district, 97 were owner-occupied and a majority of these owners were old people.

"While the housing stock is beautiful and very attractive," Mrs. Miller said, "unless we get a handle on those houses, it's going to be very hard for the current homeowners to maintain them."

"Our fund-raising is an ongoing effort to help the senior citizens," Mr. Bess said, and Mrs. Smith finished the sentence, to bring down the costs of maintaining property so that the senior citizens won't be displaced."

The association is also negotiating to buy eight abandoned city-owned houses that it will rehabilitate. The problem is that that will probably cost $1 million.

"There is not a market for $80,000-to-$90,000 homes in this area," Mr. Smith said.

"At this time," Mr. Bess added, with something of a smile.

"I hope never," Mrs. Smith concluded. "I hope to pass my home on to my children."●

CLAIR W. BURGENER

HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. ZABLOCKI. Mr. Speaker, I welcome this opportunity to join my colleagues in honoring the congressional career of the distinguished gentleman from California (Mr. BURGENER).

As a member of the Committee on Appropriations and as the ranking minority member of the Subcommittee on Legislative Branch, CLAIR BURGENER has played an important role in the legislative process—and he has had an especially important impact on our own congressional operations.

In addition to this record, however, he has been very active in a wide range of important causes and local volunteer efforts in his own community. He has been chairman of the Heart Fund Campaign and United Fund Campaign of San Diego and a leader in the movement to combat mental retardation and to assist handicapped children—both at the local and national levels. This is the kind of personal involvement which has characterized his 10 years of service both to his constituents and to this body.

To CLAIR BURGENER and his family, I extend my warmest best wishes for a successful and rewarding future, and I commend the gentleman for his outstanding service to the Nation.●

RESTRAINING THE NUCLEAR ARMS RACE

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. CONYERS. Mr. Speaker, when the energy and water development appropriation bill (H.R. 7145) comes to the floor, I shall be offering an amendment to delete $2.233 billion from the national security programs that fund nuclear warhead development, testing, production, and stockpiling. The purpose is to remove only those funds that will be used for the development, testing, and production of new warheads. The amendment leaves ample funds to maintain and upgrade existing plants, reactors, and stockpiles. The deletion amcunts only to 38 percent of the committee's recommendations.

I believe the United States and the U.S.S.R. have a precious opportunity to move significantly forward on nuclear arms control. The Soviet leadership has changed, and I detect a willingness of the new leadership to engage in serious arms control negotiations. The risks of perpetuating and extending the arms race far outweigh the risk of undertaking a nuclear warhead moratorium on our part. The administration has given the go-ahead for producing an additional 37,000 new nuclear warheads during the next decade or so. I daresay the Soviets will match our expansion, just as we have matched theirs. So instead of a superpowers' nuclear stockpile of 50,000 weapons currently, we will find a stockpile of 100,000 or more warheads in the next decade. That does not make any sense.

The news reports from Europe clearly indicate that our allies are disposed to enter upon arms control negotiations with the Soviets. Denmark has decided not to support U.S. plans to deploy Pershing missiles. There are indications that the Netherlands and Belgium will follow suit. European opinion appears to be intensely opposed to further escalation in the nuclear arms race.

In our country, the November election should have dispelled any doubts about American sentiment toward the arms race. The nuclear freeze referenda demonstrated strong sentiment for initiatives and negotiations to halt the arms race. There is also growing awareness of the debilitating economic effects of massive military spending in this country and in the world.

The dangers of nuclear confrontation are even greater than the horrendous numbers of current weapons suggest. Every new nuclear weapons system adds greatly increased accuracy and speed. Under these conditions,

nuclear weapons can easily be launched as the result of miscalculation or error. This year alone, over 100 false alarms of nuclear launches occurred. The Soviet Union recently warned that they will move toward "a launch-on-warning" strategy if we deploy MX missiles. The growing sophistication, accuracy, and speed of weapons are the very incentives for a preemptive first strike.

What is the value inherent in continuing the nuclear arms race under these conditions? Consider the competitive race during the past 30 years. The United States exploded the first atomic weapon in 1945; the Soviets obtained theirs in 1949. The United States built the first hydrogen bomb in 1954; the Soviets followed suit 1 year later. The U.S.S.R. was the first to successfully test an ICBM in 1957; we tested ours in 1958. The United States deployed the first submarine-launched ballistic missile in 1960; 8 years later, the Soviets deployed their own. In 1966 the United States deployed the first multiple warhead, and the Soviets matched that in 1968.

The Soviets deployed the first anti-ballistic missiles in 1968; we matched them in 1972. In 1970 the United States developed the first multiple independently targeted warhead (the MIRV); 5 years later, the Soviets followed suit. The United States built the first long-range cruise missile in the past few years; it is said the Soviets are several years behind. In the same way, the Soviets will match us in our enhanced-radiation tactical nuclear weapons, just as we, no doubt, will match them in developing antisatellite and other space weapons.

What possible value is there is continuing this incalculably wasteful and dangerous competition? I know of none.

The amendment I will be offering would send a reasonable signal to the Soviet Union and the world that we are absolutely serious about curbing the nuclear arms race. I believe it could create or advance the context for an agreement between the United States and the U.S.S.R. to curb this deadly competition by taking a first step in freezing nuclear warheads at existing levels.●

AMNESTY INTERNATIONAL GROUP 154 (MID-WESTCHESTER) MONITORS TURKISH PRISONER OF CONSCIENCE ALI SAHIN

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. OTTINGER. Mr. Speaker, I rise to bring to the attention of my colleagues the plight of Mr. Ali Sahin of Turkey, who has been designated by Amnesty International as a "Prisoner of Conscience." Mr. Sahin's case is being closely monitored by Amnesty International's Group 154 of Mid-Westchester, N.Y.

Ali Sahin is 1 of 52 leading officials of the Turkish Confederation of Progressive Trade Unions (DISK) arrested under article 146 of the Turkish Penal Code which carries the death penalty. According to Amnesty International, Sahin and his colleagues have been accused of "intending to change the order of the State by force." However, the 817-page indictment, read in its entirety in full court, does not contain accusations or evidence of use of force by the defendants. They appear to be prosecuted solely for their trade union activities, in violation of article 11 of the European Convention on Human Rights to which Turkey is committed.

Mr. Sahin has been a distinguished labor leader. He served as a member of the DISK management board; as national board member of the 5th national congress of DISK, and as secretary general and president of the Glass Workers' Union.

In addition to appealing for the release of this 45-year-old man, Amnesty International Group 154 is particularly concerned about his health and is seeking information about his medical condition. The basis for this concern are reports that over 30 of the 52 defendants have claimed that they were tortured during interrogations.

I strongly urge the Reagan administration and the State Department Bureau of Human Rights and Humanitarian Affairs in particular, to speak out against this terrible violation of human rights, and to closely monitor the condition of Ali Sahin and his colleagues. I also commend the tireless efforts of the members of Amnesty International and Group 154 in Mid-Westchester. These people have been vigilant in the defense of human rights throughout the world, and deserve great praise for their work.●

POOR DRAINING CHARITIES

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Ms. MIKULSKI. Mr. Speaker, I am submitting for the RECORD, an article by Larry Carson that appeared in the November 17, 1982, Baltimore Sun newspaper. I would like my colleagues to have the opportunity to read a stark and graphic description of just how desperate our social work agencies and charities are getting. The number of poor in this country is increasing and the resources of the private sector charitable organizations are being stretched to the limit. This cannot go on. We, as leaders of this country, have an obligation to insure that people in this great Nation do not starve to death and do not freeze to death.

POOR ARE DRAINING CHARITY COFFERS HERE

(By Larry Carson)

Increasing numbers of poor people, desperate for emergency food as well as money with which to pay overdue utility and rent bills, are straining the resources of private charities in Baltimore.

The sharp increase in the number of people requesting emergency aid this fall has forced many private agencies to cut back in different ways, either by limiting the help they give or the number of people they see.

Associated Catholic Charities, already forced to cut the amount of help it provides each applicant, expects to turn people away for the first time in December.

The Franciscan Center on Maryland Avenue now refuses to give any money to people with unpaid utility bills of more than $800, believing the $15 or $20 it could give is better spent on those with smaller bills.

The Maryland Children's Society on West Hamburg Street isn't advertising its emergency food services in Steuart Hill and on West Baltimore Street anymore, said Bill Grimes-Wyatt, its director.

"We get five to 10 calls a day for help with gas and electric bills," Grimes-Wyatt said. "We can help maybe one per month."

"We've been cutting back on main dishes too," he added. "We're giving out more starches, soups and vegetables."

David Tabler, chief of the city's emergency services division, said the ranks of those now seeking assistance contain many newly desperate people, people who never needed or asked for such help before.

"It's no longer only the chronic poor, not even the working poor. We're seeing people who had good, steady jobs who just can't pay their bills anymore. The recently laid-off."

Social workers in the city social services department must work longer to help each client seeking emergency help now, according to Alice Brock, resource coordinator for the department.

Workers get less money from each agency so they must find more agencies to provide the same help. "It's time-consuming and frustrating. There's a lot more burnout" among the workers, she said. In addition, the poor people must travel to each of perhaps four or five agencies, for $10 or $15 donations from each to make enough to pay a utility bill that will be overdue again the following month.

Volunteers manning the private agencies are also put under a strain, she said. "How long can you give. . . . It's debilitating."

At the Franciscan Center, Mary Cooney, one of three workers there, said "we were absolutely flabbergasted" at the number of requests for emergency aid in September.

She said the center had $300 set aside for emergency aid for September. It actually gave out $930.42, borrowing against the winter months ahead to come up with the money. In September 1981, emergency utility aid amounted to $76.31, she said.

Now the Franciscans refuse to give toward utility bills in the $800-and-up range. "They just hold the checks for months until they get enough. We can do more by helping the people who owe less than $100."

So far, she added, the center is holding its own with the emergency food program, the bulk of the effort.

James Libertini, director of the St. Vincent De Paul Society, said, "Things look pretty bleak this year." He said his group works through individual church poor box collections and with a small central fund he administers.

Some parishes, he said, spend $200,000 per year on aid to poor families in that parish. The central fund, tapped to supplement parish money when that runs low, now has only $700 left from what was $5,000, he said.

In addition, there is a fuel fund to help the poor buy heating oil during the winter and that now is appealing for contributions. In 1977 the fund served 343 people in need. Last winter it was up to 626 cases costing $32,000. This year is expected to place even heavier demands on the archdiocesan fund.

The Salvation Army also reports much heavier demand this year for emergency services, but a spokesman there pledged to get whatever money is needed so as not to deny anyone in need.

In June, according to Richard O'Brian, the spokesman, 40 families were aided with emergency groceries. In September, 105 people received aid for groceries.

For utility aid, O'Brian said, $1,750 was given out in September 1981, compared to $2,450 in September 1982. He said the Salvation Army would never turn anyone away, and will find whatever money is needed elsewhere in the budget, or raise it if necessary.

He added, however, that the Salvation Army strongly encourages people to work out repayment plans with BG&E before a bill mounts to $800 or more. Many people, he said, don't work out a plan until the amount becomes enormous and then seek emergency help when the utilities are about to be cut off.

Norma Graham, of Catholic Charities, said the maximum cash assistance for people seeking help with utility cutoffs is now $15, down from $25. She said 737 cases of people seeking emergency help occurred between July and October this year, compared to 687 between July and December 1981.

The program's outreach program, four workers at four downtown churches in poor neighborhoods, received another 305 appeals for emergency help from July through October this year, compared to 385 between July and December 1981, she said.

Catholic Charities spent $3,555 on emergency help in September. Graham said the administrative budget has been used to shore up the badly strained emergency aid budget.

At St. Bernadine's Church in the 3800 block of Edmondson Ave., the Rev. Edward Miller said he receives 25 to 30 requests per week for money with which to help pay utility bills.

"Two families came in last week who said they had no electricity since April and owed $800 to $900 and haven't paid anything," he shrugged.

He said his church has about $100 to $150 per week to spend for emergency help. "The bigger parishes are being hit hard," he said.

"We limit ourselves to those living in Edmondson Village and we can help maybe five to seven families per week at most." He said the church Boy Scout troop built a model oil well on the front lawn and put a sign on it reading. "The well is dry but the people are cold."

That raised $300 to $400, he said, as did a penny-per-pin bowling tournament night. The Rev. Marcus Blackwell said things are similar at St. Edwards Emergency Food in the 900 block of Poplar Grove St. His church is sponsoring its annual 10-mile march for the hungry Nov. 21.

"We can't handle our load," Blackwell said. "We try to get DSS [Department of Social Services] to refer people who live in this area. Otherwise we refer people to other agencies."

Blackwell said four people came in Monday needing food, and one needed help with a utility bill. Last year, he said, the church would get requests from perhaps two or three people per week.

Carol Fields, director of the Bethel AME church in the 4300 block of Druid Hill Ave., said she must limit people to once every other month for emergency food aid instead of the previous limit of once per month. Emergency financial help now is limited to twice a year. "We help as many as we can," and the rest are referred elsewhere, she said.●

OLD GLORY

HON. ALBERT GORE, JR.

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. GORE. Mr. Speaker, it is with great pride and pleasure that I bring to the attention of my colleagues the unveiling of "Old Glory" today in the National Museum of American History.

Named in 1824 by sea captain William Driver, a long-time resident of Tennessee, "Old Glory" is considered to be one of the most important flags in our Nation's history. For 60 years, this 158-year-old flag has been hidden away in a Smithsonian Institution storeroom because funds were unavailable for its restoration.

But through the tireless efforts of concerned citizens in my district and throughout Tennessee, including members of the American Legion and the Daughters of the American Revolution, nearly $11,000 were raised to undertake the difficult task of carefully preserving the badly deteriorated flag. With these funds and the promise of more, the Smithsonian was able to do the necessary work, so that the flag can now be admired by all Americans.

The restoration of this historic flag could not have come at a better time to remind us of America's uniqueness and the pride we have in our country. I commend those Tennesseans and Smithsonian officials who have worked to preserve the flag, showing the rest of the country what patriotism coupled with enthusiasm can accomplish.●

A SALUTE FOR VIETNAM VETERANS

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. EDGAR. Mr. Speaker, during the week of November 8 the city of Washington and the Nation paused to pay a long-overdue tribute to the men and women who served in our Armed Forces during the Vietnam war. A focal point of this tribute was the dedication of the impressive and moving Vietnam veterans memorial on the Mall. That dedication and the events which took place during that week were also-the-center-piece for the largest gathering of Vietnam veterans since the end of the war. Apart from the ceremonies and parade down Constitution Avenue, the National salute to Vietnam Veterans clearly showed a city and a nation extending an emotional welcome and thanks to many who had not seen but who sincerely deserve our respect.

Many individuals deserve our appreciation for organizing and contribution to this occasion. Foremost among that group are the leadership of the Vietnam Veterans Memorial Fund, Jan Scruggs, Robert Dubek, Jack Wheeler, and their staff. Their insight, patience, and determination in conceptualizing the memorial and the salute have made a memorable contribution to the landscape of this city and the lives of thousands of their fellow veterans.

There are many others who also deserve our thanks. As chairman of the House Veterans' Affairs Subcommittee on Education, Training, and Employment, I believe we can be thankful for the events which took place that one week in November. But we also have a responsibility to maintain a very tangible tribute to the Vietnam veteran and all veterans through programs and services provided by a grateful nation through the Veterans' Administration and other agencies, every week of the year. Part of this responsibility is to work through our committee and the Congress to insure adequate budgets, modern medical facilities, and enlightened readjustment and employment programs for those who have served. At the same time we should also pay tribute to the thousands of men and women who work each day through the Veterans' Administration to provide these services for the veteran.

It was therefore very fitting that employees of the Veterans' Administration played a very important role during the National Salute to Vietnam Veterans last month as well. In particular, I would like to single out the staff of the Vietnam veterans read-

justment counseling program (Operation Outreach).

Enacted in 1979 through Public Law 96-22 the readjustment counseling program provides unique personal counseling and psychological services for Vietnam veterans still experiencing difficulties in readjusting to civilian life. From the beginning of the program, thousands of troubled Vietnam veterans have sought and found assistance provided by a dedicated staff in informal storefront centers in communities across the United States. This highly successful program was extended by the Congress in 1981 for an additional 3 years. As a member of the House Veterans' Affairs Subcommittee on Hospitals and Health Care, I know the program will again be one of our top priorities as we seek to encourage and direct its mission further during the 98th Congress.

Readjustment Counseling personnel brought their very special expertise to Washington during the Salute to provide professional services, personal intervention, counseling, and support for hundreds of veterans and their families. At a time when emotions were high, they established mobile vet centers in hotels, at the Mall, and throughout the city 24 hours a day to help ease the lingering pain of the Vietnam war among the many who came to Washington to pay tribute and remember.

Mr. Speaker, I would like to individually recognize those VA and vet center personnel who contributed so much to assist and honor their fellow veterans during the salute through this very valuable program.

Vet center staff and VA medical center staff providing counseling in Washington, D.C. at the National Salute to Vietnam Veterans, November 10-14, 1982:

Joseph Gelsomino, Regional Coordinator, Southeast Region.

Gary May, Assistant Regional Coordinator, Great Lakes Region.

Shad Meshad, Regional Coordinator, Far West Region.

Jaroslaw Melnyk, Assistant Regional Coordinator, Far West Region.

Sara Haley, VAOPC, Boston, Mass.

Husher Harris, Regional Coordinator, Mid-Atlantic Region.

Thomas Harris, Acting Team Leader, Indianapolis Vet Center.

Arto Woods, Counselor, Pittsburgh, Pa., Vet Center.

Jack McCloskey, Team Leader, San Francisco, Calif., Vet Center.

Harold Bryant, Counselor, Tucson, Ariz., Vet Center.

Thomas Scarano, Team Leader, Denver, Colo., Vet Center.

Stephen Frye, Team Leader, Charlotte, N.C., Vet Center.

Robert Cameau, Counselor, Portland, Maine, Vet Center.

Wayne Smith, Counselor, Providence, R.I., Vet Center.

Thomas McGreevy, Team Leader, Manchester, N.H., Vet Center.

James Lenzer, Counselor, White River Junction, Vt., Vet Center.

Ronald Armstead, Counselor, White River Junction, Vt., Vet Center.

Tom Mirtaugh, Team Leader, Elkton, Md., Vet Center.

Thomas Rascon, Counselor, Huntington, W. Va., Vet Center.

Dwight Edwards, Counselor, Philadelphia, Pa., Vet Center.

John Stuart, Team Leader, Baltimore Vet Center.

Don Saunders, Counselor, Washington, D.C., Vet Center.

Forest Farley, Counselor, Tampa, Fla., Vet Center.

Fred McLaughlin, Counselor, Tampa Vet Center.

Craig Burnette, Team Leader, Knoxville, Tenn., Vet Center.

Ronald Coffin, Counselor, Knoxville, Tenn., Vet Center.

Reggie Lawrence, Counselor, Jacksonville, Fla., Vet Center, Jacksonville, Fla.

John Townsley, Team Leader, Jacksonville, Fla., Vet Center.

Robert White, Counselor, Ft. Lauderdale, Fla., Vet Center.

William Brewie, Counselor, Vet Center, Memphis, Tenn., Vet Center.

George Knight, Counselor, St Louis Mo., Vet Center.

Farry Waginer, Counselor, Indianapolis, Ind., Vet Center.

Chet McClead, Acting Team Leader, Oak Park, Ill., Vet Center.

Stephen Tice, Team Leader, Billings, Mont., Vet Center.

Manuel Casanova, Counselor, Laredo, Texas, Vet Center.

Larry Reid, Counselor, Colorado Springs Vet Center.

Donald Receveur, Counselor, Denver, Colo., Vet Center.

Joseph Kerwin, Team Leader, El Paso, Tex., Vet Center.

Bruce Pentland, Wadsworth VAMC. Brentwood Division.

Dr. Arthur Blank, Director, Readjustment Counseling Services.

Ray Scurfield, Assistant Director for Counseling Services.

Dr. John O. Lipkin, Associate Director for Psychiatry.

Robert Frank, Staff Assistant to the Director, Readjustment Counseling Services.

Larry Turner, Social Work Services.●

THE NUCLEAR FREEZE

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Foreign Affairs Newsletter for November 1982 into the CONGRESSIONAL RECORD:

THE NUCLEAR FREEZE

Although Americans have consistently wanted a strong national defense, they have also shown their support for arms control. This support was manifested in the recent election when, despite the oppostion of President Reagan, eight of nine states and dozens of communities voted in favor of a freeze in the nuclear arsenals of the United States and the Soviet Union. It is the job of the federal government to translate these two desires into a balanced policy of national defense.

The present administration came into office with the intention of ranking arms buildup first and arms control second. It declared SALT II to be fatally flawed because of the alleged concession of strategic advantage to the Soviet Union. It waited until November of 1981 before formulating American proposals for arms control in Europe, and another six months before formulating proposals to control strategic arms. It suspended negotiations toward a comprehensive test ban treaty. At the same time, it moved ahead with the largest peacetime defense buildup in our history—$1.6 trillion over five years—as it talked openly about nuclear "demonstration shots", "limited" nuclear war, and "prevailing" in a nuclear exchange with Soviet forces.

The ranking of arms buildup over arms control, together with the tough rhetoric used by some American officials, encouraged the growth of a nuclear freeze movements. The perception now exists among many Americans that the arms race is out of control, that the people and their elected representatives do not control decisions about arms research, procurement, and deployment. They are aware that arms control talks are not making progress and that, even if the Soviet Union were to agree to both American proposals, the United States would be free to continue production of every nuclear weapons system in the budget.

The proposal for a freeze debated in the House of Representatives called for a halt to the testing, production, and deployment of nuclear weapons as an immediate objective. The idea has proven so appealing that the Administration has begun to use the term "freeze" for its own purposes. The proposal President Reagan supported differed from the original in that no mention was made either of freezing testing or production or of preserving present limits and controls. The important difference was in emphasis: The original proposal stressed the urgency of stopping the arms race; the administration's alternative allowed room for a buildup before reductions.

The original proposal should be supported both for what it is and for what it is not. It is not a proposal to disarm unilaterally. The freeze will be mutual if it happens at all. It is not a proposal to trust Moscow to keep its side of the agreement. If the freeze is ever negotiated, it with be verifiable to our satisfaction. It is not a proposal setting forth a detailed negotiating position. It does not say when the freeze should take effect, or at what levels nuclear arsenals should be frozen. It gives flexibility to the negotiators to determine such things.

The positive merits of the proposal are that it would control the arms race and facilitate arms reductions. Reductions cannot happen until an agreed limit has been put in place. This is what a freeze is—an agreed limit.

Second, the proposal reflects the reality that the two superpowers are in a position of rough strategic parity. The Soviets are ahead in land-based missiles and in "throw-weight" (which sets the number of warheads that can be put on each missile). But the United States is ahead in the number of warheads on missiles and bombers together. With respect to submarines, it is ahead in the ability to escape detection, in the accuracy and reliability of missiles, and in anti-submarine warfare capability. The United States is also ahead in the number of bombers and in cruise missile technology. In terms of the tendency of the balance, however, there is cause for alarm. The Soviets' buildup has a relentless consistency, which they can enforce because they do not have to worry very much about public opinion. It is a good time for a negotiated halt.

The situation in Europe is a special case. The balance between American and Soviet forces is heavily against us. The balance between NATO and the Warsaw Pact is also against us, but not by a very big margin. The proposal debated in the House of Representatives contained a provision stating a common position with our NATO allies as an objective. This means that we will not agree to a force weaker than the regional balance requires.

Third, the proposal engages the public. It is a comprehensible statement in an extremely obscure field. It is certainly true that the issue of arms control is enormously complex. but this fact has tended to breed a calique of experts—a nuclear "priesthood", in effect—who have left the general public out of the discussion. This can be harmful. One of the reasons we build nuclear weapons systems in the first place is to oppose a political regime which would stifle the public. The nuclear freeze movement is composed of many different people with many different views, some of them dangerous. But it has seen the central truth that the arms race is out of control.

Finally, if the freeze is negotiated successfully, a huge amount of energy, money, time and natural resources will be released for more constructive purposes. At a time when our nation faces great domestic hardship, it is important that we use our wealth to strengthen the economy and generate jobs as well as to protect ourselves against foreign threats.

I am aware of problems with the proposal. It may be difficult, for example, to detect Soviet cheating in the production of nuclear materials, but without verification, the freeze on production would no longer be feasible step. On the other hand, a special strenght of the freeze is its flexibility. It may be simpler to freeze the number of warheads deployed on both sides, requiring that any warheads added be matched by warheads withdrawn.●

JOHN J. BUSICK

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. LONG of Maryland. Mr. Speaker, on November 11, our Nation celebrated Veterans Day in recognition of the millions of men and women who have served in our Armed Forces to insure the freedom that we enjoy today.

However, I wish to take a moment today to recognize the contributions of one of my constituents, Mr. John J. Busick, a veteran of World War I.

At the age of 25, John J. Busick enlisted in the Army during World War I and fought with American forces in France and Germany. During a battle in Belgium, Private Busick was injured by poison gas. Despite his incapacity, Private Busick continued to fight. In April 1919, he received an honorable discharge and returned to private life in Baltimore.

Mr. Busick is now 90 years old and has participated in Veterans Day celebration ceremonies since his days as a private in World War I.

Mr. Busick represents the millions of men and women who have unselfishly served our Nation. I know that my colleagues in the House join me in praising this fine American.●

NORWAY TO DEFY WHALING BAN ON COLD HARPOON

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. BONKER. Mr. Speaker, after several years of heated debate on the question of humane killing of whales, the International Whaling Commission (IWC) finally agreed by consensus to outlaw the use of the cold—nonexplosive—harpoon. However, Norway and four other whaling countries have used a loophole in the 1946 Whaling Convention to exempt themselves from compliance with the ban. In flagrant violation of the letter and spirit of the 1946 Convention, Norway has indicated it will use the cold harpoon to kill its quota of nearly 1,700 minke whales in the coming year.

I wish to submit for the record a letter from the Norwegian Ministry of Agriculture to the Ministry of Fisheries which concludes that: * * * whaling with the nonexplosive harpoon can hardly be said to satisfy the requirements for humane killing * * *" It is my hope that the Norwegian Government will reconsider its decision, and comply with the IWC's ban on the use of the cold harpoon.

NORWEGIAN DEPARTMENT OF AGRICULTURE, DEPARTMENT OF FISHERIES, P.O. BOX 8118,

Oslo, Dep., October 6, 1981.

KILLING OF WHALES—THE ANIMAL PROTECTION LEGISLATION

In the legislation of June 16, 1939, concerning whaling and in the guidelines for small whaling and whaling for the killer whale, the Department of Fisheries was formally given responsbility for whaling and the regulation of whaling.

The legislation of December 20, 1974, No. 73, concerning animal protection contains no specific regulations on whaling. But the legislation dealing with killing clearly requires that the chase and the whaling must be performed in such a manner that the animal "is not subject to unnecessary suffering." Guidelines on whaling must be consistent with the requirements set forth in the Animal Protection Legislation. In this context, we wish to remind you of the cooperation which has been earlier established with the Department of Fisheries with regard to seals.

Doubts have been raised as to whether the use of the non-explosive harpoon in small whaling satisfies the requirements for humane killing. In considering this question, the Department of Agriculture must rely on the reports from controllers who have participated aboard whaling vessels. These reports seem to conclude that when the non-explosive harpoon hits vital organs such as the heart, lungs and main arteries (mortal wounds), death occurs quickly. However, such mortal wounds only rarely occur—perhaps, in only 20 percent of the cases. Most hits go through the whale without causing death. In such cases, the whale while being winched towards the vessel will undertake a death fight which can vary in time. Under difficult circumstances, it may last up to one hour. All our experience on the killing of animals indicates that this death battle is very painful. In view thereof, whaling with the non-explosive harpoon can hardly be said to satisfy the requirements for humane killing as prescribed in the Animal Protection Legislation.

It is the opinion of the Department of Agriculture that active efforts must be made to find alternative methods of killing to replace the non-explosive harpoon. Since the use of anesthesia has been mentioned in this context, we would like to draw your attention to the fact that the use of drugs as such would disqualify the meat for purposes of consumption. Based upon what we know today of the available methods of whaling, the explosive harpoon appears to be the method which ensures more humane killing.

Continued use of the non-explosive harpoon in whaling for small whales should, in the opinion of the Department of Agriculture, require a restructuring of the practice of granting concessions in certain areas.

REIDAR VOLLAN.

JORGEN ARNESEN.●

GEORGE KISTIAKOWSKY

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. FRANK. Mr. Speaker, America suffered a grave loss this week with the death of George Kistiakowsky. He made enormous contributions to our lives. George Kistiakowsky is in the great tradition of immigrants who have enriched our country. From his important work on the development of the atomic bomb, undertaken because of his detestation of nazism; through his pioneering service as Science Adviser to President Eisenhower, through his eloquent and thoughtful work on behalf of arms control, George Kistiakowsky was a mode of informed and forceful leadership in a democracy.

Most recently, as Chairman of the Council for a Livable World, he spoke and worked against the dangerous and expensive arms buildup on which we are now engaged. Drawing on his own extraordinary experience with nuclear weapons, he tried as hard as any human being could to stop the excessive arms race in which we now find ourselves.

Personally, he was a man of good humor, who never let his importance get in the way of his humanity. All of us who knew him will feel his loss deeply; so will the whole country.

This editorial in the Boston Globe gives a sense of his impact and I ask that it be printed here.

GEORGE KISTIAKOWSKY

A man is best measured not in deeds done, words spoken and honors garnered at the pinnacle of his career, but later when the full sweep of his life can be seen.

George Kistiakowsky, who died Tuesday at the age of 82, can be so measured. He was born in Kiev, Russia in 1900, the son and grandson of professors, and he became one too. He taught chemistry to Harvard students for 41 years. In the epigrammatic elegance with which it bestows honorary degrees, Harvard honored him, saying: "Swift and explosive force, your imaginative talents have both widened our knowledge of chemical structures and enriched the life of this university."

Kistiakowsky, indeed, made things explode. He began as a teenager in his parents' apartment, trying to concoct nitroglycerine. He continued as a tankman in the White Russian Army where, he later recalled, he spent most of his time "running away from the Bolsheviks and changing generals." Later in the Harvard chemistry lab he punctuated a celebrated annual lecture by blowing things up "to show the students that's what they shouldn't do."

His greatest explosion caught him off guard. That was Trinity, the codename for the device exploded on a tower in the New Mexico desert in July 1945, the dawn of the nuclear age. As head of the Los Alamos laboratory of the Manhattan project, Kistaikowsky had built the Trinity bomb's trigger.

Expecting a smaller blast than 20,000 tons of TNT, Kistiakowsky was knocked into a trench. He said to a reporter: "I am sure that at the end of the world—in the last millisecond of the Earth's existence—the last human will see what we have seen."

Kistiakowsky's awards and peak of influence came later. He was appointed science adviser to President Dwight Eisenhower during the Cold War, when the US and Soviet nuclear arsenals surged to incredible destructive capacities. For his service during that period he was showered with awards.

Through it all, he was changing, growing. "At first I felt I was working in the national interest," he later said. "After working so long on weapons, I came to the conclusion that the time had come to control them."

Eisenhower, with Kistiakowsky behind him, vastly expanded US nuclear weaponry, but at the same time ignited the countercurrent of arms control. Ike's famous farewell address warned not only of the menace of a "military-industrial complex" but of a related concern he had often discussed with his science adviser, "the danger that public policy could become the captive of a scientific and technological elite." The respect in which Eisenhower is held today stems largely from that speech.

Kistiakowsky served as an adviser to the Pentagon until 1968. By then he was deeply disturbed at the trends he perceived. "I went into war work in 1940," he told an interviewer last year, "because I was violently against Nazism. After World War II I was foolish enough to swallow hook, line and sinker the intense Washington propaganda that the Soviet Union was ready to conquer the world."

Later, he asid, "I began to realize that the policy was being formed in a way that was really questionable. It was being formed by people who didn't know the facts and didn't have time to learn them."

Kistiakowski referred to the current buildup of Pentagon spending as "this militarization of the country." He believed it was a delayed reaction to the loss of the Vietnam war, and he cited an historical pattern he'd seen before: "It happened in France, Czarist Russia, Germany."

In the twilight of his life, Kistiakowsky headed the Council for a Liveable World. Though wracked with cancer, he had a new perception of what was needed to curb the arms race, which he expressed in an editorial in the current issue of the Bulletin of Atomic Scientists:

"As one who has tried to change these trends, working both through official channels and for the last dozen years from the outside. I tell you as my parting words: Forget the channels. There simply is not enough time until the world explodes. Concentrate instead on organizing, with so many others who are of like mind, a mass movement for peace such as there has not been before. . . . Then lead the movement so that, instead of the few now in Washington, many will be elected to Congress who have a true and unbreakable commitment to search for peace."

Kisty, as friends called him, stood six-foot-three when he was younger. Against the back-drop of his life and times he's taller still.●

DON H. CLAUSEN

HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. ZABLOCKI. Mr. Speaker, it is a privilege to join my colleagues in honoring the senior Republican member of the California delegation (Mr. CLAUSEN) on the eve of his retirement from this body.

DON CLAUSEN has long established himself as a "long-ball hitter" on the Republican softball team, and that is a good way to describe his legislative record. He has served as a senior minority member of two major committees, Transportation and Public Works and Interior and Insular Affairs, and in the process has found scope for his many interests and legislative activities. These include aviation and aerospace—he is currently president of the Congressional Flying Club—conservation and highway construction. In this last field, I was interested to note that the gentleman served as a congressional adviser to the Pan-American Highway Congresses of 1967 and 1971, in Uruguay and Ecuador.

Above all, however, DON CLAUSEN will be remembered as a man of intelligence, integrity, practical good sense, and reasonableness, who is dedicated to the best interests, not only of the constituents he has served so long and so ably, but also of the Nation. We will miss these qualities, as well as a very congenial colleague, in the years ahead. I am pleased to be associated with his many colleagues and friends in wishing him and his family my warmest best wishes for a successful and rewarding retirement.●

THE FAILURE OF THE GUERRILLAS IN EL SALVADOR

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. LAGOMARSINO. Mr. Speaker, one of the peculiarities of the civil war in El Salvador is the failure of guerrilla forces either to gain wide acceptance among the people or to gain appreciable military strength. This failure is peculiar since rarely has any country's history made it more ripe for revolution. While the Government has been making slow and sometimes painful progress in human rights and has been gradually gaining the respect of its people, the guerrilla forces have been stagnant. Some 2 or 3 years ago guerrillas were operating fairly openly in the uninhabited, northernmost provinces of El Salvador and they do the same today in just about the same strength; 2 or 3 years ago in other areas of the country guerrilla tactics included burning buses, exploding bombs in public places, and attempting to destroy the economic infrastructure of the country. These remain the guerrilla tactics at just about the same intensity today and are just as surprising now as they were then. How one wins over people by destroying their daily transport, intimidating them with bombings, and leaving them in the dark—literally—escapes most observers.

It goes without saying that the Government of El Salvador has attracted fierce criticism from a variety of quarters over the past 2 or 3 years. Even the most hostile critics, however, have rather warily avoided extolling the virtues of the guerrilla opposition and for good reason. It was during the Carter administration that a senior U.S. official in El Salvador said that if the Sandinista movement in Nicaragua were equated to the Vietcong, the guerrilla forces in El Salvador would be the equivalent of the Pol Pot regime in Cambodia.

A recent event reported in the December 7 edition of the Washington

Post illustrates vividly, I submit, the increasing desperation of the terrorists. Guerrillas interrupted a soccer game in a small town near San Salvador and kidnaped more than 200 men, women, and children at gunpoint in an effort to recruit some of them for the guerrilla ranks. When a force must kidnap potential enlistees, it is safe to say that it is failing rather substantially in its efforts to win the hearts and the minds of the people of its country.

I should like to have this article included with my remarks.

The article follows:

[From the Washington Post, Dec. 7, 1982]

SALVADORAN GUERRILLAS SAID TO SEIZE 200—REBELS APPARENTLY SOUGHT RECRUITS

SAN SALVADOR, December 6.—Leftist guerrillas interrupted a soccer game in nearby San Sebastian yesterday and kidnapped more than 200 men, women and children at gunpoint in an apparent attempt to press them into the rebel ranks, residents of the town said today.

About 120 parents and relatives of the abducted people visited the El Salvador Human Rights Commission and the International Red Cross offices here, asking the two organizations to intercede with the guerrilla forces to get the people freed.

San Sebastian, a town of 4,000 people, is 30 miles east of San Salvador. Many of the residents are refugees who fled fighting in other parts of the country.

Mayor Jose Ramon Henriquez, who accompanied the relatives, said one guerrilla group attacked a local Army garrison yesterday afternoon. He said another 30 rebels hijacked a bus north of the town and rode to the soccer field, firing automatic weapons.

[United Press International quoted witnesses as saying the guerrillas forced their prisoners to march through the night to a guerrilla camp. Mimsael Ayala, who said he escaped from the guerrillas, said a rebel commander tried to calm the captives, saying, "You're only going to work not to fight."

[Wilfredo Losano, 20 said he escaped from the rebels in the midst of a rain storm that began to fall while the group was walking toward the guerrillas' mountain camp.]

Maria Hilda Barahona de Estupinian, a schoolteacher and one of the group, quoted the rebels as saying they needed the youths "to reinforce their ranks because they have had many casualties." She said her son was among those taken by the rebels.

"I don't think they want to torture or kill them. It's clearly a recruitment drive," she said.

One civil guardsman was killed in the attack on the garrison, Mayor Henriquez said. The garrison included an Army detachment, a 30-man National Guard force and another 30-man Civil Defense squad. The Civil Defense corps consists of retired officers and young men who have completed their military service, and was created by the Defense Ministry to help the Army fight the rebels.

The guerrillas at the soccer field forced players, spectators and even cigarette and candy vendors to line up on the soccer field and marched a total of 200 people at gunpoint in single file into the nearby San Pedro hills northeast of the town, where the guerrillas have a heavily fortified camp, the townspeople said.

About half a dozen kidnaped youths managed to slip away at nightfall as the guerrillas were reaching Amatitan Arriba, a village five miles northeast of San Sebastian, where the guerrillas have a camp, Henriquez said.

Henriquez quoted the youths as saying the guerrillas had organized the captured into three age groups—under 15, between 15 and 22, and older than 22.

A Civil Defense commander in San Sebastian, who asked anonymity for security reasons, said about 140 youths were kidnaped.

This was the first mass kidnaping by the guerrillas reported in their three-year fight for power. Usually they abduct individuals, executing them for "antirevolutionary activities" or holding them for ransom.●

FIORELLO H. LaGUARDIA

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. SOLARZ. Mr. Speaker, I rise in honor of the 100th birthday of a great Italian-American, Fiorello H. LaGuardia. One of the great politicians of his, or any generation, and certainly one of the greater leaders of this Nation, Fiorello H. LaGuardia was a Member of this House and a three-term mayor of New York City. He was an outspoken opponent of prohibition and a leading supporter of old age pensions, unemployment insurance, and strict Federal control of water power and other natural resources.

LaGuardia's accomplishments were many, but all of us from New York clearly recognize the significance of his ability to balance the city budget. He was a crusader who eliminate considerable graft and corruption that had existed in the awarding of New York City contracts. He was a master builder who constructed new schools, libraries, and much needed bridges and public facilities like the airport in Queens which bears his name. Even today we cannot forget the role that LaGuardia played in city beautification efforts, and in making New York and attractive place to live and work.

Today we salute the memory of Fiorello and all that he has done for New York City, for New York State, and for the Nation.●

AMBASSADOR BOB STRAUSS ON THE MERCANTILIST THREAT TO WORLD TRADE

HON. JACK KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. KEMP. Mr. Speaker, as we are seeing in the debate over local content legislation, one of the most disturbing economic developments today is the growing trend toward protectionism. Protectionism always destroys more jobs than it saves. Nothing would be more certain to turn the worldwide recession into a worldwide depression than a round of beggar-thy-neighbor trade barriers in the midst of our economic weakness. Congress must, at the very least, refrain from making the situation worse by initiating new trade barriers.

At the same time, we can work to improve the situation, by seeking further multilateral liberalization of trade. Moreover, as we saw in the 1920's and 1930's, international trade barriers almost always result from, or are accompanied by, a derangement of national currencies and the international monetary system, such as we have seen since the breakdown of the Bretton Woods system in 1971. What appears to be "dumping" or predatory competition is sometimes nothing but the result of fluctuating currency values, which create windfall gains and losses in world trade. So I welcome the initiative of Treasury Secretary Donald Regan in calling for an international monetary conference to seek greater stability in the international monetary system.

I am gratified to see that there are Members in both parties who still understand the crucial importance of a liberal international trading order to the American national interest. Bob Strauss and I have found ourselves on opposite sides of the political fence on issues, but I have long admired him for his leadership and his position on international trade, and the great contributions he made as our U.S. Special Trade Representative.

Bob Strauss recently outlined the vital importance of the trade issue in an article published in the Wall Street Journal. I urge my colleagues to read this excellent article.

The article follows:

[From the Wall Street Journal, Wednesday, Nov. 24, 1982]

THE MERCANTILISTIC THREAT TO WORLD TRADE

(By Robert Strauss)

The meeting today of the General Agreement on Tariffs and Trade (GATT) has occasioned a torrent of articles and speeches on the problems plaguing our international trading system. We have heard from the president, as well as congressional and other leaders from both parties. Unhappily, all have tended to divorce our trade problems from our domestic economic and political problems. Trade is a political problem.

The spreading resort to protectionism is the direct result of the inability of Western governments and their leaders to deal in concert with deteriorating world-wide economies. Far too few understand that the luxury of correcting domestic economic ills in a vacuum from trading partners is no longer available. No matter what domestic efforts are adopted to stimulate our economy, if other nations continue austerity policies, we can only marginally improve economic performance and unemployment will remain unacceptably high. We cannot prosper with Europe in recession and a depression in the developing world.

We can no longer call world trade a rising tide lifting all boats, as President Kennedy described it 20 years ago. The postwar growth of trade has stopped in the face of a massive recession among industrialized countries and what might best be termed mini-depressions among the developing nations.

FOCUS OF DEBATE IS CHANGING

Since the 1950s a mutually beneficial relationship has prevailed between economic growth and trade: Increased economic growth stimulates even faster growth of trade, which stimulates more economic expansion in an upward spiral of prosperity. There is a grave risk that the world economy might be beginning not just a temporary downward trend, but a new and dangerous long-term downward spiral. It is in this climate that the debate between protectionism and free trade is reaching a climax.

While talk of the reality and promise of "free and open trade" is still heard at cocktail parties on the East Side of Manhattan and in Washington, D.C., or under the arches of academe, men wearing work shirts and drinking beer in a neighborhood bar in Gary, Ind., have a different view of that reality.

To them it's lost jobs, misery and suffering caused by imports. They say they can compete with foreign workers and companies successfully, but "we can't compete with their governments."

Reconciling these two perspectives is the central task of trade policy and political leadership.

To the growing ranks of disillusioned workers are now added pragmatic and responsible voices that have long advocated liberalized trading rules. They now believe that the fundamental premises of liberal trade policy no longer prevail. Maybe we should call them "neo-protectionists." They say that no one else is playing by the rules, so why should we?

Increasingly it is governments, not market forces, that are determining the direction and content of trade flows. American workers and farmers now compete with 20th century mercantile states—nations where governments have formed alliances with corporations, farmers and workers not to maximize profits, but to maximize exports.

The American farmer is not competing with the European farmer, but with $7 billion of agricultural subsidies of the European Economic Community. The American aerospace worker is not competing with the European aerospace worker, but with France's policy of export credit financing. And American computer technicians are not competing with their Japanese counterparts, but with the predatory pricing policies of the Japanese computer industry working with the Japanese government in targeting high-tech advancement.

Obviously, real economic recovery in America and in other nations would go far to relieve protectionist pressures. And it would provide the resources to permit the long-term and painful structural adjustments that need to be made. But what do we do in the meantime?

This is not the place to unveil a comprehensive trade policy. However, in addition to the change in perspective on trade issues, we should consider among other things the following steps:

We clearly need temporary relief in certain sectors, such as steel and automobiles. However, we can't let poor planning, bad management and nostalgia for the past unduly penalize consumers. Thus, a line needs to be drawn between protecting a limited number of critical sectors of our economy and not permitting stronger, more competitive sectors the indulgence of additional protection. However, such stronger sectors are entitled to more effective and more aggressive application of international trade rules already in place to deal swiftly with dumping and other unfair trade practices. We simply cannot let predatory practices destroy sectors of the U.S. economy where we are clearly competitive and efficient.

We must aggressively pursue negotiations on trade in services that are not now covered by the GATT.

The world trade system we have created relies on the ability of Europe, Japan and the U.S. in concert with the developing world, to work out their problems together. This can be done only in ways that will satisfy no one of them completely, but that make sense to all of them as a compromise. If the GATT ministerial meeting does not produce constructive results, such as a freeze on new trade barriers and a solid work program with a short time fuse, the president should call for a summit meeting, and insist that it be for work, not show. This summit proposal must grapple with Western economic growth and the related problem of trade.

Finally, President Reagan should immediately call together a bipartisan group of political, agricultural, business and labor leaders to set a trade agenda before it becomes to controversial a political issue for anyone to address responsibly. This would be an important first step in defusing pressure for unwise legislative action.

THE STAKES ARE BIG

There is more at stake here than economic stability and prosperity. The survival of freedom and the maintenance of peace are inextricably linked to the economic welfare of all nations. It is no longer possible or appropriate to separate the mechanisms we have created for economic cooperation from those that we have devised to provide for collective security. A NATO alliance among nations waging economic war instead of competing fairly will be virtually worthless.

The task of our political leadership is to understand the gravity of the situation and to begin to shape a trade policy that makes sense for the world of the 1980s and in which the American people can believe. These two goals are not irreconcilable if our leaders from both parties are pragmatic and courageous.●

LEE HANEY: HARD WORK AND SUCCESS

HON. CARROLL A. CAMPBELL, JR.

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. CAMPBELL. Mr. Speaker, I am pleased to pay tribute to Mr. Lee Haney, the 1982 Mr. World Bodybuilding Champion. A native of Spartanburg, S.C., Lee Haney has captured some of the most prestigious titles in the bodybuilding profession over the past year.

On October 2, Lee Haney won the heavyweight and overall titles to become the 1982 Mr. America Bodybuilding Champion. Several days later, on October 9, he competed in Brussels, Belgium and captured the world bodybuilding title before a large crowd of spectators. Lee Haney won the world championship by defeating representatives from more than 50 nations, who had captured their countries' title to participate for the world championship.

Lee began winning bodybuilding titles in 1978 when he picked up the Mr. South and Mr. Palmetto amateur titles. Since then, he has won numerous awards, including the Mr. Atlantic USA title last February and the Mr. Junior America championship in June.

The drive and determination that Lee possesses is unmatched. He is a model for many young men who desire to follow in his footsteps. Moreover, Lee Haney is still seeking his ultimate goal of winning the Mr. Olympia title. This is the world's biggest professional bodybuilding event and the competition is intense. I am sure that Lee Haney will attain his goal because his desire, motivation, and grueling hard work are even more intense.

Lee has made his family, the citizens of Spartanburg, and all South Carolinians proud, and I am sure that he will continue to do so in the future.●

MARK IMMEL, EAGLE SCOUT

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. LONG of Maryland. Mr. Speaker, on Sunday, December 12, Mr. Mark Immel, a member of Boy Scout Troop 409, will be awarded the rank of Eagle Scout at a court of honor to be held at St. Peter's Evangelical Lutheran Church.

Mark, an 18-year-old senior at Patapsco Senior High School, has been a member of Scout Troop 409 for the past 6 years. His leadership and community service have earned Mark the Order of the Arrow, and he is widely known as a young man his friends and family can count on to get the job done.

Mark will enter the U.S. Air Force following his graduation from high school.

Mark's parents are Mr. and Mrs. Charles Immel of Dundalk.

I am sure that my colleagues join me in commending Mark on his fine achievements.●

ANTICONSUMER LEGISLATION COMES BEFORE THE HOUSE

HON. DAN COATS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 9, 1982

● Mr. COATS. Mr. Speaker, tomorrow the House is scheduled to consider the H.R. 5133, the Fair Practices in Automotive Products Act of 1982, one of the most blatantly anticonsumer bills to come before the Congess. I am submitting for the benefit of my colleagues letters from Donald Regan, Secretary of the Treasury, and John Block, Secretary of Agriculture, in opposition to this legislation.

If enacted, this bill will shield our automobile manufacturers from competitive forces, hurting rather than aiding, their recovery. Moreover, other industries will suffer. Agricultural exports will be subject to retaliatory action by our trading partners under the terms of the General Agreement on Tariffs and Trade. In the end, U.S. consumers will be the victims of this so-called jobs bill which is really antijobs.

I urge my colleagues to examine the long-term ramifications of this type of special interest protectionist legislation.

THE SECRETARY OF THE TREASURY,
Washington, D.C., December 8, 1982.

DEAR MEMBER: I am writing to stress the Administration's continued strong opposition to local content legislation.

Local content legislation is the most troublesome trade legislation to be introduced in the last quarter century. Its basic principles are unacceptable. A local content requirement creates a select group of suppliers and workers that are protected against import competition. A free people cannot and should not accept such government-imposed restraints on their freedom of choice. The individual consumer should ultimately determine the availability and price of goods.

Local content legislation would have profound negative implications for the U.S. economy. It imposes a hidden inflationary tax transfer from those who purchase automobiles to those protected by the local content requirement. It poses a real threat to U.S. exporters, who are forced to accept a decline in export sales either through potential retaliation or reduced foreign income available to spend on U.S. products. U.S. auto manufacturers will be hurt as their efforts to become more competitive both at home and abroad are hampered by the requirement to use local inputs, no matter how uncompetitive or more expensive.

While I share the widespread concern about high unemployment in the automobile sector and in the economy generally, this legislation is not the way to respond to those problems. Local content legislation is a giant step backward from the goal of healthy U.S. industries, competitive worldwide, which are crucial to U.S. economic well-being. I strongly urge your support in opposing this legislation.

Sincerely,

DONALD T. REGAN.

DEPARTMENT OF AGRICULTURE
OFFICE OF THE SECRETARY,
Washington D.C., December 8, 1982.

In anticipation of consideration of H.R. 5133, as amended, by the House of Representatives, we would like to reaffirm the Department's opposition to this legislation. H.R. 5133, as amended, would establish local content requirements for motor vehicles sold in the United States. As was stated by Deputy Under Secretary Alan Tracy in testimony before the House Ways and Means Trade Subcommittee on September 21, passage of this legislation may have severe consequences for American agriculture. We export two out of every five acres of crops grown and nearly a fourth of farm cash receipts are from export sales. This legislation would endanger these sales.

The limitation of imports required by this legislation would be in direct violation of U.S. obligations under the General Agreement on Tariffs and Trade (GATT) and could result in swift retaliation against United States exports of comparable value. Retaliation could be expected particularly from the European Community and Japan, which together bought $18 billion of United States agricultural exports in 1981, over 42 percent of our total export of agricultural products in that year.

The European Community has for nearly 20 years been seeking an opportunity to overturn its commitments in GATT to import oilseeds, oilcake, and nongrain feed ingredients such as corn gluten meal, free of import duties and restrictions. In 1981, the European Community's imports of these products alone from the United States totalled approximately $4.5 billion.

The United States exports over half of its soybeans and soybean products, and the European Community alone purchases nearly half of these exports.

The Congress recently recognized the danger of action by the European Community to limit U.S. exports of corn gluten meal by passing resolutions calling for U.S. retaliation against any such action by the European Community. Japan is the largest single country market for United States agricultural exports. Japanese purchases from us in 1981 totalled $6.6 billion. Grains, oilseeds and products accounted for nearly two-thirds of the total. Japan buys one-sixth of U.S. exports of soybeans, and only as recently as 1979 agreed to bind its zero import duty on soybeans and soybean meal. The United States exports nearly two-thirds of its production of wheat, and Japan is the largest market after the USSR and China. That is, Japan is our most important reliable customer for wheat. Competition in the international wheat market is keen. Japan could obtain supplies as well from Canada, Australia, and other sources.

In the last few years the United States has put great pressure on Japan to open its import markets, especially for agricultural products, for which Japan maintains a number of import quotas which we believe are in violation of Japan's GATT obligations. Japan has agreed to some expansion of quotas for citrus fruit, and other products. These efforts would be effectively reversed by action against Japanese automobiles.

We believe this legislation will benefit neither the U.S. auto industry nor the national economy, but will be most detrimental to the trade sector. With farmers in their third year of severely depressed prices and income, we must not jeopardize our current agricultural export trade. We must not take actions that lessen the pressure on important trading partners to change trade policies affecting the entire international agricultural trading system. I urge your opposition to this legislation.

Sincerely,

JOHN R. BLOCK, *Secretary.*●

SENATE—*Friday, December 10, 1982*

(Legislative day of Tuesday, November 30, 1982)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Gracious Father in Heaven, we invoke Thy peace and blessing upon the Senate of the United States. Let Thy love be manifest in our midst. Deliver us from every influence that divides. However much we differ, help us to honor those whose views and commitment conflict with ours. Deepen our appreciation and respect for each other. Make us sensitive to those in need, who are discouraged or depressed. Sweeten our dispositions so that our relationships will be caring and constructive.

In this place where so much position, prestige, and power are concentrated, protect us against their misuse and abuse, their seductive, destructive force. Help us to be invulnerable to the manipulation and finesse which flatters and feeds the ego. Increase our appreciation and gratitude for all the supporting staffs without which the Senate could not function. Bind us together in common purpose and dedication for the people's welfare and Thy glory. In Jesus' name. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

REALLOCATION OF TIME FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, there is already an order for a period for the transaction of routine morning business, after recognition of the two leaders under the standing order, of 10 minutes. I ask unanimous consent that that be changed to 20 minutes and that the distinguished Senator from Rhode Island (Mr. CHAFEE) be allocated 10 minutes of the 20 minutes available under this order.

The PRESIDING OFFICER (Mr. STAFFORD). Is there objection? Without objection, it is so ordered.

Mr. BAKER. Mr. President, I may have a further statement to make for the moment, but before I do so, I need to confer. I suggest the absence of a quorum.

The PRESIDING OFFICER. Is that on the leader's time?

Mr. BAKER. Yes, Mr. President.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

NORMAN'S APPENDIX

Mr. BAKER. Mr. President, you see, there is this page they call "Spanky," and he is most certainly a member of "our gang." "Spanky," AKA Norman Milliard, spends his livelihood dedicating himself to the affairs of the Republic. Of course when you are only 15 years old, serving the Republic means serving as a page, but what a page he is!

Anyway, I wish to inform those of my colleagues who are desperately looking for the young whippersnapper, that he has been given the day off, quite generously I might add, to have his appendix removed.

Yes, it is true that he did not request the day off in advance, and yes, there are some who think that he staged the emergency operation at the Washington Hospital Center last night just so he could take it easy, but I for one, believe the young man.

The latest press conference at the hospital confirms earlier reports that Norman is doing fine, and should be back in shape to join us and his family real soon. That news is good news, and to Spanky we send our best, with just one question—"Where is that delivery?"

Mr. President, I have no further immediate need for my time under the standing order. I believe there are other Senators who do wish to speak, however. I ask unanimous consent that I may reserve my remaining time for utilization during the balance of this day.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, the minority leader has not yet been recognized under the standing order. Before he is, let me say I believe the Senator from Rhode Island wished to speak. Special provision has been made for him to have 10 minutes, of the period for routine morning business, which is to follow Senator ROBERT C. BYRD, the minority leader, under the standing order.

Mr. CHAFEE. Mr. President, of that time I wish to yield 2 minutes to the Senator from Wisconsin.

Mr. BAKER. Mr. President, under the standing order, the minority leader will be recognized, is that correct?

The PRESIDING OFFICER. The Senator is correct.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. The minority leader is recognized.

Mr. ROBERT C. BYRD. Mr. President, I yield to Mr. PROXMIRE such time as he may require. I understand he wants 2 minutes.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I thank the distinguished leader. I will take 2 minutes. I thank my good friend from Rhode Island.

PRAYER IN THE SCHOOLS—WHY HATE IT?

Mr. PROXMIRE. Mr. President, one of the most remarkable and surprising political phenomena I have encountered in recent years is the vehemence and depth of reaction against permitting prayer in our schools. Of course, I am not surprised that many oppose prayer in the schools. What astonishes me is the absolute intolerant, even vengeful, attitude of those who seem to see in prayer the ultimate evil.

During the last campaign, I indicated that I favored voluntary, nondenominational prayer in schools, provided the school board wished to permit it. I can tell you that in nine statewide campaigns in my State over a period of 30 years I have never encountered such an emotional tirade of hate and denunciation.

This past Wednesday a story appeared in the New York Times describing the reaction of a local school board member in Old Bridge, N.J., who proposed that it might be nice to say a little prayer of thanks at the beginning of the school day. What happened to that school board member and his prayer proposal? What happened to his proposal to call on students and teachers to share, to be helpful, to be tolerant, to love and not hate? What happened was a story of the same kind of ferocious intolerance I encountered in my State during the past campaign.

If those who so bitterly oppose prayer in the schools would direct a small part of that rage against marihuana in the schools or crime or cheating or the general lack of discipline and order, we might make some surprising educational progress.

I am sure that prayer in the schools does not have a chance in the world, but I must say I am puzzled and discouraged by the vehemence with which this proposal has been opposed.

Every morning when I hear our Chaplain and other clergymen address this body, I find I am uplifted and reinforced in my determination to try to be a better person. I can certainly understand why many would oppose permitting prayer in the public schools. What I cannot understand is why the proposal has stirred up such a bitter, emotional reaction.

Mr. President, I ask unanimous consent that the article from the December 8, 1982, issue of the New York Times be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE QUESTION OF SILENCE RAISES VOICES

OLD BRIDGE, N.J., December 7—This was not something cooked up by a band of religious zealots or a national organization of Christian fundamentalists. Thomas Cherney, a member of the local school board, just thought "it would be nice to, you know, say a little prayer of thanks at the beginning of the school day."

He thought this out loud at a board meetings, prompting the largest and most vocal crowd in memory to show up at the next meeting—most of them to yell at him.

"You don't reserve the right," said Joseph Tenorio, a local resident who echoed the views of many others, "to tell a child when or where to pray or to whom."

To be sure, there were some who supported Mr. Cherney, citing problems of drugs and alcohol abuse among students and arguing that instituting a school prayer "might help get things back on the right track," as one put it.

And so, in this Middlesex County commuter town, Mr. Cherney set in motion a series of proposals, counterproposals, fights among neighbors and school board votes that ended in a court suit, an injunction and a vote Monday night to forget the whole thing.

SCORN IS HEAPED ON HIM

Some parents who voiced opposition to Mr. Cherney's proposed "nondenominational" prayer in their 17 public schools threatened to bring in the American Civil Liberties Union and to keep their children home. Some teachers and administrators protested that they would be asked to violate the Constitution.

Local children and editorial writers heaped scorn on him, calling him "a right-winger" and "a religious nut." They said that his proposal was politically motivated, and everywhere in town people were asking out loud if the Moral Majority or some such group was not covertly supporting Mr. Cherney.

As for Mr. Cherney, a rug and drapery cleaner by trade, he seemed genuinely shocked at the stir he had created. No, he said, he was not born again—once having been sufficient, thank you—and no, the only support he had received was not from national movements, but from John Damato, the owner of a local gas station, who also serves on the school board.

Faced with fierce opposition, Mr. Cherney amended his idea for a school prayer to "a moment of reverent silence." When this also came under attack, he asked if "a moment of silent meditation" might be all right. But he finally had to settle for "a moment of silence" after the pledge of allegiance, and this proposal was finally approved by the school board by a vote of 5 to 4.

But watering down his proposal did nothing to stem the tide of criticism. A fellow member of the school board, Edna Gordon, was so incensed she sued herself and other members of the board, asking a Federal judge to stop them from implementing the moment of silence.

Mr. Cherney objected that "a moment of silence is nothing, really," but last week the judge granted a restraining order, calling the idea a "subterfuge" for returning prayer to public school classrooms.

Monday night, with Mr. Cherney in a hospital suffering a stomach ailment that a board spokesman said was "stress related," the school board voted to drop the whole idea because it would cost too much to defend in court and because it was dividing the community. From Old Bridge Regional Hospital, Mr. Cherney said today he had thought "a little prayer, it couldn't hurt."

But in the end, the board members felt otherwise.

"TIME TO START HEALING PROCESS"

"Neighbors are fighting neighbors," said one board member, Louis Alfonso, "and Christians fighting Jews, almost all of whom are opposed to this. It's time to start the healing process."

"There is also a feeling on the board," said John Shepard, the school board president, "that we need to move on to more important things."

Mr. Alfonso said that he still supported school prayer but that the school district faced budgetary problems and as a purely practical matter did not have the financial resources to fight a "long and costly" legal battle. The foremost concern of most board members seemed to be financial rather than philosophical.

Even Mrs. Gordon, who brought suit against the board because she did not want her son, a fifth-grader, "to be subjected to any encouragement, motivation, coercion or requirement to engage in prayer," said that she would have gone along with the moment of silence if Governor Kean had made it state law. "Then the state would have been sued and not us," she said.

The Legislature had passed a measure calling for a period of silence in public schools, but Governor Kean vetoed it last week.

Earlier Monday, students at James Madison High School expressed mixed opinions on the school board's proposal.

"I'm all for religion," said Dawn Palmieri. "I go to church and I say grace before meals, but I don't see a point to a moment of silence and I think prayer is a personal thing that you don't do in schools."

Lucy Rizzo expressed the opposing view, "I think adults want to put a little religion into us," she said, "and I think they're right."

The school's principal, Peter M. Delaney, was a teacher in the district before the 1962 Supreme Court decision and remembers reading from the Bible every day.

"This country is founded on religious principles," he said, "and can promote things such as the golden rule, but I do believe prayer violates the Constitution."

Meanwhile, Mr. Cherney rests in his hospital bed, hoping to be back on his feet soon. "It seemed like a small thing," he said, "a little prayer, a little time out to reflect."

THE KU KLUX KLAN: ANOTHER REASON TO RATIFY THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, at the end of November, the Ku Klux Klan planned to march down the streets of Washington. The event was intended to commemorate a landmark Klan parade in Washington in 1925, in which 35,000 members participated. The 1982 parade was cancelled at the last moment, because police feared conflict between Klan members and anti-Klan demonstrators.

Since the Klan is still a force in our society, it is worth examining its origins. The planned parade was the most recent incident in the long and chilling history of the Ku Klux Klan. Confederate soldiers founded the Klan in Pulaski, Tenn., in the aftermath of the Civil War. They vowed to uphold "all that is chivalric * * * noble * * * generous * * * and patriotic," a supremely ironic charter for a group that became known for its violent means of enforcing white supremacy.

During the Reconstruction era, the Klan grew to 550,000 members and became a major source of terror throughout the South. They made sinister night raids into black communities which were designed to intimidate the black vote. Sometimes they were satisfied to leave a burning cross in their wake. Other times, their deeds were considerably more violent.

Sadly, Klan terror was effective in keeping blacks away from the polls during Reconstruction. Consequently, white Southerners easily passed into law the "separate but equal" form of segregation, which lasted 80 years.

After World War I, the Klan underwent a great revival under the leadership of Grand Wizard William Simmons, a former preacher. It remained basically racist, but expanded its hate list to include Jews, Catholics, and foreigners.

Two trends added fuel to the Klan's fire: The great waves of European immigration from 1880-1910, and World War I. Together, these trends produced a fierce nationalism among Americans. The national mood in the 1920's was thus more receptive to the Klan, which claimed to be a "pro-American" group, dedicated to preserving racial purity in the nation.

In the civil rights era, the Klan once again swam into the mainstream. Its membership rose to 40,000, and it was suspected of 138 race-related bombings in the South from 1956-63.

The Klan resembles the German Nazi Party all too closely for comfort. Although their actions have not been as excessive, their basic attitudes and intentions are the same.

The promotion of hatred among racial, ethnic, and religious lines creates the kind of political climate in which genocide can occur. That is why it is essential that we maintain vigilance against future genocides by remembering the past and doing everything we can to prevent a dangerous political climate from taking hold in the United States.

The most important step we can take is to make genocide a crime under international law. I urge my colleagues to join with me in supporting the ratification of the Genocide Convention.

SWEDEN, SOVIET SUBS AND THE MX

Mr. PROXMIRE. Mr. President, what does Sweden's unsuccessful hunt for a mysterious submarine in its coastal waters have to do with the MX debate? That is the interesting question posed by Daniel S. Greenberg, formerly the director of the International Institute for Strategic Studies in London and now the political editor of the German weekly Die Zeit.

The heart of the answer rests on the issue of mobility and deception. For a generation Pentagon planners have argued hard to convince the American public and the Congress that the answer to increasing Soviet missile strength was mobility and deception. With mobility the Russians would be unsure of where our missiles were and which silos were occupied. Deception compounded the problem. We were told that the racetrack scheme provided the best long-term alternative.

But then the strategists dramatically switched rationales. Mobility is no longer important they argue. Deception is immaterial. Dismiss all the old arguments. Forget 10 years of Senate and House hearings. Disregard the tens of thousands of pages of briefings, charts, and testimony. Now we are told to put all our eggs in one basket and challenge the opposition to attack these assets all at once. Line up the planes at Pearl Harbor and bring the battleships into port.

Well, Mr. President, perhaps there is a lesson in the recent exercise of Sweden in hunting down the potential Soviet submarine in its waters. And that lesson is that our sea-based resources still provide the greatest measure of security and still combine those assets of mobility and deception that have now been abandoned with regard to our land-based forces.

Mr. Greenberg well argues that our sea-based forces provide us with time to make a careful decision about the basing mode for the MX. The invulnerability of our sea-based forces gives us that extra cushion of security making it possible not to have to rush into a precipitous and unsound decision on the Dense Pack deployment mode.

Mr. President, I ask unanimous consent that the Greenberg article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Baltimore Sun, Dec. 5, 1982]

DENSE PACK—COMPLEX FOOLISHNESS

(By Daniel S. Greenberg)

WASHINGTON.—Sweden's unsuccessful hunt in its coastal waters for a mysterious submarine last September is an unlikely source of insight into our MX basing controversy.

But that humiliation of the Swedish Navy invites skeptical attention to the inflexible determination of the U.S. Air Force to find a land-based scheme (no matter how bizarre) for the powerful new missile. And it provides further reasons to doubt that the costly MX is needed at all.

It is useful to recall that the MX missile was conceived amid fears that a surprise Soviet attack could obliterate the existing land-based deterrent. The antidote for the presumed threat was to be a new missile that would be kept on the move so that the Soviets could never be certain of its location.

When one mobility scheme after another was abandoned, the administration performed a wondrous turnabout and chose the latest scheme: the so-called dense pack, which scraps the original idea of concealment through mobility.

To replace it, the Air Force would now rely on a 20-square-mile field of heavily reinforced silos so close together that (so the theory goes) the first enemy missile would set off blast effects that would disable any following incoming missiles, thus giving our surviving "dense pack" silos a chance to get off retaliatory fire.

Numerous Soviet counters to the dense-pack scheme have been suggested, among them a salvo that could blanket the field, a deep-burrowing missile that could set off disabling underground shock waves, etc.

Nevertheless, the Air Force is determined that, if not dense pack, then some other land-based scheme must be found. And, in the process, it has successfully prevented serious attention from being paid to a simple solution that would be highly effective: submarine basing.

The missile establishment holds to the rule that the American nuclear deterrent must be based on a "triad" of the Air Force bombers and land-based missiles and Navy submarine-borne missiles. Now that the existing land-based missiles are coming under a threat, the missile managers insist it is necessary that they be replaced by yet another force of land-based missiles—hence MX and dense pack.

As for why the submarine isn't the solution to increased vulnerability on land, the answer that is offered is that submarine-launched missiles are not quite as accurate as the land-based versions. Furthermore, there is the triad, which has worked so well for the Navy's missile-age interests that it isn't about to contest the Air Force's determination to guarantee its own future in missilery.

However, the technological realities are that no land-based target, least of all a stationary one, enjoys the protection of a submarine concealed in the vastness of the world's oceans.

In regard to the accuracy argument, the submarine-based Poseidon and Trident missiles are fearsome enough as it is, but they will achieve pinpoint accuracy when rapidly advancing space-based navigation systems are in place to provide launcher submarines with precise data on their distance from targets. In addition, missiles are prime targets—as the eternal quest for secure MX basing shows—and putting them to sea lessen the danger to civilian populations.

Finally, there is the survivability factor. Over a span of serveral weeks, a strong flotilla of modern Swedish vessels, operating unchallenged in its own waters, failed to find its quarry. As evidenced by Sweden's futile search for that intruder in confined waters, the odds are with the sub, and even more so on the high seas, where there is plenty of room to maneuver and hide.

No matter to our policymakers, as far as MX is concerned. The new missile, whose necessity is open to serious doubt if sub-based missiles are secure, has inspired a long succession of Rube Goldberg schemes designed to keep it alive and on land. These range from ever-rolling railroad flat cars to a multibillion-dollar shell game that would conceal 200 missiles among some 4,500 concrete shelters.

MX's advocates insist that it is necessary as insurance against a scientific breakthrough that could find submarines in the ocean depths. Scientists who study the ocean say such a breakthrough is unlikely. But even if one does occur, sub-based missiles would then be no worse off than land-based missiles.

That, too, gets ignored by policymakers of missilery. Dense pack will wither of its own complex foolishness, to be replaced by another scheme.

Land-based, of course.

Mr. PROXMIRE. Mr. President, I thank the distinguished minority leader. I yield the floor.

Mr. ROBERT C. BYRD. Mr. President, I yield such remaining time as I have to the majority leader.

Mr. BAKER. Mr. President, I thank the Chair.

Mr. President, might I reserve that time as well for use later in the day?

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I thank the Chair.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I believe that there will now be a period for the transaction of routine morning business?

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business for not to exceed 20 minutes.

Mr. CHAFEE addressed the Chair.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. CHAFEE. Mr. President, how much time do I have?

The PRESIDING OFFICER. The Chair understands the Senator has 10 minutes.

Mr. CHAFEE. I thank the Chair.

THE DANGERS OF DOMESTIC CONTENT LEGISLATION

Mr. CHAFEE. Mr. President, the House of Representatives is today considering the Fair Practices in Automotive Products Act, H.R. 5133. It seems clear that this dangerous bill will pass the House, and that an attempt will be made to obtain its consideration by the Senate.

I wish to serve notice at this time that should an attempt be made in the Senate to pass this legislation this calendar year, I intend to discuss it at great length.

This bill should be correctly labeled the "Unfair Practices Act" because it is extraordinarily unfair—unfair to American consumers, unfair to labor, unfair to auto manufacturers, and unfair to importers. Were it to become law, it would imperil thousands of American workers and farmers whose jobs depend on U.S. exports, because the bill would invite foreign retaliation. For that reason, an impressive group of U.S. business and agricultural interests has coalesced in oppostion to this bill.

What I am discussing, Mr. President, is the so-called domestic content legislation.

One effect of the bill would be to reduce the number of vehicles imported from 2 million to about 500,000, or by 75 percent, according to the Council of Econmic Advisers. It would do so by mandating that imported cars must contain certain percentages of domestic labor and domestically manufactured parts; in other words, that the domestic content of a given auto company's cars must be anywhere from 10 percent to 90 percent, depending on the number of autos that manufacturer sells in this country.

If a manufacturer sells less than 100,000 units, it is not affectd by the domesitc content provision. This means that most European imports would not be affected by the bill. If, however, the manufacturer sold 500,000 units, the domestic content required would be 50 percent; or if it sold 700,000 units, the domestic content would be 70 percent. That would mean that the bill affects mainly the two largest Japanese manufacturers, Toyota and Nissan, whose sales in this market are respectively 714,000 and 584,000 units. Clearly, such high domestic content requirements would force these manufacturers to abandon the major part of their U.S. market.

H.R. 5133 is far worse than a tariff bill. It is simply a new form of quota bill in the demure disguise of a U.S. jobs bill—a wolf in sheep's clothing. It masquerades as a jobs bill, but it really is a job loss bill. Everybody loses by the bill, Sadly, even auto workers would ultimately lose were this bill to become law.

The bill would be devastating. It would affect most sectors of the economy. It would wipe out many of the 7,000 American businesses which sell foreign autos and create substantial unemployment among the 165,000 Americans whose livelihood depends directly on the U.S. import automobile industry.

It would lead to absolutely certain foreign retaliation; there is no quesition about that. It would cause lost jobs in agriculture and industry. American farmers exported about $40 billion of their products in 1981, accounting for about one-fourth of U.S. farm income. Thus, 16 major American farm groups have joined in opposition to the bill.

The Conference Board, a leading economic and respected source of economic information and analyses, has estimate that 70 percent of all new manufacturing jobs in the last 10 years has been generated by the export sector. In other words, job creation in this Nation is coming from exports that we are sending abroad. These are the jobs that are imperiled by this bill.

Partly because of the retaliatory response the bill would evoke, the Congressional Budget Office has estimated that the bill would cause a net loss of 66,000 U.S. jobs by 1990. This simply exposes a selfish attempt to obtain employment in the auto industry at the expense of working men and women in other industries.

The effects on consumers are equally drastic. Because the bill sets standards for domestic content that cannot be met by many foreign exporters, these manufacturers would be effectively barred from the U.S. market. That is what it is designed for.

American consumers would simply not be able to buy the autos of their choice. If they turn from Japanese cars to European cars, the European manufacturers would in turn be blocked from expanding their sales because of the automatic increases in the domestic content that would be required as their sales volume rose under this legislation.

The result would be higher prices. The U.S. auto market would be increasingly isolated. Consumer choice would be limited mainly to domestic cars and the prices of these cars would inevitably rise.

What a bonanza for the U.S. automobile manufacturers and the United Auto Workers. Sure this is designed for them, temporarily at least. They would increase their prices, they would not agree to any freeze on wages, or freeze on cost-of-living adjustments. Up would go the price.

The Council of Economic Advisers has estimated that the price of all cars sold in the United States would increase by $1,000 per vehicle.

Mr. President, this discussion that I have had this morning on the harmful effects of this dangerous bill is at best cursory. This legislation has been the subject of substantial analysis by our own CBO, the executive branch agencies, and business and farm organizations. However, in the Senate we have had no hearings in this domestic content legislation. Certainly it requires extensive study by the Commerce Committee and by the Finance Committee before being considered by this body.

Mr. President, I think this is an extremely serious matter and indeed so does our administration think it is extremely serious.

In absence of study that a bill of this consequence must have I will vigorously oppose its consideration by the Senate during the remainder of this session.

Mr. President, I think that this legislation, as I have said, represents tremendous dangers to the United States and I call all my colleagues' attention to it and urge their careful consideration of this measure and urge that it not be taken up, that it not be considered on the floor here during this truncated session, but that were it to pass the House of Representatives, as most predict it will, it be referred to committee and be carefully considered there and indeed postponed until next year and then we can start all over again.

Thank you, Mr. President.

EXTENSION OF TIME FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that the time for the transaction of routine morning business be extended to not longer than 11 a.m. in which Senators may speak for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

A TRIBUTE TO DAVE RIMINGTON

Mr. ZORINSKY. Mr. President, I pose a question to my colleagues. What has a 3.54 grade average, twice has been named the Nation's top college interior lineman and is known to put away six steaks in a single sitting?

The answer, for those who do not follow Big 8 football, is a Nebraska phenomenon named Dave Rimington. And, although he is not quite faster than a speeding bullet, he is still Superman to those of us from the Cornhusker State.

At 6 foot 3 and 290 pounds, Dave is one of the biggest things to hit Nebraska football in years. The senior center has won the Outland Trophy, given annually to the Nation's out-

standing interior lineman, the last 2 years. He is the only player to repeat as winner in the trophy's 37-year history.

He also was a top contender for this year's Heisman Trophy, an AP and UPI All-America pick and winner of the Vince Lombardi Award for the Nation's outstanding college lineman.

But Dave is more than just an athletic phenomenon. An economics major, he is a Rhodes Scholar candidate and one of 11 scholar-athletes honored earlier this month at the silver anniversary dinner of the National Football Foundation.

What is more, he rates his scholastic honors right up there with his athletic achievements. "Education kind of gets downplayed on the football field," he says. "Football, however, is only part of your life."

Dave's long-range goal is to enter the corporate business world or perhaps start his own business. His teammates kid him about someday being an economic adviser in the White House.

Mr. President, noted author and broadcaster Heywood Hale Broun has said that "sports don't build character; they reveal it." That certainly is the case with Dave Rimington.

I know I speak for all Nebraskans when I say I am extremely proud of this outstanding 22-year-old native of Omaha. He is a credit to his hometown, the University of Nebraska at Lincoln and the entire Cornhusker State.

Thank you, Mr. President.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. STAFFORD. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mrs. HAWKINS). Without objection, it is so ordered.

THE INTERPARLIAMENTARY UNION

Mr. STAFFORD. Madam President, I am going to take a minute or two to informally talk about the Interparliamentary Union, and I hope as I do so that some of the Members of this body will be listening to their in-office speakers as they conduct other morning business for their constituencies. I also hope that some of their assistants will be listening so that some of my colleagues in the Senate will be intrigued to know more about the Interparliamentary Union.

What is it? Interparliamentary Union is an international body membership which requires a parliament in the country seeking to join the body.

Currently there are approximately 90 nations which belong to the Interparliamentary Union, including our own United States, and all of the parliamentary democracies this Senator knows of around the globe.

How old is Interparliamentary Union? It has been in existence since the 1890's so that it is the oldest major interparliamentary organization in the world.

Not only do the parliamentary democracies belong to it but also the Communist bloc nations and the Soviet Union, all of whom technically can claim to have a parliament, even though it may meet but once a year for a couple of hours.

I am making these remarks purely informally since at the end of the current Congress the Senator from Vermont will no longer be the President of the United States group that has been attending meetings of Interparliamentary Union. But I am doing it in part because in the view of the Senator from Vermont my colleagues in the Senate have not been showing what I would consider to be an adequate interest in the affairs of Interparliamentary Union.

There is some dissatisfaction, I would have to say to my colleagues, on the part of Members of the other body who have generally producd substantial delegations to attend meetings of Interparliamentary Union.

The meetings do afford members of the U.S. delegation an opportunity to learn at firsthand what delegations from other parts of the world with different philosophical and political outlooks think of us here in the United States and our policies.

There are, in the view of this Senator, constructive discussions and debates over numbers of international issues, including disarmament, international trade, education, communications, what is known as colonialism, and other interesting issues. The U.S. delegation comes eyeball to eyeball with our acquaintances who are in the delegations from the Soviet Union, the Communist bloc nations, the Third World nations, and those representing the parliamentary democracies with whom we are friendly and cooperate in these meetings.

The next meeting of the Interparliamentary Union will be held in the spring, as is customary, and current plans are for that meeting to be held in Helsinki, Finland. The fall meeting is currently scheduled to be held in Seoul, Korea, in September.

I hope that Members who may be intrigued with the opportunity to represent this Nation, either in the spring meeting or the fall meeting or both meetings, might informally contact me and I would be glad to discuss the matter further personally with any Senator who might be interested.

Madam President, I yield the floor.

UNANIMOUS CONSENT AGREEMENT

SURFACE TRANSPORTATION ASSISTANCE ACT OF 1982—H.R. 6211

DEFENSE APPROPRIATIONS—H.R. 7355

Mr. BAKER. Madam President, I am about to put a unanimous-consent request that I have discussed with the parties who have indicated an interest in these matters and with the minority leader.

Madam President, there are two items on the calendar that are must items that I have discussed previously. The first is H.R. 6211, Calendar Order No. 987, which is the so-call gas tax or highway or jobs bill, principally depending on who describes it, and the other is H.R. 7355, Calendar Order No. 985, the defense appropriations bill. As I say, both of those are on the calendar, Madam President. But the 1-day rule ordinarily would bar their consideration until after an adjournment of the Senate.

For a variety of reasons that vary from Senator to Senator, it does not appear desirable to adjourn the Senate and thus qualify these matters under the rule, although we could do that. But Senators who have a principal interest in this have kindly indicated they they would agree, I believe, that the 1-day rule might be waived as to these two items.

Therefore, Madam President, I ask unanimous consent that the bills H.R. 7355, which is the defense appropriation bill, and H.R. 6211, the surface transportation bill, be considered as having been on the calendar 1 legislative day for the purpose of the rules of the Senate.

Mr. ROBERT C. BYRD. Madam President, reserving the right to object, and I will not object, but I would like to be recognized immediately after the request is granted.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I thank the Chair.

Mr. ROBERT C. BYRD. Madam President, the reason there was no objection on this side was that, as the majority leader has stated, the two measures are generally conceded to be must measures, and that was one of the reasons why there was no objection.

Second, as the majority leader pointed out, he could achieve his objective of dealing with the 1-day rule simply by adjourning the Senate, and the 1-day rule would have been wiped out.

Third, by proceeding as he has, the right of those Senators who wish to debate the motion to proceed are preserved, because, if the majority leader had adjourned the Senate, it is conceivable that he could have found a window during the first 2 hours during which to make the motion to proceed, and that motion to proceed would not have been debatable under rule VIII,

and the majority leader did not want to prevent Senators from exercising their rights to debate the motion to proceed. So for those who wish to debate the motion to proceed, their rights are preserved by this method.

For these reasons, there was no objection from this side. I make that statement for the record.

Mr. BAKER. Madam President, I thank the minority leader.

Madam President, when we conclude morning business it is my intention to ask the Senate to proceed to the consideration of another calendar item, Calendar Order No. 995, Senate Resolution 507, which is the budget waiver to accompany the gas tax bill. It is, of course, a privileged matter and there is a statutory time limitation of 1 hour for debate. Time for that measure is allocated to the control of the majority leader and the minority leader or their designees, as I recall. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. While we ascertain that the principals involved with that measure are available to proceed—meaning, primarily, the Budget Committee people—I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF TIME FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Madam President, the chairman of the Budget Committee (Mr. DOMENICI) is not here yet. He is on his way to the floor and should be present shortly. I prefer not to attempt to go to the budget waiver until he is present so representatives on both sides are available to manage that resolution. Therefore, I ask unanimous consent that the time for the transaction of routine morning business be extended not past 11:15 under the same terms and conditions.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF TIME FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Madam President, I ask unanimous consent that the time for the transaction of routine morning business be extended not past the hour of 11:30 a.m.

The PRESIDING OFFICER (Mrs. KASSEBAUM). Without objection, it is so ordered.

Mr. GRASSLEY. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

BUDGET ACT WAIVER FOR SURFACE TRANSPORTATION

Mr. BAKER. Madam President, I ask unanimous consent that the Senate turn to the consideration of Calendar Order No. 995, S. Res. 507, the budget waiver to accompany H.R. 6211, the Surface Transportation Assistance Act of 1982.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Madam President, it is my understanding that there is no objection on this side of the aisle.

The PRESIDING OFFICER. Hearing no objection, the resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 507) waiving section 303(a) and section 402(a) of the Congressional Budget Act of 1974 for consideration of H.R. 6211, the Surface Transportation Act of 1982, and certain amendments thereto.

The Senate proceeded to consider the resolution.

Mr. DOMENICI. Madam President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOMENICI. Madam President, is it correct that there is 1 hour of debate on the waiver resolution?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Will the Senator yield?

Mr. DOMENICI. I yield.

Mr. BAKER. Madam President, I believe the act provides that I have control of half of the time; is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Madam President, I yield control of that time to the distinguished chairman of the Budget Committee.

Mr. HUMPHREY. Madam President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HUMPHREY. Can time be yielded back?

The PRESIDING OFFICER. Yes; it can be.

Mr. HUMPHREY. I thank the Chair.

Mr. DOMENICI. Madam President, I yield myself 5 minutes.

Today we consider the Budget Act waiver for H.R. 6211, the Surface Transportation Act of 1982, and certain amendments thereto. A waiver of both sections 303 and 402 is necessary because sections of this legislation provide direct spending, in violation of section 303, and other sections contain authorizations reported after the May 28 deadline, in violation of section 402, the latter being merely a timeliness requirement. It is important to note that this debate should be limited to this waiver, not to debate the merits of the Surface Transportation Act.

Senate Resolution 507, the waiver of sections 303 and 402, was reported by the Finance Committee yesterday. The Congressional Budget Act gives the Budget Committee 10 working days to consider a waiver but, due to the urgency of this legislation and the short period of time remaining in this Congress, I felt it was important for the committee to act on this waiver quickly and allow the full Senate to consider this legislation.

We faced a unique situation in considering this waiver. This waiver is rather complicated because the legislation was referred to four committees and each committee acted upon it in a different way. This waiver, S. Res. 507 was reported by the Finance Committee for the bill, H.R. 6211, and for the amendments to the bill that have been reported from the Commerce Committee and the Environment and Public Works Committee and the legislation that was discharged from the Banking Committee. The Budget Act permits that Committee to report this type of omnibus waiver. Budget waivers may cover a bill as well as all matters related thereto. In this case the matters related thereto are the amendments which have been reported by other committees. While most waiver resolutions waive only a single section of the Budget Act—either section 303 or section 402—this waiver covers both sections.

A waiver of section 303 is necessary because sections of this legislation contain new spending authority in the form of contract authority. Section 303 of the Budget Act provides a point of order against any bill or amendment that provides for new spending authority for a fiscal year for which a first concurrent resolution on the budget has not yet been agreed to.

In this case, the multiyear nature of the highway program requires direct spending in fiscal year 1984 which, violates section 303. But, obviously, the waiver provisions are there so that this matter could be handled in this manner.

Multiyear direct spending is necessary in order to allow States to plan large capital improvements projects.

What I am saying, Madam President, is that the nature of the Highway Act is that it contains multiyear spending. We have an outyear expenditure and, therefore, we need the waiver. It is very conventional in a highway bill that we provide section 303 waivers.

The multiyear nature of this has required the section 303 waiver each time such legislation has been considered since enactment of the Budget Act. Each time we have considered a highway bill, this kind of waiver has been necessary.

A waiver of section 402 is necessary because sections of the legislation authorize appropriations for fiscal year 1983 and were reported after the May 28 deadline. So it will be generally understood, this kind of 402 waiver has been granted literally scores of times this year because much legislation was reported long after May 28. However, the waiver provision was included in the Budget Act specifically to deal with legislation such as H.R. 6211. The Budget Act is intentionally flexible in order to allow the Senate to consider emergency legislation that could not have been reported before the deadline for authorization.

I think this particular legislation is a patent example. There was not concurrence in the Congress, nor was there support from the White House for this approach May 28. It came along later in the year. The Budget Act intended to provide flexibility for this type of legislation.

I hope the Senate will agree with me that this waiver should be adopted at this time.

Madam President, I understand that the distinguished Senator from New Hampshire would like to speak. I assume it is in opposition to the waiver.

Is that correct, I ask the Senator?

Mr. HUMPHREY. That is correct, Madam President. I have a question I would like to pose to the distinguished Senator from New Mexico.

Mr. DOMENICI. I shall be glad to answer any questions, but I also want him to know that I have a half hour and I am glad to yield some reasonable portion of that to him or anyone else who wants to speak in opposition.

The PRESIDING OFFICER. The 5 minutes of the Senator from New Mexico has expired.

Mr. DOMENICI. Would the Senator like me to yield any amount of time?

Mr. HUMPHREY. Yes, Madam President.

Mr. DOMENICI. I yield 5 minutes to the distinguished Senator from New Hampshire.

Mr. HUMPHREY. Madam President, I begin by addressing a question to the chairman of the Committee on the Budget. If he cares to follow this, it is on page 423 of the book of Senate Procedures at the bottom.

I refer the Senator's attention to section 303(c), the part that reads.

That committee shall report the resolution to the Senate within 10 days after the resolution is referred to it (not counting any day on which the Senate is not in session) beginning with the day following the day on which it is so referred, accompanied—

I stress the word "accompanied"—

by that committee's recommendations and reasons for such recommendations with respect to the resolution.

It seems to this Senator that the choice of the word in the Budget Act is quite explicit. The word is "accompanied," not "incorporated." The budget waiver, as it reached the desk, as I understand it, incorporates the committee's recommendations and reasons, but is not accompanied by such. That is, it is not accompanied by a report. My distress with this budget waiver and the associated gas tax-jobs bill, in part, is that the matter is being railroaded through Congress without the usual due process and reasonably careful consideration of various points of view. It seems to me, unless I am mistaken, that here is yet another evidence of the speed with which this matter is being rushed through Congress. There is no report accompanying the budget waiver; rather, it has been incorporated within the waiver itself. I ask the chairman of the Committee on the Budget why his committee has not sent its recommendations and its reasons for those recommendations in a report and instead has incorporated them.

I am not making a point of order here, but I thought it worth discussing, that it appears to me it has incorporated these recommendations within the waiver itself. Is this not another evidence of the speed with which this legislation is being rushed through the Senate?

Mr. DOMENICI. The Senator is absolutely correct that the way we acted is not only evidence of speed, but it is speed. We felt compelled to act in an expeditious manner.

Mr. HUMPHREY. I wonder why that is, if the Senator would care to answer?

Mr. DOMENICI. Because the leadership has expressed itself as desiring that this matter be considered during the lameduck session. We have, I think, a rather appropriate history of cooperating with the leadership of the Senate. Thus, when they asked us to do it, we complied in every respect with the spirit and the letter of the Budget Act. We had 12 Members in attendance. We called the meeting pursuant to the rules, and we reported this resolution in a very typical manner.

If the Senator thinks that by incorporating the recommendation in the resolution, that is evidence of something extraordinary, I assure him that it is not. Everything else about it is evidence that we are in a hurry, but that is not. That is a very typical way—we hardly do it otherwise. We include the favorable, the unfavorable, or "without recommendation" language in the resolution itself. We have done that this time.

I note for the Senate that the Budget Committee is discharged of its procedural responsibility if it reports a waiver with any of the following three recommendations—favorably, unfavorably, or without recommendation. We noted here that the vote yesterday was to report the waiver without recommendation.

Mr. HUMPHREY. So the Senator is saying that the standard procedure is incorporating recommendations and the reasons for such within the waiver as opposed to issuing an accompanying report?

Mr. DOMENICI. I do not understand the question.

Mr. HUMPHREY. This Senator's contention is that there is possibly a violation of the Budget Act inasmuch as the recommendations and the reasons for the same are incorporated in the waiver as opposed to accompanying the waiver. It seems to me the language in the act very strongly implies a report accompanying the waiver, not incorporated within it.

Mr. DOMENICI. No, first of all, a report is not required. I would be delighted to cite the sections with reference to that. We did not file a report. The resolution before us is the resolution prepared by the Committee on Finance that was referred to the Budget Committee and required action by the Budget Committee. When we reported it back, we sent the resolution accompanied by our recommendation. Our recommendation is that it be reported without recommendation. That is precisely the way it is always done. It is not incorporated in the resolution.

The PRESIDING OFFICER. The 5 minutes allotted to the Senator from New Hampshire has expired.

Mr. DOMENICI. Does the Senator desire additional time?

Mr. HUMPHREY. Yes, I wish the Senator would yield additional time.

Mr. DOMENICI. I shall be glad to yield an additional 3 minutes. The only reason I am being a little cautious is that I understand others wish to be heard and I have only a half hour.

Mr. HUMPHREY. I do not wish to take up time if somebody wishes to speak. Obviously, nobody does.

The Senator has stated that the committee forwarded the waiver without recommendation.

Mr. DOMENICI. Would the Senator repeat that, please?

Mr. HUMPHREY. The chairman stated that the Budget Committee forwarded the waiver without recommendation. Is that correct?

Mr. DOMENICI. That is correct.

Mr. HUMPHREY. Where is that language, "without recommendation," contained?

Mr. DOMENICI. A parliamentary inquiry, Madam President.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOMENICI. I ask the Parliamentarian. That is the way it was reported by the committee. I am not in control of what is printed and what is not printed.

The PRESIDING OFFICER. The committees have the right to report either favorably or unfavorably or without recommendation.

Mr. DOMENICI. And the committee has so reported, without recommendation.

The PRESIDING OFFICER. The Senator is correct.

Mr. HUMPHREY. Parliamentary inquiry. How is that transmitted to the Chair? Is it incorporated within the waiver or is there a separate report?

The PRESIDING OFFICER. It is an endorsement on the printed copy of the resolution.

Mr. HUMPHREY. It is an endorsement. Is it a handwritten endorsement or printed endorsement?

The PRESIDING OFFICER. No, it is the printed endorsement on the resolution.

Mr. HUMPHREY. So it is incorporated within the resolution as opposed to accompanying it?

The PRESIDING OFFICER. The Senator from New Hampshire is correct.

Mr. HUMPHREY. That is all I have to say on the point at this moment, Madam President. I understand, if time might be yielded to him, that the Senator from Oklahoma wishes to speak.

Mr. DOMENICI. Madam President, how much time does the Senator from New Hampshire have remaining on what I yielded to him?

The PRESIDING OFFICER. One more minute.

Mr. DOMENICI. I yield that 1 minute and an additional 5 minutes to the distinguished junior Senator from Oklahoma.

Mr. NICKLES. I thank the Senator from New Mexico. I have a couple of questions for the Senator, if I might.

Mr. DOMENICI. Sure.

Mr. NICKLES. The reason for the Budget Act having both rules—what is it, 303 and 402?—is that if you are going to come up with an authorization bill or a spending bill outside of the budget you would have to have a special waiver, outside of the budget resolution that was adopted by Congress?

Mr. DOMENICI. No, section 402 has nothing to do with whether a piece of legislation is within or exceeds the budget resolution's limitations, but, rather, has to do with filing a bill by May 28 in this particular year. Generally, it is May 15. Because of some delays, it was agreed that the reporting deadline would be May 28. Section 402 relates to timeliness.

As an example, the Senator from Oklahoma sits on the Energy and Natural Resources Committee. In the last month, maybe last 2 months, many bills that relate to various and sundry aspects of public leased land, a special piece of legislation to cure this or that, have been discussed. Any one of these bills reported to the Senate after May 28 of this year would be accompanied by a waiver. The Budget Committee goes through the process of voting and making a recommendation to the full Senate. We report waiver resolutions similar to the one here. It is obviously not complex. As I explained before, the 303 waiver is a waiver that does not relate to breaking budgets but, rather, relates to a very technical thing called direct spending.

Most highway bills provide for direct spending at least 1 year beyond the current fiscal year. This bill is no exception. It provides for direct spending in the year of 1984, and that is because you need leadtime in preparing highway programs. So, technically, 303 direct spending is involved, and this waiver includes a waiver of the prohibition against direct spending.

Mr. NICKLES. If the Senator will help me clarify a little bit further, because there is a direct additional budget authority and spending authority in the out years, whether it be 1983 or 1984 or 1985, that is when 303 would have to be waived?

Mr. DOMENICI. The Senator is correct. I gather from his question, however, that he might conclude by my answer that direct spending is obviously in violation of budget targets. That is not the case. The issue is direct spending itself. Even if it falls within budget targets in the out years, it needs a waiver. It does not have to do with whether it breaches the budget in terms of more expenditures than contemplated or larger deficits than contemplated, simply the fact that it is direct spending.

Mr. NICKLES. Let me try and get a better feel for it, if the Senator will answer this question. How much additional new spending or spending authority are we talking about in the out years based on this budget waiver?

Mr. DOMENICI. I say to the Senator that that is extremely complicated and difficult to analyze. We have a table which, based upon our best estimates, incorporates both the new taxes and the new expenditures contemplated, and the estimated net effect on the deficit. For fiscal year 1983 it is minus $700 million, for 1984 it is minus $500 million, and when you get out to 1985, it adds $100 million. So what I am saying is that if you look at this estimate they will collect more taxes in 1983 than they spend and more in 1984, and then, if everything remains as is, they will spend $100 million more in 1985.

The PRESIDING OFFICER. The Chair advises the Senator from New Mexico that the additional time yielded has expired.

Mr. DOMENICI. I do not want to mislead the Senate in answering that question. This is a very difficult one to estimate, and since we are operating in a rather short timeframe, the numbers that we are using are the numbers that come from the Senate Budget Committee staff, but they have gathered their information from the Joint Committee on Taxation and the Congressional Budget Office.

We certainly do not have a full Congressional Budget Office estimate. These are the best we can come up with. But it is rather obvious that when you are just talking about money going into the trust fund and money going out of the trust fund it is fair to say that the tax portion and the additional spending for the highway program and other programs is certainly not per se a significant contributor to the deficit. It is fair to say that with assurance to the Senate.

Mr. NICKLES. Will the Senator yield further?

Mr. DOMENICI. I am pleased to. Does the Senator desire another 5 minutes?

Mr. NICKLES. I would appreciate it.

Mr. DOMENICI. Madam President, when we have completed this 5 minutes, how much time does the Senator from New Mexico have?

The PRESIDING OFFICER. There will be 10 minutes remaining.

Mr. NICKLES. I thank the Senator. I have a couple more questions. As the Senator from New Mexico probably understands, my dilemma about the bill, as mentioned by the Senator from New Hampshire, is the fact that it has gone so quickly. We do not have a report from the Finance Committee or the Budget Committee to try and grapple with the economic consequence. Everybody talks about whether it is a $5.5 billion tax increase per year, but to date I have not seen a committee report that shows a breakdown of where that is coming from, the gasoline tax or whether it be the excise tax, or the net revenue effect on what it will do for the budget and the deficit. So if the Senator from New Mexico could possibly respond and give me what the estimated receipts and outlays are for 1983, 1984, and 1985, it would be appreciated by this Senator.

Mr. DOMENICI. I say to my good friend from Oklahoma I am certain that the distinguished chairman of the Finance Committee, Senator DOLE, when the bill is before us, will go into it in more detail. He is certainly more

familiar with all of the nuances of the tax.

It is not just a 5-cent tax on gasoline. It has some other taxes, as the Senator knows.

It is not the Budget Committee's prerogative to analyze them from the standpoint of whether we like them or not. That is certainly the prerogative of the Finance Committee.

But I can give the Senator some numbers. I will read them to him and will give him a copy of our estimates. Maybe it will be helpful.

Might we do this: I ask unanimous consent that the preliminary Senate Budget Committee estimates of the budgetary implications be printed in the RECORD.

There being no objection, the estimates were ordered to be printed in the RECORD, as follows:

PRELIMINARY SENATE BUDGET COMMITTEE ESTIMATES OF THE BUDGETARY IMPLICATIONS OF H.R. 6211, THE SURFACE TRANSPORTATION ASSISTANCE ACT OF 1982

[In billions of dollars]

	Fiscal year							
	1983	1984	1985	1986	1987	1988	1989	1990
Additional revenues	1.7	4.1	4.2	4.2	4.3	4.4		
Additional outlays (Direct spending)								
Highways and bridges	0.7	2.9	3.2	4.9	5.7	5.0	1.5	0.5
Highway safety grants	(1)	(1)	(1)	0.1	0.1	0.1		
Airport development aid program (ADAP)	(1)	0.1	0.1	0.1	(1)			
Recreational boating safety	(1)	(1)	(1)	(1)	(1)	(1)		
Reforestation	0.1	(1)	(1)	(1)				
Authorizations [2]								
Urban Mass Transit	0.2	0.5	0.8					
Highway safety research and development		(1)	0.1	0.1	0.1			
Total additional outlays	1.0	3.6	4.3					
Net effect on the deficit (minus means lower deficit)	−0.7	−0.5	+0.1					

[1] Less than $50 million.
[2] Assumes authorizations are fully funded.
Note.—Details may not add to totals due to rounding.

Mr. DOMENICI. Madam President, I say to the distinguished Senator from Oklahoma that he has in his hands what has just been made a part of the RECORD and perhaps it would be better that he ask me questions about it. I think it is rather self-explanatory, but I will be delighted to answer any questions.

Mr. NICKLES. I thank the Senator.

This table does, I think, point out some of the problems that some of us may have.

It says additional revenues in 1983 of $1.7 billion. Is that total additional revenues of $1.7 billion?

Mr. DOMENICI. That is net revenue.

Mr. NICKLES. And then in the further years $4.1 billion, $4.2 billion, $4.2 billion, $4.3 billion, $4.4 billion all the way out to 1988.

I do not see a $5.5 billion bill that we have continually been reading about.

Mr. DOMENICI. Madam President, what we try to do here is to give the Senator from Oklahoma and other Senators an estimate of the net effect. The Senator wants the gross numbers. This estimate deals with net taxes. The Senator can get the specific tax receipts that will result from the bill from the Finance Committee. Net taxes means we impose the tax and businesses and corporations of the United States and individuals get to deduct additional amounts. We have taken the amount of tax reduction that occurs off the trust fund receipts.

I suggest that this method of estimating net taxes is used whenever we change the tax law.

In this case, it is 25-percent reduction, more or less in terms of the total Treasury effect, and there is general agreement with that kind of rough formula.

Mr. NICKLES. I thank the Senator.

If I might just make a couple comments, part of my serious reservations about this bill is the speed and haste that it has been on the railroad in coming through, and these facts have not been known or made to the rest of the Senators. There has not been a report filed on the bill either from the Finance Committee or from the Budget Committee. When we are talking about multibillion-dollar decisions that affect each and every single individual who drives an automobile or a vehicle in this country, I think we should know what we are talking about.

It seems like we are on a very hastened pace to be moving forward which I personally somewhat resent.

I think a lot of times, if we look back on some of the mistakes that have been made legislatively, they have been made because legislation has been made in haste.

The PRESIDING OFFICER. The 5 minutes of the Senator from Oklahoma have expired.

Mr. NICKLES. I have concluded my comments.

I thank the Chair.

Mr. DOMENICI. Madam President, I reserve the remainder of my time.

Madam President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOMENICI. If we have a quorum call, against whom is it charged?

The PRESIDING OFFICER. Against the time of the Senator who suggests it.

Mr. DOMENICI. Madam President, I ask unanimous consent that the time be charged equally.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOMENICI. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Parliamentary inquiry, Madam President.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOMENICI. How much time does the Senator from New Mexico have?

The PRESIDING OFFICER. Four minutes.

Mr. DOMENICI. Four.

How much time does the other side have?

The PRESIDING OFFICER. There are 24 minutes remaining.

Mr. DOMENICI. I yield 2 minutes to the distinguished Senator from Oklahoma.

Mr. NICKLES. I thank my friend from New Mexico.

If the Senator will yield to me for just one question, I notice on the calendar I think 17 or 18 waivers are now pending. Is it done automatically? If

you need a waiver from the Budget Committee it is kind of we run right by the budget, whether it is a 303 or 402 waiver?

Mr. DOMENICI. The calendar list includes many waivers that are pending before the Budget Committee. In each instance, we act. I assume most of those are timeliness waivers, Senator. I do not know. Almost all are 402(a) waivers which have to do with, as I explained to the Senator before, the fact that a great deal of legislation has been reported late in the year after the May 28 deadline.

Mr. NICKLES. The 17 other waivers which have been reported from the Budget Committee then I am hoping are 402 waivers and not 303 waivers, is that correct?

Mr. DOMENICI. I could go through them one by one, but I think it is fair to say almost all of them are timeliness waivers.

Mr. NICKLES. I appreciate the comment because I have heard a great deal said about the Budget Act, yet when I see we go around it so quickly in something which is to raise budget authority as we have in this 303 waiver, it concerns me, it concerns me a lot.

We spent a lot of time debating the Budget Act and we are talking about deficits, taxes, and authority to see if we can move something.

I notice this was marked up yesterday, on the calendar today, without report, and it seems to me it was done very, very rapidly, and I would hope that maybe on this bill and on others when we are talking about items that are in the multibillion-dollars-per-year range that both the Committee on Finance and the Budget Committee and the Senate will take more time in their deliberations on such important issues.

The PRESIDING OFFICER (Mr. MATTINGLY). The Senator's 2 minutes have expired.

Mr. DOMENICI. We have now checked and all 17 are timeliness waivers.

Mr. President, I reserve the remainder of my time.

Mr. LONG. Mr. President, on the minority's time I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. CHILES. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHILES. Mr. President, we are discussing now the proposed waiver from the Budget Committee to allow the gas tax now to be taken up. The Budget Committee has voted out, without recommendation, the waiver and that is the matter that we are on at this time.

In our discussions in the Budget Committee in regard to the waiver, we were looking at the factor that, while the gas tax proposes to raise approximately $5.5 billion per year from the nickel tax and the other items in the tax, in effect the net revenue to the Federal Government is going to be less than that if we deduct what will be the loss to general revenue from the business deduction. For the corporate expense or the corporate portion of the tax as a business deduction, we are going to lose approximately $1.5 billion. So rather than have $5.5 billion per year, we are going to have closer to $4 billion a year. Even though the trust fund will receive into that $5.5 billion, there will be a loss to general revenue of this $1.5 billion.

Now the concern I think that was expressed in the Budget Committee—I started the discussion, but all of the members of the Budget Committee then did respond that, if we go forward with the bill now that is going to spend $5.5 billion, we better recognize that what we are doing is we are adding to the deficit then $1.5 billion a year because we are going to be actually spending more than we are taking in.

So the Budget Committee voted out a spearate resolution—we did not try to amend the waiver; we recognized that that was something we could not do—calling this matter to the attention of the Senate and to the Congress, expressing our feelings that we should not be adding to the deficit, by what we would be expending in a program to fix the highways, more than we are actually taking in from the tax and also expressing our strong belief that moneys that are coming out of this should go through the expenditures, should go through the proper authorizing committees and the appropriating committees, and that we were not attempting to create simply another entitlement.

I think the Senate bill purports to do this, although the House bill seems to be on a different track, seems to be creating what is more an entitlement program than a program that is going to go through authorizing an appropriating committees. Our whole direction, as we put in the Budget Act and has been since that time, was that we did not want to create additional programs that are purely entitlement. We are having enough trouble with some of the entitlement programs that we now have. We want to see some of these programs go through the authorizing committee and the appropriating committee.

So the work in reporting out the resolution, reporting out the wiaver without recommendation was, I think, based on the fact that we were sending out a separate resolution calling to the attention of the Senate that we are actually talking about right now spending more money than we are going to be taking in net from the gas tax; that if we in fact do that, that would be adding to our deficit and we in the Budget Committee think that is a mistake and that we ought to watch and see that we are not adding to the current deficit, and that, also, we feel strongly that we should insist on the part of our conferees that we maintain the Senate position that funds expended for the highway repair and the other items under the bill and the moneys expended should go through the appropriate authorizing committees and also be appropriated through the Appropriations Committee.

That, I think, was what we were hoping to call to the attention of the Senate. I hope at the appropriate time that the majority leader would call up our other resolution so that we could bring that also before the Senate, because I think the Senate also should respond to that action.

I yield to the distinguished chairman of the committee.

Mr. DOMENICI. Will the distinguished Senator from Florida yield on his time? I only have 2 minutes, and I want to save that.

Mr. CHILES. I yield to the Senator such time as he needs.

Mr. DOMENICI. I thank my friend.

I say to the Senator that I have talked with the leader about the related freestanding resolution that the Senator refers to, that he offered and which was adopted. Basically, I think we will have to talk with the leader and with the minority leader because it will require unanimous consent to bring it up. Immediately after the adoption of this waiver resolution, the subject matter will be the gasoline tax and related committee amendments on highways and mass transit.

All I can do is suggest to the distinguished Senator from Florida that we meet with the leader when we are finished with this resolution. I understand that no one is going to ask for a rollcall vote on this resolution and we, therefore, will be finished shortly.

Mr. CHILES. I thank the distinguished chairman. I am prepared, if the chairman is, to yield back the remaining time that I have on the resolution.

Mr. HUMPHREY. Parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. HUMPHREY. The chairman of the Budgert Committee stated that the next business of the Senate after disposition of the budget waiver will be the gas tax bill. Will it not be the motion to proceed to the gas tax bill?

The PRESIDING OFFICER. It will be the motion to waive section 402(a) of the Budget Act.

Mr. HUMPHREY. Yes; but following that.

The PRESIDING OFFICER. Then there is an order to deal with Radio Marti.

Mr. BAKER. Will the Senator yield for a further parliamentary inquiry?

Mr. HUMPHREY. Yes.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Mr. President, I am sorry. I came in the middle of that conversation and ruling. But do I understand the Chair to state that, after the disposition of this budget waiver resolution, the motion in respect to Radio Marti will recur?

The PRESIDING OFFICER. That is correct.

Mr. BAKER. Mr. President, I might add, in clarification of the situation, that at that moment I intend to seek recognition for the purpose of making a motion to proceed to the consideration of the gas tax bill.

The PRESIDING OFFICER. The order was for recognizing Mr. ZORINSKY at that time.

Mr. BAKER. Mr. President, I intend to see if we can arrange with Senator ZORINSKY to do that.

Mr. DOMENICI. Mr. President, I apologize to the distinguished Senator from New Hampshire, when I stated that the next item of business would be what I said it would be. That clearly was a mistake on my part. I understood the leader was going to move that we take up the bill. It is more correct as stated by the leader than stated by the Senator from New Mexico.

Mr. CHILES. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, if someone has 15 seconds, so that I might inquire, I wonder if we have exhausted the need or time for debate on this measure and we can go on with the next step in the procedure.

The PRESIDING OFFICER. Has all time been yielded back?

Mr. BAKER. If the Chair will withhold for just a moment—did I understand the distinguished Senator from Florida to say that they were prepared to yield back their time?

Mr. ZORINSKY. Mr. President, I yield back the remainder of the time allocated to the minority.

The PRESIDING OFFICER. Has all time been yielded back?

Mr. DOMENICI. Mr. President, I yield back the remainder of my time on our side.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 507) was agreed to, as follows:

S. RES. 507

Resolved, That section 303(a) and section 402(a) of the Congressional Budget Act of 1974 are hereby waived with respect to consideration of H.R. 6211, the Surface Transportation Assistance Act of 1982 and the following amendments thereto:

S. 3043, the Federal-Aid Highway Improvement Act of 1982, as ordered reported by the Senate Committee on Environment and Public Works on December 8, 1982;

S. 3072, a bill to amend the Urban Mass Transportation Act of 1964, as discharged on December 3, 1982, from the Senate Committee on Banking, Housing, and Urban Affairs; and

Title IV of S. 3044 with an amendment in the nature of a substitute, as ordered reported by the Senate Committee on Commerce, Science, and Transportation on December 6, 1982.

SECTION 1. A waiver of section 303(a) is necessary because the bill and certain amendments thereto contain new spending authority for a fiscal year for which a first concurrent resolution on the budget has not yet been agreed to as required by the Congressional Budget Act.

SEC. 2. A waiver of section 402(a) is necessary because this legislation authorizes the enactment of new budget authority which would first become available in fiscal year 1983 and such legislation was not reported before May 28, 1982, as required by the order of May 12, 1982.

SEC. 3. Waivers of the Budget Act are necessary to permit congressional consideration of this bill and certain amendments thereto. This legislation contains multiyear spending to provide States and others the ability to plan long-term capital programs. This proposal is being reported in response to the need for immediate rehabilitation and restoration of our Nation's highways, bridges, mass transit systems, and other facilities.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BUDGET ACT WAIVER FOR RADIO MARTI

The PRESIDING OFFICER. The question recurs on agreeing to the motion to waive section 402(a) of the Budget Act with respect to the consideration of H.R. 5427.

Under the previous order, the distinguished Senator from Nebraska is recognized.

Mr. ZORINSKY. Mr. President, I am happy to yield to the majority leader, provided I am accorded unanimous consent to be recognized first to resume when this question is again brought before the Senate today, tomorrow, or any other day, and that the continuation of my remarks at that time will be ruled as an extension of my first speech and not as a second speech under the two-speech rule.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. Mr. President, I thank the Senator from Nebraska for permitting me to seek recognition at this point.

SURFACE TRANSPORTATION ASSISTANCE ACT OF 1982

Mr. BAKER. Mr. President, as I indicated previously, I will ask the Senate to turn to the consideration of the highway bill, Calendar No. 987, H.R. 6211. I rather expect that I might not be able to do that by unanimous consent, but I never know until I try.

I ask unanimous consent that the Senate turn to the consideration of Calendar No. 987, H.R. 6211.

Mr. NICKLES. I object, Mr. President.

The PRESIDING OFFICER. Objection is heard.

Mr. BAKER. Mr. President, I move that the Senate turn to the consideration of Calendar No. 987, H.R. 6211.

The PRESIDING OFFICER. The question is on agreeing to the motion.

Mr. HUMPHREY. Mr. President, what is the title of the bill?

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 6211) to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes.

Mr. HUMPHREY. Mr. President, I ask that the bill be read.

The PRESIDING OFFICER. It would take a motion which would have to be agreed to by the Senate.

Mr. BAKER. Mr. President, if the Senator will yield, is it customary that a bill can be reported by title, in response to a motion of this sort?

The PRESIDING OFFICER. That is correct.

Mr. BAKER. The motion itself is debatable, is it not?

The PRESIDING OFFICER. It is.

CLOTURE MOTION

Mr. BAKER. Mr. President, I think no one would be surprised when I say I anticipate there will be an extensive debate on the motion to proceed. No one would be surprised to know that we have consulted on that. No one will be taken by surprise. If the Senator will permit me, I will go ahead at this time and file a cloture motion on the motion to proceed and we will have that out of the way.

Will the Senator yield to me so that I may do that?

The PRESIDING OFFICER. The Senator does not have to yield for a cloture motion.

Mr. BAKER. Very well. Mr. President, I send a cloture motion to the desk.

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The assistant legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the motion to proceed to the consideration of H.R. 6211, the Surface Transportation Assistance Act of 1982.

Howard Baker, Jake Garn, Alfonse D'Amato, Nicholas Brady, Bob Dole, Dan Quayle, S. I. Hayakawa, Robert Stafford, Ted Stevens, Mark Andrews, Strom Thurmond, David Durenberger, Warren B. Rudman, John H. Chafee, Pete Domenici, and John Heinz.

Mr. BAKER. Mr. President, the motion is debatable and, as I said earlier, the rapidity with which I have filed this is prompted by two reasons: one, because we have to deal with must legislation; the other, extensive conversations have been carried on for some days now and I believe all parties understand that there will be extensive debate on the motion to proceed, which I acknowledge, and that I would file a cloture motion. That has been done.

If the Senate is in session on tomorrow, under the rule that vote will occur on Monday. If the Senate is not in session on tomorrow, that vote will occur on Tuesday. I intend to consult with the principals involved on both sides of this issue, those who oppose or support the motion to proceed, and, of course, with the minority leader, to arrange the schedule of the Senate so that it will be a convenience to the maximum number of Senators.

Mr. President, at this time I yield the floor.

Mr. HUMPHREY addressed the Chair.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. HUMPHREY. Mr. President, speaking for myself, it is not my wish to block further pressing business of the Senate, nor is it my wish to inconvenience Senators in any way, especially with respect to the target date for adjournment.

Some might suggest that I and those who are resorting to extended debate are being unreasonable in this respect. I would suggest that we turn to those who are trying to ramrod through this piece of legislation in the waning days of the 97th Congress as being unreasonable because the highways surely will not critically deteriorate in the next month's time. There is time in the next Congress to consider this with the usual due process and deliberation.

For some reason unfathomable by this Senator, there is a great deal of haste attached to this bill.

Mr. President, during the recess, the leadership of both Houses announced that they were going to produce a jobs bill. As far as I can see, this is it insofar as a bill agreed upon by both Houses, or about to be—proposed to be. I ask the question: If raising gasoline taxes by a nickel is the way to produce jobs, reduce unemployment and bring about prosperity, why stop with a nickel? Why not raise taxes by 40 cents or 50 cents?

Mr. BAKER. Mr. President, will the Senator permit me to interrupt without losing his right to the floor?

Mr. HUMPHREY. I ask unanimous consent, Mr. President, that I may yield to the majority leader without my remarks upon resumption being counted as a second speech and without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I have consulted now with Senator NICKLES from Oklahoma and the minority leader. I wonder if we could get on with the business of trying to decide when we are going to have this cloture vote.

As I said, we can come in tomorrow, which I am prepared to do, and have the vote 1 hour after we convene or have the quorum call 1 hour after we convene on Monday. It seems preferable to me that we might enter into a unanimous-consent agreement that we need not be in tomorrow and go ahead and let the vote occur and the quorum call occur on Monday as if the Senate had been in session on Saturday.

May I inquire first of the minority leader if he will object to this procedure?

Mr. ROBERT C. BYRD. No, Mr. President, I agree with that procedure. If the only purpose of coming in tomorrow is to fulfill the requirements under rule XXII, I would recommend that a unanimous-consent request be granted allowing a cloture vote on Monday, because there is no way of keeping the majority leader from coming in tomorrow if he wants to. He can move to adjourn, if he has to. That is nondebatable. He can get a vote on it and he has the votes. Or he can recess over until tomorrow so the Senate would come in and fulfill the requirements under the rule.

Without going through all that, if that is the only purpose of coming in tomorrow, if we can avoid the expense of having the Senate come in tomorrow, I am very willing on my side of the aisle to agree to a vote on cloture on Monday, which would occur otherwise, under the procedures of the rule, if the majority leader brought us in tomorrow.

Mr. BAKER. I thank the Senator very much.

Mr. President, may I inquire of the distinguished Senator from New Hampshire if he would look favorably upon a request of that sort?

Mr. HUMPHREY. He would, yes, Mr. President.

Mr. BAKER. Mr. President, I thank the Senator for that. I think the minority leader has put it very well. We can do this, but we shall have to go through a little ritual to accomplish it. I think it would best serve the interests of the Senate and all Members to go to a vote on this on Monday and not come in on Saturday.

Mr. ROBERT C. BYRD. It would be a saving of the taxpayers' money.

Mr. BAKER. And maybe avert a substantial threat to the Republic if we are not in session any more than we have to be.

Mr. President, I ask unanimous consent that the vote in response to the cloture motion just filed against further debate on the motion to proceed to the debate of Calendar Order No. 987 occur on Monday according to the provisions of rule XXII, notwithstanding that the Senate will not have been in session on the requisite number of days prior thereto.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. BAKER. I thank the Chair. I thank the minority leader. I especially thank the Senator from New Hampshire and the Senator from Oklahoma.

Mr. HUMPHREY. Mr. President, I was making the point that there are many who support this gasoline tax on the basis of reducing unemployment and producing jobs. I say again, if that is the case, why stop at a nickel? Why not tax gas at a quarter or 50 cents? For that matter, why stop with gasoline? Why not raise taxes across the board? Indeed, why not confiscate everybody's paycheck immediately? Raising taxes, particularly during a recession, does not produce jobs, it destroys them. Those who support this measure on that basis perhaps should give some thought to this fact.

The proposed increase in highway taxes and associated truck taxes has been around for some time and gained very little, if any, ground until just 2 weeks or so ago. So we must ask how, all of a sudden, this measure has caught fire.

The answer to the question, of course, as I have alluded earlier, is that Members of Congress see this as a way of at least appearing to be doing something about unemployment.

True, the measure will create jobs in the construction industry, but it will, at the same time, destroy jobs in other industries in which, today, many companies are on the edge of going under. So, if it creates jobs, it does so only by robbing Peter of his job to create one for Paul for political reasons, to which I have already referred.

The most important aspect of this proposal is economic. We should look at the effect of this bill on the net tax burden borne by our citizens and by the private sector—the net tax burden. Will this measure reduce that tax burden consistent with efforts of this administration or will it increase the tax burden in a way that is inconsistent with the efforts of this administration? The case, of course, is the latter. It will increase the net tax burden on the people of this country.

This fiscal year, 1983, according to the latest figures I have been able to come by, the Federal Government is going to raise close to $670 billion in taxes. That is an enormous tax burden on the backs of the people of our country. I emphasize the word "people," because it is only people who pay taxes. We cannot honestly believe that businesses pay taxes. They collect them, but, of course, they pass along the burden to people in the form of higher prices. So people pay taxes. The people of this country are already, this year, bearing a tax burden of $670 billion, approximately.

Now Congress is coming along, apparently, and saying to these heavily-burdened people, "this is not quite enough, friends. If you want your highways repaired, you are going to have to submit to an extra 5 cents per gallon for gas and highway taxes."

This Senator is not opposed to keeping our capital assets in good repair. That is only prudent. The point is if that highway and bridge repair suddenly is so critical, then we should fund repairs within the context of existing revenues.

How would we do that, since those revenues are already thinly stretched? Well, it is very simple. We shall have to move highway repair up in our order of priorities and something else down. My point is we ought to do it within the context of our existing revenue structure and not add a new tax.

We simply cannot levy a new tax every time we perceive some new unfilled need. At some point, we have to learn to live within the means of the American people to bear taxes.

Of course, we are far from that today. Beyond the $670 billion in tax revenues, we are going to be borrowing some as yet uncertain figure, but it will evidently be well over $100 billion.

If this proposal pending before us for consideration had in it some offsetting provision, some provision that would offset a like amount, dollar for dollar, of the tax burden, the Senator from New Hampshire would support it.

The basis of my objection is that it is a net increase in the tax burden at a time when we are supposed to be trying to reduce that net tax burden as a means of restoring health to the economy and creating jobs and opportunity and security for our people. This tax, absent some offsetting reduction elsewhere in taxes, is an added burden that will prolong the recession; it will work against jobs creation; it will attack the future and the opportunity and the security of our people.

If the merits of the bill are questionable—and in my view demerits—what makes it even worse is the way in which this measure is being considered by the Congress and by the Senate. It is on the fast track, being railroaded through without the usual due process, without the usual hearings, without committee reports, without time for Members to consider those reports, and without time for a national debate and a national consensus to develop. It is being railroaded through, and we always regret it later on when we do this because we inevitably make mistakes. Even when we have time to consider legislation carefully we make mistakes. We make even more mistakes when we consider it hastily. There is no pressing need that this measure be disposed of in this Congress. There is no pressing need that it be railroaded through the Congress. There are many reasons why we ought to wait just a few more weeks and let the next Congress, the 98th Congress, take up this important measure. I believe it could be improved. I believe those of us who oppose it, speaking for myself at least, could support it if it were properly improved, but not under these circumstances.

The matter is fairly simple. Being a New Englander and conservative with words, I am not going to repeat the same argument over and over again in different ways, but I obviously have an obligation to keep the floor for a while.

Nevertheless, I have been asked as a favor to the Senator from Missouri to yield to him so he might conduct some business.

I ask unanimous consent, Mr. President, that I might yield to the Senator from Missouri without losing my right to the floor; that I might be recognized upon his yielding of the floor, and that upon resuming my remarks not be counted as a second speech.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Missouri.

(Mr. EAGLETON'S remarks are printed later in today's RECORD.)

Mr. EAGLETON. Mr. President, I again thank my colleague from New Hampshire for yielding the floor.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. HUMPHREY. Mr. President, there is one element of this matter on which I have not yet touched. It seems obvious that while considering ways to raise money to repair highways we ought to also be looking at the other side of the equation, and that is how to save money in the repair of highways or how to get more value for each dollar spent, more miles built, more repairs accomplished, and how to save money.

We have not heard much discussion about that in this debate that has been under way now these last 10 or 12 days on the gasoline tax. Surely, as eager as Congress appears to be to fix highways all of a sudden, Congress ought to be sincerely interested in ways to save money on highway repairs and construction and ways to stretch to the maximum each dollar spent.

One very simple way in which Congress could address this matter is to repeal the Davis-Bacon Act. Davis-Bacon was passed, I believe, in 1931 or thereabouts. In any case, it is New Deal legislation. It has been recommended for repeal by many studies including one by either the CBO or the GAO. This study also found that Davis-Bacon cost taxpayers $1 billion a year in unnecessary expense.

Labor expenses on federally assisted construction projects run on average 36 percent higher than on those construction projects where Davis-Bacon does not apply, which is to say they are 36 percent higher for federally assisted construction projects as opposed to those construction projects where there is no Federal assistance.

So the taxpayers bear that extra premium.

Davis-Bacon is nothing more or less than a sweetheart deal with construction unions. It should have been repealed long ago in the interest of taxpayers but remains on the books today despite the many recommendations for its repeal by responsible studies. Despite many, many efforts in Congress to repeal it, it remains on the books, I suppose, as testimony to the political power of organized labor and the financial contributions organized labor can make to political campaigns by means of dues involuntarily collected from members, involuntarily collected in the sense that members have no practical say in how those funds will be disbursed among candidates. Davis-Bacon is a testimony to the power of organized labor not only to make cash contributions to selected candidates, those presumably who toe the line on a legislative agenda, but also contributions of in-kind services and materials such as professionally operated phone banks and highly trained and experienced political consultants.

But in any case the point is that if Congress were truly sincere about the highways it would move with speed, even greater speed than with which this gas tax is being considered, to repeal Davis-Bacon and to save in one bold stroke $1 billion a year in unnecessary construction costs on federally assisted construction projects; $1 billion a year is very nearly 20 percent of

all the proceeds. In fact, it is more than 20 percent of the net proceeds to be raised by this tax.

Yet, we do not hear too much about such a proposal in fact, and this is one of the multitude of provisions, many of which Members are not aware of because this is a complex piece of legislation. In fact, both the Senate and the House versions now contain language which extends the coverage, not cuts it back or repeals it, but extends the coverage of the Davis-Bacon Act from new construction to which it formerly applied to repairs as well.

So obviously since this gas tax is aimed principally at repairs, Davis-Bacon is now going to cover those kind of projects and the taxpayers are going to get 36 percent less value for their money than they might otherwise.

So I urge my colleagues, Mr. President, to look at the other side of the picture and look to where we can save money in the interests of the taxpayers. Here is the way, very simply. It can be done speedily. It would have an almost immediate effect and a very, very large effect indeed.

Mr. President, I ask unanimous consent that I might yield to my colleague from North Carolina without losing my right to the floor and upon my resuming my remarks without having them counted as a second speech.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from North Carolina.

Mr. HELMS. I thank the Chair, and I thank the Senator from New Hampshire.

Mr. President, first of all I wish to thank the able Senator from New Hampshire and the able Senator from Oklahoma for stepping into the breech this morning and taking on this issue.

I just returned from North Carolina, where I spoke to the North Carolina Corn Growers Association.

I say to my friend from New Hampshire that in my judgment probably the most dangerous animal in terms of the health of the Republic in America today is a duck, a lameduck. Moreover, this may be the first time in history that a lameduck is trying to give birth to a turkey, which this gas tax bill is, for all of the reasons that the distinguished Senator from New Hampshire has mentioned.

Mr. President, the purpose of the so-called lameduck session of Congress supposedly was for the House of Representatives and Senate to come back and act on some appropriations bills that Congress did not consider before the election.

When we left here in early October there was some mention of addressing the social security issue. But this Senator never heard any mention of a serious intention to take up any significant legislative initiatives beyond those.

Yet, here we are about to consider a gas tax increase and highway authorization all rolled up into one little piece of legislation, which I daresay not over five Senators understand or can even begin to describe the contents of.

This is a bad way to operate, if you pardon the expression, a railroad.

It will be a serious mistake for Congress to pass this package in the waning moments of this year.

There is no reason to act on the legislation now without the scrutiny it deserves and the hearings that should be mandatory on such an issue, Mr. President. Let us be sure of one thing: If this 5-cent increase, plus all of the other aspects of this bill, which have not been discussed by the media, if this bill or anything remotely similar to it becomes law, these taxes will never come off. Call it a temporary tax all we wish. But it is the same old story. There is nothing so permanent as a temporary tax.

So that is why I have felt obliged from the very beginning to advise the distinguished majority leader that it is my intent to slow down the pace a little bit so Congress can give the consideration to this proposal that it is due.

Mr. President, it would be interesting to know how many Senators have even picked up the bill, let alone studied its provisions and contemplated its implications.

Unfortunately, that is the way the system works around here all too often. The steamroller is cranked up, the campaign is orchestrated, and the American people are persuaded that a good thing is about to happen, and too late, too late they learn that the temporary tax is permanent and that the bill that had been proposed was not the panacea that it was advertised to be.

For my part, Mr. President, I have a variety of problems with the general proposition. The biggest problem I have with it is that the little guy is going to get it in the neck again.

I had a very wealthy gentleman from Montana occupying the seat next to me on the airplane this morning, and he thought the gasoline tax was just fine. He said, "It is not going to cost me but $30 a year. I heard the President say that."

Well, he could afford even $30 a day, but how about the textile mill worker who has no transportation to his factory or plant except an aging automobile? How about the farmer who has to drive around his farm and to get into town? Thirty dollars, if that is all it will amount to—and it will amount to more than that by far—but even $30 is a pretty big deal to him. The last thing the American people need now is another tax increase. No tax increase is ever welcome, but this one is particularly unwelcome because of the obvious fact that it will take billions of dollars out of the private sector and it will impose a burden on that workingman or workingwoman who can least afford it.

(Mr. EAST assumed the chair.)

Mr. HELMS. Around this place over the years I have heard many, many eloquent speeches about regressive taxation. There may be somewhere in the myriad of legislation that has flowed through the Senate since I have been here a more regressive piece of legislation than this, but it does not come to mind.

Then there is the complexity of this proposal. It does not, as much of the media has reported, simply add a nickel per gallon tax on gasoline. It raises other taxes as well, and it sets wide-ranging, far-reaching policies that will have all sorts of ramifications in the future, some predictable, some unpredictable. But one thing is certain: This package has zipped through the House of Representatives like Blalock's bull, with scarcely any scrutiny, consistent with the syndrome around this place—this place being the Congress of the United States—that we tax and tax and spend and spend.

So we have a proposition to impose additional taxes on the American taxpayer saying, "Oh, this won't hurt you too much." The campaign has been well orchestrated. But in fact Congress is about to adopt policy decisions with little or no idea of what the long-range effects will be, all of which leads me to the most fundamental point of all—and Senator HUMPHREY stated it a couple of times in his remarks—why the haste? Why is this proposition so sacrosanct that we must disregard the normal processes of the Senate? Why must we give it no hearings, and push it through before the people have any chance to find out really what is involved and, therefore, no chance to make their feelings known?

Somebody said one time that if you like sausage and if you love the law you do not ever watch either one of them being made. That statement is particularly relevant to our situation here today.

Now, Mr. President, having said all of that, every Senator is for motherhood, he is against sin, and he is for good roads. But if Congress passes this package, a unique opportunity to put into practice the principles of New Federalism will have been lost.

It was in 1956 that Congress created the highway trust fund in order to build a National Interstate Highway System for defense and commercial purposes. But Congress never intended the Federal Government to play a major role in repairing and maintaining such a system. This was to be the responsibility of the States.

In that perspective what do we see with the enactment of this proposal? We will see State prerogatives preempted in bridge and highway construction and repair, and we will see the Federal Government put substantially into the business of highway and bridge maintenance and repair.

I recognize there are a lot of Governors and, perhaps, a lot of State legislatures who will say, "Glory be, let us get this off our backs and dump it on Uncle Sam's back." Surely the past 35 years will be instructive as to the folly of that attitude.

I recognize that State governments are having their fiscal problems now that the flow of so-called free money from Washington is being slowed down, toned down, and cut down; and the wisest politics probably is to abdicate responsibility and shift the responsibility up here to Washington, D.C., in the hope that some of that free money from Washington can bail out the States from their responsibilities.

Today's $1 trillion plus Federal debt is proof enough that this is folly. The Federal Government has assumed the role of be-all and end-all, and in 35 or 40 years has been shoving out money like there is no tomorrow. We therefore have in place all sorts of welfare programs that have taken on a life of their own, which have just mushroomed in terms of their responsibility, cost, and sadly enough, fraud.

But it got it off the backs of the States. States abdicated their responsibility, and they were all too delighted to see the Federal Government step in and take over. So where has it brought us?

Mr. President, each year the interest on our more than $1 trillion Federal debt costs the taxpayers of this country substantially more than the cost to operate the entire Federal Government along about 1960. That is for interest alone. Meanwhile, we have built-in mechanisms to increase the cost and the scope and the size of programs. And I daresay that there was not a time when these programs were advanced and enacted into law that Senators did not get up here and say, "Oh, this is just the thing to do. It won't cost but this, it won't hurt the average taxpayer. In fact it will help him." Too late, the taxpayer learned about these programs; and too late the taxpayer will learn about this gas tax bill.

As Senator HUMPHREY has said—and he is absolutely correct—this proposal is likely to cost more jobs than it will create. And, in any case, most of the jobs created by this proposal will not be created for months, perhaps even years. You do not put together a program of this type and this size simply by pushing a button. There will come an enormous bureaucracy with all the rules and regulations and all the fusses and fights. Somewhere down the line, maybe some guy who does not have a job will be able to get a job. Well, in the meantime, others will be put out of business. And this is not hollering, as Henny Penny did, that the sky was going to fall. What will happen is perfectly predictable.

Let us just examine this proposal, just in a cursory fashion, and look at a few of the flaws. Now I do not intend to go into great details now. I will save that for later when the extended debate really becomes serious. It is not serious today in terms of how long Senators in opposition to this bill will speak. But, come Monday, if cloture is voted, there are all sorts of ways that a Senator, under the rules, can exercise his rights to put the Senator on record time and time again about various aspects of this legislation.

I would suggest to my colleagues that this will happen. The farmers are going to know, small businessmen are going to know, textile workers are going to know, everybody is going to know how every Senator voted on every aspect of this piece of legislation, because I am sure there will be an adequate number of amendments on which Senators will be able to take a position.

Now the 5-cent-per-gallon increase in the price of gasoline is, of course, the most advertised feature of the bill. You might say it is the major feature.

Now, what is this? It is an excise tax. I have heard my good friend, the distinguished chairman of the Finance Committee, remark on a number of occasions that excise taxes are bad tax policy. He is right. I could not agree with him more. Senators who profess to be worried or concerned about regressive taxes had better take a look at the small print in this piece of legislation.

As I said earlier, this tax increase will fall primarily on the shoulders of working men and women who have to drive to work every day.

The Tax Foundation recently reported that Americans now pay about a third of their incomes in local, State, and Federal taxes. I do not contest that, except in the sense that I do not believe they cover the hidden taxes. But let us say it is at least one-third.

There are other excise tax increases in this proposal, Mr. President, including an increase on the trucking industry. Hundreds of truckers and trucking executives have been calling and writing my office in opposition to this tax increase. Of course, it will affect the small- and medium-sized companies—it will put them out of business. But it will even hurt the larger trucking companies as well.

So I say again, Mr. President, that the result of this proposal, no matter how well intended, is almost certain to be a loss of jobs—and let me say it again for emphasis—a loss of jobs, rather than an increase in the number of jobs available.

Mr. Martin Feldstein, in whom President Reagan has obviously sufficient confidence to have selected to be the Chairman of the Council of Economic Advisers, says that this proposal will cost another 20,000 Americans their jobs. So it is not a jobs bill. It will destroy jobs, Mr. President.

I have other objections to the proposal that I will discuss in some detail later. But let me reiterate this point: There is nothing in this proposal that must be passed in this lameduck session of Congress. We will be back here in January. We can conduct hearings. We can let all Americans concerned come and state their views. We can operate in an orderly manner, and, at most, 1 month or 5 weeks will be lost.

Surely, that is a small price to pay for making certain we are doing the right thing.

I would like to have the time, Mr. President, in my capacity as chairman of the Senate Agriculture Committee, to have farmers and their representatives come in and discuss this proposal. They have not had a chance.

I think the small truckers ought to have a chance to be heard. Otherwise, haste will make waste. What will be wasted are funds that we do not want to waste and should not waste.

Mr. President, as I said at the outset, on yesterday I called the Senator from Oklahoma (Mr. NICKLES) and the Senator from New Hampshire (Mr. HUMPHREY), and they agreed to take the lead in this discussion this morning until I could get back at noontime. I am grateful for their having done that.

I will say to Senator HUMPHREY that I heard a portion of his remarks over the loudspeaker in my office. He is right on target.

I thank the Senator for yielding.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. HUMPHREY. Mr. President, I thank the Senator from North Carolina for his assistance in shedding some further light on this matter.

Mr. President, I want to read into the RECORD an article by M. Stanton Evans, published in Human Events, the issue of December 4, 1982, entitled, "Why the Gas Tax Hike is Wrong."

A RADICAL DEPARTURE—WHY THE GAS TAX HIKE IS WRONG

(By M. Stanton Evans)

Having recently been handed a sizable tax hike by the Congress, the public may be less than totally enchanted with a concept currently percolating through the government: An extra five cents a gallon federal tax on gasoline.

As it has evolved inside the Department of Transportation, and drawn support within the Congress, the new gas tax would add about $4 billion a year to the federal highway fund, with another $1 billion allocated to capital outlays for mass transit. The pro-

posal is being sold as a needed step toward improving the Nation's "infrastructure," as well as a method of providing jobs.

Considering recent wailings about the price of gasoline and tortured regulatory efforts supposedly aimed at holding it down, this will strike many as a peculiar turn of policy for the Reagan government. If nothing else, it will serve to increase the reigning confusion as to whether the Administration is trying to cut our taxes or increase them.

If the proponents had stuck to the "infrastructure" line, they might have had a plausible case. On their figures, highway funding has not kept pace with the expansion of the system. Deterioration of roadways and bridges has ensued, and the highway fund as presently constituted is unable to meet the resulting burdens (which would be increased under the Administration plan). Considered in a vacuum, the infrastructure appeal makes a fair amount of sense.

There are no vacuums in nature, however, and none in politics. The gas tax proposal will inescapably be weighed in the context of tax and budget battles generally, and in that context comes over as another tax hike. The dent put in the Administration's tax-cutting credibility by this summer's tax hike will get still bigger. Add in other tax hike proposal reportedly favored by Sen. Robert Dole (R.-Kan.), chairman of the Senate Finance Committee, and the problem is apparent.

Helping spread the confusion is the effort to sell the project as a "jobs" proposal. This smacks of the New Deal WPA-approach, and ignores the fact that dollars taken away from motorists to create jobs in highway building obviously can't be spent on something else, thereby un-creating other jobs. The folks who argue this way should read Henry Hazlitt's Economics in one Lesson, where such fallacies are readily demolished.

Also clouding the issue is the $1 billion from the gas tax that would be forked over for mass transit. This method of cracking into highway funds for one of their favorite boondoggles is a long-time goal of many liberals. It is ironic, to say the least, to see it advanced by a Republican administration; even more so to see it advanced under the hallowed rubric of "user fees."

The concept behind the highway fund is a good one: The people who use the highways should pay for them. Gas tax moneys are therefore put into a special account where they are dedicated to highway construction and repair. The motorists for whom the highways exist pay the bills for them when they buy gasoline.

A lot of liberals don't like this. They usually prefer cross-subsidies to user fees, and are always on the lookout for new sources of revenue that can be funneled into social welfare planning schemes. Also, many liberals don't like the private automobile, preferring to herd us all into mass transit. The idea of cracking into the highway fund for mass transit, and a lot of other things besides, is one that occurs quite naturally to the liberal intellect.

Consider in this respect a recent article in The Washington Monthly, concerning the fate of highway funds here in the Nation's Capital. For several years we had a transit chieftain here who held the opinion that "it's immoral for somebody to drive a car downtown." This individual managed to divert our gas tax money from street maintenance to the insatiable city subway system. By breaking into the highway fund, the authors note, "money once dedicated for road re-surfacing and pothole repair could be fed to the Metro, which eagerly gobbled it down."

There is little doubt that liberal forces would like to do the same thing on the national level—though efforts of this type to date have largely been repelled. While the federal highway fund has been subject to nibbling around the edges, the user fee notion has remained essentially intact. A limited portion of the money has been siphoned off for mass transit, and some projects only marginally related to the purpose have been funded by it. But, on the whole, the dedicated nature of the fund has been respected.

The proposal now being advanced by the Administration and the Congress would be a radical break with this tradition—and with the very concept of user fees that it invokes. Whatever its merits otherwise, it is this aspect of the plan that ought to draw the strongest opposition.

Editorial criticism of the gas tax abounds, Mr. President, as in a brief part of another editorial, this one from the Wall Street Journal of December 2, 1982, entitled, "The Gas Tax, Fiscal Speeding."

THE GAS TAX: FISCAL SPEEDING

Everyone, including us, agrees that it's a good idea to fill the nation's potholes, shore up its bridges and spread new asphalt over its crumbling but vast network of roads. Seizing on this consensus, the Reagan administration has endorsed a five-cent increase in the federal tax on gasoline, putting it forward as a remedy for lagging highway maintenance and for unemployment. And everyone thinks the bill will pass Congress during the current lame-duck session with heavy support from both parties.

One trouble with all this reflexive agreement is that no one is taking the time to look carefully at what the gas tax will actually accomplish. Even a cursory glance at the administration proposal should give most lawmakers pause. A nickel by itself isn't much, but as a levy against every gallon of motor fuel sold in the nation, it will multiply into $5.5 billion in a year. This is a large sum to extract from already strapped taxpayers. It is also a 125 percent increase over the old federal gas tax. And for what?

Not jobs. Informed opinion and common sense make us doubt altogether the president's claim that revenues from the hike will pay for 320,000 new hires in a maintenance work force. In fact, the net effect of the $5.5 billion bite out of consumers' wallets will probably reduce overall employment in the economy at large. Even administration stalwarts are no longer coming on strong about the gas tax as a boon to the labor market.

Worst of all, the tax carries with it absolutely no guarantee of any kind that most of the total nine-cent-a-gallon levy will go to fill potholes. Secretary of Transportation Drew Lewis confirmed this in testimony before the Senate Finance Committee this week. The administration bill nowhere stipulates anything about repair or maintenance. It merely increases funding levels for the same highway construction budget categories that have existed for years. The only difference now is that highway departments will have more than twice as much money available to them as ever before.

There are no new controls and therefore no way of compelling states and cities to stop deferring maintenance, in favor of new highway construction. Highway contractors will have twice as good an incentive to pressure governors and mayors to approve boondoggle road projects like New York's Westway or the second Baltimore harbor tunnel. Some new construction may be necessary, but the Congressional Budget Office report of last June concluded that all new routes required for a national interconnected system of highways could be built for a yearly expenditure of only $1 billion. Congress ought to read the report it paid for and act on it. If there's going to be a gasoline tax hike aimed at potholes and other repairs, the new bill should say so in language that will prevent the usual alchemy and keep nickels from turning into pork.

Mr. SYMMS. Will my good friend yield on that point?

Mr. HUMPHREY. Mr. President, I ask unanimous consent that I may yield without losing my right to the floor and that upon resuming my remarks, it not be counted as a second speech.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. SYMMS. I thank my spirited and capable Senator friend from New Hampshire for the philosophical aspects of his discussion here. I was listening when my other friend from North Carolina was speaking on the floor.

I think that, as the chairman of the surface Transportation Subcommittee, I agree with the Senators philosophically that this is not a jobs bill, but the perception oftentimes in politics becomes what is the truth. There is a perception in the country that it is a jobs bill. Even with the best efforts that some of us have made who have been behind having an improved Federal-aid highway program this year, it has been impossible to keep the news media from calling it a jobs bill, and our colleagues. So it is called a jobs bill. What it will do is create more jobs in construction and may have an impact on other jobs and may not, as the Senator is saying.

I think we should say that the highway bill that has passed the Senate in the Public Works and Environment Committee is definitely tilted in the direction of reconstruction, resurfacing, and rehabilitation of old roads as opposed to construction of new roads. We should not leave the record in error on what is actually taking place in the bill.

It is true, we have to deal with our colleagues in the other body and in the conference. But there has been a concerted effort by the Democrats and Republicans alike in the Public Works Committee in the last 2 years to change the scope of where our highway programs are going. The fact is that when I took over the chairmanship of that subcommittee, we had $55 billion dollars worth of unfinished highway in the Interstate System in the United States to complete. Through the efforts of Senator STAF-

FORD and myself and others and Ray Barnhart, Drew Lewis, and others in the administration, we have demapped enough miles of interstate in the country to change that number down now to $38 billion that will complete the construction of the interstate. We are constantly going through the process of taking sections off the map that we think are inefficient for the taxpayers to pay for so the moneys can go back and actually be spent on new construction.

Another thing to think about with this nickel a gallon is that average taxpayers will use about $30 a year to pay their share of this. One front-end alinement will offset several years' worth of a nickel a gallon gas tax. It has been estimated by many of the automobile associations and studies that have been done that the costs that people pay in maintenance on their automobiles far exceed what the costs would be of financing the potholes on the roads. So I think there are some tradeoffs here.

I have often said, viewing this, that this is one issue from a philosophical standpoint on which I am very sympathetic to my good colleague from New Hampshire, and Senator NICKLES, Senator HELMS and others. I think it is always good for this body to consider the philosophical aspects of what we are doing here. To one who is a conservative, the Federal highway program is so much a part of the basic transportation system in the United States. I believe it has maximized personal freedom for most Americans in much more of a sense than we have had in the past.

After all, in what other country in the world can a person get in an automobile and have access to fuels, supplies, maintenance, and good roads, and travel, as we can here from Maine to California, and not be stopped by law enforcement people, harassed and checked, as long as they do not exceed what is considered to be a safe speed limit, in the country? I would say that we have more freedom in America to drive on the Nation's highways and have more access than any other country in the world.

I would have to say that George Will is not regarded as one of the more liberal journalists in America, but has more of a classical conservative philosophical approach. He wrote an excellent article on this subject in April in the Washington Post, and he called it "What the Potholes Say About Us."

We have held several days of hearings in this subcommittee on this very subject. I am convinced that beyond question of a doubt, we are wearing out the highways and the bridges in America faster than we are repairing them. This 5 cents a gallon will make a big improvement in the commitment we are making, even though it will not get us back up to where we are holding our own on wearing out the roads.

That has happened for several reasons. One is that we get more fuel efficiency out of our automobiles today. No. 2 is we have already built a massive infrastructure of highways, many of which are coming to the end of their design life.

I commend my colleagues for bringing this philosophical point to this Chamber. If I had been running the show, we would have done this last summer, but I was only one Senator, so we had only one tax increase for the American people to swallow. They would have been behind us. I do think that President Reagan is correct in giving his support to this. I think Republicans, Democrats, liberals, conservatives, blacks, whites, Jews, Catholics, Christians, and other denominations all drive on the same highways and the long-term benefits for America will certainly be well served if we take care of the potholes.

I think, as George Will said, what the potholes say about us is like a person whose house you walk in and find they do not vacuum the carpet.

It becomes much more expensive if you drive to work in the morning and knock the front end out of line or blow a tire or lose a hub cap or, the worst case, where you would have an accident and you lose your life or maim somebody or what have you.

I do believe there is a lot of merit in this proposition. It is unfortunate that there is no easy way to have a proposition like this pass in Congress without taking some heat from some constituents. I have never run into a constituent of mine who wants to raise taxes on himself. If you can tax somebody else, that is OK. If you want to tax them, that is not a good idea.

There is probably not a more equitable tax than we have in the country than taxing the people who use the highways. That is those of us who drive on them. So we put a tax on fuel. It is probably the single most equitable tax we have.

All taxes are unpleasant but I do think if you look at the numbers of dollars that are actually spent on construction vis-a-vis the number of dollars spent on administration, we do much better with our highway dollar than we do with most of the rest of the money the Federal Government spends, or at least a good share of it.

I say to my colleagues who are having concerns about this, take a very careful look at what the committee has done. This program we are passing through this body does emphasize resurfacing, rehabilitation, and reconstruction of our already built highways and bridges.

I thank my good friend for yielding.

Mr. HUMPHREY. Mr. President, I thank the Senator from Idaho for his clarification. It is quite true that we have a philosophical difference, but it is more than just philosophy. It is very real and concrete in that it will affect the pocketbooks of our people.

I do not object to user fees. I certainly do not object to repairing our highways and keeping them in good repair. That is only sensible. What I object to is the net increase in the tax burden to be borne by the American people.

As I said earlier, if this provision had some offsetting reduction in the tax burden so that there were no net change, I would gladly support it. But it is distinctly wrong to raise taxes, to increase the net tax burden during a recession, and it is especially wrong to argue for that on the basis that it will create jobs. It will not. It will destroy jobs. No matter how much the proponents may now deny it, after having originally proclaimed that this is a jobs bill, it is still succeeding in this Congress on that basis. There is no logical explanation I know of for the way in which this highway proposal has suddenly caught fire within the space of 2 weeks, when it had languished for months and months on end, for a year really, other than to explain it by saying that Members of Congress want to give the appearance of doing something about unemployment. That is the way it has succeeded, in my view at least.

We must concern ourselves, if we are truly interested in creating employment and restoring prosperity, with the net burden of the Federal Government upon the private sector. That means taxation. That means regulatory burdens.

This bill, if passed, will clearly increase, no one can argue against it, the net tax burden upon our people at the very time when we should be holding it steady or reducing it.

I think it is absurd to suggest that on top of $670 billion of taxation which the American people will bear in this fiscal year they must also pay an additional 5 cents of gallon or $5.5 billion across the economy for the privilege of having their roads kept in good repair. We cannot enact a new tax every time we discover some unfilled need. We must learn to rank our priorities and to live within the ability of the American people to bear the tax burden. A heavier burden will destroy the economy and ultimately destroy our society and our country as we know it today.

Mr. President, I want to read into the RECORD an editorial—I guess I could call it an op-ed piece—by Carolyn Atkinson, Washington Post staff writer, entitled "Gasoline Tax Boost Won't Add Jobs."

Q: When is a jobs program not a jobs program?

A: When it is a tax increase.

Congress, desperately anxious to appear to be doing something about today's high unemployment, is pressing ahead in the

lame duck session with what many label a "jobs program." President Reagan has backed it.

But the plan to add 5 cents a gallon to the gasoline tax and spend the proceeds on repairing roads and bridges is far from a jobs program, even according to Reagan's own chief economist. Indeed, it "may actually increase unemployment during the first year or two," Council of Economic Advisers Chairman Martin Feldstein wrote in a memo to the president last month.

Although the extra public spending on roads and bridges envisaged under the plan will provide jobs for some, the gasoline tax increase that pays for the program will take work away from others.

Feldstein explained that the new jobs for construction and maintenance workers created by the program probably will not be enough to offset the job losses "in those industries that produce the goods and services consumers would otherwise buy with the extra $5 billion that they would pay on gasoline taxes."

Consider what will happen if the gas tax goes into effect next April as now seems likely. Motorists will have to pay more—albeit only a dollar or so a week to buy the same amount of gasoline. Some may decide to cut back a little on driving. Others simply may spend less on other things. Someone getting $4.50 change out of a $20 bill after filling the tank, rather than $5 as before, may then spend 50 cents less on lunch that day, for example, or decide against buying a candy bar or—over a period of time—go to the movies less often.

In other words, the $5.5 billion or so of extra government revenue from gas taxes means $5.5 billion less spending power in the hands of consumers. Small individual cutbacks in spending will add up across the economy, reducing jobs here and there in a variety of industries. Moreover, because "consumers spend a substantial part of their money on various kinds of personal services that are much more labor intensive than road building," the jobs lost from the reduction in consumer spending after the tax increase will likely outnumber those gained initially by road builders and bridge repairers, Feldstein told the president.

How has Congress gotten so muddled?

The coexistence of large budget deficits—which experts keep saying are bad for the economy—and the worst recession since World War II has confused many people. Traditional antirecession medicine aims to boost the total amount of spending in the economy, whether by raising federal spending on jobs programs or encouraging consumer spending through tax cuts. But this extra spending is financed by government borrowing. It raises the budget deficit, which members of Congress already fear is too large.

Unfortunately, they are attempting to have it both ways, fighting unemployment through a highways spending program while holding the deficit down through a gas tax increase, and it will not work. It will shift around the available jobs in the economy, but not increase the number. If politicians want to use fiscal policy to create more employment, then they have to accept that this means larger budget deficits, at least for the time being.

Many have been frightened away from such a course by the critics of big deficits and the projections of ever-widening budget gaps in the future.

Feldstein, for example, has argued recently:

* * * to a number of different audiences that large deficits are harming the economy. They raise interest rates and thus hurt business investment and other interest-sensitive sectors of the economy, he says. High interest rates, in turn, have driven up the value of the dollar on foreign exchanges and made it harder for American exporters to sell their goods overseas and harder for domestic manufacturers to compete with cheap imports, he argues.

However, even Feldstein acknowledged to a group of reporters recently that budget deficits do not, in fact, depress the economy overall, even if they may raise interest rates. The depressing effect of higher interest rates in some sectors of the economy is more than offset by the higher spending—whether public or private—that budget deficits support, most economists agree. Budget deficits worry economists for two main reasons. One is that they encourage consumption at the expense of investment. The other is that they may worsen inflation and inflationary expectations.

Both of these arguments make sense if the economy is strong, unemployment low and business operating at close to full capacity. The large deficits now projected for the latter years of the decade, when the economy is expected to have recovered from recession, are thus a major problem. But in today's depressed economy—when business does not want to invest because it cannot use all its existing plant and equipment, inflation is declining and unemployment is widely perceived as the nation's major problem—the deficit is helping and not hurting the economy.

It seems to this Senator, Mr. President, that the writer, Caroline Atkinson, has made a number of good points but the central point to me is that Government in these makework projects, and perhaps that is not the best way to phrase it, but in any case the Government in getting involved in allocation of resources might be fooling the people temporarily but in truth it is only shifting jobs from one sector to another, as I said earlier, taking Peter's job to create one that is policially useful for Paul.

How much better it would be if we focused instead on ways of saving money instead of raising taxes. Ways of cutting spending is the only option open to us who truly seek to restore employment and prosperity.

Mr. President, earlier I spoke about one such way of saving money, namely, repeal of the Davis-Bacon Act which costs taxpayers $1 billion in extra expense on federally assisted construction projects and which could be easily repealed and could almost immediatley realize savings on that scale.

Over the years, the General Accounting Office has conducted numerous studies of Davis-Bacon and each study documents the enormous additional costs superimposed upon basic building costs by the Davis-Bacon Act.

Consider these facts from the 1979 GAO study aptly entitled, "The Davis-Bacon Act Should Be Repealed."

In 30 randomly selected Federal or federally assisted projects GAO found that higher wage costs, due to Davis-Bacon inflated construction costs ranging from 1 to nearly 9 percent, inflated construction costs. That is, overall costs.

GAO concluded because of these excessive wage costs the unnecessary construction costs due to Davis-Bacon amounted to several hundred million dollars annually.

Further, the GAO estimated unnecessary contractor costs related to the payroll reporting requirement at $189 million and unnecessary costs of administration and enforcement by Federal agencies of $12.4 million in 1977, for a total of $201 million.

In the 1979 report GAO also concluded that the passage of more recent wage legislation makes Davis-Bacon unnecessary today and points out that in nearly 50 years of administering the act the Department of Labor has yet to develop an effective system for wage determination activity.

A 1980 GAO report looking at Davis-Bacon and Metro construction estimated that Davis-Bacon may increase construction costs by about 6.8 percent or $149 million on that project.

The most recent study of Davis-Bacon by the American Farm Bureau released just this year supported the GAO studies by finding that Davis-Bacon increases the cost on nonresidential buildings in rural areas of this country and that the total impact of the act ranged from 26 to 38 percent.

In spite of all of this evidence Davis-Bacon remains on the books.

Mr. President, the distinguished columnists Rowland Evans and Robert Novak published a story last month on the gas tax, and I shall read that into the RECORD.

The article follows:

NO, HE'S JUST BEING MISADVISED

(By Rowland Evans and Robert Novak)

Moments after President Reagan told his press conference Thursday that it would not take a palace coup after all for him to support higher gas taxes, one of his anti-tax economic advisers voiced his own disapproval of the scheme, but added: "If we get away with just that, we'll be well ahead of the game."

The nickel-a-gallon tax to finance public works spending is, therefore, a ploy to appease growing bipartisan hunger on Capitol Hill for old-fashioned pump-priming in the New Deal tradition. It is supposed to preempt ambitious schemes for far more spending and far higher taxes.

However improbable that goal, the gas tax ploy marks another benchmark in the administration's departure from basic principles. It undercuts both the "new federalism" and free-market economics; it signals that the White House is moving toward accommodation, not confrontation, with the expanded Democratic majority in the House and increasingly fractious Republicans in the Senate.

It also provides fresh evidence that Reagan is no match for the concentrated barrage from his advisers. Indeed, his turnaround on the gas tax raises this question:

can he withstand the renewed spend-and-tax syndrome no matter how much he protests?

Consider the private White House briefing of Sept. 28 in preparation for the night's press conference. In the critique of Reagan's answers during a question-and-answer prep session, budget director David Stockman cautioned him about promising a balanced budget in the years ahead.

But Reagan asked, wouldn't the $100 billion tax increase he reluctantly swallowed last summer at least trim the projected future deficit? No, Stockman replied, the deficits will get *bigger*. Stunned, the president said: "If I had known that, I never would have backed the tax increase." For the next 10 minutes of the briefing, Reagan's eyes glazed over and his mind seemed detached.

Accordingly, at that night's press conference, when he was asked about new tax hikes and "specifically, an increase in the gasoline tax," he replied:

"Unless there's a palace coup and I'm overtaken [laughter] or overthrown, no." Hearing that, and coupling it with his shock during the afternoon briefing session, White House insiders assumed the president had drawn the line.

What's more, there were plenty of arguments inside the administration to bolster the president's instincts against the gas tax, plugged relentlessly for two years by Transportation Secretary Drew Lewis. Stockman, for once opposing higher taxes, has argued that the non-interstate highways most in need of repair are the responsibility of the states. Reagan's "new federalism" would dictate that if states want to repair their roads, they should raise their own gasoline taxes.

The more sophisticated argument at the Treasury discounts the notion that the gas tax actually creates jobs. The increase in the price of gasoline could cost as many jobs in the energy industry as it creates building highways.

But even the Treasury is split. At last week's Cabinet council meeting the day before Reagan's press conference, Stockman was the only solid voice against the tax. Even White House aide Rich Williamson, usually strong against higher taxes, was benevolently neutral in his role as the presidential liaison with hard-pressed state governments.

At last week's press conference (his first since Sept. 28), the president apparently had forgotten that his "palace coup" crack answered a specific gasoline-tax question, claiming he was referring only to "general" tax increases. More remarkably, Reagan had swallowed whole Lewis' contention that the tax is a "user fee" (Treasury experts consider it, plain and simple, an excise tax). Reagan also reverted to New Deal logic in declaring "There would be jobs created" by the tax.

The hope of conservatives inside the administration that this at least would forestall worse retreats is dimmed by decisions facing the president this week. He will be asked by his budget-makers whether he wants to slash defense spending, raise taxes or abandon the balanced-budget goal.

Ronald Reagan, still ignoring the monetary policy that has created this deep recession, is entrapped in the budget process that led to the huge tax increase (and no relief in budget deficits). The immemorial pressures to spend and tax are not going to be assuaged by the ploy of a 5-cent gas tax.

Mr. President, I emphasize those were not my words. I certainly would not speak of the President in those tones because I admire and like him very much and continue to support him, and hope very much he will be a candidate for reelection, and I hope very much he will be a little more cautious in accepting the advice of certain of those around him and, perhaps, even make some changes for, I believe, he is very badly advised at times, as in the case of this gasoline tax, as a specific example.

(Mr. KASTEN assumed the chair.)

Mr. HUMPHREY. Mr. President, at the risk of annoying our majority leader, I am going to read a press account of a press conference held by the Senator from Tennessee and the Speaker of the House of Representatives. I read this only as a way of citing, perhaps underscoring, my point that the impetus given this gasoline tax comes from its attractiveness as a way for Members of Congress to be perceived as doing something for unemployment.

Our majority leader does an outstanding job. His labors are heroic. He has been unanimously elected to the post once again to serve as majority leader of the 98th Congress, and well deserves that honor and responsibility. But I think it is useful to focus on the origin of this bill and the history of its remarkable progress in the last several weeks. This article is from the Washington Post of November 23:

House Speaker Thomas P. (Tip) O'Neill Jr. and Senate Majority Leader Howard H. Baker Jr., agreed yesterday to seek approval in the lame-duck session of Congress beginning next week of a gasoline tax increase to finance a multibillion-dollar highway-repair and jobs program.

At the same time they cold-shouldered a proposal, under study by President Reagan, to advance next July's scheduled income tax cut to January in hopes of stimulating the economy.

While details of the jobs initiative have yet to be worked out, Baker told reporters after meeting with O'Neill that they will push jointly in the lame-duck session for a program "similar" to one advocated by Transportation Secretary Drew Lewis.

The Lewis plan calls for a 5-cent-per-gallon increase in the federal gasoline tax to finance $5.5 billion in highway, bridge and mass transit construction projects, creating an estimated 320,000 jobs. The federal tax is currently 4 cents a gallon.

The rare joint initiative by O'Neill and Baker

And I say parenthetically I hope, this Senator hopes, they will become even rarer—

enhances chances that Congress, under pressure from a 10.4 percent unemployment rate, will pass a quickie job-creating bill before the end of the year. It also puts heavy pressure on Reagan to climb on the jobs bandwagon.

Indeed, I will depart from the news article here, Mr. President, and state that I certainly do not hold President Reagan responsible for this jobs program. It was presented by the leadership of Congress, to my way of thinking, as a fait accompli, and he chose to swim with the tidal wave instead of against it, and inasmuch as he has a great deal of work to do, that decision can be understood.

Returning to the article:

"I think we can work something out, and I think the odds are good the president will support it," said Baker, implying that he intends to push the legislation even if Reagan doesn't endorse it in advance. Reagan has shown interest in the Lewis plan but has not taken a firm position.

In what amounted to a limited agenda for the three-week, post-election session, the two leaders also agreed to act on as many appropriations bills as possible and on trade liberalization provisions of the administration's Caribbean Basin Initiative.

Skipping over unrelated parts of the article and resuming with the next to the last paragraph:

On the highway jobs bill, however, the skids were being greased. Apparently under pressure from O'Neill, Ways and Means Committee Chairman Dan Rostenkowski and Public Works Committee Chairman James J. Howard planned to meet to resolve a jurisdictional dispute that has been holding the bill up for weeks.

There is yet another element, Mr. President, in this recent history of the gas tax bill which is disturbing to the Senator from New Hampshire, and that is—and I say this with all due respect to the leadership—that during the recess, congressional leadership chose to take positions on controversial issues apparently without any thorough canvassing of Members, as far as this Senator knows. And perhaps that was inadvertent. I know it was done with goodwill, for these gentlemen simply wish to solve our Nation's problems, whether we disagree or agree with their remedies.

But the effect of their taking a position during the recess period was to represent and to take a position on behalf of their respective majorities. It seems to this Senator, at least, that, on controversial matter, the congressional leadership should not take positions that might be construed as being on behalf of Members during recess periods when Members are scattered far and wide and can hardly be adequately consulted.

I can only say for myself that I was in no way consulted on the gas tax or on the proposal to advance the third increment of the income tax. It happens that this Senator's positions on those issues were the opposite of those taken by the majority leader. I say that with all good will toward him. but nevertheless feel it unfortunate and hope that in the future congressional leadership will not take positions during the recess periods which might be construed as representing a policy position of their party or of the Members of Congress of their party, because to do that misleads the press,

misleads the people of our country, and, I believe, in this case, misleads the President of the United States.

He was advised, for instance, if press accounts are correct, that it would be impossible to obtain enough votes in Congress to advance the third increment of the tax cut. I do not know if that is so or not. I do not know how such an opinion could have been reached during a recess period when it is presumably impossible to adequately canvass Members. Likewise, I believe the President might have misconstrued the leadership position on the gasoline tax as well and, based his decision to go along with it, on possibly faulty information.

Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order. The Senate will be in order.

The Senator from New Hampshire.

Mr. HUMPHREY. I thank the Chair.

Mr. Chairman, I will share with my colleagues an article appearing in the November 27 issue of Human Events, entitled "Gas Tax Hike Seen as Major Blunder."

GAS TAX HIKE SEEN AS MAJOR BLUNDER

Less than a day after the President indicated at a nationally televised press conference that he was leaning toward support of a five-cent-a-gallon hike in the gasoline tax, gas tax foes within the Administration began circulating at high levels of the White House a memorandum listing chapter and verse about why the President should do no such thing.

While the President had referred to the plan—which Transportation Secretary Drew Lewis has been pushing for the last two years—as calling for a higher "user fee," the memo, a copy of which has been obtained by Human Events, argues that no one will be fooled by such a lable. The document boldly states that "The proposed 'user fee' is actually a tax increase,'" adding: "The 'user fee' revenue will be raised through the tax system, added to the receipts side of the budget, and burden the economy just as any excise tax hike would. Whatever we label it, It is a tax increase."

In an obvious attempt to head off the Lewis proposal, the memo went on to note that such a tax increase "would violate a specific presidential pledge." The memo pointed out that the President, when asked at his September 28 news conference if he would "flatly rule out any tax increases, revenue enhancers, or specifically an increase in the gasoline tax," had answered: "Unless there's a palace coup and I'm overtaken or overthrown, no, I don't see the necessity for that."

Commented the memo: "Even if the 'gas tax increase' clause had not been included in the question, the President would still be reversing his position against tax increases if he endorsed the gas tax increases. Indeed, he would open the door to additional taxes—disguised as 'user fees' or otherwise—in 1983."

The internal memorandum was particularly stinging in its criticism of the assertion by Lewis and others that, by spending the added revenue to rebuild roads and bridges, the tax hike would create jobs. The document flatly stated:

"The jobs creation argument (320,000 new jobs) is totally false. The money to pay for the road building has to come from somewhere. We will tax if from the private economy, and reduce private-sector job creation accordingly. . . .

"The same analysis applies regardless of what the federal government is spending the money on—whether make-work jobs, roads or other public works. A public job is a public job, and has the same economic effect."

In addition, said the memo, by increasing federal spending by up to $27.5 billion over five years, the Lewis scheme "would seriously worsen the budget problem. . . . In fact, this proposal alone could cancel out 55 percent of the budget savings we secured all of this year."

While the author of the Administration memo was not identified, one high-level official who was known to be counseling against the tax hike was Budget Director David Stockman. According to a source familiar with Stockman's thinking, he is concerned that the Lewis proposal would dramatically increase the federal responsibility for road maintenance—just the opposite of the President's earlier plan to return such programs to the states.

Under present law, the federal Highway Trust fund will spend $46.8 billion for the period 1984-88, of which $21.5 billion will go for interstate highways, which is the one system almost completely funded by the federal government. But though the Lewis proposal would greatly expand federal highway expenditures over the 1984-88 period from $46.8 to $71.5 billion, None of this additional spending would go to the overwhelmingly federal interstate system.

The only other roads currently receiving significant federal funding are the so-called primary roads, which on average receive 43 per cent of their funding from Washington, with the state and local governments paying for more then 50 per cent of their upkeep. Under the Lewis formula, however, the federal share of primary-road maintenance would soar to well over 50 per cent. In addition, some $6 billion would go to secondary roads and urban transit, which currently receive little if any federal support.

Conservatives outside the Administration were also hoping the President would reject the Lewis plan. Rep. Phil Gramm (D.-Tex.), a former economist at Texas A&M University, told Human Events:

"If we were going to build new bridges, it ought to be done on an economic basis. It ought not to be done with the idea that it is going to create new jobs because clearly it is not. Because if we raise taxes to pay for it, we're taking income away from people—income that they would have saved, income that they would have spent."

Thus, said Gramm, "the question really boils down to: Can the government create more jobs by spending money than the private sector can and will create by spending the same money through the private capital market? My answer is that it cannot, especially when we're beginning to see signs of an economic recovery."

While the President said at his press conference that he didn't think such a gasoline tax increase "would in any way reduce the incentive features" of his income-tax rate reductions, many believe the President may be underestimating the danger. As bad as the gas tax boost is when viewed in isolation, they note, it is even worse when considered in combination with other scheduled tax hikes.

As council of Economic Advisers Chairman Martin Feldstein recently pointed out, while taxes are lower than they would have been without the President's cuts, they are still taking a 20.3 per cent share of the GNP. That is significantly higher than the 18.7 per cent of GNP going to taxes in the 1960s and the 19.7 per cent share in the 1970s. Yet Feldstein's figures don't even include the effect of the 1982 tax hike measure, which won't be felt until next year. Nor do they include the scheduled increase in Social Security taxes, and likely pressures for additional new increases in that tax. When considered in this overall context, the added effect of more than doubling the federal levy on gasoline could destroy any change of a quick economic recovery.

Interestingly, the President himself remains fully conscious of the drag on the economy caused by the continued high tax burden. For that reason, he was giving serious consideration at press time to asking Congress to advance the 10 per cent third stage of the tax cut scheduled for July 1983 to January 1983. But boosting the gasoline tax would tend to offset much of the economic stimulus to be expected from moving up the reduction in the income tax.

Already, for example, the oil companies and gasoline stations are fighting desperately to maintain sales in the face of a seriously declining demand for fuel brought on by the big jumps in energy costs over recent years. By suddenly boosting the price of gasoline, the gasoline tax hike can only make this problem worse, thereby leading to increased joblessness in the energy industry.

But the negative effect on business would extend far beyond the confines of the oil firms alone. Mike McKevitt of the National Federation of Independent Business, which represents over half-a-million small businesses across the United States, called the potential effects of such a tax hike "devastating" for the firms his organization represents:

Mr. President, I would repeat that and emphasize it for my colleagues who are listening in their offices. This tax proposal is opposed by the National Federation of Independent Businesses, generally thought to represent the small business point of view in this Nation.

We all know how piously Congress worships at the shrine of small business, and with good reason. I am not trying to be sarcastic about small business but, rather, sarcastic about Congress and its lack of sincerity, sometimes.

Continuing with the article:

"What effect would the gasoline tax have? It would be devastating. . . . Our 504,000 members between them own 19 million vehicles. . . . It's a big cost of doing business. Traveling salesmen are very upset by it.

"Last year," said McKevitt, "we polled our members on the issue. About eight or nine to one were against a gasoline tax increase. We opposed this under Carter. Why should we change under Reagan?"

Such a tax hike would also inflict a severe blow on the trucking industry, while leading to an increase in prices for virtually everything shipped by truck. According to Edward Kiley of the American Trucking Associations, an increase of one or two cents per gallon might be reasonable, but five cents is completely out of line.

Clearly, then, such a tax hike presents a serious threat to present hopes for a business upturn in the near future. Yet despite this threat, there might still be some argument in favor of such a tax jump if (1) it could be shown that it was needed to fund federal responsibilities for road construction and maintenance; or (2) that the added spending would create more jobs during the current recession. In fact, neither is true.

With regard to the condition of the highways, for example, the Urban Institute testified August 18 before the Senate Public Works Committee:

"Recent popular press reports and statements by highway officials have suggested that the nation's entire federal-aid highway system has deteriorated to an alarmingly poor state. These accounts are largely anecdotal, however, and are often based solely on subjective assessments. . . .

"We believe the evidence suggests that severe problems of deterioration are confined to particular locations and types of roads. In fact, the problems appear to be most serious for the secondary and non-federally aided road systems."

A spokesman for the Federal Highway Administration confirmed to Human Events that none of the revenues from the tax hike would go to the interstate highways, which is the one system for which the federal government now has primary responsibility. Instead, the additional revenues would go to roads that are primarily—or, in many instances, entirely—the responsibility of state and local governments. But if there roads need additional attention, why not let the states raise their gasoline taxes?

As for the argument that the public-works projects funded by the tax will generate jobs, the Heritage Foundation reported last week:

"Historically, these programs have provided few jobs per dollar invested. A recent New York Times article pointed out that each job created through public works spending on highways, bridges and sewage treatment plants costs the taxpayer from $28,000 to $40,000. Not only are these jobs expensive, but they may well appear months after economic recovery begins."

In short, such government programs are both wasteful and ill-timed. But with not only Secretary Lewis but also such key GOP senators as Paul Laxalt (Nev.) and Howard Baker (Tenn.) pushing hard for the new tax-funded job scheme, the President may be tempted to go along anyway.

Mr. President, inasmuch as it is not our wish to impede other important business, I shall be happy to yield to the leadership at this point, who have expressed a wish to move other business. So I shall yield at this point, asking unanimous consent that I not lose my right to the floor and that, upon resuming my remarks; it not be counted as a second speech.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

The majority leader is recognized.

Mr. BAKER. Mr. President, I am most grateful to my friend from New Hampshire. I appreciate his permitting me to be recognized at this time under the conditions just granted by the Chair so we may undertake some routine matters that require the attention of the Senate, I believe.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I have a number of matters in my folder that appear to be cleared for action by unanimous consent. In a moment, I shall inquire of the minority leader if he is in a position similarly to clear all or most of these items, then proceed on that basis. No item will be taken up which is not cleared on both sides of the aisle through the usual clearance process.

The first item I would like to deal with is a message from the House on S. 2336. If the minority leader is prepared to do so, I shall ask the Chair to lay that message before the Senate.

Mr. ROBERT C. BYRD. Mr. President before the Chair proceeds with that, may I ask the majority leader if he anticipates any other rollcalls today.

Mr. BAKER. Mr. President, I am advised that there will be a motion this afternoon. I believe it will be a motion to postpone indefinitely my motion to proceed. I am also advised that there will be a request for the yeas and nays. The best estimate I can get on that is it will occur around 3 p.m. I am advised by the Senator from New Hampshire that we can do that now or after the calendar call or whenever it seems most convenient to most Senators.

Mr. ROBERT C. BYRD. I wonder if the majority leader or the Senator from New Hampshire or any other Senators anticipate further rollcalls this afternoon.

Mr. BAKER. I inquire of the Senator from New Hampshire and the Senator from Oklahoma, who are principally involved, whether they anticipate any other rollcalls?

Mr. NICKLES. It is this Senator's intention that it be only that motion to postpone as far as I know. I would like to make a few comments on it. I believe the Senator from Michigan (Mr. LEVIN) may wish to make a few comments on it, also.

Mr. BAKER. I thank the Senator. Does the Senator from New Hampshire anticipate any other rollcalls this afternoon?

Mr. HUMPHREY. Not for my part, Mr. President; just the one described.

Mr. BAKER. I thank the Senator. In view of that and in view of the fact that the Senator does not wish to ask the Senate to undertake any other matters I am prepared to announce that, after the disposition of a motion which may be made by the Senator from Oklahoma or the Senator from New Hampshire to postpone any disposition, either on the bill itself or some other procedural device in respect to that motion, including a tabling motion, after that issue is disposed of, there will be no further record vote today.

Mr. ROBERT C. BYRD. The leader is saying there could be three or four other record votes on that issue.

Mr. BAKER. Yes, as far as I know, there could be one, and could be more than one.

Mr. ROBERT C. BYRD. I am prepared to proceed.

Mr. BAKER. I thank my colleagues from New Hampshire and Oklahoma. As soon as it is convenient to them, I urge them to go forward with their motion if they wish.

Mr. President, I have a House message on S. 2336. Is the minority leader prepared to proceed with that?

Mr. ROBERT C. BYRD. Yes.

MARITIME PROGRAMS OF THE DEPARTMENT OF TRANSPORTATION

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 2336.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House insist upon its amendments to the bill (S. 2336) entitled "An Act to authorize appropriations for fiscal year 1983 for certain maritime programs of the Department of Transportation, and for other purposes", and ask a conference with the Senate on the disagreeing votes of the two Houses thereon.

Ordered, That Mr. Jones of North Carolina, Mr. Biaggi, Mr. Breaux, Mr. Donnelly, Mr. Snyder, Mr. McCloskey, and Mr. Young of Alaska be the managers of the conference on the part of the House.

Mr. BAKER. Mr. President, I move that the Senate disagree to the House amendments and agree to the request of the House for a conference, and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to and the Presiding Officer appointed Mr. PACKWOOD, Mr. GORTON, Mr. STEVENS, Mr. LONG, and Mr. INOUYE conferees on the part of the Senate.

COMMERCIAL FISHERIES AND MARINE DEVELOPMENT ACT AMENDMENTS OF 1982

Mr. BAKER. Mr. President, the next item in my folder is a request to discharge the Commerce Committee from further consideration of H.R. 3942 and proceed to its immediate consideration.

Mr. ROBERT C. BYRD. Mr. President, I have no objection.

Mr. BAKER. I thank the minority leader.

I ask unanimous consent that the Commerce Committee be discharged from further consideration of H.R. 3942, the Commercial Fisheries Research and Development Act and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the bill.

The assistant legislative clerk read as follows:

A bill (H.R. 3942) to amend the Commercial Fisheries Research and Development Act of 1964.

UP AMENDMENT NO. 1428

Mr. BAKER. Mr. President, I send to the desk an amendment on behalf of the distinguished chairman of the Committee on Commerce (Mr. PACKWOOD) and ask that it be stated.

I might say, in explanation, Mr. President, that this is a substitute and it has been supplied to all parties and I believe has been cleared all around.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER), for Mr. PACKWOOD, proposes an unprinted amendment numbered 1428.

Strike all after the enacting clause and insert the following: That this Act may be cited as the "Fisheries Amendments of 1982".

TITLE I—COMMERCIAL FISHERIES RESEARCH AND DEVELOPMENT ACT

SEC. 101. (a) Section 4(a) of the Commercial Fisheries Research and Development Act of 1964 (16 U.S.C. 779(a)) is amended—

(1) by striking the period at the end of paragraph (2) and inserting in lieu thereof "and"; and

(2) by adding at the end thereof the following new paragraph:

"(3) $5,000,000 for each of the fiscal years ending September 30, 1984 and September 30, 1985.".

(b) Section 4(b) of the Commercial Fisheries Research and Development Act of 1964 (16 U.S.C. 779(b)) is amended—

(1) by striking "and" at the end of paragraph (2);

(2) by inserting "and" at the end of paragraph (3); and

(3) by adding at the end thereof the following new paragraph:

"(4) $2,500,000 for each of the fiscal years ending September 30, 1984 and September 30, 1985".

(c) Section 4(c) of the Commercial Fisheries Research and Development Act of 1964 (16 U.S.C. 779b(c)) is repealed.

TITLE II—MARINE MAMMAL PROTECTION

SEC. 201. Section 14 of the North Pacific Fisheries Act of 1954 (16 U.S.C. 1034) is amended to read as follows:

"SEC. 14. (a)(1) The Secretary of Commerce is directed to take such actions as are necessary and appropriate to determine the effect of the Japanese salmon drift gillnet fishery on marine mammal populations, and to reduce or eliminate the incidental taking of marine mammals, particularly Dall's porpoise, by this fishery. Such actions shall include, but not be limited to:

"(A) the placement of duly authorized observers of the United States onboard Japanese salmon fishing and research vessels while within the Fishery Conservation Zone, for the purpose of making scientific observations and studies relating to the biology of the Dall's porpoise and the incidental taking of marine mammals, seabirds and king salmon of North American origin;

"(B) the collection of a representative sample of biological material and data on all marine mammals incidentally taken in the fishery; and

"(C) the adoption of requirements, by permit conditions or agreement, governing the incidental taking of marine mammals by Japanese salmon fishing vessels within the fishery conservation zone, which will insure that new fishing gear or techniques, or both, are implemented in the North Pacific salmon fishery which will reduce porpoise mortality to the greatest extent practicable.

"(2) The introduction of new fishing gear or techniques, or both, of the fishery under paragraph (1) of this subsection shall be accomplished no later than is specified in the following timetable:

"(A) 25 per centum of the fleet by the commencement of the 1984 season;

"(B) 50 per centum of the fleet by the commencement of the 1985 season;

"(C) 75 per centum of the fleet by the commencement of the 1986 season; and

"(D) 100 per centum of the fleet in order to be eligible for a new permit for the period after June 9, 1987.

The Secretary shall have the authority to decide, based upon available fishery research, which types of fishing gear or techniques offer the most tactical and effective opportunity for reducing porpoise mortality, and to specify which of these fishing gear or techniques, or both, must be implemented during the time periods specified in subparagraphs (A) through (D) of this paragraph. In addition, the National Marine Fisheries Service may require the implementation of new gear types or fishing techniques, or both, on a faster schedule if the Service determines that faster implementation is technically and economically feasible.

"(b) The General Permit issued under the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361 et seq.) to the Federation of Japan Salmon Fisheries Cooperative Association on May 7, 1981 (hereinafter referred to as the "General Permit") is extended through June 9, 1987, unless earlier terminated by the Secretary pursuant to applicable law: *Provided*, That:

"(1) all other provisions of the General Permit and applicable law shall remain in effect during that period;

"(2) the Secretary shall by January 1 of each year during that period prepare and make available a report covering the results of the annual review required by condition B-2 of the General Permit and a proposed action plan for the forthcoming fishing season setting forth monitoring, research and development, and any other necessary actions to assure compliance with the General Permit, resolve questions about the status and trends of marine mammals affected by the Japanese high seas and land-based salmon gillnet fisheries, and reduce the annual incidental take of marine mammals in the fishery conservation zone, and shall publish a notice of availability of the report in the Federal Register. The Secretary shall, by April 30 of each year during this period, prepare and make available a report covering a final action plan and shall publish a notice of availability of the report in the Federal Register; and

"(3) the Memorandum of Understanding between the Government of the United States of America and the Government of Japan dated June 3, 1981 relating to such incidental taking shall be modified or renegotiated by June 9, 1984 so as to apply to this extended period and to ensure the conduct of necessary monitoring and research and development efforts to implement the action plans described in paragraph (2) of this subsection.

"(c) The taking of marine mammals incidental to fishing operations by Japanese salmon fishing vessels within the fishery conservation zone shall be regulated in accordance with the General Permit, except that the Secretary shall take appropriate steps, including the suspension or modification of the General Permit, if the Secretary determines that the General Permit holder or certificate holders are not adhering to the conditions of the General Permit or to the conditions specified in paragraphs (a)(1)(C) and (a)(2) of this section and publishes such determination and its basis in the Federal Register.

"(d) The terms and conditions under which the General Permit is issued may be modified by the Secretary in such manner as the Secretary determines to be consistent with and necessary to carry out the purposes of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361 et seq.) and this Act.

"(e) The Secretary shall ensure that any Memorandum of Understanding between the Government of Japan and the Government of the United States of America shall require no less of a commitment to marine mammal research and seabird research than that required by this section and the Memorandum of Understanding in effect on the date of enactment of the Fisheries Amendments Act of 1982.

"(f)(1) In order to assure full implementation of the provisions of this section, the Secretary shall include as a condition of such General Permit and any Memorandum of Understanding that the Government of Japan or the permit holder, shall provide:

"(A) appropriate funding each year to carry out fully a joint research program on Dall's porpoise and other marine mammals incidentally taken in the Japanese fishery; and

"(B) a full report each year on the activities undertaken by the Government of Japan and the General Permit holder relating to marine mammal research and the progress toward the elimination of the incidental taking of marine mammals in the fishery.

"(2) If the Secretary finds that such research cannot be successfully conducted because of a lack of adequate funding by the Government of Japan or the General Permit holder, the Secretary shall immediately suspend the General Permit until such time as adequate funding is provided.".

SEC. 202. The first sentence of section 201(b)(1) of the Act of October 21, 1972 (16 U.S.C. 1401(b)(1)), is amended to read as follows: "Effective September 1, 1982, the Commission shall be composed of three members who shall be appointed by the President, by and with the advice and consent of the Senate.".

TITLE III—NORTH ATLANTIC SALMON TREATY

SEC. 301. This title may be cited as the "Atlantic Salmon Convention Act of 1982".

SEC. 302. As used in this title, the term—

(1) "Act of 1976" means the Act entitled "An Act to provide for the conservation and management of the fisheries, and for other purposes", approved April 13, 1976 (16 U.S.C. 1801 et seq.);

(2) "Commission" means any of the Commissions of the Organization that are established by the Convention;

(3) "Commissioner" means a United States Commissioner appointed under section 403 of this title;

(4) "Convention" means the Convention for the Conservation of Salmon in the

North Atlantic Ocean, signed at Reykjavik, Iceland, on March 2, 1982;

(5) "Council" means the Council established by the Convention;

(6) "Fishing" has the same meaning as such term has in section 3(10) of the Act of 1976 (16 U.S.C. 1802(10));

(7) "Organization" means the North Atlantic Salmon Conservation Organization established under the Convention;

(8) "Person" has the same meaning as such term has in section 3(19) of the Act of 1976 (16 U.S.C. 1802(19)); and

(9) "Salmon" means all species of salmon which migrate in or into the waters of the Atlantic Ocean north of 36 degrees North Latitude.

SEC. 303. (a) The United States shall be represented on the Council and Commissions by three United States Commissioners to be appointed by the President to serve at his pleasure. Of such Commissioners, one shall be an official of the United States Government, and two shall be individuals (not officials of the United States Government) who are knowledgeable or experienced concerning the conservation and management of salmon of United States origin.

(b) The Secretary of State, in consultation with the Secretary of Commerce and the Secretary of the Interior, may designate alternate United States Commissioners. In the absence of a Commissioner appointed under subsection (a) of this section, an alternate Commissioner may exercise at any meeting of the Organization, the Council, or any Commission all functions of such Commissioner.

(c) Individuals who serve as Commissioners and alternate Commissioners shall not receive any compensation for such service. Such individuals shall be considered to be Federal employees while performing such service, except for purposes of injury compensation or tort claims liability as provided in chapter 81 of title 5, United States Code, and chapter 171 of title 28, United States Code.

(d) In carrying out their functions under the Convention, the Commissioners may consult with the appropriate Regional Fishery Management Councils established by section 302 of the Act of 1976 (16 U.S.C. 1852), and may consult with such other interested parties as they consider appropriate. The Federal Advisory Committee Act (5 U.S.C. Appx. 1 et seq.) shall not apply to consultations described in this subsection.

SEC. 304. (a) The Secretary of State may—

(1) receive, on behalf of the United States, reports, requests, recommendations, proposals, and other communications of the Organization and its subsidiary organs;

(2) with the concurrence of the Secretary of Commerce and the Secretary of the Interior, approve, object to, or withdraw objections to regulatory measures proposed in accordance with the Convention; and

(3) act upon, or refer to other appropriate authority, any communication referred to in paragraph (1) of this subsection other than a proposed regulatory measure.

(b) If the concurrence required under subsection (a)(2) of this section has not been obtained by the Secretary of State—

(1) regarding the approval of, or the objection to, a proposed regulatory measure within 45 days after the measure was received on behalf of the United States; or

(2) regarding the withdrawal of an objection of the United States to a proposed regulatory measure within 45 days after such withdrawal is proposed by the Secretary of State;

the Secretary of State shall submit the matter in disagreement, together with a statement of the opposing positions, to the President for timely disposition.

SEC. 305. (a) The Secretary of Commerce, in cooperation with the Secretary of the Interior and the Secretary of the Department in which the Coast Guard is operating, shall promulgate such regulations pursuant to section 553 of title 5, United States Code, as may be necessary to carry out the purposes and objectives of the Convention and this title, and to implement regulatory measures that are binding on the United States under the Convention. Any such regulation may be made applicable, as necessary, to all persons and all vessels subject to the jurisdiction of the United States, wherever located.

(b) The Secretary of Commerce, in cooperation with the Secretary of the Interior, shall prepare all statements, reports, and notifications required by Articles 14 and 15 of the Convention and submit such documents to the Secretary of State for transmission to the Organization.

SEC. 306. (a) In carrying out the provisions of the Convention, the Secretary of Commerce, in consultation with the Secretary of the Interior, may arrange for the cooperation of agencies of the United States and the States, and of private institutions and organizations.

(b) Appropiate agencies of the United States may cooperate in the conduct of scientific and other programs, and may furnish facilities and personnel, for the purposes of assisting the Organization in carrying out its duties under the Convention. Such agencies may accept reimbursement from the Organization for providing such services, facilities and personnel.

SEC. 307. (a) It is unlawful for any person, or any vessel, subject to the jurisdiction of the United States—

(1) to conduct directed fishing for salmon in waters seaward of twelve miles from the baselines from which the breadths of territorial seas are measured, in waters of the Atlantic Ocean north of 36 degrees North Latitude; or

(2) to violate any provision of the Convention or this title, or of any regulation promulgated under this title.

(b) Any person who commits any act that is unlawful under subsection (a) of this section shall—

(1) be liable to the United States for a civil penalty under section 308 of the Act of 1976 (16 U.S.C. 1858) to the same extent as if such act were an act prohibited under section 307 of the Act of 1976 (16 U.S.C. 1857); and

(2) be guilty of an offense under section 309 of the Act of 1976 (16 U.S.C. 1859) to the same extent as if such act were an act prohibited by section 307(1) (D), (E), (F), or (H) of the Act of 1976 (16 U.S.C. 1857(1) (D), (E), (F), or (H)).

Any vessel used in the commission of an act which is unlawful under subsection (a) of this section shall be subject to civil forfeiture under section 310 of the Act of 1976 (16 U.S.C. 1860) to the same extent as if such vessel was used in the commission of an act prohibited by section 307 of the Act of 1976 (16 U.S.C. 1857).

SEC. 308. The Secretary of Commerce and the Secretary of the department in which the Coast Guard is operating shall enforce the provisions of this title and any regulation issued under this title. For purposes of such enforcement, such provisions and regulations shall be considered to be provisions of the Act of 1976 to which section 311(a), (b), (c) and (d) of the Act of 1976 (16 U.S.C. 1861(a), (b), (c) and (d), respectively) apply.

SEC. 309. There are authorized to be appropriated from time to time such sums as may be necessary for carrying out the purposes and provisions of the Convention and this title, including—

(1) necessary travel expenses of the Commissioners and alternate Commissioners in accordance with the Federal Travel Regulation and sections 5701, 5702, 5704 through 5708, and 5731 of title 5, United States Code; and

(2) the United States contribution to the Organization as provided in Article 16 of the Convention, not to exceed $50,000 for fiscal year 1983, and not to exceed, for each succeeding fiscal year, the amount assessed by the Organization for the United States for such year.

TITLE IV—GOVERNING INTERNATIONAL FISHERY AGREEMENTS

SEC. 401. Notwithstanding any other provision of law, the governing international fishery agreement entered into between the Government of the United States and the Government of Japan pursuant to the Magnuson Fishery Conservation and Management Act of 1976 (16 U.S.C. 1801 et seq.) signed at Washington on September 10, 1982 is approved, and shall become effective on January 1, 1983.

SEC. 402. Notwithstanding any other provision of law, the governing international fishery agreement entered into between the Government of the United States and the Government of Spain pursuant to the Magnuson Fishery Conservation and Management Act of 1976 (16 U.S.C. 1801 et seq.) signed on July 29, 1982 is approved.

TITLE V—MISCELLANEOUS PROVISIONS

SEC. 501. Notwithstanding the failure of the vessels named below to meet the requirements contained in sections 111 and 112 of the Vessel Documentation Act, as amended (46 U.S.C. 65 (i) and (j)), and section 27 of the Merchant Marine Act, 1920, as amended (46 U.S.C. 883), on the date of this Act, the Secretary of the Department in which the Coast Guard is operating shall cause the vessel Centurion (officially numbered 236815), owned by Joseph B. Simoncelli, of Scranton, Pennsylvania, and the vessel Ellen Ruth (officially numbered 282354) owned by Jefferson B. Bruton, of Isle of Palms, South Carolina, to be documented as vessels of the United States upon compliance with all other requirements of law, with the privilege of engaging in the coastwise trade.

SEC. 502. The Merchant Marine Act, 1920 (41 Stat. 988), as amended (46 U.S.C. 861 et seq.), is amended by adding at the end of section 27: "For the purposes of this section, after December 31, 1983, or after such time as an appropriate vessel has been constructed and documented as a vessel of the United States, the transportation of hazardous waste, as defined in section 1004(5) of the Resource Conservation and Recovery Act of 1976 (42 U.S.C. 6903(5)), from a point in the United States for the purpose of the incineration at sea of that waste shall be deemed to be transportation by water of merchandise between points in the United States; Provided, however, that the provisions of this sentence shall not apply to this transportation when performed by a foreign-flag ocean incineration vessel, owned by or under construction on May 1, 1982 for a corporation wholly owned by a citizen of the United States; the term citizen of the

United States, as used in this proviso, means a corporation as defined in section 2(a) and 2(b) of the Shipping Act, 1916 (46 U.S.C. 802(a) and (b)). The incineration equipment on these vessels shall meet all current United States Coast Guard and Environmental Protection Agency standards. These vessels shall, in addition to any other inspections by the flag state, be inspected by the United States Coast Guard, including drydock inspections and internal examinations of tanks and void spaces, as would be required of a vessel of the United States. Satisfactory inspection shall be certified in writing by the Secretary of Transportation. Such inspections may occur concurrently with any inspections required by the flag state or subsequent to but no more than one year after the initial issuance or the next scheduled issuance of the Safety of Life at Sea Safety Construction Certificate. In making such inspections, the Coast Guard shall refer to the conditions established by the initial flag state certification as the basis for evaluating the current condition of the hull and superstructure. The Coast Guard shall allow the substitution of an equivalent fitting, material, appliance, apparatus, or equipment other than that required for vessels of the United States if the Coast Guard has been satisfied that fitting, material, appliance, apparatus, or equipment is at least as effective as that required for vessels of the United States."

SEC. 503. (a) Section 20 of the Act of March 4, 1915 (38 Stat. 1185), as amended (46 U.S.C. 688) is amended—

(1) by redesignating that section as section 20(a); and

(2) by adding at the end thereof the following new subsection:

"(b)(1) No action may be maintained under subsection (a) or under any other maritime law of the United States for maintenance and cure or for damages for the injury or death of a person who was not a citizen or permanent resident alien of the United States at the time of the incident giving rise to the action, if the incident occurred—

"(A) while that person was in the employ of an enterprise engaged in the exploration, development, or production of offshore mineral or energy resources—including but not limited to drilling, mapping, surveying, diving, pipelaying, maintaining, repairing, constructing, or transporting supplies, equipment or personnel, but not including transporting those resources by (a) vessel constructed or adapted primarily to carry oil in the cargo spaces; and

"(B) in the territorial waters or waters overlaying the continental shelf of a nation other than the United States, its territories, or possessions. As used in this paragraph, the term "continental shelf" has the meaning stated in article I of the 1958 Convention on the Continental Shelf.

"(2) The provisions of paragraph (1) of this subsection shall not be applicable if the person bringing the action establishes that no remedy was available to that person—

"(A) under the laws of the nation asserting jurisdiction over the area in which the incident occurred; or

"(B) under the laws of the nation in which, at the time of the incident, the person for whose injury or death a remedy is sought maintained citizenship or residency."

(b) The amendment made by this section does not apply to any action arising out of an incident that occurred before the date of enactment of this section.

SEC. 504. Section 27 of the Merchant Marine Act, 1920 (46 U.S.C. 883) is amended by inserting the following immediately before the period at the end thereof: *"Provided further,* That for the purposes of this section, supplies aboard United States documented fish processing vessels, which are necessary and used for the processing or assembling of fishery products aboard such vessels, shall be considered ship's equipment and not merchandise.".

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1428) was agreed to.

● Mr. PACKWOOD. Mr. President, the bill the Senate is acting upon today is a collection of several pieces of fisheries legislation. I would like to take a moment to clarify and highlight some of the provisions contained in this measure.

First, the bill provides a formal, legislative approval of the Governing International Fishery Agreement between the Government of Japan and the Government of the United States. This agreement is the result of long, tough negotiations, and I am pleased to say that it provides a number of benefits for our domestic fishing industry. We have already seen an increase in cooperation between the Japanese fishing industry and our own. Joint ventures have increased, technical assistance has increased, and we are hoping that Japanese markets for American fishery exports will also increase in size and accessibility.

The American Government has shown a greater willingness over the past several years to stand up for its rights as regards the marine resources of our Fishery Conservation Zone. This is a trend which I support, and which I believe is reflected in this agreement.

However, I do not want to leave this issue without first mentioning another subject I have long been interested in. That issue is commercial whaling.

As many of my colleagues are aware, this past July the International Whaling Commission (IWC) approved a moratorium on commercial whaling set to begin in 3 years. This is a goal I have long worked for and so I was very pleased with this decision.

However, I am sorry to have to also report that several whaling nations have since filed objections to the IWC decision. This means that they are leaving open for themselves the possibility of continuing commercial whaling activities after the date set for commencement of the IWC moratorium. Japan, the most active of the whaling nations and the largest market for whale products, was one of the nations to file an objection. I want to stress in the strongest terms that today's approval of the new Governing International Fishery Agreement with Japan should not be taken by the Japanese as a sign that their objection to the moratorium is being ignored. The situation is very much to the contrary.

The reason the new Governing International Fishery Agreement is being approved is simply that it is more beneficial to the U.S. fishing industry. Congressional displeasure with the Japanese objection to the IWC moratorium is very real and very strong. In my opinion, the newly elected Government of Japan would be well advised to give serious consideration to the possibility of withdrawing the objection filed by the previous government.

If this is not done, there will surely be negative consequences along the entire range of United States-Japanese relations. This is especially true in the fisheries area, however, where we see that Japan is currently taking almost 1.5 million tons of fish from the U.S. Fishery Conservation Zone annually. The continuation of this relationship on a "business as usual" basis will certainly be threatened if the Government of Japan persists with its objection to the IWC decision. In fact, I have recently been assured by the Department of State, in a letter from Acting Secretary Kenneth Dam, that our Government will use all diplomatic means as well as available laws and regulations in an effort to persuade the Japanese to rescind their objection. Existing U.S. law, for instance, gives the Secretaries of State and Commerce wide latitude in their ability to adjust—either up or down—the level of fishery allocations to foreign nations. This option will certainly not be overlooked as we enter 1983 and decisions are made on fishery allocations.

In saying this, however, let me also point out to my friends in the U.S. fishing industry that I will not endorse any actions which could end up doing harm to the development efforts of the domestic fishing industry. We are finally making progress toward Americanizing the utilization of the resources in the Fishery Conservation Zone, and I am committed to this course.

Another important item included in the Fisheries Amendments Act of 1982 is the implementing legislation for the Convention for the Conservation of Salmon in the North Atlantic Ocean. This international agreement is also of great potential benefit to American fishermen, particularly sport fishermen in the Northeast. The agreement is also particularly noteworthy from a conservation point of view in that we expect to see a considerable expansion of the North Atlantic salmon resource under the management framework set out in the Convention.

I commend the Department of State and its negotiators for their perseverance, and for the obvious dedication to the goal of protecting and promoting

American fisheries interests which is reflected in both the international agreements I have discussed so far. They are to be congratulated.

Another segment of this bill which I want to mention deals with the operation of the Japanese salmon drift gillnet fishery in the North Pacific Ocean and its effect on marine mammals in the area, particularly Dall's porpoise. The legislation before us today extends the existing marine mammal permit for this fishery for an additional 3 years. However, at the same time, it requires the Japanese to implement new fishing gear and techniques which will result in a significantly lower incidental catch of Dall's porpoise in the fishery. The Japanese have been testing a variety of methods for reducing the porpoise kill associated with the fishery, and some of the tests have shown great promise. In my view, it is time for the fruits of this testing to be implemented and for the kill rate to be reduced. Testing to date indicates that the incidental catch rate could be reduced by close to 50 percent with a relatively modest financial investment. Future testing will surely uncover even more effective ways of insuring that fewer porpoise become entangled in the gillnets.

Just as the domestic tuna fishing industry has made remarkable accomplishments in reducing its incidental take of porpoise to a fraction of what it once was, I am sure that the Japanese will be able to do the same. Encouraging them to do so is the goal of this particular section of the Fisheries Amendments Act of 1982.

These are the primary items contained in the measure. All are necessary and progressive steps, in my opinion, and I hope my colleagues will support the bill's passage.●

Mr. LONG. Mr. President, American offshore service companies and their foreign subsidiaries are being severely impacted by a multitude of lawsuits, aggregating claims over a billion dollars, brought by foreign offshore oil and gasfield workers. These lawsuits for damages arising from foreign offshore personal injury claims are based upon U.S. maritime tort laws enacted 40 to 50 years before worldwide offshore mineral extraction activities began. Such laws were never intended to apply to foreign workers engaged in offshore operations abroad.

The United States should not continue to export its remedies for foreign workers' work-related injury claims which arose in foreign waters. Since no other country allows its judicial system to be used by foreign citizens for incidents occurring within the jurisdiction of foreign nations, U.S. offshore service companies and their foreign subsidiaries are at a competitive disadvantage with their many foreign competitors.

A reasonable solution is to clarify U.S. maritime tort laws to provide that a foreign worker engaged in mineral extraction activities in waters over the continental shelf of a foreign nation may not seek a remedy for his work-related injury in U.S. courts if he has a remedy in his home country, or in the country with jurisdiction over the accident site, if different. Should there be no remedy overseas, the foreign worker would then, and only then, be able to adjudicate his claim in U.S. courts.

Such a clarification would not affect U.S. workers no matter where in the world they work, or seamen on blue-water vessels, or anyone working in waters over the U.S. Continental Shelf.

This statutory clarification is needed in order to insure that U.S. offshore service companies remain competitive enough to continue to provide U.S. citizens jobs both at home and abroad.

● Mr. MITCHELL. Mr. President, I support this legislation which permits the United States to fulfill the obligations it assumed when it agreed to abide by the provisions of the Atlantic Salmon Convention. However, I wish, for the record, to ask of the floor manager a question which relates to the effect which the Convention and this implementing legislation will have on the Magnuson Fishery Management Conservation Act (MFCMA) and the operations of the regional management councils established pursuant to that act.

I ask the following question because several of my constitutents in Maine have expressed to me their concern that the Atlantic Salmon Treaty and its implementing legislation might undercut the authority of the regional management councils. My question is: Does any provision of the Convention, or the legislation which will implement it, give authority to the U.S. commissioners to agree to management or conservation measures which will affect the management of nonsalmon stocks harvested in the fisheries conservation zone (FCZ) and overseen by the regional management councils?

Mr. PACKWOOD. The Convention and the Convention implementing legislation would not preempt the role of the regional management councils in regulating the nonsalmon fisheries within the fisheries conservation zone whether or not those fisheries take a bycatch of salmon.

Article 7, paragraph 2 of the Convention does obligate the United States and Canada to minimize the bycatches of salmon originating in each others rivers. However, the Commission has no regulatory authority to do this. The obligation will be implemented by domestic law. Thus, of course, the councils would be involved as usual. I would point out that this is very much a theoretical problem as U.S. fisheries catch almost no salmon of foreign origin.

Mr. MITCHELL. I thank the Senator for such a complete answer to my question.●

● Mr. GORTON. Mr. President, I am pleased to speak in support of H.R. 3942. While this legislation includes a variety of measures affecting the U.S. fisheries industry, I would like to highlight two aspects of the bill which are of special significance to the northwest fisheries industry.

Under the Magnuson Fishery Conservation and Management Act, foreign nations cannot fish in our fishery conservation zone unless they meet certain conditions, including the existence of a governing international fishery agreement with the United States. The conclusion of a GIFA does not guarantee allocations to a foreign nation, but it does mean that fishermen of that nation are eligible for allocations of surplus fish stocks. Since the passage of the Magunson Fishery Conservation and Management Act, the United States has entered into GIFA's with many nations, and has, over time, developed a greater sense of the provisions of a GIFA which would be most advantageous to the interests of our domestic industry.

The Japanese GIFA contained in today's fisheries package represents the culmination of that thought and effort. This 5-year GIFA with Japan incorporates the legislatively mandated criteria for foreign allocations, including whether the nation in question cooperates with the United States in the advancement of fisheries trade; whether the nation in question cooperates with the United States in the enforcement of domestic law and regulation relating to fisheries; whether the nation in question imposes tariff or nontariff barriers on the importation of U.S. fisheries products; and whether the nation in question cooperates with the United States, and aids in fisheries research. In addition, the Japanese GIFA contains a commitment by the Government of Japan to cooperate in the development of the U.S. industry by taking measures to reduce or remove impediments to the development of our industry, including increased imports and increased joint ventures.

These provisions of the GIFA are of critical importance to the northwest fishing industry. Joint venture participation by the Japanese is scheduled to increase significantly in the next year, offering the prospect of continued fishing opportunities for the northwest fleet. Northwest fishermen are ready and eager to participate in joint ventures with the Japanese, and have demonstrated their ability to harvest a previously untapped resource in the underutilized groundfish. It is the intention and expectation of the U.S.

fishing industry ultimately to utilize fully the resources of our fishery conservation zone. But to achieve this goal, both processors and fishermen will have to improve their competitive position, and gain greater access to domestic and foreign markets. Joint ventures, in the short term, offer the prospect of bringing U.S. processors and fishermen closer to that goal.

In addition to the Japanese GIFA, another provision of this bill is of special interest to the northwest. U.S. processors have been hampered by an interpretation of the U.S. Customs Service which held that supplies which a processing vessel uses are "merchandise", thereby triggering the provisions of the Jones Act which prohibited the carrying of such processing supplies between two U.S. ports. With the amendment contained in today's bill, which is a narrow and carefully drafted change, U.S.-flag, U.S.-documented fish processing vessel will be able to carry between U.S. ports processing supplies which are necessary and used for processing or assembling of fishery products aboard such vessel. This change will correct an interpretation which has created an unworkable situation for the fish processing industry.

Mr. President, I am pleased that the Senate today is demonstrating its commitment to the continued health and growth of the U.S. fisheries industry. I share that commitment, and I look forward, with congressional approval of the provisions of H.R. 3942, to a new era of recognition of the importance of our domestic fisheries industry.●

● Mr. LEVIN. Mr. President, few conservation issues have evoked as much intense public concern as the destruction of the great whales. The decision of the International Whaling Commission this July to impose a cessation of commercial whaling beginning in 1986 shows that this concern is shared by many nations throughout the world.

However, several member nations of the IWC, which participated in the decisionmaking process this July but opposed the outcome, have now lodged objections to the IWC's historic decison. Those nations are: Japan, Norway, the Soviet Union, and Peru. The legal effect of an objection is to release these nations from compliance with the IWC decision.

It is my view that a firm response should be made. But such a response will be taken seriously only if it is translated into economic terms.

This view led me to join with 65 other Senators in urging Secretary of Commerce Baldrige and the administration to use the fishery allocation process under the fisheries Conservation and Management Act to encourage whaling nations which fish in the U.S. 200-mile zone, particularly Japan and Korea, to adhere to the IWC cessation decsion.

It is my understanding that the State Department has recently addressed this matter in a letter to Senators PACKWOOD and PERCY, dated December 4, 1982. The letter, from Mr. Kenneth Dam, Acting Secretary of State, indicated that the Department is "prepared to use available laws and regulations, beginning this spring, to prevent Japan from thwarting the IWC cessation decision."

Based upon this letter it is my opinion that his statement does in fact constitute a promise by the adminstration to take the actions requested in our letter to Secretary Baldrige, and that the administration is hereby affirming that it will use the allocation process to bring about a retraction of the Japanese objection, and to prevent the Republic of Korea from filing one.

I believe U.S. fisheries policy can be made effective as a means of protecting the whales, without harming the U.S. fishing industry.●

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read a third time, the question is, Shall it pass?

So the bill (H.R. 3942) was passed.

Mr. BAKER. I move to reconsider the vote by which the bill passed.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BILL HELD AT DESK—H.R. 7338

Mr. BAKER. Mr. President next on my list is a request to hold H.R. 7338 at the desk if the distinguished minority leader is prepared to agree with that request.

Mr. ROBERT C. BYRD. Mr. President, I have no objection.

Mr. BAKER. Mr. President, I ask unanimous consent that once the Senate receives from the House of Representatives H.R. 7338, which is a bill to amend the Public Health Service Act, it be held at the desk pending further disposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

BILL HELD AT DESK—H.R. 7377

Mr. BAKER. Mr. President, I have a similar request in respect to H.R. 7377.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

Mr. BAKER. Mr. President, I ask unanimous consent that H.R. 7377, a bill to designate Lakeview Lake project in Mountain Creek, Tex., the "Joe Poole Lake," be held at the desk being further disposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROCLAMATION OF MARCH 13, 1983, AS "NATIONAL SURVEYORS WEEK"

Mr. BAKER. Mr. President, next is a request to discharge the Judiciary Committee from further consideration of Senate Joint Resolution 263 and ask for its immediate consideration if the minority leader is prepared to approve that.

Mr. ROBERT C. BYRD. No objection.

Mr. BAKER. Mr. President, I ask unanimous consent that the Judicary Committee be discharged from further consideration of Senate Joint Resolution 263 and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the joint resolution by title.

The assistent legislative clerk read as follows:

A joint resolution (S.J. Res. 263) to authorize the President to issue a proclamation designating the week beginning on March 13, 1983, as "National Surveyors Week".

The PRESIDING OFFICER. Without objection, the Senate will proceed to its consideration.

The joint resolution (S.J. Res. 263) was considered, ordered to a third reading, read the third time, and passed. The preamble was agreed to.

The resolution with its preamble, is as follows :

S.J. RES. 263

Whereas the Congress of the United States recognizes the valuable contributions of the surveying profession to history, development and quality of life in the United States of America;

Whereas the surveying profession requires special education, training, experience, and knowledge of the principles of mathematics, the related physical and applied sciences, and requirements of law for adequate evidence; and

Whereas since the early days of our Nation when many of our forefathers, including our first and third Presidents, were surveyors, the profession of surveying has continued to be uniquely qualified to determine and describe land and water boundaries for the management of our natural resources and the protection of private property rights: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is hereby authorized and requested to issue a proclamation designating the week beginning on March 13, 1983, as "National Surveyors Week" and to urge the people of the United States to observe such week with appropriate ceremonies and activities paying tribute to professional surveyors and their contribution to society.

Mr. BAKER. I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER FOR HOUSE JOINT RESOLUTION 460 TO BE HELD AT THE DESK

Mr. BAKER. Mr. President, another request to hold at the desk, House Joint Resolution 460, if that can be approved by the minority.

Mr. ROBERT C. BYRD. No objection.

Mr. BAKER. Mr. President, I ask unanimous consent that once the Senate receives House Joint Resolution 460, Women's History Week, from the House of Representatives, it be held at the desk pending further disposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR SENATE JOINT RESOLUTION 254 TO BE HELD AT THE DESK

Mr. BAKER. Mr. President, I have a similar request in respect to Senate Joint Resolution 254, American Businesswomen's Day.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

Mr. BAKER. Then I put that request.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMERICAN BUSINESSWOMEN'S DAY

Mr. BAKER. Mr. President, I ask unanimous consent that the Chair lay before the Senate, Senate Joint Resolution 254.

The PRESIDING OFFICER. The clerk will state the resolution by title.

The assistant legislative clerk read as follows:

A resolution (S.J. Res. 254) designating September 22, 1983, as "American Businesswomen's Day."

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

● Mr. BOSCHWITZ. Mr. President, today I rise as a cosponsor of Senate Joint Resolution 254, designating September 22, 1983, as "American Businesswomen's Day."

Mr. President, women have always made a substantial contribution to our economy, now constituting about half of our work force. I think some brief history is appropriate.

At the beginning of this century, approximately 1 out of every 5 women was in the labor force. By 1940, this ratio had increased to 1 in 4. But then, significant changes began to occur in the work force.

By the end of World War II, 35 percent of the working population of America was female. Many women, once in the work force, found that they enjoyed it and decided to stay. In many ways, the business world was unprepared for this change. During this period, there were a number of viable business organizations, but very few dedicated to preparing and promoting women for business. But, Mr. President, ingenuity and perserverance prevailed, and new groups began to spring up. One group, the American Business Women's Association (ABWA) stands out in my mind.

The ABWA began as the dream of some businessmen and businesswomen working in the Kansas City area. Through the efforts of a small group of people, the American Business Women's Association took shape and became a reality. From its original 50 charter members, the association has grown to the point where it now boasts a membership of over 100,000 in its 2,000 chapters located in all 50 States, the District of Columbia, and Puerto Rico.

Through its scholarship program, business seminars, and member workshops, the ABWA has exhibited an unrelenting commitment to the future of American business and women. We in Congress should mirror that commitment.

Mr. President, American businesswomen are a national resource that will continue to enhance the economic vitality of our Nation. This resolution is an appropriate means of recognizing their past and future contributions. I commend it to my colleagues and urge its adoption.●

The joint resolution (S.J. Res. 254) was ordered to be engrossed for a third reading, was read the third time, and passed.

The preamble was agreed to.

The joint resolution, with its preamble, reads as follows:

S.J. RES. 254

Whereas there are forty-three million working women integrally involved in determining the direction of both the private and public sectors of our Nation;

Whereas American businesswomen hold active, responsible, decisionmaking roles at all levels of business, and thus influence the direction of our Nation; and

Whereas the Congress recognizes the important contributions of American businesswomen to our Nation's continuing vitality: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That September 22, 1983, is designated "American Business Women's Day". The President is authorized and requested to issue a proclamation calling upon the people of the United States to observe that day with appropriate ceremonies and activities.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BUDGET ACT WAIVER—SENATE RESOLUTION 470

Mr. BAKER. Mr. President, I next have in my folder two items. One is a budget waiver to accompany the underlying measure, Calendar Order No. 919, which is the budget waiver to accompany Calendar Order No. 818, Senate Resolution 2279.

I inquire of the minority leader if he is prepared for us to consider that measure at this time, including the budget waiver.

Mr. ROBERT C. BYRD. There is no objection to considering both the budget waiver and the measure itself.

Mr. BAKER. I thank the minority leader.

Mr. President, I ask unanimous consent that the Chair lay before the Senate Calendar Order No. 919, Senate Resolution 470, a budget waiver to accompany S. 2279.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 470) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 2279.

There being no objection, the Senate proceeded to consider the resolution.

The resolution (S. Res. 470) was considered and agreed to as follows:

S. RES. 470

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 2279, a bill to designate Alben Barkley National Historic Site. S. 2279, as reported, authorizes the enactment of new budget authority which would first become available in fiscal year 1983.

The waiver of section 402(a) of such Act is necessary to permit congressional consideration of S. 2279. Such bill was not reported on or before May 15, 1982, as required by section 402(a) of the Congressional Budget Act of 1974 for such authorizations.

ALBEN BARKLEY NATIONAL HISTORIC SITE

Mr. BAKER. Mr. President, I ask unanimous consent that the Chair lay before the Senate a measure to which the budget waiver referred, and that is S. 2279, Calendar No. 818.

The PRESIDING OFFICER. Without objection, it is so ordered. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 2279) to designate the Alben Barkley National Historic Site.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to the consideration of the

bill which had been reported from the Committee on Energy and Natural Resources with an amendment, as follows:

On page 2, line 3, strike "Mayfield,", and insert "Paducah,".

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. (a) That in order to preserve for the benefit, education, and inspiration of present and future generations certain historically significant properties associated with the life of Alben Barkley, the Secretary of the Interior is authorized to acquire by donation, purchase with donated or appropriated funds, or exchange, the lands and buildings thereon known as "Angles," comprising approximately thirteen acres located near Paducah, Kentucky.

(b) It is the express intent of the Congress that the Secretary should substantially complete the acquisition program authorized by this Act within one year after the date of enactment of this Act.

(c) Upon the acquisition of the aforesaid property, the Secretary shall establish the same as the Alben Barkley National Historic Site by publication of a notice and boundary map in the Federal Register. The Secretary shall administer the site in accordance with the Act of August 25, 1916 (39 Stat. 535), as amended and supplemented, and the Act of August 21, 1935 (49 Stat. 666), as amended.

SEC. 2. Effective October 1, 1982, there are authorized to be appropriated from the Land and Water Conservation Fund not to exceed $700,000 for the acquisition of lands and interests therein.

The amendment was agreed to.

Mr. FORD. Mr. President, I rise to express my sincere interest in, and support for, having the Alben Barkley Home, known as Angles, designated as a National Historic Site.

The Angles, constructed in 1853, is the home of one of Kentucky's best known and best loved politicians, Alben W. Barkley (1877-1956). Alben Barkley served as U.S. Senator, Senate majority leader, and Vice President under Harry S Truman (1949-52). Later he was reelected to the Senate and died in office in 1956.

Barkley's political career began in 1905 when he was elected prosecuting attorney for McCracken County, an office he held until 1908 when he was elected McCracken County judge. Continuing his rise on the political ladder, Barkley was elected to the U.S. House of Representatives in 1913, where he remained until 1927, at which time he was elected to the U.S. Senate. While in the Upper House he served as majority leader from 1936 to 1947 and minority leader from 1947 to 1949. During his congressional career, he became closely identified with the policies of President Franklin D. Roosevelt and as majority leader, was responsible for their successful passage. Barkley had a long and glorious career as one of the most powerful men in politics and is one of Kentucky's best known national statesmen and orators.

He went to great lengths to preserve the original flavor of Angles while contributing several interesting features of his own.

The Angles, besides being architecturally beautiful, contains antiques and mementos which are of great value and interest to every historian.

Included in these items is a handcarved teakwood desk and chair used by Barkley while serving as Vice President. The other furniture is originally from the Philippines. Some of the other items of value include a library containing many books from Presidents Franklin Roosevelt and Truman, many portraits of Barkley and his wife, his top hat and suit worn during the Truman Inauguration, and a bust of F. D. R. presented to him by the President. There is also a 1930 brass tea set from Russia, and a collection of over 150 canes collected by Alben Barkley during his years in public office.

A wealth of history is contained in this house which has not changed since the Vice President died in 1956. Alben Barkley has made a tremendous contribution to this country, and I believe making his home a national historic site is a memorial fitting the accomplishments of this great statesman. I urge that this opportunity to preserve part of America's history not be overlooked and that this landmark be protected for the education and inspiration of present and future generations.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SETTLEMENT OF CERTAIN CLAIMS INVOLVING MEMBERS AND EMPLOYEES OF THE SENATE

Mr. BAKER. Mr. President, the next item on my list is Senate Resolution 492, Calendar Order No. 937, which I would propose to ask the Senate to consider if the minority leader is agreeable.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate Calendar Order No. 937, Senate Resolution 492.

The PRESIDING OFFICER. Without objection, it is so ordered. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 492) authorizing the Sergeant at Arms of the Senate, with the approval of the Committee on Rules and Administration, to settle certain claims involving Members, officers, and employees of the United States Senate.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 492) was agreed to as follows:

S. RES. 492

Resolved, That the Sergeant at Arms of the Senate, in accordance with regulations prescribed by the Attorney General and such regulations as the Committee on Rules and Administration may prescribe, may consider and ascertain and, with the approval of the Committee on Rules and Administration, determine, compromise, adjust, and settle, in accordance with the provisions of chapter 171 of title 28, United States Code, any claim for money damages against the United States for injury of loss of property or personal injury or death caused by the negligent or wrongful act or omission of any Member, officer, or employee of the Senate while acting within the scope of his office or employment, under circumstances where the United States, if a private person, would be liable to the claimant in accordance with the law of the place where the act or omission occurred. The Committee or Rules and Administration may, from time to time, delegate any or all of its authority under this resolution to the chairman. Any compromise, adjustment, or settlement of any such claim not exceeding $2,500 shall be paid from the contingent fund of the Senate on a voucher approved by the chairman of the Committee on Rules and Administration.

SEC. 2. The Committee on Rules and Administration is authorized to issue such regulations as it may determine necessary to carry out the provisions of this resolution.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PRINTING OF THE PRAYERS OF THE SENATE CHAPLAIN

Mr. BAKER. Mr. President, next is Senate Resolution 493. Has that been dealt with?

The PRESIDING OFFICER. No, it has not been dealt with.

Mr. BAKER. Then, Mr. President, if the minority leader has no objection, I should like to proceed to that at this time.

Mr. ROBERT C. BYRD. I have no objection, Mr. President.

Mr. BAKER. I thank the minority leader.

Mr. President, I ask that Senate Resolution 493 be laid before the Senate.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution will be stated by title.

The assistant legislative clerk read as follows:

89-059 O-86-13 (Pt. 22)

A resolution (S. Res. 493) authorizing the printing of the prayers by the Reverend Edward L. R. Elson, S.T.D., as Chaplain of the Senate during the 96th and 97th Congresses.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 493) was agreed to as follows:

S. RES. 493

Resolved, That there be printed with an appropriate illustration as a Senate document, the prayers by the Reverend Edward L. R. Elson, S.T.D., the Chaplain of the Senate, at the opening of the daily sessions of the Senate during the Ninety-sixth and Ninety-seventh Congresses, together with any other prayers offered by him during that period in his official capacity as Chaplain of the Senate; and that there be printed and bound four hundred additional copies of such document for the use of the Joint Committee on Printing.

SEC. 2. The copy for the document authorized in section 1 shall be prepared under the direction of the Joint Committee on Printing.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DEFINITION OF CAPITOL GROUNDS

Mr. BAKER. Mr. President, I should like to proceed to the consideration of H.R. 6417, if that can be cleared on the other side.

Mr. ROBERT C. BYRD. Mr. President, that matter has been cleared on this side.

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate H.R. 6417.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 6417) to amend Public Law 96-423 relating to the United States Capitol Grounds.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 6417) was ordered to a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

H.R. 7143 PLACED ON CALENDAR

Mr. BAKER. Mr. President, next on my list, I must say for the benefit of the minority leader and other Senators, is a request to discharge the Foreign Relations Committee from further consideration of H.R. 7143, and to place that measure on the calendar, if there is no objection.

Mr. ROBERT C. BYRD. Mr. President, there is no objection on this side.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be discharged from further consideration of H.R. 7143, a bill to extend for 1 year the agricultural and productive credit and self-help community development programs, and I ask that it be placed on the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

NATIONAL PARKINSON'S DISEASE WEEK

Mr. BAKER. Mr. President, I would like to discharge the Judiciary Committee now from further consideration of House Joint Resolution 531 so that that measure may be considered by the Senate at this time.

I inquire of the minority leader if he is prepared to do so.

Mr. ROBERT C. BYRD. That matter has been cleared on this side for action.

Mr. BAKER. I thank the minority leader.

Mr. President, I then ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of House Joint Resolution 531, a bill to designate the week of May 15, 1983, "National Parkinson's Disease Week," and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (H.J. Res. 531) to designate the week of May 15, 1983, "National Parkinson's Disease Week."

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

Mr. BAKER. If the Chair will withhold, I was slow on the uptake. I apologize.

UP AMENDMENT NO. 1929

(Purpose: To modify the week to be designated as "National Parkinson's Disease Week")

Mr. BAKER. Mr. President, I have an amendment that I send to the desk on behalf of the distinguished Senator from Maryland (Mr. MATHIAS), the chairman of the Rules Committee, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER), on behalf of Mr. MATHIAS, proposes an unprinted amendment numbered 1929.

Mr. BAKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out all after the resolving clause and insert in lieu thereof the following:

"That the week of May 15, 1983, is designated as "National Parkinson's Disease Week" and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe that week with appropriate activities and programs.".

Strike out the preamble and insert in lieu thereof the following:

"Whereas Parkinson's disease is one of the most devastating illnesses threatening the citizens of the United States;

"Whereas Parkinson's disease afflicts one out of every one hundred persons over the age of sixty;

"Whereas Parkinson's disease is one of the most severely crippling disorders of the nervous system;

"Whereas the American Parkinson Disease Association, the National Parkinson Foundation, the Parkinson's Disease Foundation, and the United Parkinson Foundation are major contributors to research on Parkinson's disease and to treatment and rehabilitation programs for the victims of such disease;

"Whereas the Parkinson Education Program/USA and the all-volunteer Parkinson Support Groups of America are devoted to helping Parkinson patients and their families cope with their ailment; and

"Whereas research on the causes of and the search for a cure for Parkinson's disease are continuing to be conducted and patient support groups continue to grow and bring new hope to those who bear the burden of this affliction; Now, therefore, be it

Amend the title so as to read: "Joint Resolution to designate the week of May 15, 1983, through May 21, 1983, as 'National Parkinson's Disease Week'.".

Mr. MATHIAS. Mr. President, I am pleased to speak in support of Senate passage of House Joint Resolution 531, a bill to designate the week of May 15, 1983 "National Parkinson's Disease Week."

Parkinson's disease strikes 1 percent of all Americans over 60 and affects 1 person in 1,000 in the general population. Although the disorder was first identified in 1817, scientists have yet to discover a cure for or even the cause of Parkinson's disease. Researchers are looking at viral infection, exposure to environmental toxins, and abnormal acceleration of the aging process as possible explanations. We do know that Parkinson's is connected with a serious deficiency of dopamine, a chemical substance necessary for the transmission of nerve impulses. This deficiency must be addressed to give the patient any relief from the debilitating symptoms of Parkinson's disease: uncontrollable tremors, muscular

rigidity and difficulty in initiating movement.

Fifteen years ago, the new drug levodopa brought hope to many Parkinson's sufferers. A metabolic precursor of dopamine, it promotes dopamine production. Initially hailing it as a wonder drug, users found that after 3 or 4 years of levadopa treatment, the drug started to work less effectively and, for some, produced unwanted side effects, such as hallucinations and the so-called "on-off syndrome"—the complete cessation or involuntary initiation of movement.

Although levodopa compounds are still considered the most effective treatment for Parkinson's, the problems surrounding the drug have stimulated research into possible supplementary or substitute treatments. Doctors and scientists, with the help of the National Institute of Neurological and Communicative Disorders and Stroke, are experimenting with bromocriptine and lisuride, two drugs that mimic the action of dopamine. Researchers at the National Institute of Mental Health, working on the grounds of St. Elizabeths Hospital, have transplanted healthy brain tissue into the dopamine-deficient brains of laboratory rats and monkeys. And, last July, surgeons in Sweden transplanted healthy dopamine-producing tissue from a patient's adrenal gland onto his brain, the first and only time such surgery has been performed on humans.

It is clear that much more remains to be done if doctors are to find a cure, or even relief, for victims of Parkinson's disease. I am confident that the biomedical community will continue to work toward these goals. House Joint Resolution 531 recognizes the contributions made in research, treatment, and rehabilitation by the American Parkinson Disease Association, the National Parkinson Foundation, the Parkinson's Disease Foundation, and the United Parkinson Foundation.

Equally important are the contributions made by the more than 100 Parkinson's self-help groups in this Nation. The recent growth of this movement has given hope and encouragement to Parkinson's victims and their families who must live with this illness every day. The Parkinson Education Program/USA, and the Parkinson's Support Groups of America, an all-volunteer, nonprofit, independent organization, have organized Parkinson's support groups nationwide.

The work being done both by the research and the support groups is making life better for Parkinson's sufferers everywhere. "National Parkinson's Disease Week" will be a time to recognize the contributions these organizations have made, and to encourage their continued commitment.

PARKINSON'S DISEASE

Mr. CRANSTON. Mr. President, I rise in support of House Joint Resolution 531, as reported by the Judiciary Committee to designate the week beginning on May 15, 1983, as "National Parkinson's Disease Week." I am pleased to add my support to this effort to increase the public's awareness and understanding of Parkinson's disease and help in the fight to overcome this devastating disease.

Mr. President, Parkinson's disease is a nervous system disorder that can be severely crippling. It is a progressively degenerative disease marked by impaired muscular control and gradual deterioration of the body. Fortunately, we have learned a great deal about this disease since it was first described in medical literature in 1817 by Dr. James Parkinson. Research into the causes of Parkinson's disease have helped unravel some of the brain's mysteries. We have found that several neurological and neuropsychiatric diseases result either from the loss of one of the neurotransmitters—chemical substances essential for the functioning of brain cells—or from an imbalance in the release of several neurotransmitters. Approximately half a dozen major neurotransmitters in the brain have now been identified, isolated, and described in great detail, enabling drugs to be developed that can mimic their functions.

This research, supported largely by the National Institute of Neurological and Communicative Disorders and Stroke, led to the discovery that Parkinson's disease results from the degeneration of a specific group of nerve cells in the brain which leads to a deficiency in the brain's supply of the neurotransmitter dopamine. The deficiency or blockage of this neurotransmitter produces the symptoms of Parkinson's disease. A major breakthrough in the treatment of Parkinson's disease soon followed with the development of the drug levodopa—L-dopa—to replace the brain's supply of dopamine in Parkinson's patients. L-dopa is the first effective drug for controlling the most debilitating symptoms of the disease—the tremors, spasms, and paralysis of the muscles.

But L-dopa is not a cure, and it provides only temporary relief. After several years of treatment, the patient develops a tolerance to the drug and it no longer works as effectively.

Other developments also show promise. Recently, the Food and Drug Administration approved the drug bromocryptine to be taken in conjunction with L-dopa as a way to extend its effective use. Recent experiments in Sweden have raised the possibility that some day brain tissue can be transplanted from one person to another to reestablish the functions that become lost as the disease progresses. But we must push forward to find better answers.

Over half a million Americans are afflicted with Parkinson's disease. Yet, it is primarily a disease associated with older people; 1 out of every 100 persons over the age of 60 suffers from Parkinson's disease. As is the case with so many disorders associated with the process of aging, we have yet to understand the cause of Parkinson's disease or fully understand its mechanisms. Greater research efforts, particularly in the area of basic research, which often leads to the most effective methods of prevention, are needed to gain that understanding. With our capabilities and leadership in science, no serious disease or disability—including Parkinson's disease—should be considered beyond our ability to find the answers to prevention and ultimate cure.

Mr. President, while research holds the greatest promise for Parkinson patients, we can also offer them more immediate help by educating ourselves about the disease. Increased public awareness of Parkinson's disease can help eliminate the stigma that too often is attached to people with the disease. Many are more than capable of continuing to work and of maintaining productive activity for the full span of their lives. But because the symptoms of Parkinson's disease are so visible, people afflicted with this disease are often discriminated against in job opportunity and advancement or insensitively regarded as drunk or deranged.

Mr. President, I have a deep personal interest in combating this affliction. My wife, Norma, has been diagnosed as having Parkinson's disease. It is a challenge for her, but her outlook is wonderful and she continues her activities the same as always. She serves on the board of the Parkinson's Disease Foundation which is headquartered in New York. This is one of four national organizations which, through endowments and donations, provide funding for research, support training programs, provide referral and information services, and, in some cases, provide treatment to people with Parkinson's disease. Affiliated with these organizations are over 100 local groups which provide counseling to Parkinson patients and their families and friends, helping them to cope with the emotional and physical stress of the disease. These organizations and groups provide a tremendously valuable service of public education and personal support.

By designating a week in May as "National Parkinson's Disease Week," and educating ourselves and others about this disease, perhaps we will have a better understanding of the need to find a cure for it and be more supportive of those who are afflicted by it.

The PRESIDING OFFICER. The joint resolution is open to amendment. If there be no amendment, the joint resolution will be read a third time.

The joint resolution (H.J. Res. 531) was ordered to a third reading, read the third time, and passed.

The preamble, as amended, was agreed to.

The title, as amended, was agreed to as follows:

Joint resolution to designate the week of May 15, 1983, through May 21, 1983, as "National Parkinson's Disease Week.".

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FIORELLO H. LA GUARDIA MEMORIAL DAY

Mr. BAKER. Mr. President, I propose to discharge the Judiciary Committee from further consideration of House Joint Resolution 595 and ask for its immediate consideration if the minority leader is agreeable.

Mr. ROBERT C. BYRD. Mr. President, that has been cleared on this side of the aisle.

Mr. BAKER. I thank the minority leader.

I ask unanimous consent, then, that the Committee on the Judiciary be discharged from further consideration of House Joint Resolution 595, designating December 11, 1982, as "Fiorello H. La Guardia Memorial Day," and ask for the immediate consideration of that measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

The joint resolution H.J. 595 will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution designating December 11, 1982, as "Fiorello H. La Guardia Memorial Day."

The joint resolution (H.J. Res. 595) was ordered to a third reading, read the third time, and passed.

The preamble was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ARCTIC RESEARCH AND POLICY ACT

Mr. BAKER. Mr. President, I have next in my folder S. 1562, which I wish to ask unanimous consent to consider at this time if the minority leader can clear that.

Mr. METZENBAUM. Mr. President, I rise not to object but to be certain that this measure will not have any amendment added to it on the floor of the Senate and should any amendments be added when it comes back from the House of Representatives that the author of the legislation, the distinguished Senator from Alaska, will not attempt to bring the bill as amended back to the floor of the Senate for concurrence unless the amendments as added by the House of Representatives are found not objectionable by any Member of this body.

It is my understanding that is agreeable to the Senator from Alaska.

Mr. MURKOWSKI. Mr. President, I am happy to respond to the Senator from Ohio and give him that assurance.

Mr. METZENBAUM. I thank the Senator from Alaska.

I have no objection.

Mr. MURKOWSKI. I thank the Senator from Ohio and I thank the majority leader.

Mr. BAKER. Mr. President, I understand the minority leader has given his consent to this measure.

Mr. ROBERT C. BYRD. Yes; we are prepared to move to the consideration of the measure.

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate S. 1562, Calendar Order No. 931.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1562) to provide comprehensive national policy dealing with national needs and objectives in the Arctic.

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Governmental Affairs with an amendment to strike out all after the enacting clause, and insert the following:

That this Act may be cited as the "Arctic Research and Policy Act of 1982".

FINDINGS AND PURPOSE

SEC. 2. (a) The Congress finds and declares that—

(1) the Arctic, onshore and offshore, contains vital energy resources that can reduce our dependence on foreign oil and improve the national balance of payments;

(2) as our only common border with the Soviet Union, the Arctic is critical to national defense;

(3) the renewable resources of the Arctic, specifically fish and other seafood, represent one of the Nation's greatest commercial assets;

(4) Arctic conditions directly affect global weather patterns and must be understood in order to promote better agricultural management throughout the United States;

(5) industrial pollution not originating in the Arctic region collects in the polar air mass, has the potential to disrupt global weather patterns, and must be controlled through international cooperation and consultation;

(6) the Arctic is the only natural laboratory for research into human adaptation physical and psychological to climates of extreme cold and isolation and may provide information crucial for future defense needs;

(7) atmospheric conditions peculiar to the Arctic provide a unique testing ground for research into high-latitude communications, which is likely to be crucial for future defense needs;

(8) Arctic marine technology is critical to cost-effective recovery and transportation of energy resources and to the national defense;

(9) most Arctic-rim countries, particularly the Soviet Union, possess Arctic technologies far more advanced than those currently available in the United States;

(10) Federal Arctic research is fragmented, uncoordinated and undercapitalized at the present time;

(11) such fragmentation has led to the neglect of certain areas of research and to unnecessary duplication of effort in other areas of research;

(12) there is an immediate need to formulate a comprehensive national policy to organize and fund currently neglected scientific research with respect to the Arctic;

(13) the Federal Government, in cooperation with State governments, should focus its efforts on the collection and characterization of basic data related to biological and geophysical phenomena in the Arctic, directing special attention to the broad accumulation of data related to sea-ice dynamics; and

(14) research into the long-range environmental and social effects of development in the Arctic is necessary to mitigate the adverse consequences of such development to the land and its residents.

(b) The purposes of this Act are—

(1) to establish an Arctic Science Policy Council and an Arctic Research Commission to promote Arctic research;

(2) to establish a centralized system for the collection and retrieval of scientific data with respect to the Arctic; and

(3) to establish priorities and provide financial support for basic and applied scientific research with respect to the Arctic that is currently being neglected and is essential to our Nation's needs.

ARCTIC SCIENCE POLICY COUNCIL

SEC. 3. (a) There is established a council to be known as the Arctic Science Policy Council (hereafter in this Act referred to as the "Council").

(b) The Council shall be composed of the following members:

(1) A chairperson appointed by the President, with the advice and consent of the Senate.

(2) Two individuals from the State of Alaska who have demonstrated a knowledge and interest in the field of Arctic Research, appointed by the President from a list of individuals submitted by the Governor of the State of Alaska. The President in his or her discretion may request additional names to be submitted.

(3) Two individuals who have demonstrated a knowledge and interest in the field of Arctic Research, appointed by the President from lists submitted by the Secretary of Commerce, the Secretary of Defense, the Secretary of the Interior, the Secretary of the Department of Energy, the Secretary of State, the Secretary of Transportation (on behalf of the Coast Guard) and the Director of the National Science Foundation. The President in his or her discretion may request additional names to be submitted.

(c) Each member shall have an equal vote on matters decided by the Council.

(d)(1) Except as provided in paragraph 2, the term of office for a member of the Council shall be two years.

(2)(A) Of the members of the Council originally appointed under paragraphs (2) and (3) of subsection (b), one member appointed under paragraph (2) of such subsection, and one member appointed under paragraph (3) of such subsection shall be appointed for a term of one year.

(B) A member may serve after the expiration of his term of office until the President appoints a successor.

(e)(1) A member of the Council not otherwise employed by the United States shall be compensated at a rate equal to the daily equivalent of the rate for level V of the Executive Schedule under section 5316 of title 5, United States Code, for each day such member is engaged in the actual performance of his duties as a member of the Council.

(2) A member of the Council who is an officer or employee of the United States or of the State of Alaska shall serve without additional compensation.

(3) All members of the Council shall be reimbursed for travel (in accordance with 5 U.S.C. 5701) and other necessary expenses incurred by them in the performance of their duties as members of the Council.

(4) No member may be compensated for more than ninety days of service each year in performance of his or her duties as a member of the Council.

DUTIES OF COUNCIL

SEC. 4. (a) The Council shall—

(1) facilitate cooperation between the Federal Government and State governments with respect to Arctic research;

(2) coordinate and promote cooperative Arctic scientific research programs with other nations (in consultation with the Secretary of State);

(3) develop and supervise an integrated national Arctic science policy (except with respect to the areas of authority specifically reserved to the Arctic Research Commission under section 7 of this Act);

(4) appoint the members of the Arctic Research Commission; and

(5) cooperate with the Governor of the State of Alaska and with such agencies and organizations of the State as the Governor may designate (including but not limited to the Alaska Council on Science and Technology) with respect to the formulation of Arctic science policy.

(b) Not later than January 31 of each year, the Council shall—

(1) publish a statement of goals and objectives with respect to Arctic research to guide the Arctic Research Commission in the performance of its duties; and

(2) submit to Congress a report describing the activities and accomplishments of the Council during the immediately preceding calendar year.

COOPERATION WITH THE COUNCIL

SEC. 5. (a)(1) The Council may acquire from the head of any Federal agency unclassified data, reports, and other nonproprietary information with respect to Arctic research which the Council considers useful in the discharge of its duties.

(2) Each such agency shall cooperate with the Council and furnish all data, reports, and other information requested by the Council to the extent permitted by law.

(b) The Council may utilize the facilities and services of any Federal agency (with the consent of the appropriate agency head, with or without reimbursement), taking every feasible step to avoid duplication of research and effort.

ARCTIC RESEARCH COMMISSION

SEC. 6. (a) There is established a commission to be known as the Arctic Research Commission (hereafter in this Act referred to as the "Commission").

(b)(1) The Commission shall be appointed by the Arctic Science Policy Council and shall be composed of the following members:

(A) Four members shall be appointed from among individuals with expertise in representative areas of research relating to the Arctic (including, but not limited to, the physical, biological, and social sciences), at least one of whom shall be employed by the University of Alaska.

(B) Two members shall be appointed from among residents of the Arctic who are representative of the needs and interests of Arctic residents and live in areas directly affected by Arctic resource development.

(C) Two members shall be appointed from among individuals familiar with the Arctic and representative of the needs and interests of private industry undertaking resource development in the Arctic.

(D) One member shall be appointed from among individuals familiar with the Arctic and employed by the United States Coast Guard.

(2) Upon the appointment of the members of the Commission pursuant to paragraph (1), the Council shall designate a member of the Commission to be chairperson of the Commission.

(c)(1) Except as provided in paragraph (2), the term of office for a member of the Commission shall be four years.

(2) Of the members of the Commission originally appointed under paragraph (1) of subsection (b)—

(i) two shall be appointed for a term of one year;

(ii) two shall be appointed for a term of two years;

(iii) two shall be appointed for a term of three years; and

(iv) three shall be appointed for a term of four years.

(3) A member may serve after the expiration of his term of office until the Council appoints a successor.

(d)(1) A member of the Commission not otherwise employed by the United States shall be compensated at a rate equal to the daily equivalent of the rate for GS-16 of the General Schedule under section 5332 of title 5, United States Code, for each day such member is engaged in the actual performance of his duties as a member of the Commission.

(2) A member of the Commission who is an officer or employee of the United States or the State of Alaska shall serve without additional compensation.

(3) All members of the Commission shall be reimbursed for travel (in accordance with section 5701 of title 5, United States Code) and other necessary expenses incurred by them in the performance of their duties as members of the Commission.

(4) No member may be compensated for more than one hundred and eighty days of service each year in performance of his or her duties as a member of the Commission.

DUTIES OF COMMISSION

SEC. 7.(a) The Commission shall—

(1) survey Arctic research conducted by Federal and State agencies, the University of Alaska and other universities, and other private and public institutions to determine priorities for future Arctic research, and make recommendations thereon to the Council and other interested parties;

(2) establish a data collection and retrieval center for Arctic research (which shall be located in the State of Alaska) and promulgate guidelines for the use and dissemination of Arctic research information;

(3) make grants for such Arctic research as the Commission deems necessary and desirable to further the goals and objectives published annually by the Council pursuant to section 4(b)(1), with special consideration being given to studies in neglected areas of Arctic research; and

(4) consult the Council with respect to—

(A) all proposed, ongoing, and completed research programs and studies funded by the Commission,

(B) recommendations proposed by the Commission with respect to future Arctic research, and

(C) guidelines for awarding and administering Arctic research grants.

(b)(1)(A) Not later than December 31 of each year, the Commission shall transmit to the Council a report describing the activities and accomplishments of the Commission during the immediately preceding calendar year and making recommendations with respect to future Arctic research policy.

(B) Such report shall be available for public inspection at reasonable times.

(2) Not later than March 31, 1983, the Commission shall submit to Congress and to the Legislature of the State of Alaska a report making recommendations with respect to the continued operation of Government-operated laboratory facilities conducting Arctic research, taking into account the efficiency and effectiveness of such facilities and the degree to which the operation of such facilities would result in the duplication of research and effort.

(c) The Commission shall cooperate with the Governor of the State of Alaska, and with such agencies as the Governor may designate (including but not limited to the Alaska Council on Science and Technology) with respect to—

(1) the recommendations proposed by the Commission pursuant to section 7(a)(4)(B);

(2) the planning, funding, and logistical support of Arctic research; and

(3) the storage, transfer, and dissemination of Arctic scientific and technological knowledge and data.

ADMINISTRATION OF THE COMMISSION

SEC. 8. The Commission may—

(1) in accordance with civil service laws and subchapter III of chapter 53 of title 5, United States Code appoint and fix the compensation of an Executive Director and such additional staff personnel as may be necessary;

(2) procure temporary and intermittent services as authorized by section 3109 of title 5, United States Code;

(3) enter into contracts and procure supplies, services, and property; and

(4) enter into agreements wth the General Services Administration for procurement of necessary financial and administrative services, for which payment shall be made by reimbursement from funds of the Commission in such amounts as may be agreed upon by the Commission and the Administrator of the General Services Administration.

STATE ELECTION

SEC. 9. (a) The State of Alaska may elect to participate or not to participate in the activities of the Council and the Commission.

(b) Failure of the State of Alaska to contribute to the Arctic Research Fund (established by section 10 of this Act) for a fiscal year an amount equal to one-quarter of the

amount appropriated to such Fund by the United States for the previous fiscal year shall constitute an election by such State not to participate in the Council and the Commission.

(c) Upon an election by the State of Alaska not to participate in the Council and the Commission pursuant to subsection (b)—

(1) appointments to such Council or Commission which are required to be made from among individuals—

(i) employed by the State of Alaska, or

(ii) nominated by the Governor of the State of Alaska

shall be vacated; and

(2) an appointment to fill a vacancy created by such election shall be made in such manner and from among such individuals as other appointments to such Council or Commission are required to be made (as determined by the chairperson of the Council or Commission).

(d) An election by the State of Alaska not to participate in the Council and the Commission pursuant to subsection (b) shall not affect the powers or duties of those bodies.

(e) Should the State of Alaska wish to reinstate its participation following an election not to participate, it may do so by meeting the funding requirement for the year in which reinstatement is sought.

ARCTIC RESEARCH FUND

SEC. 10. (a) There is hereby created a trust fund to be known as the Arctic Research Fund (hereafter in this Act referred to as the "Fund"), to be available for the support of the activities of the Arctic Science Policy Council and the Arctic Research Commission.

(b) Such Fund shall consist of—

(1) amounts appropriated to such Fund;

(2) amounts contributed to such Fund by the State of Alaska;

(3) amounts contributed by private individuals and organizations.

(c) Amounts in the Fund shall be available, until expended, for the purposes of this Act, to the extent and in such amounts as are provided for in advance in appropriation Acts.

(d)(1) There is authorized to be appropriated for the Arctic Research Fund for the fiscal year beginning October 1, 1983, and for each succeeding year thereafter, $25,000,000.

(2) In determining the amount contributed to such Fund by the State of Alaska for a fiscal year—

(A) the fair market value (as determined by the Council in good faith) of all facilities, services, materials, and other support contributed to the Fund by the State of Alaska during such fiscal year, and

(B) all amounts contributed by private individuals and organizations,

shall be taken into account,

DEFINITION

SEC. 11. The term "Arctic" shall mean all United States and foreign territory north of the Arctic Circle and all United States territory north and west of the boundary formed by the Porcupine, Yukon, and Kuskokwim Rivers; all contiguous seas, including the Arctic Ocean and the Beaufort, Bering, and Chukchi Seas; and the Aleutian chain.

NONAPPLICABILITY OF NEPA

SEC. 12. The National Environmental Policy Act of 1969 shall not be construed to require the submission of environmental impact statements for any activities conducted pursuant to this Act.

Mr. BAKER. Mr. President, I have an amendment in my hand which I will deliver to the distinguished Senator from Alaska (Mr. MURKOWSKI) so that he may offer it at this time if he wishes.

AMENDMENT NO. 3638

(Purpose: To amend the committee amendment to S. 1562, the Arctic Research and Policy Act)

Mr. MURKOWSKI. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. MURKOWSKI) proposes a printed amendment numbered 3638.

Mr. BAKER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Under section 2(a), on page 13, line 15, strike the word "and" after the semicolon. On page 13, line 19, strike the period and insert a semicolon. On page 13, after line 19, insert the following:

"(15) Arctic research has singificant value for expanding knowledge of the Arctic which can enhance the lives of Arctic residents, increase opportunites for international cooperation among Arctic-rim countries and foster a national policy for the Arctic; and

"(16) The Alaskan Arctic provides essential habitat for marine mammals, migratory waterfowl, and other forms of wildlife which are important to the Nation and which are essential to Arctic residents.".

On page 26, strike section 12.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that amendment No. 3638, an amendment to the committee amendment to S. 1562, be approved.

Mr. METZENBAUM. Mr. President, will the Senator from Alaska yield for a question?

Mr. MURKOWSKI. I am happy to yield.

Mr. METZENBAUM. Will the Senator from Alaska be good enough to advise what that amendment entails very briefly?

Mr. MURKOWSKI. Yes, I shall be happy to.

In response to the Senator from Ohio, it is basically an amendment concerning—it is called the native amendment and it strikes section 12 of NEPA from the bill because the Arctic research policy will not be involved in any conflicts with NEPA, will not be doing any of those things. It also adds language citing the importance of the wildlife habitat to the native Alaska residents.

Mr. METZENBAUM. I thank the Senator from Alaska.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alaska.

The amendment (No. 3638) was agreed to.

Mr. BAKER. Mr. President, is there a committee substitute amendment at the desk?

The PRESIDING OFFICER. The Chair understands there is a committee substitute amendment pending.

Mr. BAKER. All right. Are there any further amendments?

Mr. MURKOWSKI. Mr. President, there are no further amendments.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment, as amended, was agreed to.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (S. 1562) was passed, as follows:

S. 1562

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Arctic Research and Policy Act of 1982".

FINDINGS AND PURPOSE

SEC. 2. (a) The Congress finds and declares that—

(1) the Arctic, onshore and offshore, contains vital energy resources that can reduce our dependence on foreign oil and improve the national balance of payments;

(2) as our only common border with the Soviet Union, the Arctic is critical to national defense;

(3) the renewable resources of the Arctic, specifically fish and other seafood, represent one of the Nation's greatest commercial assets;

(4) Arctic conditions directly affect global weather patterns and must be understood in order to promote better agricultural management throughout the United States;

(5) industrial pollution not originating in the Arctic region collects in the polar air mass, has the potential to disrupt global weather patterns, and must be controlled through international cooperation and consultation;

(6) the Arctic is the only natural laboratory for research into human adaptation, physical and psychological, to climates of extreme cold and isolation and may provide information crucial for future defense needs;

(7) atmospheric conditions peculiar to the Arctic provide a unique testing ground for research into high-latitude communications, which is likely to be crucial for future defense needs;

(8) Arctic marine technology is critical to cost-effective recovery and transportation of energy resources and to the national defense;

(9) most Arctic-rim countries, particularly the Soviet Union, possess Arctic technologies far more advanced than those currently available in the United States;

(10) Federal Arctic research is fragmented, uncoordinated and undercapitalized at the present time;

(11) such fragmentation has led to the neglect of certain areas of research and to unnecessary duplication of effort in other areas of research;

(12) there is an immediate need to formulate a comprehensive national policy to organize and fund currently neglected scientific research with respect to the Arctic;

(13) the Federal Government, in cooperation with State governments, should focus its efforts on the collection and characterization of basic data related to biological and geophysical phenomena in the Arctic, directing special attention to the broad accumulation of data related to sea-ice dynamics; and

(14) research into the long-range environmental and social effects of development in the Arctic is necessary to mitigate the adverse consequences of such development to the land and its residents;

(15) Arctic research has significant value for expanding knowledge of the Arctic which can enhance the lives of Arctic residents, increase opportunities for international cooperation among Arctic-rim countries and foster a national policy for the Arctic; and

(16) the Alaskan Arctic provides essential habitat for marine mammals, migratory waterfowl, and other forms of wildlife which are important to the Nation and which are essential to Arctic residents.

(b) The purposes of this Act are—

(1) to establish an Arctic Science Policy Council and an Arctic Research Commission to promote Arctic research;

(2) to establish a centralized system for the collection and retrieval of scientific data with respect to the Arctic; and

(3) to establish priorities and provide financial support for basic and applied scientific research with respect to the Arctic that is currently being neglected and is essential to our Nation's needs.

ARCTIC SCIENCE POLICY COUNCIL

SEC. 3. (a) There is established a council to be known as the Arctic Science Policy Council (hereafter in this Act referred to as the "Council").

(b) The Council shall be composed of the following members:

(1) A chairperson appointed by the President, with the advice and consent of the Senate.

(2) Two individuals from the State of Alaska who have demonstrated a knowledge and interest in the field of Arctic Research, appointed by the President from a list of individuals submitted by the Governor of the State of Alaska. The President in his or her discretion may request additional names to be submitted.

(3) Two individuals who have demonstrated a knowledge and interest in the field of Arctic Research, appointed by the President from lists submitted by the Secretary of Commerce, the Secretary of Defense, the Secretary of the Interior, the Secretary of the Department of Energy, the Secretary of State, the Secretary of Transportation (on behalf of the Coast Guard) and the Director of the National Science Foundation. The President in his or her discretion may request additional names to be submitted.

(c) Each member shall have an equal vote on matters decided by the Council.

(d)(1) Except as provided in paragraph 2, the term of office for a member of the Council shall be two years.

(2)(A) Of the members of the Council originally appointed under paragraphs (2) and (3) of subsection (b), one member appointed under paragraph (2) of such subsection, and one member appointed under paragraph (3) of such subsection shall be appointed for a term of one year.

(B) A member may serve after the expiration of his term of office until the President appoints a successor.

(e)(1) A member of the Council not otherwise employed by the United States shall be compensated at a rate equal to the daily equivalent of the rate for level V of the Executive Schedule under section 5316 of title 5, United States Code, for each day such member is engaged in the actual performance of his duties as a member of the Council.

(2) A member of the Council who is an officer or employee of the United States or of the State of Alaska shall serve without additional compensation.

(3) All members of the Council shall be reimbursed for travel (in accordance with 5 U.S.C. 5701) and other necessary expenses incurred by them in the performance of their duties as members of the Council.

(4) No member may be compensated for more than ninety days of service each year in performance of his or her duties as a member of the Council.

DUTIES OF COUNCIL

SEC. 4. (a) The Council shall—

(1) facilitate cooperation between the Federal Government and State governments with respect to Arctic research;

(2) coordinate and promote cooperative Arctic scientific research programs with other nations (in consultation with the Secretary of State);

(3) develop and supervise an integrated national Arctic science policy (except with respect to the areas of authority specifically reserved to the Arctic Research Commission under section 7 of this Act);

(4) appoint the members of the Arctic Research Commission; and

(5) cooperate with the Governor of the State of Alaska and with such agencies and organizations of the State as the Governor may designate (including but not limited to the Alaska Council on Science and Technology) with respect to the formulation of Arctic science policy.

(b) Not later than January 31 of each year, the Council shall—

(1) publish a statement of goals and objectives with respect to Arctic research to guide the Arctic Research Commission in the performance of its duties; and

(2) submit to Congress a report describing the activities and accomplishments of the Council during the immediately preceding calendar year.

COOPERATION WITH THE COUNCIL

SEC. 5. (a)(1) The Council may acquire from the head of any Federal agency unclassified data, reports, and other nonproprietary information with respect to Arctic research which the Council considers useful in the discharge of its duties.

(2) Each such agency shall cooperate with the Council and furnish all data, reports, and other information requested by the Council to the extent permitted by law.

(b) The Council may utilize the facilities and services of any Federal agency (with the consent of the appropriate agency head, with or without reimbursement), taking every feasible step to avoid duplication of research and effort.

ARCTIC RESEARCH COMMISSION

SEC. 6. (a) There is established a commission to be known as the Arctic Research Commission (hereafter in this Act referred to as the "Commission").

(b)(1) The Commission shall be appointed by the Arctic Science Policy Council and shall be composed of the following members:

(A) Four members shall be appointed from among individuals with expertise in representative areas of research relating to the Arctic (including, but not limited to, the physical, biological, and social sciences), at least one of whom shall be employed by the University of Alaska.

(B) Two members shall be appointed from among residents of the Arctic who are representative of the needs and interests of Arctic residents and live in areas directly affected by Arctic resource development.

(C) Two members shall be appointed from among individuals familiar with the Arctic and representative of the needs and interests of private industry undertaking resource development in the Arctic.

(D) One member shall be appointed from among individuals familiar with the Arctic and employed by the United States Coast Guard.

(2) Upon the appointment of the members of the Commission pursuant to paragraph (1), the Council shall designate a member of the Commission to be chairperson of the Commission.

(c)(1) Except as provided in paragraph (2), the term of office for a member of the Commission shall be four years.

(2) Of the members of the Commission originally appointed under paragraph (1) of subsection (b)—

(i) two shall be appointed for a term of one year;

(ii) two shall be appointed for a term of two years;

(iii) two shall be appointed for a term of three years; and

(iv) three shall be appointed for a term of four years.

(3) A member may serve after the expiration of his term of office until the Council appoints a successor.

(d)(1) A member of the Commission not otherwise employed by the United States shall be compensated at a rate equal to the daily equivalent of the rate for GS-16 of the General Schedule under section 5332 of title 5, United States Code, for each day such member is engaged in the actual performance of his duties as a member of the Commission.

(2) A member of the Commission who is an officer or employee of the United States or the State of Alaska shall serve without additional compensation.

(3) All members of the Commission shall be reimbursed for travel (in accordance with section 5701 of title 5, United States Code) and other necessary expenses incurred by them in the performance of their duties as members of the Commission.

(4) No member may be compensated for more than one hundred and eighty days of service each year in performance of his or her duties as a member of the Commission.

DUTIES OF COMMISSION

SEC. 7. (a) The Commission shall—

(1) survey Arctic research conducted by Federal and State agencies, the University of Alaska and other universities, and other private and public institutions to determine priorities for future Arctic research, and make recommendations thereon to the Council and other interested parties;

(2) establish a data collection and retrieval center for Arctic research (which shall be

located in the State of Alaska) and promulgate guidelines for the use and dissemination of Arctic research information;

(3) make grants for such Arctic research as the Commission deems necessary and desirable to further the goals and objectives published annually by the Council pursuant to section 4(b)(1), with special consideration being given to studies in neglected areas of Arctic research; and

(4) consult the Council with respect to—

(A) all proposed, ongoing, and completed research programs and studies funded by the Commission,

(B) recommendations proposed by the Commission with respect to future Arctic research, and

(C) guidelines for awarding and administering Arctic research grants.

(b)(1)(A) Not later than December 31 of each year, the Commission shall transmit to the Council a report describing the activities and accomplishments of the Commission during the immediately preceding calendar year and making recommendations with respect to future Arctic research policy.

(B) Such report shall be available for public inspection at reasonable times.

(2) Not later than March 31, 1983, the Commission shall submit to Congress and to the Legislature of the State of Alaska a report making recommendations with respect to the continued operation of Government-operated laboratory facilities conducting Arctic research, taking into account the efficiency and effectiveness of such facilities and the degree to which the operation of such facilities would result in the duplication of research and effort.

(c) The Commission shall cooperate with the Governor of the State of Alaska, and with such agencies as the Governor may designate (including but not limited to the Alaska Council on Science and Technology) with respect to—

(1) the recommendations proposed by the Commission pursuant to section 7(a)(4)(B);

(2) the planning, funding, and logistical support of Arctic research; and

(3) the storage, transfer, and dissemination of Arctic scientific and technological knowledge and data.

ADMINISTRATION OF THE COMMISSION

SEC. 8. The Commission may—

(1) in accordance with civil service laws and subchapter III of chapter 53 of title 5, United States Code appoint and fix the compensation of an Executive Director and such additional staff personnel as may be necessary;

(2) procure temporary and intermittent services as authorized by section 3109 of title 5, United States Code;

(3) enter into contracts and procure supplies, services, and property; and

(4) enter into agreements with the General Services Administration for procurement of necessary financial and administrative services, for which payment shall be made by reimbursement from funds of the Commission in such amounts as may be agreed upon by the Commission and the Administrator of the General Services Administration.

STATE ELECTION

SEC. 9. (a) The State of Alaska may elect to participate or not to participate in the activities of the Council and the Commission.

(b) Failure of the State of Alaska to contribute to the Arctic Research Fund (established by section 10 of this Act) for a fiscal year an amount equal to one-quarter of the amount appropriated to such Fund by the United States for the previous fiscal year shall constitute an election by such State not to participate in the Council and the Commission.

(c) Upon an election by the State of Alaska not to participate in the Council and the Commission pursuant to subsection (b)—

(1) appointments to such Council or Commission which are required to be made from among individuals—

(i) employed by the State of Alaska, or

(ii) nominated by the Governor of the State of Alaska

shall be vacated; and

(2) an appointment to fill a vacancy created by such election shall be made in such manner and from among such individuals as other appointments to such Council or Commission are required to be made (as determined by the chairperson of the Council or Commission).

(d) An election by the State of Alaska not to participate in the Council and the Commission pursuant to subsection (b) shall not affect the powers or duties of those bodies.

(e) Should the State of Alaska wish to reinstate its participation following an election not to participate, it may do so by meeting the funding requirement for the year in which reinstatement is sought.

ARCTIC RESEARCH FUND

SEC. 10. (a) There is hereby created a trust fund to be known as the Arctic Research Fund (hereafter in this Act referred to as the "Fund"), to be available for the support of the activities of the Arctic Science Policy Council and the Arctic Research Commission.

(b) Such Fund shall consist of—

(1) amounts appropriated to such Fund;

(2) amounts contributed to such Fund by the State of Alaska;

(3) amounts contributed by private individuals and organizations.

(c) Amounts in the Fund shall be available, until expended, for the purposes of this Act, to the extent and in such amounts as are provided for in advance in appropriation Acts.

(d)(1) There is authorized to be appropriated for the Arctic Research Fund for the fiscal year beginning October 1, 1983, and for each succeeding year thereafter, $25,000,000.

(2) In determining the amount contributed to such Fund by the State of Alaska for a fiscal year—

(A) the fair market value (as determined by the Council in good faith) of all facilities, services, materials, and other support contributed to the Fund by the State of Alaska during such fiscal year, and

(B) all amounts contributed by private individuals and organizations,

shall be taken into account.

DEFINITION

SEC. 11. The term "Arctic" shall mean all United States and foreign territory north of the Arctic Circle and all United States territory north and west of the boundary formed by the Porcupine, Yukon, and Kuskokwim Rivers; all contiguous seas, including the Arctic Ocean and the Beaufort, Bering, and Chukchi Seas; and the Aleutian chain.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MURKOWSKI. Mr. President, I thank the majority leader and I thank the Senator from Ohio.

Mr. BAKER. I thank the Senator from Alaska and the Senator from Ohio for their cooperation.

JUDICIAL DISTRICT MODIFICATION

Mr. BAKER. Mr. President, next on my list is a proposal to discharge the Judiciary Committee from further consideration of S. 3081 and to proceed to its immediate consideration, if the minority leader is agreeable.

Mr. ROBERT C. BYRD. Yes.

Mr. President, on yesterday the Senate—in acting on H.R. 4481, which was discharged from further consideration of the Judiciary—adopted an amendment which was offered by me and Mr. RANDOLPH modifying the judicial districts of West Virginia.

That action was approved, as I stated.

The bill to which the distinguished majority leader has just referred was introduced by me on behalf of myself and Mr. RANDOLPH on December 7, and referred to the Committee on the Judiciary.

The bill does precisely what the amendment on yesterday did, namely, it transferred certain counties to the southern district and certain counties of West Virginia were shifted to the northern district.

The "swing" judges designation will be eliminated and the change would not cost the Federal Government any additonal money.

The southern district would be reduced from 4½ to 4 judges and the northern district increased from 1½ to 2 judges.

The bill that I introduced, as well as the amendment which I introduced yesterday, both of which were on behalf of myself and my senior colleague, Mr. RANDOLPH, is supported by the Federal district court judges in the State, supported by the circuit counsel for the fourth Judicial Circuit, and was initiated by Chief Judge Charles A. Moye, Jr., chairman of the Subcommittee on Judicial Statistics of the Committee on Court Administration of the Judicial Conference.

The bill will alleviate the difficult situation that exists in my State.

We are calling up the bill at this time so that we will have a double shot at this matter. It is important to the State of West Virginia. As I say it does not affect any other State.

But the amendment of yesterday and the bill that we are now about to call up would accomplish the same purposes, and we just elected to go two different routes to achieve the same objective.

So there is no objection on this side, and I appreciate the majority leader's

courtesy and kindness in calling up this bill at this time.

Mr. BAKER. Mr. President, I thank the minority leader, and I can assure him I share with him his objectives and I am pleased then to ask unanimous consent that the Judiciary Committee be discharged from further consideration of S. 3081, the West Virginia Federal Judiciary Improvement Act, and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 3081) to modify the judicial districts of West Virginia, and for other purposes.

There being no objection, the Senate proceeded to consider the bill.

Mr. ROBERT C. BYRD. Mr. President, I call attention to the fact that my senior colleague is here in the Chamber with me, and he, of course, can very ably speak for himself, but we join in urging the Senate to adopt this measure.

Mr. RANDOLPH. Mr. President, I fully concur in what the able Senator, the minority leader of the Senate, Mr. ROBERT C. BYRD, has said in reference to the action taken yesterday and now almost a reaffirmation in another degree with the bill pending for the shifting of counties, the better administration of justice in the State of West Virginia. I am also very appreciative to the majority leader, Mr. Baker, for cooperating promptly with the minority leader, Mr. BYRD, and myself, and I wish to restate that this legislation costing no funds of the Federal Government will bring to the State of West Virginia in the northern and southern districts better process of litigation and service to the public in matters that come before the courts.

I thank Senator BAKER and, of course, Senator ROBERT C. BYRD.

Mr. BAKER. Mr. President, I thank the distinguished senior Senator from West Virginia.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 3081

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 129 of title 28, United States Code, is amended—

(1) in subsection (a) by—

(A) striking out ", Wirt, and Wood";

(B) inserting "Braxton," after "Berkeley,";

(C) inserting "Pocahontas" after "Pleasants,"; and

(D) inserting "Webster, and" after "Upshur"; and

(2) in subsection (b) by—

(A) striking out "Braxton,", "Pocahontas," and "Webster,"; and

(B) inserting "Wirt, Wood," after "Wayne,".

SEC. 2. (a) The existing district judgeship for the Southern District of West Virginia, authorized by section 2 of the Act entitled "An Act to provide for the appointment of additional district and circuit judges and for other purposes", approved October 29, 1978, (92 Stat. 1632; 28 U.S.C. 133 note) shall, as of the date of enactment of this Act, be authorized under section 133 of title 28 of the United States Code as a district judgeship for the Northern District of West Virginia, and the incumbent of that office shall henceforth hold office under section 133, as amended by this Act.

(b) The existing district judgeship for the Northern and Southern Districts of West Virginia shall be authorized as the district judgeship for the Southern District.

SEC. 3. The table in section 133 of title 28, United States Code, is amended by striking out the following:

"West Virginia:
"Northern 1
"Southern 3
"Northern and Southern ..... 1",

and inserting in lieu thereof the following:

"West Virginia:
"Northern 2
"Southern ..... 4".

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. RANDOLPH. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, on my calendar is another item that is cleared for consideration at this time. I refer to H.R. 2329, Calendar Order 980, and I will inquire of the minority leader whether he is prepared to proceed to that.

Mr. ROBERT C. BYRD. Mr. President, this side is prepared to proceed.

Mr. BAKER. I thank the Senator.

GRANTING CERTAIN COURTS JURISDICTION IN INDIAN CLAIMS CASES

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate H.R. 2329, a bill conferring jurisdiction on certain courts of the United States.

The PRESIDING OFFICER. The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (H.R. 2329) conferring jurisdiction on certain courts of the United States to hear and render judgment in connection with certain claims of the Cherokee Nation of Oklahoma.

The Senate proceeded to consider the bill.

Mr. BAKER. Mr. President, do I understand the Senator from Oklahoma wishes to be heard on this subject?

Mr. NICKLES. Mr. President, I wish to thank the majority leader and also Senator THURMOND for the expeditious way in moving this bill, which we think is important and has been long introduced. So we thank the Senator for his assistance.

Mr. President, I am very pleased that this bill is before the Senate for consideration today. This legislation should bring about a solution to a longstanding impasse by allowing the Cherokee, Choctaw, and Chickasaw Nations to bring claims against the U.S. Government in two specific cases.

In 1969, the U.S. Supreme Court held that these three tribes owned certain portions of the Arkansas Riverbed. Beginning in 1973, Congress appropriated funds for 3 years to determine the value of the mineral reserves in the Arkansas River. After many years of attempts to reach a decision concerning certain claims, it became obvious that legislation to waive the statute of limitations was the only way to reach a settlement. My fellow Oklahoman, Mr. BOREN, and I introduced legislation to accomplish these objectives last year.

Mr. President, the reason this legislation has reached the floor of the Senate during the 97th Congress is the diligent effort on the part of the Judiciary Committee, both members and staff. I particularly want to express my appreciation to the chairman, Mr. THURMOND, and the subcommittee chairman, Mr. GRASSLEY.

Mr. BOREN. Mr. President, I am very pleased with the action by the Senate today in approving H.R. 2329. I especially want to recognize the contribution of Mr. Ross Swimmer, chief of the Cherokee Nation of Oklahoma, in bringing about passage of this important legislation. Through his dedicated efforts, the Cherokee Nation will now have the opportunity to adjudicate a longstanding claim in a court of law.

I also want to express my appreciation to the distinguished chairman of the Judiciary Committee, Senator THURMOND, for his cooperation and assistance in expediting committee consideration on this legislation. He has been extremely helpful in bringing about prompt Senate action on the bill.

Mr. President, I am pleased to have played a part in providing the Cherokee Nation the opportunity to gain access to the courts in order to have these claims adjudicated.

The PRESIDING OFFICER. The question is on the third reading of the bill.

The bill (H.R. 2329) was ordered to be read a third time, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. NICKLES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THE EXECUTIVE CALENDAR

Mr. BAKER. Mr. President, the only remaining items have in my folder, I will say to the minority leader, are certain nominations, and I would especially invite his attention to those nominees appearing on page 3 beginning with the Judiciary and continuing through page 4, with the exception of one nominee, which is Calendar Order No. 1071 on page 4, all of the nominations on page 5, page 6, page 7, page 8, page 9, page 10 which are nominations placed on the Secretary's desk in the Coast Guard.

Could I inquire of the minority leader if he is prepared to proceed to the consideration of all or any of those nominations?

Mr. ROBERT C. BYRD. This side of the aisle is prepared to proceed to the nominations beginning on page 3, continuing through page 4 and the Department of Justice on page 4; Department of Justice on page 5; Copyright Royalty Tribunal, Department of Education, Public Health Service, and Department of State on page 6 and Department of State on page 7, excepting Calendar Order No. 1089; the minority is prepared to proceed with the Inter-American Foundation on page 7; International Banks, U.S. Advisory Commission on Public Diplomacy, U.S. International Development Cooperation Agency, U.S. Information Agency; page 9 Department of the Treasury, excepting Calendar Order 1096 on page 9; and prepared to proceed with the balance of page 9, and page 10, nominations placed on the Secretary's desk in the Coast Guard.

EXECUTIVE SESSION

Mr. BAKER. Very well, Mr. President. I am grateful to the minority leader. Let me put this request: Mr. President, I ask unanimous consent that the Senate now go into executive session for the purpose of considering the following nominations: All of the nominations under the judiciary on page 3 of today's calendar being orders No. 1060, 1061, 1062, 1063; continuing under the judiciary on page 4 Nos. 1064, 1065, 1066, 1067; those under Department of Justice, being 1068, 1069, 1070; those under Department of Justice on page 5, being 1072 through 1079; those on page 6 under Copyright Royalty Tribunal 1080; Department of Education being 1081 and 1082; Public Health Service 1083; Department of State 1084; all of the nominations on page 7, with the exception of Calendar Order 1089; all of the nominations on page 8, being orders 1091 through 1094; the nominations on page 9, with the exception of order 1096; and all of the nominations placed on the Secretary's desk in the Coast Guard.

Before the Chair rules, may I inquire of the minority leader if that accords with the comparison of my list with his list?

Mr. ROBERT C. BYRD. The majority leader's statement is in conformity with the list I have.

Mr. BAKER. I thank the minority leader. The request is put that we go into executive session for the purpose of considering those nominations.

The PRESIDING OFFICER (Mr. HAYAKAWA). Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the nominations just identified be considered en bloc.

The PRESIDING OFFICER. Is there objection? The Chair hears none and, without objection, the nominations are considered and confirmed en bloc.

The nominations considered and confirmed en bloc are as follows:

THE JUDICIARY

Paul E. Plunkett, of Illinois, to the U.S. district judge for the northern district of Illinois vice James B. Parsons, retired.

John W. Bissell, of New Jersey, to be U.S. district judge for the district of New Jersey vice Vincent P. Biunno, retired.

Frank X. Altimari, of New York, to be U.S. district judge for the eastern district of New York vice Edward R. Neaher, retired.

Frank W. Bullock, Jr., of North Carolina, to be U.S. district judge for the middle district of North Carolina vice Eugene A. Gordon, retired.

Lawrence S. Margolis, of Maryland, to be a judge of the U.S. Claims Court for a term of 15 years vice a new position created by Public Law 97-164.

Haldane Robert Mayer, of Virginia, to be a judge of the U.S. Claims Court for a term of 15 years vice a new position created by Public Law 97-164.

Reginald W. Gibson, of Illinois, to be a judge of the U.S. Claims Court for a term of 15 years vice a new position created by Public Law 97-164.

Christine Cook Nettesheim, of the District of Columbia, to be a judge of the U.S. Claims Court for a term of 15 years vice David Schwartz, retired.

DEPARTMENT OF JUSTICE

Anthony Bertoni, of Michigan to be U.S. Marshal for the eastern district of Michigan for the term of 4 years (reappointment).

Edward M. Camacho, of Guam, presently U.S. Marshal for the district of Guam to be also U.S. Marshal for the district of the Northern Mariana Islands for a term expiring September 14, 1986, vice Juan G. Blas.

Romolo J. Imundi, of New York, to be U.S. Marshal for the southern district of New York for the term of 4 years vice George V. Grant, term expired.

Matthew Chabal, Jr., of Pennsylvania, to be U.S. Marshal for the middle district of Pennsylvania for the term of 4 years, vice John L. Buck, term expired.

Peter K. Nunez, of California, to be U.S. attorney for the southern district of California vice William H. Kennedy.

Dwight G. Williams, of Mississippi, to be U.S. Marshal for the northern district of Mississippi for the term of 4 years vice H. Brooks Phillips, term expired.

Charles E. Healey, of New York, to be U.S. Marshal for the eastern district of New York for the term of 4 years vice Louis J. Soscia, term expired.

Daniel B. Wright, of New York, to be U.S. Marshal for the western district of New York for the term of 4 years vice Joseph I. St. George, term expired.

James K. Stewart, of California, to be Director of the National Institute of Justice (new position).

Victor M. F. Reyes, of Texas, to be a Commissioner of the U.S. Parole Commission for a term of 6 years, vice Richard T. Mulcrone, resigned.

J. Raymond Bell, of the District of Columbia, to be Chairman of the Foreign Claims Settlement Commission of the United States for the term expiring September 30, 1985 (reappointment).

COPYRIGHT ROYALTY TRIBUNAL

Katherine D. Ortega, of New Mexico, to be a Commissioner of the Copyright Royalty Tribunal for a term of 7 years from September 27, 1982, vice Francis Garcia, term expired.

DEPARTMENT OF EDUCATION

Caroline H. Hume, of California, to be a Member of the National Museum Services Board for a term expiring December 6, 1985, vice Dorothy Graham-Wheeler, to which position she was appointed during the last recess of the Senate.

Liles B. Williams, of Mississippi, to be a Member of the National Museum Services Board for a term expiring December 6, 1985, vice John Connell.

PUBLIC HEALTH SERVICE

The following candidate for personnel action in the regular corps of the Public Health Service subject to qualifications therefor as provided by law and regulations:

For appointment:

To be Senior Surgeon:

William E. Mayer.

DEPARTMENT OF STATE

Edward Lionel Peck, of California, a Career Member of the Senior Foreign Service, class of Minister—Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Islamic Republic of Mauritania.

Lev E. Dobriansky, of Virginia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to The Commonwealth of The Bahamas.

Samuel Friedlander Hart, of Virginia, a Career Member of the Senior Foreign Service, class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Ecuador.

Jerome W. Van Gorkom, of Illinois, to be Under Secretary of State for Management, vice Richard T. Kennedy.

John Herbert Holdridge, of Maryland, a Career Member of the Senior Foreign Service, class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Indonesia.

INTER-AMERICAN FOUNDATION

Victor Blanco, of California, to be a Member of the Board of Directors of the Inter-American Foundation for a term expiring September 20, 1988, vice Peter Taylor Jones, term expired.

INTERNATIONAL BANKS

W. Allen Wallis, of New York, to be U.S. Alternate Governor of the International

Bank for Reconstruction and Development for a term of 5 years; U.S. Alternate Governor of the Inter-American Development Bank for a term of 5 years; U.S. Alternate Governor of the Asian Development Bank; and U.S. Alternate Governor of the African Development Fund, vice Myer Rashish, resigned.

U.S. ADVISORY COMMISSION ON PUBLIC DIPLOMACY

E. Robert Wallach, of California, to be a Member of the U.S. Advisory Commission on Public Diplomacy for a term expiring July 1, 1985, vice Lewis Manilow, term expired.

William G. Simpson, of Illinois, to be a Member of the Board of Directors of the Overseas Private Investment Corporation for a term expiring December 17, 1984, vice William M. Landau, term expired.

U.S. INFORMATION AGENCY

Kenneth Y. Tomlinson, of New York, to be an Associate Director of the U.S. Information Agency, vice Robert John Hughes.

DEPARTMENT OF THE TREASURY

Manuel H. Johnson, Jr., of Virginia, to be an Assistant Secretary of the Treasury, vice Paul Craig Roberts, resigned, to which position he was appointed during the last recess of the Senate.

EXECUTIVE OFFICE OF THE PRESIDENT

William Poole VII, of Rhode Island, to be a Member of the Council of Economic Advisers, vice Jerry L. Jordan, resigned.

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE COAST GUARD

Coast Guard nominations beginning Philip M. Lebet, and ending Kent D. Morris, which nominations were received by the Senate on October 20, 1982, and appeared in the CONGRESSIONAL RECORD of November 29, 1982.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nominations were confirmed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOMINATION OF MANUEL H. JOHNSON TO BE ASSISTANT SECRETARY OF THE TREASURY FOR ECONOMIC POLICY

Mr. DOLE. Mr. President, the Finance Committee today voted unanimously to report favorably the nomination of Manuel H. Johnson to be Assistant Secretary of the Treasury for Economic Policy. Dr. Johnson is extremely well qualified for this position, having served for the past year as Acting Assistant Secretary for Economic Policy and, prior to that, as Deputy Assistant Secretary. Thus he brings considerable experience to the position, having participated in the development of the administration's economic program since early 1981.

As Assistant Secretary for Economic Policy, Dr. Johnson's primary duty is to provide economic counsel to the Treasury Secretary and other administration officials, and to assist the Secretary in formulating appropriate economic policies. He certainly is qualified to do this. Dr. Johnson received the Ph. D. in economics from Florida State University in 1977. Prior to coming to the Treasury Department, he was a professor of economics at George Mason University. While there, he authorized some 5 books and over 30 articles in professional journals. He also was cofounder of the Journal of Labor Research. He is not an ivory-tower theorist; however, most of his research is very pragmatic and policy oriented. He also consulted for such policy think-tanks as the American Enterprise Institute and the Heritage Foundation. In addition, he appeared often before congressional committees, presenting testimony on small business problems. Dr. Johnson's prolific output has earned him the respect of his economist colleagues as one of the most prominent young economists in the Nation.

Mr. President, these are challenging economic times. It is vital that the administration attract the best talent from the economics profession. Dr. Johnson is a respected scholar, and an experienced member of the administration. The Finance Committee recommends that the full Senate approve the nomination of Manuel H. Johnson to be Assistant Secretary for Economic Policy.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I wish to express my gratitude to the minority leader in particular and to all Senators for permitting us to transact this considerable amount of business before the Senate. I wish to express my gratitude particularly to the Senator from New Hampshire and the Senator from Oklahoma for permitting us to interrupt the debate in order to accomplish this purpose.

Mr. President, I yield the floor.

SURFACE TRANSPORTATION ASSISTANCE ACT OF 1982

Mr. HUMPHREY. Mr. President, I wish to announce while there are a number of Senators on the floor, I think it is time we put this motion so that we can obtain a sufficient second. My colleague from Oklahoma is prepared to make the motion, and I ask unanimous consent to do that.

Mr. BAKER. What was the request?

Mr. HUMPHREY. I was suggesting that now might be a good time to put the motion which we have already discussed so as to obtain a sufficient second.

Mr. BAKER. Mr. President, if the Senator will permit me, it is a little after 3 o'clock and I think all Senators are on notice that there is going to be a rollcall vote at about this time, and I agree with the Senator it would be a good time.

The Senator from New Hampshire and the Senator from Oklahoma have been very thoughtful in giving us notice of the time they intend to make that motion.

Mr. HUMPHREY. I yield the floor at this point.

Mr. RANDOLPH. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield to my senior colleague from West Virginia so that he may make a request?

Mr. RANDOLPH. Mr. President, will the Senator from New Hampshire yield to me for approximately, say, 2 minutes?

Mr. HUMPHREY. Mr. President, I ask unanimous consent that I may yield to the Senator from West Virginia without losing my right to the floor and without having my speech counted as a second speech.

The PRESIDING OFFICER. Without objection, it is so ordered.

FEDERAL-AID HIGHWAY LEGISLATION

Mr. RANDOLPH. Mr. President, the Federal-Aid Highway Improvement Act of 1982 is legislation which is very important to the future of this Nation. Over the past decade, the highway network of this country, which has been constructed under the format of the Federal-aid highway program since 1956, has begun to deteriorate badly. Many segments of our primary and secondary roads are in terrible shape, and portions of the Interstate System which were constructed in the early days of the Federal-aid program following its enactment in 1956 are in such poor condition that they do not meet the serviceability requirements for which they were designed.

The legislation on which we are debating the motion to proceed today makes a serious effort to begin to rectify these important problems. The 5-cent increase in the Federal gasoline tax, the first since 1959, will provide an additional $4.4 billion in revenue to the highway trust fund. This substantial increase in funding will give us a highway program which can target its resources to meet the decay in our highway transportation network.

The bill, S. 3043, which was reported by the Committee on Environment and Public Works on December 8, authorizes $12.2 billion for fiscal year 1983 and nearly $70 billion over the 5 years of the legislation for completion of our Interstate System, rehabilitation and reconstruction of those interstate segments which have deteriorat-

ed, and substantial moneys for the primary, secondary, and urban systems to bring them back up to standard. No highway bill would be complete without a discussion of our growing bridge problem in this country. This legislation nearly doubles the authorization in the first year for the bridge rehabilitation and replacement program. These funds will be spent on projects to replace or rehabilitate structurally obsolete bridges. Mr. President, there are many other important changes made to the highway program in title 1: Highway Authorization Provision, and I commend them to my colleagues in the Senate.

This legislation is extremely important, and I would hope that the Senate can act in an expeditious manner to bring forth these important changes to allow the States to fund highway projects in fiscal year 1983. Another important aspect of this legislation is the jobs creation potential, with unemployment at its extremely high levels of today. Over 320,000 direct and indirect jobs can be created early next year if this legislation is adopted expeditiously. Mr. President, I urge those who are debating this motion to proceed to weigh carefully their actions. This legislation, including the gas tax increase, is highly important to the economic well-being of this Nation.

CLOTURE MOTION

Mr. President, I ask unanimous consent that my name be included as one of the signatories to the cloture motion filed at the desk on the motion to proceed to the consideration of H.R. 6211, the Federal Highway Improvement Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

The cloture motion is as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the motion to proceed to the consideration of H.R. 6211, the Surface Transportation Assistance Act of 1982.

Howard Baker, Jake Garn, Alphonse D'Amato, Nicholas Brady, Bob Dole, Dan Quayle, S. I. Hayakawa, Robert Stafford, Ted Stevens, Mark Andrews, Strom Thurmond, David Durenberger, Warren B. Rudman, John H. Chafee, Pete Domenici, John Heinz, and Jennings Randolph.

Mr. RANDOLPH. Mr. President, again, I thank my friend from New Hampshire.

Mr. HUMPHREY. Mr. President, the Senator from West Virginia is more than welcome.

At this point, Mr. President, I relinquish the floor.

Mr. NICKLES addressed the Chair.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. NICKLES. Mr. President, I move to postpone consideration of the pending motion until January 2, 1983, and ask for the yeas and nays on my motion.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Mr. President, I move to table the motion of the distinguished junior Senator from Oklahoma and I ask the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee (Mr. BAKER) to table the motion of the Senator from Oklahoma (Mr. NICKLES) to postpone consideration of the pending motion until January 2, 1983. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Missouri (Mr. DANFORTH), the Senator from Arizona (Mr. GOLDWATER), the Senator from Florida (Mrs. HAWKINS), and the Senator from Wyoming (Mr. WALLOP) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Texas (Mr. BENTSEN), the Senator from Delaware (Mr. BIDEN), the Senator from Arizona (Mr. DECONCINI), the Senator from Ohio (Mr. GLENN), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Hawaii (Mr. MATSUNAGA), and the Senator from Massachusetts (Mr. TSONGAS) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 79, nays 10, as follows:

[Rollcall Vote No. 400 Leg.]

YEAS—79

Abdnor	Ford	Moynihan
Andrews	Garn	Murkowski
Armstrong	Gorton	Nunn
Baker	Grassley	Packwood
Baucus	Hart	Pell
Boschwitz	Hatfield	Percy
Bradley	Hayakawa	Pressler
Brady	Heflin	Pryor
Bumpers	Heinz	Quayle
Burdick	Hollings	Randolph
Byrd, Harry F., Jr.	Huddleston	Riegle
Byrd, Robert C.	Inouye	Roth
Cannon	Jackson	Rudman
Chafee	Jepsen	Sarbanes
Chiles	Kassebaum	Sasser
Cochran	Kasten	Schmitt
Cohen	Kennedy	Simpson
Cranston	Laxalt	Specter
D'Amato	Leahy	Stafford
Denton	Long	Stennis
Dixon	Lugar	Stevens
Dodd	Mathias	Symms
Dole	Mattingly	Thurmond
Domenici	McClure	Tower
Durenberger	Melcher	Warner
Eagleton	Metzenbaum	Weicker
	Mitchell	

NAYS—10

Boren	Helms	Proxmire
East	Humphrey	Zorinsky
Exon	Levin	
Hatch	Nickles	

NOT VOTING—11

Bentsen	Glenn	Matsunaga
Biden	Goldwater	Tsongas
Danforth	Hawkins	Wallop
DeConcini	Johnston	

So the motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which motion to table was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business to extend not past 4 p.m. in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

HIGHWAY REVENUE ACT OF 1982—H.R. 6211

Mr. DOLE. Mr. President, this is an explanation of the Highway Revenue Act of 1982, the committee amendment approved by the Senate Committee on Finance that it intends to offer as a substitute for H.R. 6211, the Surface Transportation Assistance Act of 1982, as passed by the House of Representatives on December 6, 1982. The Finance Committee considered and approved the committee amendment on December 8, 1982.

The first part of the statement is a summary of the committee amendment. The second part discusses the general reasons for the committee amendment. This is followed in the third part by a detailed explanation of the committee amendment, including present law, reasons for change, explanation of the provisions, effective dates, and the estimated revenue effect of the provisions. Finally part 4 presents tables showing the estimated revenue effects of the committee amendment for fiscal years 1983-88.

The statement follows:

H.R. 6211

I. SUMMARY OF THE COMMITTEE AMENDMENT

Under present law, the Highway Trust Fund generally will expire after September 30, 1984. The Finance Committee amendment, the Highway Revenue Act of 1982, extends the Highway Trust Fund through September 30, 1989, provides revenue sources for it, and establishes a new transit account in the Trust Fund.

Under present law, the highway excise taxes that provide the revenues for the trust fund generally expire or revert to lower rates after September 30, 1984. The committee amendment increases the annual revenues into the trust fund by extending

some of the taxes at higher levels through September 30, 1989, and repeals or modifies other provisions. In providing these tax changes and extensions for the Highway Trust Fund, the committee changed the distribution of the tax burden of highway users by shifting a larger share to the heaviest trucks on the highways and reducing the share paid by lighter trucks. These shifts of burden are generally consistent with the highway cost allocation study submitted to Congress by the Department of Transportation in May 1982.

The increases in estimated Highway Trust Fund receipts over present law are $2.2 billion in fiscal year 1983, $5.3 billion in 1984, $9.6 billion in 1985, $9.9 billion in 1986, $10.1 billion in 1987, and $10.4 billion in 1988.

In addition, trust fund receipts will be increased above the levels of a simple continuation of the present law taxes by $2.2 billion in fiscal year 1983, $5.3 billion in 1984, $5.4 billion in 1985, $5.5 billion in 1986, $5.6 billion in 1987, and $5.7 billion in 1988.

Total Highway Trust Fund tax revenues are estimated at $8.6 billion in fiscal year 1983, $12.2 billion in 1984, $12.6 billion in 1985, $13.0 billion in 1986, $13.4 billion in 1987, and $13.8 billion in 1988.

Tables 2, 3 and 4 in section IV, below, show revenue estimates of the taxes affected by the committee amendment for fiscal years 1983-1988.

The specific tax and trust fund changes contained in the Finance Committee amendment are summarized below. Table 1 contains a summary comparison of the tax provisions in present law and in the committee amendment.

TAX PROVISIONS

Motor fuels taxes.—The excise taxes on gasoline, diesel and special motor fuels used in highway vehicles currently are 4 cents a gallon; fuel used in recreational motorboats also is taxed at 4 cents a gallon. These taxes are scheduled to decline to 1½ cents a gallon after September 30, 1984.

The committee amendment increases the motorfuels excise tax rates to 9 cents a gallon, beginning on April 1, 1983, through September 30, 1989. Complete exemptions from the 9 cents a gallon tax are provided for State and local governments, nonprofit educational institutions, farm use, school buses, local transit buses, intercity buses, off-highway business use, gasohol and 85 percent or more alcohol fuels (other than those derived from petroleum and natural gas). Exemption from the present law 4 cents a gallon excise tax is continued for qualified taxicab (through fiscal year 1984). The definition of qualified taxicab is expanded to permit certain taxicabs which can offer ride sharing under company policy, but are barred from such action by local law, to claim the fuels tax exemptions for one year, January 1 through December 31, 1983. An additional exemption, at the 9 cents rate, is created for certain vanpool vehicles. Ground applicators of fertilizers and other substances are made eligible for refunds of fuels taxes, under the farm use exemption, under the same terms as are aerial applicators. The time for payment of the gasoline tax is extended by 6 days for certain oil jobbers, if payment is made by electronic wire transfer to an authorized government depository.

All the motor fuels taxes and the exemptions from these taxes will terminate after September 30, 1989. Revenue from the 9 cents a gallon tax on recreational motorboat fuel is transferred to the Land and Water Conservation Fund, and $45 million per year up to an accumulated balance of $45 million (instead of $20 million as in present law) is the maximum amount that may be transferred to the National Recreational Boating Safety and Facilities Improvement Fund, which is extended through fiscal year 1989.

Tires, tubes and tread rubber.—These items presently are subject to a manufacturers excise tax that is levied on a per pound basis: highway tires at 9.75 cents, other tires at 4.875 cents, laminated tires at 1 cent, inner tubes at 10 cents, and tread rubber at 5 cents. After September 30, 1984, the tax on highway tires is scheduled to fall to the same 4.875 cents rate applied to other tires. The tax on inner tubes is scheduled to decline to 9 cents, and the tax on tread rubber is scheduled to expire.

Under the committee amendment, the taxes on laminated tires and all nonhighway tires are repealed. The tax on highway tires is imposed at a graduated scale depending on tire weight: 9.75 cents per pound for the first 50 pounds; 15 cents per pound for the next 50 pounds; and 25 cents per pound for each pound in excess of 100. Tread rubber is taxed as follows: 5 cents per pound for tires under 50 pounds; 8 cents per pound for tires between 50 and 100 pounds; and 16 cents per pound for tires over 100 pounds. The present tax on inner tubes is retained.

The changes in these excise taxes are effective on April 1, 1983, and the taxes will expire on October 1, 1989.

Lubricating oil.—Lubricating oil presently is taxed at 6 cents a gallon. The committee amendment retains this tax and expands it to synthetic lubricating oils, effective April 1, 1983.

Trucks and truck parts.—Truck parts and accessories are taxed at 8 percent of the manufacturers sale price under present law. Trucks and truck trailers weighing more than 10,000 pounds are taxed at 10 percent of the manufacturer's sale price. These taxes are scheduled to decline to 5 percent after September 30, 1984.

Under the committee amendment, the tax on new trucks and trailers is increased to 12 percent. In addition, this tax will be imposed at the retail level on the retail price, rather than at the manufacturers level. The weight threshold for this tax is increased from 10,000 pounds to 33,000 pounds for trucks and to 26,000 pounds for trailers. Rail trailers and vans are exempted from the tax. In addition, the tax on truck parts and accessories is increased to 12 percent and is retained at the manufacturers level, but only for parts for trucks and trailers over 33,000 pounds.

The increase in the weight thresholds for the exemptions from the taxes on trucks and truck parts are effective on the day after the date of enactment. The shift of the truck tax to the retail level and the rate increase from 10 percent to 12 percent are effective April 1, 1983, as is the increase in the tax on parts from 8 percent to 12 percent.

Heavy vehicle use tax.—The tax on heavy vehicles in present law is $3 per thousand pounds for trucks weighing more than 26,000 pounds. In its place, the committee amendment provides a graduated tax that begins at 33,000 pounds. Trucks below that weight level will pay no tax. At 33,000 pounds, trucks will pay $80, and heavier trucks will pay an additional $10 for each added 1,000 pounds up to 55,000 pounds. Trucks weighing between 55,000 pounds and 80,000 pounds will pay $300 plus $52 for each 1,000 pounds over 55,000 pounds up to $1,600, which is the maximum annual use tax on heavy trucks. The new schedule is phased-in, with one-third of the tax change effective on January 1, 1984, two-thirds on July 1, 1984, and the permanent rate schedule effective on July 1, 1985.

In addition, an exemption (or refund) will be provided for trucks that travel on highways 5,000 miles or less in a taxable period, effective on January 1, 1984.

Sunset of taxes.—All the highway user excise taxes, as well as most exemptions from the taxes, expire after September 30, 1989.

Motor carrier operating rights.—The committee amendment provides that the basis adjustments applicable under the Economic Recovery Tax Act of 1981 to corporate taxpayers acquiring certain motor carrier operating authorities shall also apply to noncorporate taxpayers acquiring such rights.

Trust fund and transit account

Highway Trust Fund.—Under the committee amendment, the Highway Trust Fund is extended through September 30, 1989. The taxes that will be deposited into the Trust Fund, and the authority to spend from the Trust Fund, will expire after September 30, 1989, except for certain statutory transfers allowed through June 30, 1990.

Mass Transit Account.—One cent a gallon of the fuels taxes is to be deposited in a new separate Mass Transit Account in the Highway Trust Fund. These deposits may be used only for mass transit capital programs, including new projects, that are authorized in section 22 of the Urban Mass Transportation Act.

TABLE 1.—COMPARISON OF CURRENT HIGHWAY USER EXCISE TAXES AND THOSE APPROVED BY THE COMMITTEE ON FINANCE

Tax	Present law (before Oct. 1, 1984)	Finance Committee approved rates
A. Fuels:		Effective Apr. 1, 1983:
Gasoline	4 cents per gallon	9 cents per gallon.
Diesel fuel	do	Do.
Special motor fuels	do	Do.
B. Lubricating oil	6 cents per gallon	6 cents per gallon.
C. Truck and truck parts:		
Trucks and trailers.	10 percent of manufacturers sale price for trucks and trailers over 10,000 lb.	12 percent of retail sales price for trucks over 33,000 lb and trailers over 26,000 lb.[1]
Parts and accessories.	8 percent of manufacturers sale price for trucks and trailers over 10,000 lb.	12 percent of manufacturers sale price of trucks and trailers over 33,000 lb.[1]
D. Tires, tubes, and tread rubber:		Effective Apr. 1, 1984:
Tires for highway vehicles.	9.75 cents per pound on all highway tires.	9.75 cents per pound for first 50 lb, 15 cents per pound for next 50 lb, 25 cents for each pound over 100 lb.
Laminated tires	1 cent per pound	Repeal.
Other tires	4.875 cents per pound	Do.
Inner tubes	10 cents per pound	10 cents per pound.
Tread rubber	5 cents per pound for tires of all weights.	5 cents per pound for use on tires below 50 lb, 8 cents per pound for tires between 50 and 100 lb, 16 cents per pound for tires over 100 lb.
E. Use tax on heavy vehicles.	$3 per 1,000 lb per year, if more than 26,000 lb.	0 to 33,000 lb: no tax. 33,000 to 55,000 lb: $80 plus $10 per 1,000 lb in excess of 33,000 lb. 55,000 to 80,000 lb: $300 plus $52 per 1,000 lb in excess of 55,000 lb.[2] Over 80,000 lb: $1,600.

[1] The increase in the weight thresholds for the exemptions for trucks and trailers is effective on the day after the date of enactment. The increase in the rate to 12 percent and the shift to the retail level for collection of the truck tax are effective Apr. 1, 1983.

[2] Phased in between Jan. 1, 1984, and July 1, 1985.

II. General Reasons for the Committee Amendment

The committee believes that extensive improvements are required in the nation's highways, bridges and mass transit systems, and that Highway Trust Fund revenues under the current tax structure are inadequate to finance them. This inadequacy is due in part to the fact that the purchasing power of trust fund revenues has been reduced by inflation, because many highway user taxes do not automatically rise with prices and the tax rates have not been adjusted for several years. The motor fuels tax, which has been fixed at 4 cents per gallon since 1959, is an example. The committee has determined that the highway user taxes should be raised sufficiently to pay for the additional expenditures that are so much needed. In addition, it believes that the Highway Trust Fund should be extended for five additional years.

Allocating highway costs to users

The committee agrees with the general principle that highway users should pay highway user taxes in proportion to the costs that result from their use. On this point, the committee recognizes the broad conclusions of the cost allocation study undertaken by the Department of Transportation and transmitted to Congress in May 1982. This study indicated that, under the current excise tax structure, users of the heaviest trucks are paying much less than their proportionate share of highway costs and users of lighter trucks are paying much more. Aware that an increase in motor fuels taxes alone would aggravate the existing problem of disproportionate tax payments, the committee modified virtually the entire highway user excise tax structure so that users of the heaviest trucks will pay a greater share of the cost. Nevertheless, the committee believes it would not be wise policy to adhere strictly to the cost allocation study in designing the highway excise taxes: first, because it would be difficult even for a healthy industry to absorb a tax increase of that magnitude, and second, because the affected industry is currently experiencing significant economic problems. Thus, the tax increase on heavy trucks is lower than implied by the cost allocation study, and that increase is phased in over a 2½-year period.

Simplification of highway excise taxes

Another goal of the committee is to simplify the highway user excise tax system. The committee, therefore, modified several of these taxes such that the number of taxpayers or the number of taxable transactions will be reduced. In addition, the committee decided to repeal certain minor taxes, because the revenue from them is too small relative to the government's administrative costs and the taxpayer's compliance costs.

III. Explanation of the Committee Amendment

A. Motor Fuels Taxes

(Secs. 511 and 518 of the committee amendment and secs. 44E, 4041, 4081-4083, 6416, 6420, 6421, and 6427 of the Code)

Present law—Gasoline tax

A manufacturers excise tax is imposed on the sale by a producer or importer of gasoline. The present gasoline tax is 4 cents per gallon. The tax is scheduled to decline to 1½ cents per gallon on October 1, 1984 (Code sec. 4081 (a) and (b)).

The 4-cents-per-gallon tax on gasoline applies for highway, noncommercial aviation,[1] and motorboat use (other than commercial fisheries or whaling use), except that the tax is 2 cents per gallon for other nonhighway, nonaviation qualified business use.[2] Revenues from the gasoline tax generally are deposited in the Highway Trust Fund. Revenues from the tax on noncommercial aviation are deposited in the Airport and Airway Trust Fund. An amount equivalent to the revenues from the tax on motorboat gasoline is transferred to the National Recreational Boating Safety and Facilities Improvement Fund and the Land and Water Conservation Fund (discussed below).

Diesel and special motor fuels taxes

A tax is imposed on the sale or use of diesel fuel for use in motor vehicles on highways (sec. 4041(a)). The tax on diesel fuel is imposed at the retail level and is presently imposed at 4 cents per gallon. The tax is scheduled to decrease to 1½ cents per gallon on October 1, 1984 (sec. 4041(a)).

A similar retailers excise tax is imposed on the sale of special motor fuels for use in a motor vehicle or motorboat.[3] The tax on special motor fuels is presently 4 cents per gallon and is scheduled to decrease to 1½ cents per gallon on October 1, 1984 (sec. 4041(b)). The tax on special motor fuels applies both for highway and off-highway use. However, the tax is 2 cents per gallon for off-highway, qualified business use.

Motorboat fuels

As noted above, the gasoline tax and the special motor fuels tax are imposed on such fuels used by motorboats. An amount equivalent to the revenues derived from these taxes is transferred from the Highway Trust Fund to two other special funds. Amounts not exceeding $20 million per year of these revenues for fiscal years 1981-1983 are to be transferred to the National Recreational Boating Safety and Facilities Improvement Fund. However, that fund is not permitted to have a balance in excess of $20 million at any one time. The balance of the revenues from these taxes is transferred to the Land and Water Conservation Fund.

Exemptions from motor fuels taxes

Present law provides a number of exemptions from the three motor fuel taxes. Off-highway use exemptions apply to farm use (sec. 6420) and use as supplies for certain vessels or aircraft (secs. 4041(g) and 6416(b)(2)(B)).[4]

Sales for the exclusive use of State and local governments, sales for export, and sales for use by nonprofit educational institutions and certain aircraft museums are also exempt (secs. 4041(f) and 6416(b)(2)(C)-(D)).

Exemptions from the taxes are also provided for use by school buses and certain other buses providing public passenger transportation for hire (sec. 6421(b) and sec. 6427(b))[5] and for certain qualified taxicab use through 1982 (sec. 6427(e)).[6]

An additional exemption from the taxes applies through 1992 to a fuels mixture (gasohol) which contains at least 10 percent alcohol of 190 proof (secs. 4041(k), 4081(c), and 6427(f)). To qualify, the alcohol must be produced from sources other than petroleum, gas, or coal. Producers of alcohol fuels may claim a 40-cents-per-gallon income tax credit, which is reduced to the extent that the alcohol is used in gasohol for which there is an excise tax exemption is claimed (sec. 44E).[7]

The exemptions from the motor fuels taxes are accomplished by tax-free sale or allowance of a refund (or credit) for tax paid when the fuels are purchased. The exemption is usually made available only to the party using the fuel. In the case of the farm use exemption, the exemption is accomplished by means of a credit and is available only to the farm operator, tenant, or owner except in the case of aerial applicators. Aerial applicators that receive written consent of the farm owner, tenant, or operator may claim the exemption for fuels they use for farming purposes.

Time for payment of tax

Under present law, the motor fuels taxes generally are paid based upon a semimonthly period, with the tax due 9 days after the close of the period.

Reasons for change

The present excise taxes funding the Highway Trust Fund are scheduled to expire or to be reduced on October 1, 1984. Extension of the Trust Fund and modifications in these excise taxes are needed to finance the increased highway construction and maintenance programs anticipated as necessary to rebuild the nation's transportation system.

The committee determined that an increase in the present taxes on gasoline, diesel, and special motor fuels to 9 cents per gallon is necessary to achieve the required funding levels for anticipated highway and transit expenditures. These increases, when combined with the modification of the other highway-related excise taxes contained in the committee amendment, make the highway excise tax structure more consistent with the findings of the 1982 cost allocation study submitted to Congress by the Department of Transportation than is the case under present law.

---

[1] Section 4041(c) imposes a retail excise tax on noncommercial aviation gasoline of 8 cents per gallon, for a total tax on noncommercial aviation gasoline of 12 cents per gallon. This rate of tax applies through 1987.

[2] In general, a qualified business use is a use in an off-highway vehicle that is used in a trade or business or for the production of income.

[3] Special motor fuels are benzol, benzene, naptha, liquefied petroleum gas, casinghead and natural gasoline, or any other liquid (other than kerosene, gas oil, fuel oil, gasoline taxed under the general gasoline tax, or diesel fuel taxed under the general diesel fuel tax). Methanol and ethanol fuels are taxed as special fuels under present law. Further, section 4041(c) imposes a retail tax of 14 cents per gallon on nongasoline fuels used in noncommercial aviation. This rate of tax applies through 1987.

[4] The term "supplies for vessels or aircraft" means fuel supplies, ships stores, sea stores, or legitimate equipment for vessels of war, vessels employed in fisheries or in the whaling business, or vessels engaged in foreign trade or trade between the Atlantic and Pacific ports of the United States or between the United States and any of its possessions. The term "vessels" also includes civil aircraft employed in foreign trade or trade between the United States and any of its possessions (sec. 4221(d)(3)).

[5] The exemption does not apply for fuel used in such buses where the transportation is not scheduled and not along regular routes unless the seating capacity of the bus is at least 20 adults (not including the driver).

[6] Qualified taxicab use means furnishing of nonscheduled land transportation for a fixed fare by a licensed operator who is not prohibited by law or company policy from furnishing shared transportation (with consent of the passengers). Model year 1978 and later taxicabs must have a fuel economy rating in excess of the average EPA rating for the type of vehicle involved to qualify for this exemption.

[7] A tariff of 40 cents per gallon is imposed on ethanol imported for use in fuels.

The committee also examined the various exemptions from the motor fuels taxes. In general, the committee believes that these exemptions should be continued at their present levels, i.e., an amount equal to the full tax imposed on the motor fuels. In three instances, however, the committee determined that modification of the exemptions is appropriate. First, the committee amendment provides a new exemption from the special motor fuels tax, at the 9-cents-per-gallon rate, for alcohol fuels consisting of at least 85 percent ethanol, methanol, or other alcohols. The exemption is available only for alcohol fuels derived from sources other than petroleum and natural gas. The committee believes this new exemption is consistent with the policy of decreasing reliance on petroleum fuels.

Second, the committee amendment limits the present exemptions for fuels used in providing qualified taxicab services to 4 cents per gallon. The committee believes this level promotes the goal of assigning the costs of constructing and maintaining the highway system to the users of that system in proportion to the burden they place upon it. The committee amendment generally terminates the present law exemptions for fuels used in providing qualified taxicab services on September 30, 1984. The amendment expands the exemption to include taxicabs permitted to offer ride sharing by company policy in areas where local law prohibits ridesharing in certain circumstances. The expansion is effective only through December 31, 1983. These termination dates are intended to permit a more thorough examination of that exemption during the next Congress.

Third, the committee amendment adds a new exemption for vanpooling because vanpooling promotes energy conservation.

Finally, the committee determined that the present exemptions for certain off-highway uses should be increased from one-half of the otherwise applicable tax to the entire amount of the tax. The committee believes this action is appropriate because these uses of motor fuels place no burden on the highway system.

Explanation of provisions

1. Increase in motor fuels taxes: The excise taxes on gasoline, diesel, and special motor fuels are increased from their present 4-cents-per-gallon rate to a rate of 9 cents per gallon.[8]

2. Taxes on motorboat fuels: The committee amendment increases the tax rates for gasoline and special fuels used in motorboats to 9 cents per gallon to conform those rates to those for other taxable uses of the fuels. The committee amendment also increases the maximum amount that can be transferred to the National Recreational Boating Safety and Facilities Improvement Fund from $20 million to $45 million per year and extends the period for those transfers through September 30, 1989. A corresponding committee amendment is made permitting the balance of the Boating Fund to reach $45 million. (For more information on the Boating Fund, see the discussion of the Highway Trust Fund, below in H.)

3. Modification of exemptions from fuels taxes:

Gasohol.—The committee amendment retains the present exemptions from the motor fuels taxes for gasohol to exempt each gallon of gasohol from the full 9 cents of tax. These exemptions will terminate after the previously scheduled 1992 termination date.

A corresponding amendment is made to increase the 40-cent-per-gallon tariff on ethanol imported for use in fuels to 90 cents.

Alcohol fuels.—The committee amendment provides a new exemption from the special motor fuels tax, at the new 9-cent-per-gallon rate, for certain alcohol fuels. Fuels qualifying for the new exemption must consist of at least 85 percent methanol, ethanol, or other alcohols. Additionally, the fuels cannot be derived from petroleum or natural gas. Such alcohol fuels derived from coal, bagasse, or waste or other refuse will qualify for the 9-cent exemption.

The 40-cents-per-gallon income tax credit for alcohol fuel derived from sources other than oil, gas, or coal is increased to 90 cents per gallon to conform to the increase in the gasohol exemption and the new alcohol fuels exemption, and the 1992 termination date for this credit is retained. The credit for alcohol fuels is reduced to take account of any benefit provided by the new alcohol fuel exemption in the same manner as with the present gasohol exemption.

Certain buses.—The committee amendment retains the provisions of present law that provide exemption from the motor fuels taxes for certain buses. Thus, fuels used in these vehicles are entitled to a 9-cent-per-gallon exemption from any applicable motor fuels taxes.

Qualified taxicabs.—The committee amendment retains the present exemptions for motor fuels used in providing qualified taxicab services. Under the committee amendment, fuels used in providing qualified taxicab services will maintain their present 4-cents-per-gallon exemption. Thus, these fuels are subject to tax at a 5-cents-per-gallon rate. In addition, the committee amendment expands the exemption, through 1983, to fuels used in otherwise qualified taxicabs even though their offering ridesharing is prohibited in certain circumstances by local law.

Further, the committee amendment directs the Secretary of the Treasury to conduct a study of the effectiveness of this exemption in promoting energy conservation and the relationship of this exemption, if any, to the cost allocation goals relating to financing of the highway system. The results of this study, along with any recommendations of the Secretary, are to be submitted to the Congress not later than January 1, 1984.

Certain vehicles used for vanpooling.—The committee amendment includes a new exemption for vehicles used in vanpooling if certain requirements are satisfied. First, the vehicle must seat at least 8 adults (not including the driver) and at least 80 percent of its mileage must be commuting to and from work. Under the amendment, such vehicles will be exempt from the full 9 cents per gallon fuels taxes whether owned by the employer, by an owner-operator, or by a third party and leased by the employer or operator. Only fuels used in commuting are exempt from tax.

Farm use.—The committee amendment continues the provisions of present law that provide for full exemption from the motor fuels excise taxes for fuels used on farms for farming purposes.

Off-highway business use.—The committee amendment increases the present exemption for fuels used in an off highway business use from one-half of the tax imposed to the full 9-cent-per-gallon rate.

Other exemptions.—The committee amendment continues, at the new 9-cent-per-gallon tax rates, the other exemptions from tax provided in present law. Among such exemptions are those for fuels sold for the exclusive use of State and local governments, for export, for use by nonprofit educational institutions, for use as supplies for vessels or certain aircraft, and for use by certain aircraft museums.

Method of claiming exemptions.—The committee amendment does not change the method by which exemptions from the motor fuels taxes are claimed. The committee amendment does make one change, however, in the person who is entitled to the exemption on fuels used on farms for farming purposes. Under the committee amendment, certain ground applicators or pesticides, herbicides, and other farm processes are to be treated the same as aerial applicators are treated under present law. Therefore, if the owner, tenant, or operator of a farm served by these applicators consents in writing, the applicator, rather than the owner or operator of the farm, is entitled to the credit for tax paid on fuels used on the farm for farming purposes. This provision does not expand the present law circumstances in which gasoline and other motor fuels are exempt from tax.

4. Time for payment of taxes: The committee amendment permits an additional 6 days for payment of the gasoline excise tax, for a total of 15 days after the date of the semimonthly payment period. The additional period is available only to certain oil jobbers who elect, pursuant to Treasury Department regulations, to pay tax by electronic wire transfer. A qualified oil jobber is a jobber who sells 2 million or fewer gallons of gasoline during the semi-monthly period for which the additional time is granted.

Effective dates

The increases in the motor fuels tax rates are effective for fuels sold after March 31, 1983, and before October 1, 1989.

The provisions exempting certain sales of motor fuels from tax are generally effective with the changes in the rates of the taxes, and generally terminate after September 30, 1989. The exemption for fuels used in providing qualified taxicab services is effective on January 1, 1983; that exemption will expire after September 30, 1984, or December 31, 1983, in the case of taxicabs qualifying under the expansion of that provision. The provision affecting certain ground applicators is effective on April 1, 1983.

The increase in the tariff on certain imported ethanol is effective for imports after March 31, 1983.

The extension in the time for payment of tax is effective on April 1, 1983.

Revenue effect

It is estimated that the changes relating to the tax on gasoline will increase fiscal year trust fund receipts by $2,211 million in 1983, $4,442 million in 1984, $6,589 million in 1985, $6,461 million in 1986, $6,432 million in 1987, and $6,459 million in 1988.

The changes relating to diesel and special motor fuels will increase trust fund receipts by $341, million in 1983, $803 million in 1984, $1,303 million in 1985, $1,394 million in 1986, $1,496 million in 1987, and $1,607 million in 1988.

[8]The excise taxes on fuels used in noncommercial aviation are not changed by the committee amendment. Those taxes remain 12 cents per gallon for gasoline and 14 cents per gallon for other aviation fuels through 1987.

B. EXCISE TAXES ON SALE OF TRUCKS AND TRUCK PARTS

(Sec. 512 of the committee amendment and new sections 4051-4053 and sec. 4061 of the Code

Present law—Trucks and truck trailers

A manufacturers excise tax is imposed on the sale of truck chassis and bodies, truck trailer and semitrailer chassis and bodies, and tractors of the kind chiefly used for highway transportation in combination with a trailer or semitrailer (including related parts or accessories). The tax imposed is 10 percent of the selling price of the manufacturer, producer or importer. However, the tax does not apply to the sale of truck chassis and bodies suitable for use with a vehicle which has a gross vehicle weight of 10,000 pounds or less (as determined under regulations prescribed by the Secretary). Also, the tax does not apply to truck trailer and semitrailer chassis and bodies suitable for use with a trailer or semitrailer which has a gross vehicle weight of 10,000 pounds or less (as so determined). Additional exemptions apply to specified articles including ambulances, trash containers, house trailers and certain other articles. However, rail trailers and rail vans are not currently exempted. This manufacturers excise tax on trucks is scheduled to fall to 5 percent on October 1, 1984.

Truck parts and accessories

A manufacturers excise tax is imposed on the sale of parts or accessories (other than tires or innter tubes) for articles taxed under the manufacturers excise tax on trucks. The tax imposed is 8 percent of the selling price of the manufacturer, producer or importer. This tax on parts and accessories is scheduled to fall to 5 percent on October 1, 1984.

Reasons for change

The committee believes that a more equitable distribution of highway costs would result if both the excise tax on trucks and the excise tax on truck parts are modified to impose smaller taxes on lighter trucks and higher taxes on heavier trucks. In addition, the committee is concerned that the manufacturers excise tax on trucks, because of the amount of tax per article, is likely to create a financial hardship for retail dealers who carry inventories of tax-paid trucks for long periods before those trucks are sold at retail. Therefore, the committee believes that this tax should be imposed at the retail level, but that the tax on truck parts should continue to be imposed at the manufacturing level.

Explanation of provision

1. Trucks and truck trailers:

The committee amendment modifies the excise tax on trucks and truck trailers in several respects.

First, the exclusion from tax is extended to truck chassis and truck bodies suitable for use with a vehicle which has a gross vehicle weight of 33,000 pounds or less. The exclusion from tax also is extended to truck trailer and semitrailer chassis and bodies suitable for use with a trailer or semitrailer which has a gross vehicle weight of 26,000 pounds or less. The committee intends that the same concept of gross vehicle weight will apply as it does under present law. In addition, the committee amendment exempts from this tax rail trailers and rail vans, the chassis or body of which is designed for use both as a highway vehicle and a railroad car. For purposes of this exemption, a piggy-back trailer or semitrailer is not treated as designed for use as a railroad car.

Second, the current manufacturers excise tax will be converted to a retail excise tax and the rate of tax will be increased from 10 percent to 12 percent of the price for which an article is sold, beginning on April 1, 1983. In the case where a 10-percent manufacturers excise tax has been paid on an article taxable under the retail excise tax, the tax rate applicable to the retail sale of the article will be 2 percent. The tax will be imposed on the first retail sale of an article, which means the first sale after manufacturing, production, or importation for a purpose other than for resale. As under present law, the rebuilding of a truck will be treated as a manufacture. A person will not be treated as engaged in manufacture merely because an article is combined with an item described in Code section 4063(d). A lease will be considered a sale under rules similar to the present rules of Code section 4217. Use prior to the first retail sale (other than use in the further manufacture of a taxable article) will be treated as a taxable sale. Articles currently exempted from the manufacturers excise tax under Code section 4063(a), plus rail trailers and rail vans, will be exempt from the retail excise tax. Similarly, exemptions currently provided by Code section 4221(a) (relating to sales for further manufacture, for export, for use as supplies for vessels or aircraft, to a State or local government, or to a nonprofit educational organization) will apply under the retail excise tax.

For purposes of this tax, the retail price will include any charge incident to placing the article in condition ready for use, but will exclude (i) the amount of this tax, (ii) the retail price of tires (inclusive of any federal excise tax thereon), and (iii) the amount of any retail sales tax (if stated as a separate charge) imposed by any State, political subdivision thereof, or the District of Columbia. Retail price includes the value of any trade-in. If an article is sold otherwise than through an arm's-length transaction at less than the fair market price, the tax will be computed on the price for which similar articles are sold at retail in the ordinary course of business.

Third, the retail excise tax on trucks will expire on October 1, 1989.

2. Truck parts and accessories:

The committee amendment increases the manufacturers excise tax on truck parts and accessories from 10 percent to 12 percent. In addition, the exclusion threshold is raised to 33,000 pounds. Thus, the tax will not apply to parts or accessories suitable for use with trucks or truck trailers and semitrailers which have a gross vehicle weight of 33,000 pounds or less. Also, parts sold for resale in connection with the first retail sale of a vehicle taxable under the retail tax on trucks and trailers are exempt.

Under the committee amendment, this tax will expire on October 1, 1989.

Effective dates

The increase in the threshold weights for exclusion from the excise taxes on trucks and truck parts and the exemption of rail trailers and rail vans are effective on the day after the date of enactment. To account for the fact that these higher threshold weights will exclude certain vehicles that are currently taxable and on which the manufacturers truck tax has been paid, a credit or refund (without interest) for the tax paid will be allowed if the article has been sold to an ultimate consumer after November 28, 1982, and before the day after the date of enactment.

The replacement of the manufacturers excise tax on trucks by the retail excise tax on trucks and the increase in the tax rate to 12 percent are effective on April 1, 1983. The 12 percent tax rate for truck parts also takes effect on April 1, 1983.

Revenue effect

The provision relating to the excise tax on the sale of trucks and trailers is estimated to reduce receipts of the Highway Trust Fund by $158 million in fiscal year 1983, have no revenue effect in fiscal year 1984, and to increase receipts by $716 million in fiscal year 1985, $819 million in fiscal year 1986, $888 million in fiscal year 1987, and $965 million in fiscal year 1988.

The provision relating to the manufacturers excise tax on truck parts and accessories is estimated to decrease receipts of the Highway Trust Fund by $94 million in fiscal year 1983, $140 million in fiscal year 1984, $37 million in fiscal year 1985, $41 million in fiscal year 1986, $45 million in fiscal year 1987 and $48 million in fiscal year 1988.

C. HEAVY VEHICLE USE TAX

(Sec. 513 of the committee amendment and secs. 4481-4483 of the Code)

Present law

An excise tax is imposed on the use on the public highways of any highway motor vehicle which (together with semitrailers and trailers customarily used in connection with highway motor vehicles of the same type as the vehicle) has a taxable gross weight of more than 26,000 pounds. The rate of tax is $3 a year for each 1,000 pounds of taxable gross weight or fraction thereof. The term "taxable gross weight" means the sum of (i) the unloaded weight of the vehicle fully equipped for service, (ii) the unloaded weight of semitrailers and trailers (fully equipped for service) which are customarily used in connection with vehicles of the same type, and (iii) the weight of the maximum load customarily carried on vehicles, semitrailers and trailers of the same type.

The taxable period for the highway use tax is generally the one-year period beginning on July 1. Payment in quarterly installments is permitted. The amount of tax is prorated only when the first use of the vehicle occurs later than the first month of the taxable period. No de minimus exemption is provided under persent law for vehicles used on the public highways for only a limited number of miles during a taxable period.

The highway use tax is scheduled to expire on October 1, 1984.

Reasons for change

The committee believes that the current structure of the highway use tax should be changed in order to achieve a more equitable distribution of future costs of highway construction and maintenance. As discussed in the General Reasons (above), the committee believes that the use tax should be lowered for lighter vehicles and raised for heavier vehicle, so that highway user taxes for different types of trucks will be more nearly proportionate to the costs properly allocable to their respective use of the highway system. In addition, the committee believes that an exemption should be provided to prevent the overpayment of tax in cases where the use of public highways is limited. The committee decided upon a 2½-year phase-in of the increase in this tax because the current depressed state of the trucking industry makes that industry unable to bear

a sudden increase in the tax to the permanent levels provided in the amendment.

Explanation of provisions

The committee amendment modifies the use tax in four respects.

First, the highest taxable gross weight of a vehicle not subject to the tax will be raised from 26,000 pounds to 33,000 pounds. The committee amendment does not modify the definition of taxable gross weight. However, the committee amendment makes it clear that a semitrailer or trailer is to be treated as customarily used in connection with a highway motor vehicle if the vehicle is equipped to tow the semitrailer or trailer.

Second, the rate of tax will be changed from a flat amount per 1,000 pounds to a graduated amount determined by a 3-bracket structure, as follows:

If the taxable gross weight is—		The rate of tax is—
At least	But less than	
33,000 pounds	55,000 pounds	$80 per year, plus $10 for each 1,000 pounds or fraction thereof in excess of 33,000 pounds.
55,000 pounds	80,000 pounds	$300 per year, plus $52 for each 1,000 pounds or fraction thereof in excess of 55,000 pounds.
80,000 pounds		$1,600 a year.

This schedule is phased in, so that it is first fully effective for the taxable period which begins on July 1, 1985.

Third, a new de minimus exemption from the tax will apply if a vehicle is used 5,000 miles or less on the public highways during a taxable period. Provided that the owner of the vehicle furnishes such information as the Secretary may require, collection of the tax will be suspended where it is reasonable to expect that use will not exceed 5,000 miles, and no tax will be imposed if use does not in fact exceed that amount. Where the tax is paid and the vehicle is not used for more than 5,000 miles, the amount of tax will be credited or refunded (without interest) to the owner.

Fourth, the highway use tax will expire on October 1, 1989.

In addition, the committee amendment directs the Secretary of Transportation (in consultation with the Secretary of the Treasury, State officials, motor carriers and other affected parties) to study alternative forms of the highway use tax, study plans for the better administration of the tax, and report findings and recommendations to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate before January 2, 1985. Beginning January 1, 1985, a State must require proof of payment of the highway use tax before registering trucks in the State.

Effective date

In general, the provision will be effective on January 1, 1984.

However, the new schedule of use tax rates provided by the committee amendment is phased in and is first fully effective for the taxable period which begins on July 1, 1985. The phase-in is structured so that one-third of the use tax change is introduced in the short taxable period which begins on January 1, 1984, and ends on June 30, 1984, and an additional one-third is introduced in the (regular) taxable period which begins on July 1, 1984. Thus, for a vehicle having a taxable gross weight of at least 33,000 pounds, the use tax rate for this short taxable period will be the sum of (i) one-sixth the amount determined under the new schedule and (ii) $1 per 1000 pounds (or fraction thereof) of taxable gross weight. Vehicles having a taxable gross weight under 33,000 pounds will be exempt from the use tax beginning on January 1, 1984. Also, the new de minimus exemption for this short taxable year will be for uses of 2,500 miles or less. For the taxable period beginning on July 1, 1984, the tax rate will be the sum of (ii) two-thirds the amount determined under the new schedule and (ii) $1 per 1000 pounds (or fraction thereof) of taxable gross weight.

Present law will apply to the short taxable period which begins on July 1, 1983, and ends on December 31, 1983. The tax rate for this period will be one-half the current annual rate. The Secretary shall by forms or regulation provide for appropriate installment payments with respect to the two short taxable periods provided by the committee amendment such that no more than two installment payments may be made for a taxable period.

Revenue effect

The provision is estimated to decrease receipts of the Highway Trust Fund by $82 million in fiscal year 1983, and to increase receipts by $212 million in fiscal year 1984, $694 million in fiscal year 1985, $863 million in fiscal year 1986, $925 million in fiscal year 1987 and $964 million in fiscal year 1988.

D. TAXES ON TIRES, TUBES, AND TREAD RUBBER

(Sec. 514 of the committee amendment and secs. 4071–4073 of the Code)

Present law

Excise taxes are imposed on the sale by a manufacturer, producer or importer of tires, inner tubes and tread rubber. The taxes are based on weight: tires for use on highway vehicles are taxed at 9.75 cents per pound; inner tubes for tires are taxed at 10 cents per pound; and tread rubber for use in recapping or retreading highway type tires is taxed at 5 cents per pound. On and after October 1, 1984, these taxes will decrease to the non-highway rate of 4.875 cents per pound for tires and 9 cents per pound for inner tubes; and the tax on tread rubber will expire. Tires, other than laminated tires, that are not intended for highway use are taxed at 4.875 cents per pound. (Examples of such nonhighway tires are those for aircraft, earth movers, and other nonhighway vehicles.) Laminated tires, which are tires not designed for highway use, are taxed at 1 cent per pound.

Reasons for change

The committee believes that the present highway excise taxes should be restructured, simplified, and that nuisance taxes should be repealed. As part of the restructuring of the highway excise taxes, the committee concluded that the tire and tread rubber taxes should apply on a graduated basis so that a higher rate of tax applies to the highway tires generally used by heavier trucks, and that the taxes on nonhighway-type tires should be repealed. This is generally consistent with the highway cost allocation study recommendations of the Department of Transportation and the Administration proposal. Also, the committee concluded that the tax on laminated tires should be repealed as a means of simplifying the highway excise taxes. Finally, the committee determined that the tax on inner tubes should be retained, as most inner tubes are utilized by the heavier highway tires.

Explanation of provisions

Under the committee amendment, there will be a graduated tax on highway tires with the following tax rates and brackets: 9.75 cents per pound for the first 50 pounds, 15 cents per pound for the next 50 pounds, and 25 cents per pound for each pound in excess of 100. Tread rubber will be subject to a tax of 5 cents per pound when used on tires under 50 pounds. The tax rate increases to 8 cents per pound for pounds between 50 and 101 pounds and 16 cents per pound for pounds over 100. The tax on inner tubes is retained at the present rate of 10 cents per pound. In addition, the committee amendment repeals the taxes on laminated tires and all other nonhighway tires.

Effective date

The change in the application of the excise taxes on tires, tubes, and tread rubber will be effective on April 1, 1981. The taxes will expire on October 1, 1989.

Revenue effect

The change in the tax in tires will decrease highway excise tax revenues by $6 million in fiscal year 1983 and $16 million in fiscal year 1984, and increase revenues by $381 million in fiscal year 1985, $337 million in fiscal year 1986, $350 million in fiscal year 1987, and $364 million in fiscal year 1988.

The change in the tax on tread rubber will increase highway excise tax revenues by $7 million in fiscal year 1983, $17 million in fiscal year 1984, and by $39 million per year in fiscal years 1985–1988.

The extension of the tax on inner tubes will increase highway excise tax revenues by $2 million per year in fiscal years 1985–1988.

E. TAX ON LUBRICATING OIL

(Sec. 515 of the committee amendment and secs. 4091–4093 of the Code)

Present law

The sale of lubricating oil is subject to a 6-cents per-gallon tax that is levied on the manufacturer or producer. (This tax is not scheduled to be reduced on October 1, 1984.) Exemptions are provided for oil sold for use in cutting or machining operations on metals. An exemption also applies to sales of rerefined oil. Rerefined oil must be composed of at least 25 percent used or waste lubricating oil that has been cleaned and no more than 55 percent previously unused lubricating oil.

Reasons for change

Since synthetic lubricating oil is used in motor vehicles as is regular lubricating oil, the committee concluded that the tax should be extended to synthetic lubricating oil.

Explanation of provision

The committee amendment retains the present tax on lubricating oil, and extends the tax to synthetic lubricating oil.

Effective date

The extension of the tax on lubricating oil to synthetic lubricating oil is effective for sales after March 31, 1983.

Revenue effect

This provision will increase highway excise tax revenues by less than $1 million per year for fiscal years 1983–1988.

F. FLOOR STOCKS PROVISIONS

(Secs. 521 and 522 of the committee amendment)

Present law

Floor stocks taxes are imposed on inventories of articles with respect to which a tax rate is increased. Present law includes no floor stocks taxes with respect to articles subject to the highway excise taxes. Floor

stocks taxes have been imposed with respect to these articles and other articles in the past when tax rates have been increased.

Floor stocks refunds are refunds of taxes paid on inventories of articles with respect to which a tax rate is decreased. Present law includes provisions for floor stocks refunds of the highway excise taxes on trucks, tires, tread rubber and gasoline when those taxes are scheduled to be reduced, effective October 1, 1984 (Code sec. 6412(a)).

Floor stocks provisions tax or permit refunds with respect to manufacturers excise taxes because those taxes are included in the cost of inventories. On the other hand, retailers excise taxes, such as the excise taxes on diesel and special motor fuels, are not paid before sale to an ultimate purchaser, and are not, therefore, reflected in inventory costs. Accordingly, floor stocks provisions do not apply to retailers taxes.

Reasons for change

Floor stocks taxes and refunds are designed to prevent distortion of markets upon the occasion of a manufacturers excise tax increase or decrease. This distortion could result if dealers artificially increased inventories immediately before a tax increase, or in the case of a declining tax rate, if dealers chose to delay purchases until the tax rate declined. The committee believes that decisions such as when and how much inventory to maintain should not be influenced the impending changes in the rate of tax imposed on such articles.

Explanation of provisions

1. Floor stocks taxes:

The committee amendment imposes a floor stocks tax on gasoline held for sale by a dealer on April 1, 1983, if the gasoline would otherwise be subject to tax under section 4081 if held by a producer on that date. For purposes of this tax, a dealer is defined to include a wholesaler, jobber, distributor, or retailer. An article is considered to be held by a dealer if title has passed to the dealer, whether or not the dealer has actual possession of the article.

The committee amendment also imposes floor stocks taxes on tires, tread rubber, truck parts and accessories, and synthetic lubricating oil, held for sale by a dealer on April 1, 1983, which would be subject to the excise taxes imposed under section 4071, or 4091, as amended, if held by a manufacturer on that date. For purposes of the floor stocks taxes on tires and tread rubber, the term dealer and the circumstances when a dealer is considered to hold tires and tread rubber for sale on April 1, 1983, are defined in the same manner as for the floor stocks tax on gasoline.

The floor stocks taxes are due and payable, by return, on May 15, 1983. Generally, this provides additional time for payment of this tax beyond that allowed for payment of the regular tax on gasoline.

The amount of these floor stocks taxes is equal to the excess of the new tax rates over that previously paid with respect to the articles.

Revenues from the floor stocks taxes will be transferred to the Highway Trust Fund.

2. Floor stocks refunds:

The committee amendment provides for floor stocks refunds of tax paid on articles on which the manufacturers excise taxes are repealed if certain conditions are satisfied. First, the tax-repealed articles must be held for sale by a dealer on the date the tax is repealed. Second, the manufacturer must have records to substantiate his claim that he or she paid the repealed tax on the article. Third, the manufacturer must file a claim with the Internal Revenue Service within ten months after the date on which the excise tax is repealed.

The manufacturer must also reimburse the dealer in an amount equal to the tax or must obtain the written consent of the dealer to the manufacturer's receiving the floor stocks refund. The committee intends that the manufacturer receive the written consent or possess evidence of reimbursement of the dealer before (or simultaneous with) the time any payment is made or credit granted by the Internal Revenue Service.

Tax-repealed articles include trucks with a taxable gross weight of 33,000 pounds or less, trailers with a like weight of 26,000 pounds or less, laminated tires and nonhighway tires, and parts and accessories for trucks and trailers below 33,000 pounds.

The committee amendment also provides for refunds or credits to manufacturers for tax paid with respect to certain trucks and truck trailers that are sold to ultimate purchasers between November 28, 1982, and the date of enactment. To receive these refunds or credits, manufacturers must file a claim with the Internal Revenue Service. This claim must include information similar to that required for refunds with respect to trucks held by dealers on the date of enactment, except the ultimate purchaser, rather than the dealer, must have been reimbursed for the amount of tax previously paid by the manufacturer.

Amounts equivalent to the amount of the floor stocks refunds will be transferred from the Highway Trust Fund to the general fund of the Treasury so the Trust Fund will bear the cost of these refunds.

Effective dates

The floor stocks provisions are effective on the date of the increase or repeal of the manufacturers excise taxes to which they relate.

Revenue effect

The revenue effect of the floor stocks provisions is included in the revenue changes for taxes to which they relate.

G. TERMINATION OF HIGHWAY EXCISE TAXES AND EXEMPTIONS

Present law

Some of the present Highway Trust Fund excise taxes were imposed before enactment of the Highway Trust Fund in 1956. At the time of the Trust Fund's enactment, those existing taxes were increased and new taxes imposed. Because of the special purpose for which the taxes are imposed, they have been scheduled to expire (or be reduced to their pre-trust fund levels) upon the scheduled termination of the Trust Fund.

The present motor fuels taxes (gasoline, diesel, and special fuels) are scheduled to decline from 4 cents per gallon to 1½ cents per gallon on October 1, 1984. The present manufacturers excise tax on trucks and trailers is scheduled to decline from 10 percent to 5 percent on that date, and the 8 percent tax on truck parts and accessories is scheduled to decline to 5 percent.

The tax on highway tires is scheduled to decline to 4.875 cents per pound on October 1, 1984, and the tax on tread rubber is scheduled to expire on that date. The tax on highway use of certain trucks is also scheduled to expire after September 30, 1984.

Present law also provides exemptions from these taxes for differing periods of time. (A full explanation of the scope of these exemptions can be found in the discussion of the particular tax concerned.) Some of the exemptions are of unlimited duration (e.g., the exemptions for State and local governmental and farming uses) and others are granted for only limited periods of time (e.g., the exemptions for gasohol which are scheduled to terminate after December 31, 1992).

Reasons for change

The committee believes that the highway excise taxes should terminate at the same time that the Trust Fund terminates under the committee amendment, September 30, 1989. If Congress determines that it is not appropriate to extend the Trust Fund after September 30, 1989, termination of the highway excise taxes will facilitate its consideration of which highway excise taxes, if any it is appropriate to levy without their dedication to highway and mass transit purposes.

Explanation of provisions

All of the Highway Trust Fund excise taxes continued under the committee amendment terminate, effective on October 1, 1989. The exemptions from these taxes generally are also terminated on this date. However, the exemptions for fuels used in providing qualified taxicab services (as defined under present law) terminate after September 30, 1984. Taxicabs qualifying under the amendment's expansion of the definition of qualified taxicab services are exempt only through December 31, 1983.

Certain excise taxes are repealed by the committee amendment, either in whole or in part. The taxes on laminated tires, and all nonhighway tires are repealed, effective April 1, 1983. The highway use tax on trucks with a taxable gross weight under 33,000 pounds is repealed, effective after December 31, 1983.

H. HIGHWAY TRUST FUND PROVISIONS

(Sec. 531 of the committee amendment and secs. 209(c) and (f) of the Highway Revenue Act of 1956)

Present law

Original enactment of the Highway Trust Fund.

The Highway Trust Fund was established in 1956 (P.L. 84-627) for a 16-year period to provide a specific source of financing for the new Interstate Highway System and continuation of other Federal-aid highway programs. The other highway-aid programs previously had been financed through the general fund.

The Highway Revenue Act of 1956 included a declaration of congressioal policy that (1) if it appears that the total receipts of the trust fund will be less than the total expenditures from the trust fund, or (2) if it appears that the distribution of the tax burden among the various classes of highway users or other beneficiaries of the highways is not equitable, then Congress is to enact legislation to bring about a balance of total trust fund receipts and expenditures or to make an equitable distribution of the tax burden. In addition, the 1956 Act provided for a 3-year highway cost allocation study (later extended for 2 additional years) to determine the fair distribution of highway-related user taxes among the various users.

The 1956 Act also contained a provision—the "Byrd amendment"—to prevent the Trust Fund from reaching a deficit position. In general, this provision originally required that if trust fund balances and estimated future receipts will be inadequate to cover obligations as they become due, a reduction

of the Interstate Highway System apportionment in an amount sufficient to eliminate the difference would be required.

There were increases in 1959 and 1961 in certain of the highway excise taxes to increase the financing of the trust fund.

Subsequent extensions of the Highway Trust Fund:

The Highway Trust Fund and the related highway excise taxes transferred to the trust fund have been extended three times since 1961: a 5-year extension in the Federal-Aid Highway Act of 1970 (from September 30, 1972, through September 30, 1977), a 2-year extension in the Federal-Aid Highway Act of 1976 (through September 30, 1979), and a 5-year extension in the Surface Transportation Assistance Act of 1978 (through September 30, 1984). These trust fund extensions were added by the tax writing committees as a separate title to a highway authorization bill and involved only the extensions of existing highway excise taxes and tax rates.

In the 1978 Act, the operation of the "Byrd amendment" was modified to require that when anticipated revenues are insufficient to cover expenditures, reductions will be made on a pro rata basis to all apportioned highway funds, rather than to interstate apportionments only. Finally, two studies were required: a cost allocation study to be conducted by the Department of Transportation, with a final report to Congress by January 15, 1982; and a study of the highway excise tax structure to be conducted by the Department of Treasury, with a final report to Congress by April 15, 1982. (The highway cost allocation study was submitted to Congress on May 13, 1982. A second progress report on the excise tax study was submitted on October 1, 1981, but a final report has not been submitted.)

Highway Trust Fund expenditure purposes:

Since its enactment in 1956 and through legislation since then, the Highway Trust Fund has been used to finance construction of the Interstate Highway System, other Federal-aid highways, and for other Federal highway-aid programs. The highway programs currently supported by expenditures from the trust fund are listed below:

(1) *Interstate highway system*—(a) Construction to close gaps in the nearly completed basic Interstate system; (b) resurfacing, restoring, rehabilitating and reconstructing ("4Rs") previously completed sections.

(2) *Primary highway system*—(a) Construction and reconstruction and related planning; (b) resurfacing, restoring, rehabilitating these highways.

(3) *Urban and rural area transportation program*—Assistance in urban and rural areas in construction, rehabilitation and reconstruction of local roads, and related planning and research; public transportation capital expenditures; safety improvements and traffic system management. (Urban areas have more than 50,000 persons; rural areas less than that population.)

(4) *Bridge program*—Rehabilitating or replacing structurally deficient bridges.

(5) *Construction and other highway-related safety programs*—Establishment of safety programs and to build safety into highways during their construction, including such things as pavement marking, and elimination of roadside hazards and highway rail crossings.

(6) *Emergency highway relief programs*—Highway funds relating to disaster relief.

(7) *Administration and research through the federal highway administration*—Involving (a) coordination and direction of various public programs and requirements, (b) general program support affecting policy plans and projections and adminstrative support, and (c) engineering and financial assistance.

(8) *Addditional programs*—The Highway Trust Fund contributes a share of costs of certain other programs, including the following:

Forest and public lands highways;

Economic growth center highways;

National scenic and recreational highways;

Railroad-highway crossing demonstration projects;

Rural highway public transportation demonstration projects;

Bicycle pathway programs;

Highway safety research and development;

Car and van pool projects;

Right-of-way revolving fund.

Reasons for change

The 5 year federal highway program authorizations (fiscal years 1983-1987) in the titles of H.R. 6211, as approved by the Committee on Environment and Public Works, and the Administration's recommendations for the same purposes, are directed at completing the Federal Interstate Highway System and maintaining that system and other parts of the Federal-Aid highway system in usable and safe condition. These continuing highway responsibilities involve completing the interstate highway system, expanding a program of resurfacing, restoring, rehabilitating and reconstructing parts of the system as conditions require, and extending the same restoration program to deteriorating portions of the Federal-Aid highway system and highway bridges.

In order that the federal highway programs may continue to be financed by the users of the highways at a rate commensurate with their use of the system, the Highway Trust Fund is extended for a period long enough to pay the financial obligations that will result from the increased spending planned for the revised highway program. The basic character of the Highway Trust Fund statute is extended without essential change, although the trust fund statute is updated to refer to the current executive agencies administering the Federal-Aid Highway Programs. However, as indicated in the next section discussing the new Mass Transit Account, the Highway Trust Fund's general purpose is expanded to include a separate account to receive a specified portion (1 cent per gallon) of the motor fuels tax revenues for mass transit capital expenditures.

Explanation of provisions

1. Extention of the Trust Fund:

The Highway Trust Fund is extended by the committee amendment for an additional 5 years, from September 30, 1984, through September 30, 1989. This is intended to correlate with the anticipated 5-year extension of Highway Trust Fund authorizations.

2. Revenues appropriated to the trust fund:

Under the amendment, amount equivalent to the taxes received in the Treasury under the provisions relating to the highway excise taxes will continue to be appropriated to the Highway Trust Fund for five more years, through September 30, 1989. These are taxes on: (a) diesel and special motor fuels (sec. 4041(a) and (b)),[9] (b) heavy trucks and trailers (sec. 4051(a) and 4061(a)), (c) trucks and truck parts (sec. 4061(b)), (d) tires, tubes, and tread rubber (sec. 4071), (e) gasoline (sec. 4081), (f) lubricating oil (sec. 4091), and (g) use of certain vehicles (sec. 4481). Taxes received after September 30, 1989, and before July 1, 1990, that are attributable to liabilities incurred before October 1, 1989, also are appropriated to the Trust Fund.

3. Expenditures and transfers from the trust fund:

Expenditures may be made from the Trust Fund before October 1, 1989, as provided by appropriation Acts, to meet obligations which have been incurred after authorization by law to be paid out of the Highway Trust Fund established by section 209 of the Highway Revenue Act of 1956. Eligible obligations are those incurred under the Federal-Aid Road Act of July 11, 1916, as amended and supplemented, including administrative expenses of the Federal Highway Administration.

Expenditures from the Highway Trust Fund for highway purposes, however, may not be made from the Mass Transit Account, which is described in section I, below.

Transfers of funds may be made from the trust fund to the general fund for amounts paid before July 1, 1990, that are for tax credits or other payments attributable to non-highway uses of motor fuels and lubricating oil and for floor stock refunds on the basis of claims filed for periods ending before October 1, 1989.

Revenues from the 9-cents-per-gallon taxes on motorboat fuels are to be transferred to the National Recreational Boating Safety and Facilities Improvement Fund through September 30, 1989. The aggregate amount transferred in any fiscal year, however, may not exceed $45 million and no transfers of these amounts may be made if they will increase the accumulated balance in the Boating Safety Fund above $45 million. Any other amounts of motorboat fuels taxes will continue to be transferred to the Land and Water Conservation Fund. Motorboat fuels taxes are defined as the taxes received from gasoline and special fuels used in motorboats.

Anti-deficit provision ("Byrd amendment")

The provision (the "Byrd amendment") that assures the Highway Trust Fund is maintained as a self financing entity is retained without change, including retention of the authority for repayable advances.

Effective date

The increase in the amount of revenues to be transferred to the National Recreational Boating Safety and Facilities Improvement Fund is effective on October 1, 1983 (for fiscal years 1984-1989). The extension of the Highway Trust Fund provisions generally is effective for October 1, 1985-September 30, 1989, except for the 9-month period (through June 30, 1990) for receipt of pre-October 1, 1989 highway excise tax liabilities and certain transfers from the trust fund.

---

[9] Revenues attributable to the fuels taxes on noncommercial aviation gasoline and other fuels (under sec. 4041(c)) continue to be transferred to Airport and Airway Trust Fund, through September 30, 1987. Amounts appropriated to the Airport and Airway Trust Fund from the tax on aviation fuels are deducted beforehand from the amounts deposited in the Highway Trust Fund.

I. MASS TRANSIT ACCOUNT

(Sec. 532 of the committee amendment and sec. 209(h) of the Highway Revenue Act of 1956)

Present Law

There is no transit account in the Highway Trust fund and no transit trust fund that receives tax receipts designated for deposit in such an account or fund.

Reasons for Change

Rail and bus transit systems move millions of people daily. They complement and are interdependent with highways in moving people and goods efficiently and economically in and around urban areas. Capital investment in these systems has not kept pace in recent decades with growth requirements or the deterioration of the existing capital structure. The Administration has estimated that capital investment needs for urban rail and bus transit could total almost $50 billion over the next decade.

In order to address transit needs, the committee amendment provides that the equivalent of one cent of the 9 cents a gallon fuels taxes in the committee amendment be available for capital improvement to mass transit through fiscal year 1989. The provision will provide about $1.1 billion each full fiscal year, and these funds will be in addition to the amounts appropriated from the general funds of the Treasury for mass transit.

Explanation of Provision

Under the committee amendment, a separate Mass Transit Account is established in the Highway Trust Fund. It consists of the revenue equivalent to the amount raised by 1 cent a gallon of the 9 cents a gallon excise taxes imposed on gasoline and diesel and special motor fuels (secs. 4041(a) and (b) and 4081). These amounts are to be transferred to the Mass Transit Account with the same regularity and under the same conditions as amounts from these taxes are transferred to the Highway Trust Fund. Interest earned as a result of investment in United States securities on the portion of amounts in the Highway Trust Fund that are attributable to the Mass Transit Account shall be credited to the Mass Transit Account.

Amounts in the Mass Transit Account shall be available, as provided by appropriation Acts, for making capital expenditures (including capital expenditures for new projects) before October 1, 1989, under section 22 of the Urban Mass Transportation Act of 1964. Expenditures from the Mass Transit Account may be made only for mass transit capital purposes, and no expenditures may be made from this account for highway purposes. These also will be authority, as there is under the Highway Trust Fund generally, for repayable advances for the Mass Transit Account.

In approving capital expenditures for new transit systems, it is the committee's belief that preference should be given to projects which maximize the cost-effectiveness of the federal contribution, including use of existing infrastructure, like existing track, or substantial non-federal capital contributions.

Effective date

The provision establishing the Mass Transit Account shall take effect on April 1, 1983 (the effective date of the increased fuels taxes).

J. TREATMENT OF MOTOR CARRIER OPERATING AUTHORITIES HELD BY CORPORATIONS ACQUIRED BY NONCORPORATE TAXPAYERS

(Sec. 517 of the committee amendment and sec. 266(c)(2) of the Economic Recovery Tax Act of 1981)

Present law

The Economic Recovery Tax Act of 1981 provided that an ordinary deduction is allowed ratably over a 60-month period for taxpayers who held one or more motor carrier operating authorities on July 1, 1980. The amount of the deduction is the total adjusted bases of all motor carrier operating authorities either held by the taxpayer on July 1, 1980, or acquired after that date under a binding contract in effect on July 1, 1980. The 60-month period begins July 1, 1980 (or, at the taxpayer's election, with the first month of the taxpayer's first taxable year beginning after July 1, 1980).

Under the Act, adjustments are to be made to the bases of operating authorities held on July 1, 1980 (or acquired thereafter under a binding contract in effect on July 1, 1980) to reflect amounts allowable as deductions.

Under regulations to be prescribed by the Treasury Department, an election may be made by the taxpayer holding an operating authority on July 1, 1980, to allocate to the operating authority a portion of the cost basis to the acquiring corporation of stock in an acquired corporation. The election is available only if the operating authority was held directly by the acquired corporation at the time its stock was acquired or was held indirectly through one or more other corporations. In either case, a portion of the stock basis may be allocated to the operating authority only if the acquiring corporation would have been able, if it had received the operating authority in one or more corporate liquidations immediately following the stock acquisition, to allocate such portion to the operating authority under section 334(b)(2). The election applies only if the stock was acquired on or before July 1, 1980 (or pursuant to a binding contract in effect on such date) and only if, on the date the stock was acquired, the acquired corporation held, directly or indirectly, the operating authority.

In all cases, adjustments are also to be made to the basis of the acquiring corporation in the stock of the acquired corporation to take into account any allocation of the basis in the stock to an operating authority. In addition, the Treasury regulations are in all cases to provide for an appropriate adjustment to the basis of other assets.

Reasons for change

It has come to the attention of the committee that certain corporations holding motor carrier operating authorities were acquired by noncorporate taxpayers in situations where, had the purchaser been a corporation, the basis of the authority would have been increased. The committee believes that similar treatment should be afforded corporations holding authorities regardless of whether or not the purchaser of the corporation's stock was another corporation.

Explanation of provision

Under the committee amendment, if one or more noncorporate taxpayers on or before July 1, 1980, acquired in one stock purchase the stock of a corporation which, at the time of acquisition, held directly or indirectly any motor carrier operating authority, the acquisition shall be treated, for purposes of the provisions of section 266(c)(2) of ERTA (relating to certain stock acquired), as having been acquired by a single corporation. Thus, the basis of the operating authority may be adjusted to reflect the stock acquisition price. In order to qualify for these adjustments, the purchasers must have held at least 80 percent of the corporate stock on July 1, 1980.

Rules similar to the rules applicable to authorities held by corporations acquired by a corporate purchaser are to apply to authorities of corporations acquired by noncorporate purchasers.

Effective date

The provision is effective for taxable years ending after June 30, 1980.

Revenue effect

This provision is estimated to reduce fiscal year budget receipts by less than $5 million.

IV. REVENUE EFFECTS OF THE COMMITTEE AMENDMENT

The revenue effects of the committee amendment as approved by the committee are summarized in three tables.

Table 2 presents the estimated changes in Highway Trust Fund tax revenues by major component compared to receipts under current tax rates extended through 1988. Total Highway Trust Fund revenues are projected to increase by $2.2 billion in fiscal year 1983, $5.3 billion in 1984, $5.4 billion in 1985, $5.5 billion in 1986, $5.6 billion in 1987, and $5.7 billion in 1988. The table also shows the net revenue effects of the committee amendment, which take into account the decreases in income taxes resulting from higher excise taxes. The net revenue effects on budget receipts are estimated at $1.7 billion in fiscal year 1983, $4.0 billion in 1984, $4.1 billion in 1985, $4.2 billion in 1986, $4.2 billion in 1987, and $4.3 billion in 1988.

Table 3 provides comparable data but the revenue changes have been calculated from receipts that would have been collected under rate reductions or expirations scheduled for 1984. Consequently, the revenue gains shown in this table are substantially higher than those in Table 2 for fiscal years beginning with 1985: $9.6 billion in 1985, $9.9 billion in 1986, $10.1 billion in 1987, and $10.4 billion in 1988.

Finally, table 4 shows total estimated Highway Trust Fund tax revenues under the committee amendment for fiscal years 1983–1988. Total Trust Fund tax revenues will increase from $6.7 billion actual in fiscal year 1982 to $8.6 billion in fiscal year 1983, $12.2 billion in fiscal year 1984, and $13.8 billion in fiscal year 1988.

TABLE 2.—ESTIMATED CHANGES IN HIGHWAY TRUST FUND TAX REVENUES UNDER SENATE FINANCE COMMITTEE AMENDMENT COMPARED TO RECEIPTS AT CURRENT TAX RATES EXTENDED THROUGH 1988

Tax	Fiscal years—					
	1983	1984	1985	1986	1987	1988
Gasoline	2,211	4,442	4,292	4,151	4,100	4,132

Notes.—Revenues are net of refunds and transfers.

GEORGE KISTIAKOWSKY

Mr. KENNEDY. Mr. President, on December 7, 1982, one of our Nation's greatest scientific leaders, George B. Kistiakowsky, died of cancer at the age of 82.

George Kistiakowsky's life spanned decades of rapid and dramatic developments in our modern history, and he himself was a pioneer at the frontier of some of the most important of those developments. As one of America's foremost scientists, he participated in the development of the first atomic bomb during World War II—and later he became a leader in the effort to control those weapons. He also served with great distinction as adviser to President Eisenhower and to President Kennedy. More recently, he has been familiar to all of us in Congress as president of the Council for a Liveable World.

Professor Kistiakowsky's dual experience as an accomplished scientist and active policymaker was daily proof of his long-held conviction that scientists should not confine themselves to ivory towers, but should be actively concerned with the application of their knowledge to social and political issues. I know that President Kennedy greatly valued his counsel, not only because of Dr. Kistiakowsky's extraordinary intellectual insight, but also because of his warmth and compassion, and his commitment to a better world.

His overriding concern in the last years of his life was with the prevention of nuclear war. He worked with extraordinary dedication to awaken the public about the dangers of the continuing arms buildup. As he once said:

The political leaders of powerful nations continue uttering pious words about their love of peace, but the arsenals keep growing, the stability of nuclear peace is being undermined, and the proposals for arms control negotiations on both sides are so unbalanced as to be obviously non-negotiable.

And in the December issue of the Bulletin of the Atomic Scientist, commemorating the 40th anniversary of the first nuclear explosion, Dr. Kistiakowky wrote:

As one who has tried to change these trends, working both through official channels and, for the last dozen years, from outside, I tell you as my parting words: Forget the channels. There simply is not enough time left before the world explodes. Concentrate instead on organizing, with so many others who are of like mind, a mass movement for peace such as there has not been before. But the threat of annihilation is also unprecedented. Then lead the movement so that, instead of the few now in Washington, many will be elected to Congress who have a true and unbreakable commitment to search for peace.

Mr. President, I ask unanimous consent that the eloquent editorial on Dr. Kistiakowsky in the Boston Globe on December 9 may be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Boston Globe, Dec. 9, 1982]

GEORGE KISTIAKOWSKY

A man is best measured not in deeds done, words spoken and honors garnered at the pinnacle of his career, but later when the full sweep of his life can be seen.

George Kistiakowsky, who died Tuesday at the age of 82, can be so measured. He was born in Kiev, Russia in 1900, the son and grandson of professors, and he became one too. He taught chemistry to Harvard students for 41 years. In the epigrammatic elegance with which it bestows honorary degrees, Harvard honored him, saying: "Swift and explosive force, your imaginative talents have both widened our knowledge of chemical structures and enriched the life of this university."

Kistiakowsky, indeed, made things explode. He began as a teenager in his parents' apartment, trying to concoct nitroglycerin. He continued as a tankman in the White Russian Army where, he later recalled, he spent most of his time "running away from the Bolsheviks and changing generals." Later in the Harvard chemistry lab he punctuated a celebrated annual lecture by blowing things up "to show the students that's what they shouldn't do."

His greatest explosion caught him off guard. That was Trinity, the codename for the device exploded on a tower in the New Mexico desert in July 1945, the dawn of the nuclear age. As head of the Los Alamos laboratory of the Manhattan project, Kistiakowsky had built the Trinity bomb's trigger.

Expecting a smaller blast than 20,000 tons of TNT, Kistiakowsky was knocked into a trench. He said to a reporter: "I am sure that at the end of the world—in the last millisecond of the Earth's existence—the last human will see what we have seen."

Kistiakowsky's awards and peak of influence came later. He was appointed science adviser to President Dwight Eisenhower during the Cold War, when the US and Soviet nuclear arsenals surged to incredible destructive capacities. For his service during that period he was showered with awards.

Through it all, he was changing, growing. "At first I felt I was working in the national interest," he later said. "After working so long on weapons, I came to the conclusion that the time had come to control them."

Eisenhower, with Kistiakowsky behind him, vastly expanded US nuclear weaponry, but at the same time ignited the countercurrent of arms control. Ike's famous farewell address warned not only of the menace of a "military-industrial complex" but of a related concern he had often discussed with his science adviser, "the danger that public policy could become the captive of a scientific and technological elite." The respect in which Eisenhower is held today stems largely from that speech.

Kistiakowsky served as an adviser to the Pentagon until 1968. By then he was deeply disturbed at the trends he perceived. "I went into war work in 1940," he told an interviewer last year, "because I was violently against Nazism. After World War II I was foolish enough to swallow hook, line and sinker the intense Washington propaganda that the Soviet Union was ready to conquer the world."

Later, he said, "I began to realize that the policy was being formed in a way that was really questionable. It was being formed by people who didn't know the facts and didn't have time to learn them."

Kistiakowski referred to the current buildup of Pentagon spending as "this militarization of the country." He believed it was a delayed reaction to the loss of the Vietnam war, and he cited an historical pattern he'd seen before: "It happened in France, Czarist Russian, and Germany."

In the twilight of his life, Kistiakowsky headed the Council for a Liveable World. Though wracked with cancer, he had a new perception of what was needed to curb the arms race, which he expressed in an editorial in the current issue of the Bulletin of Atomic Scientists:

"As one who has tried to change these trends, working both through official channels and for the last dozen years from the outside, I tell you as my parting words: Forget the channels. There simply is not enough time until the world explodes. Concentrate instead on organizing, with so many others who are of like mind, a mass movement for peace such as there has not been before. . . . Then lead the movement so that, instead of the few now in Washington, many will be elected to Congress who have a true and unbreakable commitment to search for peace."

Kisty, as friends called him, stood six foot three when he was younger. Against the back drop of his life and times he's taller still.

FUNDING OF FEDERAL DRUNK DRIVING INITIATIVES, EXCISE TAX ON ALCOHOL

Mr. DOLE. Mr. President, on October 25 of this year, the President signed a new 3-year Federal antidrunk driver initiative into law. The major thrust of that law is to provide incentive grants to States which have enacted specified laws and adopted certain procedures in support of a comprehensive program of drunk driving countermeasures. The funding authorization for the new law shifted $125 million of highway trust fund revenues to the new program. Although these funds represent only a small segment of highway trust fund revenues, those revenues have not been keeping up with demands on the fund. With the new demands on highway trust fund dollars now being discussed that will require additional gasoline tax revenues, I believe that we ought to also look closely at other possible revenue sources to help support Federal drunk driving programs, since gasoline taxes are now funding the bulk of our Federal drunk driving initiatives.

This Senator believes that Congress ought to look to the drinker who pays the alcohol excise tax as well as the driver who pays the gasoline tax to share the cost of Federal programs aiding the States in their battle against the drunk driver. It is reasonable that at least some of the costs of drunk driving countermeasure programs at the Federal and State level should be born by alcohol rather than by gasoline users. The alcohol tax, which has not been increased for over 30 years, may be a logical revenue source to help remove from our roads the most common violent killer in the Nation, the drunk driver.

NATIONAL DRUNK AND DRUGGED DRIVER AWARENESS WEEK

Mr. DOLE. Mr. President, the week of December 12 through 19 has been designated by Congress and proclaimed by President Reagan as "National Drunk and Drugged Driving Awareness Week." The observance of this life-saving week at this time of year is particularly appropriate, with so many Americans on the roads for the holidays visiting family and friends.

Tragically, we will all be sharing the highways with drunk drivers who will bring death to hundreds of families during this joyous holiday season. As a congressional representative on the President's Commission on Drunk Driving, I call on my colleagues in the Congress and on every citizen in the Nation to support and observe this week by taking three specific, personal steps to combat drunk drivers. First, be a friend and do not let a friend drive drunk. Second, before drinking and socializing, agree to designate a sober driver, and third, buckle up—it could help you survive a deadly encounter with a drunk driver.

Drunk drivers are the No. 1 violent criminal killer in the land, according to National Highway Traffic Safety Administration figures. Last year, over 26,000 Americans were killed by drunk or drugged drivers, and three-quarters of a million Americans suffered crippling or other serious injuries at their hands. Our Nation's experience also shows that half of the Nation's drivers can someday expect to be involved in a crash with a drunk driver. The problem with drunk drivers is particularly a problem of attitudes. Everyone favors cracking down on drunk drivers unless they happen to be a friend, family member, associate, or ourselves.

Drunk drivers have found a sanctuary in the social acceptability of their conduct that comes when too few of us dare to speak up to stop a friend or associate from driving drunk. Those who want to take truely effective action to challenge that social acceptability can begin during Drunk and Drugged Driving Awareness Week. As a demonstration of support during the week, drivers are being encouraged to turn their headlights on during the day and to display a light in their windows at home.

During the last 2 years, citizens groups across the Nation, such as Mothers Against Drunk Drivers (MADD) and Remove Intoxicated Drivers (RID), have catalyzed legislative action in Congress and in many States reforming drunk driving laws. Our Presidential Drunk Driving Commission hearings have focused on studies of tough Scandanavian-type drunk driving laws, showing that their potency evaporates with time when they are not regularly enforced in a high visibility environment. Such high visibility enforcement of drunk driving laws only comes when private attitudes support tough public policy. Some of the most effective enforcement of our drunk driving laws takes place in our homes and at social gatherings before a drinker even becomes a drunk driver—thanks to peer pressure.

This week presents all of us in this Nation with a critical opportunity to close ranks against the No. 1 violent killer in America—the drunk driver. What we do this week can and will save lives. Let us resolve for the new year to keep the drunk driver off our highways.

A TRIBUTE TO SENATOR HARRY F. BYRD JR.

Mr. GRASSLEY. Mr. President, I note with a tinge of sadness that we are about to lose a colleague whose bearing of dignified gentility exemplifies the qualities most highly treasured in this, the world's greatest deliberative body.

I am referring to our distinguished colleague, HARRY F. BYRD, JR., a fine Virginia gentleman if ever one existed, who for 17 years has carried on a family tradition of faithfully serving the people of his Commonwealth, a tradition that has continued through most of this century.

Beyond the fondness which will remain in our hearts for the Senator from Virginia after he retires in January, he has made his mark through his devotion to the principle of fiscal integrity.

From the beginning, the Senator was a lonely voice in the wilderness calling for simple commonsense in our spending practices—long before the advent of the born-again budget balancers, who now so fashionably preach the doctrine of fiscal conservatism, while continuing to seek big government solutions to our problems.

Indeed, I hope my colleagues will excuse me for reminding them with some pride that I was associated with the Senator from Virginia in one of the greatest legacies he has left Congress and the people of this Nation, having been House sponsor of the Byrd-Grassley balanced budget amendment in 1978.

This body will never again vote on a spending bill that unbalances the budget without a reminder from the Senator from Virginia that we are violating not only our fiduciary obligation to the American people, but also the law of the land.

Mr. President, I am grateful for the opportunity to have served in this body with the Senator from Virginia, if only for a short 2 years, just as the Nation is grateful for his 17 years of devoted public service as a U.S. Senator. May God bless him and his family as he returns to private life.

A TRIBUTE TO SENATOR HARRISON "JACK" SCHMITT

Mr. President, it is rare in these days of increasing specialization that an individual shows the versatility to pursue successful careers in more than one area of public service. But our colleague from New Mexico, JACK SCHMITT, followed up a glowing career as an astronaut by shooting for the stars here in the U.S. Senate.

The Senator has made a name for himself here in the service of the people of New Mexico, just as he did in his earlier public service. I can testify to that, having joined JACK as cosponsor of the Schmitt-Grassley legislative veto amendment. It is further testimony to his leadership that the legislative veto passed by a wide margin in the Senate.

It would be a fitting tribute to our colleague from New Mexico if the House of Representatives, which has sat on the regulatory reform bill that

passed the Senate 94-0, would allow the bill to go through before this "lameduck" session comes to an end.

In that way, Senator SCHMITT would be able to add a new line to his entry in the history books: the man who returned representative government to the United States.

A TRIBUTE TO SENATOR S. I. "SAM" HAYAKAWA

Mr. President, our colleague from California, Senator SAM HAYAKAWA, first burst onto the national scene in the late 1960's, when as president of San Francisco State College, his keen repartee proved a perfect foil to the ravings of those who threatened to disrupt the California college system.

It was the same kind of razor-sharp wit that characterized the Senator from California's contribution to the debate in this body. A noted semanticist, the Senator distinguished himself by lending support to conservative causes with incisive comments that often hit the nail right on the head, the kind of comments that endear politicians to the press.

Mr. President, I for one will miss the opportunity to witness the Senator's rapier thrusts at the opponents of commonsense. I wish him God's blessings and good luck as he retires this January.

A TRIBUTE TO SENATOR NICHOLAS BRADY

Mr. President, the dictionary defines "public-spirited" as "having or showing an unselfish interest in the public welfare."

I do not believe that any public servant I have known has fit this description better than the Senator from New Jersey, NICHOLAS BRADY, who will be leaving this body next month.

Senator BRADY accepted the call to public service from Governor Kean at considerable personal sacrifice, under the difficult circumstances of succeeding a Senator who retired in the shadow of scandal, and with the understanding that Senator BRADY would not advance his own career by seeking election.

Since his arrival here, the Senator has wasted no time in participating both in the business of the Senate and in the public debate on the difficult issues of the day. In this he has drawn upon the considerable reservoir of skills afforded him by his business experience—industriousness, commonsense, tact, and sensitivity to the problems faced by the people of New Jersey and of the Nation.

Senator BRADY'S tenure here has been brief but brilliant; his service to the people of New Jersey sterling. I wish the Senator from New Jersey Godspeed and good luck as he returns to the business world, and hope he returns frequently to his friends here to give us the further benefit of his counsel.

TRIBUTE TO SENATOR HARRY F. BYRD, JR.

Mr. INOUYE. Mr. President, I rise today to pay tribute to the senior Senator from the State of Virginia, my good friend HARRY F. BYRD, JR. After a long and distinguished career spanning 17 years, Senator BYRD has chosen to retire from the U.S. Senate. In so doing, this body will lose one of its most respected Members.

Senator BYRD is a man of high principle and great integrity. He brings to his work a spirit of independent-mindedness and forthrightness that has contributed immeasureably to the business of his respective committees and the Senate as a whole. As a member of the Armed Services Committee and the Finance Committee, he has consistently spoken out on behalf of fiscal restraint. In our discussions on the Senate floor, he has always contributed to maintaining the highest levels of debate, invoking clear and constant principles of responsibility and accountability in Government. Senator BYRD has served the people of Virginia well and brings credit to this institution.

It has been a great pleasure working with HARRY BYRD, and I will miss him when he retires from the Senate. I want to join my colleagues in wishing him every success and much happiness in the years ahead.

TRIBUTE TO SENATOR NICHOLAS BRADY

Mr. President, since he took office in the U.S. Senate in April, NICHOLAS F. BRADY has served the State of New Jersey and our Nation with honor and distinction.

In his several months in the Senate, Senator BRADY has impressed us with his sense of leadership and extensive expertise in the business world. His membership on the Armed Services Committee and the Banking, Housing and Urban Affairs Committee has enabled his contributions to the formulation of legislation that will affect our Nation's domestic economy and military readiness for many years to come.

It is with much gratitude that I extend my best wishes to Senator BRADY on his return to private life. In a time of difficulty, he has performed with confidence and skill. I hope that he has found his experience in the Senate as fulfilling and rewarding as he had hoped.

I wish to join my colleagues in expressing my hopes for his continued success.

TRIBUTE TO SENATOR HARRISON SCHMITT

Mr. President, 10 years ago this week, JACK SCHMITT was on his way to the Moon as a member of the Apollo 17 mission. Our colleague has already made a name for himself in history through his exploits as an astronaut and I am confident that we will continue to sing his praises in his new endeavors. Yet, in my judgement, Senator SCHMITT'S most important contribution to our society and our Nation will probably be appreciated by only a very few.

For the past 2 years, I have had the honor of working closely with Senator SCHMITT in his role as chairman of the Senate Appropriations Subcommittee on Labor-HHS-Education. This is one of the most important, if not the most important, subcommittee in the Senate and its activities touch on the lives of every one of our citizens. During his tenure, Senator SCHMITT had to make a number of very difficult decisions and, in my judgment, did an admirable job. It was quite evident to me that he is a man who really cares about our Nation's minorities, children, handicapped, and those who really need support from the Federal Government.

For a number of years, we have, unfortunately, allowed our various programs to expand without ever requiring them to be accountable and to demonstrate that they were in fact effective. Every one of us in this Chamber has often wished that we could take the easy route and vote for bigger and more expensive programs, yet JACK SCHMITT for the past 2 years, has had the responsibility of bringing us back to reality.

I am most pleased to have been able to work closely with him during these past 2 years and was most impressed by his compassion, dedication, and willingness to ask the hard questions. It would be a tremendous understatement to say that he has been more than fair to our Nation's professional nurses and especially to those, such as the mentally ill, or the residents of the Pacific Basin or our Nation's Hispanic citizens, who have not traditionally had a vocal lobby arguing on their behalf.

Senator SCHMITT brought the highest level of integrity to our deliberations and I personally felt extraordinarily confident that his recommendations would be equitable and just and, above all else, be the result of having weighed all the factors involved.

I will miss working with Senator SCHMITT in the years to come; however, I am confident that a number of the trends that he has started, such as stressing the importance of preventive health care/behavioral medicine, evaluating the efficacy of the various psychotherapeutic techniques, and insuring that the National Institutes of Health will be vigorous, but yet accountable, will continue.

JACK SCHMITT is a most farsighted man and I have learned a lot working with him.

A TRIBUTE TO HOWARD W. CANNON

Mr. President, it is with mixed emotions that I rise to pay my heartfelt tribute to my friend and colleague HOWARD CANNON.

I deeply regret that I shall not be able to continue serving with him. He has been a conscientious, influential, and extraordinarily able representative of the people of Nevada. At the same time, I welcome this opportunity to honor his many accomplishments and salute his valuable contributions to the American people.

I feel a special affinity for HOWARD CANNON because I had the pleasure of working closely with him in the Senate Commerce Committee, of which he was chairman between 1978 and 1980. During his tenure, he put his stamp permanently on domestic economic policy as he chaired the committee during the deregulation of the airline, trucking, and rail industries. The adoption of these deregulatory policies has resulted in profound changes in the structure of the American economy and has irrevocably altered the transportation sector.

He has had a special interest in and knowledge of the airline industry. He is generally acknowledged to be one of the Congress leading experts on aviation, both commercial and military. His experience has been gained through his service as chairman of the Aviation Subcommittee of the Commerce Committee and the Military Aviation Subcommittee of the Armed Services Committee and as a pilot who rose to the rank of general in the Air Force.

HOWARD CANNON gained the respect of his colleagues not through appealing to the media but rather by doing his homework and consulting with his colleagues. He has learned how to be quietly effective in the Senate and to achieve his goals through hard work, persistence, intelligence, and compromise. These qualities are the hallmark of a political statesman and a leader.

I shall cherish the many years that I have known HOWARD. I extend my fondest regards to him and his lovely wife and my hope that they will carry with them the knowledge that he has carved out a memorable career in this body and enjoys the admiration and friendship of his colleagues.

U.S. NUCLEAR WEAPONS STRATEGY

Mr. DANFORTH. Mr. President, it is high time that we had a major national debate on U.S. nuclear weapons strategy. We currently do not have a clear or coherent policy. Instead, we are besieged with conflicting claims and technical arguments. A resolution of these conflicts should be our first priority. Consider what will confront the new Congress when it convenes.

The United States has signed three arms control agreements which remain unratified—SALT II, the Threshold Test Ban Treaty and the Peaceful Nuclear Explosion Treaty. After years of effort, the American initiative toward a comprehensive test ban treaty apparently has wound up on the trash heap. Our continued informal compliance with SALT I and SALT II is clouded. Some in this administration have suggested that the SALT agreements are fundamentally flawed. Others have recommended deployment of antiballistic missiles in violation of the ABM Treaty. A defense guidance paper has been formulated which raises more questions than it answers about U.S. attitudes toward limited or protracted nuclear war and the first use of nuclear weapons.

U.S. nuclear nonproliferation policy also is in a state of confusion. Export restrictions affecting nuclear fuel cycle and reprocessing technology have been relaxed. Exemptions for highly developed countries from U.S. inspection standards under the 1976 Nuclear Nonproliferation Act are being contemplated. Our previously firm commitment to full international inspection safeguards may be loosened. If the administration believes that these actions enhance nonproliferation then it must make its case—forthwith. Otherwise our credibility as the world leader in containing the spread of fissionable materials is seriously jeopardized.

Four months ago I introduced a resolution in the Senate requesting the President to reimpose some semblance of order on the entire process of nuclear strategy including arms control and specific weapons policy by making a report on these matters to Congress. It posed the questions of where we stand, where we intend to go, and how we intend to treat all existing agreements including those that have been signed but not ratified. The resolution received strong bipartisan support and passed the Senate unanimously in late September. The administration has chosen to ignore the December 1 deadline of the request. This is regrettable because the administration's continued silence encourages complete disarray in the debate and insures that it will be dominated by forces outside of the executive branch. Moreover, the President's steadfast distance has left our Government's stewardship of the most important moral issue in the history of humankind—how to reduce the risk of nuclear war—in the hands of technicians. The result has been a piecemeal discordant effort, a woeful lack of progress in our negotiations, and a preoccupation with detail instead of fundamental principles.

In this light, it is deplorable that a lameduck session of the Congress might actually deal with such critical matters as appropriations for the Pershing and MX missiles and legislated reductions in U.S. conventional force levels in NATO. It is almost impossible to sort out the array of technical arguments over nuclear weapons. Therefore, most of us must make decisions on the basis of broader national security grounds. Eleventh hour maneuvering in a lameduck session would be a disaster no matter what the outcome.

The details of our strategic weapons development and our long-term commitment to the maintenance of conventional forces in NATO should be settled only after a comprehensive framework has been put forward by the President and its content has been debated thoroughly. For example, does the maintenance of mutual deterrence and crisis stability still constitute the foundation of our strategic planning? Is the achievement of arms limitation seen as an essential part of our national security posture? Can our reliance on strategic weapons be reduced without paying the price of increased conventional preparedness? And finally, can we implement a successful strategic policy without public support and the strong support of our allies on all aspects of East-West relations?

The President must assert his leadership over the arms control process. Not to do so will depreciate the institution of the Presidency and the future success of our negotiations. In the final analysis the complex puzzle of how to reduce the risk of nuclear war can only be fit together from the very top. Those of us who want a strong national defense are prepared to offer our support, but we need a clearer sense of purpose.

SENATOR HARRY F. BYRD, JR.

Mr. SIMPSON. I want to share with you some of my feelings as we observe the retirement of that extraordinary gentleman and statesman, HARRY F. BYRD, JR. I think of his courageous act in indicating late last year to the people of his beloved State of Virginia that he would not seek a fourth term in the U.S. Senate. I think many of us shared with him our feelings about his decision at that particular time.

My father, Milward L. Simpson, and HARRY's father, Harry F. Byrd, were very fine and close friends serving together in this U.S. Senate. In fact, my father often indicated that this was one of the men he most enjoyed working with.

It is my regret that I did not come to know HARRY better. But with the extraordinary array of hurried conferences, cursory greetings, floor debate, three or four overlapping committee or subcommittee meetings scheduled at the very same moment in time, constituents waiting in the office—one does not always get to come to know one's colleagues well. There is then the additional limitation of not having served together on committees or subcommittees, which further limits that

opportunity to bring an acquaintance into the fruition of full friendship. It is just not often possible in this extraordinary arena.

But in my times with HARRY—in either political endeavors or social activities—I can only say that he has generated in me a great feeling of respect and admiration.

Additionally, my wife Ann and I have deeply appreciated the many kindnesses that he has extended to us during our time here. He and Gretchen were always most thoughtful and gracious to us.

Ann joins me in extending our warmest personal regards to the Byrds together with all of the blessings of this holiday season and with the hope that the two of them will have many productive and beautiful years to enjoy in their magnificent State of Virginia. Indeed, the people of that State must be very proud of him. I know that they are. All of us here are too.

My remarkable parents would join in conveying love and respect to you for what you have done for your country, for your State and for the U.S. Senate. It is a better place because you served here. God bless you, HARRY.

THE RETIREMENT OF SENATOR HOWARD W. CANNON

I extend my best wishes to HOWARD CANNON as he enters into new pursuits in life. I did not have the opportunity to serve on committee assignments with HOWARD but his span of service to his country is remarkable indeed. He served in the Senate when my father was present here as a Member. Dad always enjoyed his service with HOWARD. I wish him every success in his new ventures in life and am pleased that I had the opportunity to serve in this body with him.

I commend him for his fine service to his country, his State, and to this body.

THE RETIREMENT OF SENATOR S. I. HAYAKAWA

One of the first persons I met when coming to the U.S. Senate was SAM HAYAKAWA. I recall that first visit with great vividness. It was a pleasant conversation and he offered me assistance and support as I embarked upon my new duties in the Senate. I have not had the pleasure of serving with him on committees in this body, nor have our interests drawn us into close contact. However, I worked with him in regard to the discussion, deliberation and debate on the Immigration Reform and Control Act of 1982. He followed the issue with great persistence and awareness.

SAM HAYAKAWA has brought to this body a freshness in language and communication that we have all deeply appreciated. He is an extraordinary person of multifaceted talents.

It has been my privilege to come to know him and to find the essence of that fine sense of humor and courteous demeanor and this persistence of attitude that is to be envied in this Chamber.

I wish him well as he goes on to new challenge in his life—just as he has done for all of his 76 years. He has given much to his country, to his State, and to this Senate. He has much more to render. I have greatly enjoyed my service with him in the Senate.

GAS PRICES SOAR

Mr. EAGLETON. Mr. President, the Bureau of Labor Statistics this morning announced that the Producer Price Index for November had increased by 0.6 percent. The leading component in that index was the price of natural gas which was up a full 5 percent. Between November 1981 and November 1982, the price of natural gas at the producer level has gone up 25.7 percent.

Mr. President, this report may shock some Members of this body, but it is no surprise to me. Natural gas prices in the Kansas City area this winter are expected to increase by 37 percent and in the St. Louis area by 20 to 25 percent. In many cities around the country price increases in excess of 60 percent are possible unless this Congress acts to halt these runaway prices.

Mr. President, all this week the corridors have been jammed by representatives of the gas producers who have heard there might be some of us in the Senate planning to stand up for the consumers interests at the expense of their very sizable profits. They are right. I am one of those Senators who does not believe we can wait until next summer to deal with the problem. Senators KASSEBAUM, DANFORTH, and I will press for action now—in this lameduck session—to put a stop to these unjustified, horrendous price increases.

One of the measures we will be supporting is abrogation of the anticompetitive "take-or-pay" clauses which force some pipelines to accept delivery of $6 to $9 gas while gas costing as little as 85 cents per mcf is kept in the ground. We have glut of gas supply in this country but the laws of supply and demand are not allowed to work by virtue of these "take-or-pay" contracts and the consumer is the loser. The situation makes a mockery of the arguments we heard during the deregulation debate that the free market should be allowed to set the price of natural gas. There is no free market under these contracts. We have merely traded Government regulation of prices for producer regulation. For Congress to end this lameduck session without acting to put an end of this ripoff would be unconscionable. There may be enough Members who will be persuaded that the matter is just too complex to deal with until next year, and they may vote down the reasonable measures we are offering. But, we are determined to bring this matter to a vote. If Members want to tell the folks back home they cannot do anything about today's heating bills until next summer, that will have to be their choice. But, we are determined those folks back home know what their position is.

Mr. President, a full explanation of what has been going on in the natural gas industry since the deregulation act of 1978 is provided by a General Accounting Office report made available yesterday. So that all Members will have the benefit of these facts, I ask that the report be printed in full at this point in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

U.S. GENERAL ACCOUNTING OFFICE,
Washington, D.C., December 9, 1982.

Hon. THOMAS F. EAGLETON,
U.S. Senate.
Hon. MICHAEL D. BARNES,
House of Representatives.
Hon. GEORGE MILLER, ET AL.,
House of Representatives.

This report is in response to your separate, but similar, requests for information explaining recent natural gas price increases and simultaneous reports of "excess" natural gas supplies. This report is not an evaluation of any agency's performance and contains no recommendations.

This is a preliminary report, and we are continuing our efforts in this area. We did not obtain agency comments on the matters discussed.

We are sending copies of this report to the Secretary of Energy and the Chairman, Federal Energy Regulatory Commission.

J. DEXTER PEACH,
Director.

COSIGNERS OF REQUEST LETTER FROM REPRESENTATIVE GEORGE MILLER

Representative Anthony Beilenson.
Representative George E. Brown, Jr.
Representative Phillip Burton.
Representative Ronald V. Dellums.
Representative Mervyn Dymally.
Representative Don Edwards
Representative Augustus Hawkins.
Representative Edward J. Markey.
Representative Matthew Martinez.
Representative Robert T. Matsui.
Representative Norman Mineta.
Representative Toby Moffett.
Representative John Seiberling.
Representative Pete Stark.

[Preliminary Analysis of Natural Gas Price Increases]

DIGEST

Reports that the price of natural gas will increase substantially this winter have received widespread attention. In response to congressional requests, GAO has prepared a preliminary analysis, which covers:

How fast prices have increased;
Why prices have increased; and
Whether there is an "excess supply," and if so, how it developed.

STRUCTURE AND REGULATION OF THE NATURAL GAS INDUSTRY

Natural gas—about 95 percent of it produced domestically—accounts for over 25 percent of the energy consumed in the

United States. Industrial use accounts for 41 percent of all gas; residential, for 24 percent; electric generation, for 19 percent; commercial for 13 percent; and other uses, for 3 percent.

The natural gas industry is comprised of three sectors—production, transmission, and distribution—which are physically interconnected by a network of pipeline and main throughout the United States. At one end of the network are thousands of companies which explore for, drill for, and produce gas. Since enactment of the Natural Gas Policy Act of 1978, all production has been subject to Federal price regulation. The act established various pricing categories based on such factors as where and when a well is drilled.

At the other end of the network are almost 1,600 distribution companies, usually local public utilities, serving their own market areas and under the jurisdiction of State or local regulatory bodies. The connecting transmission network includes 129 interstate pipeline companies operating under Federal jurisdiction, plus many intrastate pipelines which are generally regulated under State laws.

HOW MUCH HAVE GAS PRICES INCREASED?

Prices to all types of users increased at an annual average rate of 18 percent between 1970 and 1981 (not adjusted for inflation), according to data from the Energy Information Administration. Residential prices increased less (13 percent) than industrial prices (21 percent).

Nevertheless, residential prices today are higher than other prices. Residential users paid an average of $4.29 per thousand cubic feet in 1981; commercial users, $4.02; industrial users, $3.14; and electric utility users, $2.89.

The average residential price in October 1982 was $6.08 per thousand cubic feet, compared to $2.83 in October 1978 and $0.91 in October 1970 (not adjusted for inflation), according to Bureau of Labor Statistics data for U.S. cities. The average price in selected major cities in October 1982 was as low as $4.94 and as high as $8.20.

Prices paid by end-users flow back to the three industry segments as gross revenues. According to data from the American Gas Association, producers, pipelines, and distributors all received more revenue per thousand cubic feet in 1981 than in 1970. The producers' share of the total increased from 26 to 53 percent; the pipelines' share decreased from 29 to 25 percent; and the distributors' share decreased from 45 percent to 21 percent.

The Energy Information Administration projects that the average residential price in the first quarter of 1983 will be about 20 percent higher than the year-earlier price. However, some cities are reportedly expecting increases of 40 percent or more.

WHY HAVE NATURAL GAS PRICES INCREASED?

End-user prices for natural gas depend on the diverse factors affecting how gas is priced to pipelines, to distributors, and to end-users. Prices paid by pipelines depend on both the quantity of domestic gas in each category under the Natural Gas Policy Act and the price of gas in each category, as well as imported gas.

Several factors have affected the quantities and prices. One factor has been the regular increases in ceiling prices for various categories under the act. For example, the ceiling for new natural gas increased from $2.08 per million British thermal units (Btu's) in December 1978 to $3.27 in December 1982. (A million Btu's are approximately equal to a thousand cubic feet.)

Another factor has been the creation of incentive prices for high-cost gas, as provided by the act. According to Energy Information Administration data for major pipelines' projected purchases, the average price of high-cost gas was $6.12 per million Btu's in mid-1981 and $7.24 in mid-1982.

In addition, certain clauses in producer-pipeline contracts can cause average gas prices to increase. Many contracts obligate the pipeline to purchase a set amount of gas even if the pipeline does not have a ready market (called a "take-or-pay" clause). Such clauses were, in part, a reaction to the existence of Federal price ceilings in the interstate market, but not in the intrastate market, until 1978.

Other factors include the depletion of old gas reservoirs and imported natural gas.

Prices paid by distributors depend on the prices paid by the pipeline suppliers, plus pipeline operating expenses and rates of return.

Prices paid by end-users depend on the prices paid by their distributors and the way these costs are allocated to residential, industrial, and other classes of users. For example, because of concern about industrial users switching to an alternative fuel, a California distributor has proposed a new rate schedule which would raise the average residential price by about 70 percent and the price to industrial users which can switch to residual fuel oil by about 31 percent.

IS THERE AN IMBALANCE BETWEEN GAS PRODUCTION AND CONSUMPTION?

Reports of a current "excess supply" of natural gas are consistent with major interstate pipeline estimates of supplies which will be available this winter. The duration of this imbalance is uncertain.

This situation reflects the many factors which determine gas production and consumption. Pipelines eagerly sought new supplies during the 1970s when they could not provide as much gas as their customers desired. There is now an imbalance because pipelines are able to supply more gas than end-users want at current prices.

Consumption has fallen due to more efficient use of gas, switching to alternative fuels, and economic conditions. Distribution company sales in the first 8 months of 1982 were 4 percent below year-earlier levels, according to the American Gas Association.

Some companies are adjusting to the current situation by renegotiating contracts and other means.

GAO initiated its analysis in response to requests from Senator Thomas F. Eagleton, Congressman Michael D. Barnes, and Congressman George Miller and 14 others.

As agreed with the requesters' offices, this is a preliminary report. GAO is continuing its analysis of natural gas price increases. GAO did not seek agency comments on this report.

CHAPTER 1: INTRODUCTION

Reports of substantial increases in retail natural gas prices—both recent and expected—have attracted widespread congressional and public attention. These increases may seem particularly puzzling because of concurrent reports that there is a "glut" of natural gas, meaning that more gas could be produced and delivered than is being consumed. Ordinarily, such an imbalance between potential production and consumption would be expected to lead to declining, rather than increasing, prices to consumers.

Natural gas accounts for over 25 percent of the energy consumed in the United States. In 1981, natural gas use totaled 19.3 trillion cubic feet (Tcf),[1] nearly all of it produced domestically. It is used in about 55 percent of all residential and commercial establishments and provides 40 percent of the energy consumed by industry and agriculture. Overall, industrial use accounts for 41 percent of all gas use; residential, for 24 percent; commercial, for 13 percent; electric generation, for 19 percent; and other uses, for 3 percent.

Structure and regulation of the natural gas industry

Most natural gas passes through three sectors of the industry before it is consumed. These sectors are regulated variously by units of Federal, State, and local government.

The industry is comprised of three sectors—production, transmission, and distribution—which are physically interconnected by a network of over 1 million miles of pipeline and main throughout the United States. At one end of the network are thousands of large, medium, and small companies which explore for, drill for, and produce gas. Approximately two-thirds of their gas production is sold in interstate commerce and has been subject to Federal price regulation since 1954, now administered by the Federal Energy Regulatory Commission (FERC).[2] The remaining production is sold in intrastate commerce and has been subject to Federal price regulation only since the enactment of the Natural Gas Policy Act of 1978 (15 U.S.C. 3301) (NGPA).[3]

At the other end of the network are almost 1,600 distribution companies, usually local public utilities, serving their own market areas and under the jurisdiction of State or local regulatory bodies. The connecting transmission network includes 129 interstate pipeline companies operating under the jurisdiction of FERC, plus many intrastate pipelines which are generally regulated under State laws.

Producers explore for new reserves of natural gas, develop them to determine their size, and extract the gas from the reserves. Having determined that a reserve is large enough to warrant marketing, the producer will usually negotiate to sell the gas to a pipeline company. Pipeline companies generally purchase this gas—under negotiated contracts—from producers in the field, transport it to market, and sell it either to distribution companies or directly to large industrial and electric utility end-users.[4]

---

[1] Quantities of natural gas are often measured on the basis of volume. Frequently used measures include thousand cubic feet (Mcf), billion cubic feet (Bcf), and trillion cubic feet (Tcf). Alternatively, gas may be measured on the basis of heat content, in terms of British thermal units (Btu's). A million Btu's are approximately equivalent to an Mcf.

[2] Successor to the Federal Power Commission. Established by the Department of Energy Organization Act of 1977, 42 U.S.C. 7107.

[3] Production may also be subject to regulation at the State level, with respect to prices and levels of production.

[4] Pipeline companies may produce some gas themselves and purchase gas from and resell to other pipelines. Some pipelines also transport gas for customers which have their own gas supply.

Distributors purchases gas from pipeline companies and resell it to residential, commercial, or industrial customers. Prices paid by a distributor to a pipeline (known as wholesale or "city-gate" prices) depend on (1) field prices which are negotiated by the pipeline within regulatory limits and passed through to the customer and (2) delivery charges for transportation of the gas from the wellhead to the distributor.[5] Distributors then deliver gas to the final consumer and charge a mark-up over their wholesale purchase price for their delivery services.[6]

Different end-users may pay a distribution company various prices for natural gas, depending on the type of end-use (for example, residential, commercial, industrial, or electric utility) and on the type of service (for example, firm or interruptible supply).

In addition to the physical links between the three sectors of the natural gas industry, companies within these sectors can also be connected through common corporate structures. For example, some companies engage in production, transmission, and distribution activities and many of the largest interstate natural gas pipeline companies are involved in natural gas production either directly or through corporate affiliates. Some distribution companies are also involved in the gas producing business, while others are integrated with pipeline companies.

Objectives, scope, and methodology

This report was prepared in response to separate, but similar, requests from Senator Thomas F. Eagleton, Congressman Michael D. Barnes, and Congressman George Miller and 14 cosigners. As agreed with the requesters' offices, we concentrated on three questions:

How much have natural gas prices increased in recent years?

What factors account for these price increases?

Is there an excess supply of natural gas and, if so, why?

In this report, we present information in answer to these questions. With respect to the factors which account for price increases, we identified a number of such factors which could contribute, in some measure, to increases in various localities, but we did not attempt to determine which factors are most important in any specific locality. We are continuing our review of natural gas price increases.

In preparing this report, due to time constraints, we relied largely on available data and reports by FERC, the Energy Information Administration, the Bureau of Labor Statistics, and the American Gas Association. We did not independently verify the accuracy of any of these data. Some of the price data on which we relied are adjusted for inflation; others are not adjusted. In each case we identify whether the data were adjusted.

We also relied on our report on "Pipeline Purchases of High-Cost Natural Gas: Extent and Contested Issues" (EMD-82-53, Apr. 6, 1982) and on information gathered in connection with current natural gas reviews. We also discussed the matters covered in this report with representatives of production, pipeline, and distribution companies; Federal and State-regulatory agencies; and consumer advocates. Information gained from these sources is cited below in many instances.

Additional details on our methods are included in the subsequent chapters.

This report was prepared in accordance with generally accepted government audit standards.

CHAPTER 2: HOW MUCH HAVE PRICES INCREASED?

Although the magnitude of recent and expected price increases has attracted widespread attention, natural gas prices have been rising for many years. At the time of the landmark Supreme Court decision in *Phillips Petroleum Co.* v. *Wisconsin*, 347 U.S. 672 (1954)—which formed the basis for Federal regulation of producer prices—the average wellhead price was $.10 per Mcf. In contrast, the price in 1981 was $2.06.[7]

This chapter treats price increases since 1970 from three perspectives: (1) nationwide average prices charged to various classes of end-users, (2) prices charged to residential customers in selected cities, and (3) the breakdown of end-user prices by sector of the natural gas industry.

Prices paid by classes of end-users

First, we compiled Department of Energy data on prices paid by various classes of end-users between 1970 and 1981. There were differences in 1981 prices to various end-user classes and in the rates of increase between 1970 and 1981. (See table 1.)

Residential and commercial users paid the highest average prices in 1981—$4.29 and $4.02 an Mcf, respectively. Electric utility and industrial users paid the lowest average prices—$2.89 and $3.14 an Mcf, respectively.

Rates of increase also varied. Compounded annual average rates (not adjusted for inflation) increased 11 percent a year between 1970 and 1973 and 22 percent a year between 1974 and 1981. However, in each of the 4-year periods for which we computed average annual increases, residential prices increased by the smallest proportion, followed by commercial prices. Industrial and electric utility prices increased by larger proportions in each 4-year period.

Residential rates paid in selected cities

Next, we compiled Bureau of Labor Statistics data on residential prices between 1970 and 1982 for the Nation and for ten cities. These cities represent various regions of the country but do not necessarily reflect the full range of residential prices. (See table 2.) Furthermore, the data shown reflect average prices per Mcf of gas, not the quantity of gas used nor average customer bills.

TABLE 1.—PRICES PAID BY END-USER CLASSES, SELECTED YEARS, 1970–81, AND RATES OF INCREASE

	Residential	Commercial	Industrial	Electric utility	Overall average
Average price (price per Mcf):					
Year:					
1970	$1.09	$0.77	$0.37	$0.29	$0.55
1974	1.43	1.07	0.67	0.51	0.84
1978	2.56	2.23	1.70	1.48	1.85
1981	4.29	4.02	3.14	2.89	3.39
Compounded annual average rates of increase (percent)					
Period:					
1970–74	7	9	16	15	11
1974–78	16	20	26	31	22
1978–81	19	22	23	25	22
1970–81	13	16	21	23	18

Source: Energy Information Administration, "1981 Annual Report to Congress," Vol. 2: Energy Statistics, May 1982 DOE/EIA-0173(81)/2, p. 117, and Natural Gas Annual, 1981, DOE/EIA-0131(81), Sept. 1982, table 16.

These data reveal three trends. First, average prices for cities and prices for the ten cities all increased considerably over this period. Average national prices (not adjusted for inflation) increased by more than six-fold between 1970 and 1982. Prices for all but one of the cities increased between five-fold and seven-fold; San Francisco's prices increased almost nine-fold. Thus, the rates of increase were roughly comparable during the period.

Secondly, there were substantial differences between the lowest and highest prices. In 1970, the prices for San Francisco ($0.71 per Mcf), Atlanta ($0.84), Dallas ($0.86), and Cleveland ($0.87) were considerably lower than the prices for Boston ($1.53), Philadelphia ($1.43), and Seattle ($1.18). In 1982 the prices for Chicago ($4.94), Cleveland ($5.11), and Atlanta ($5.29) continued to be much less than for Boston ($8.20), Philadelphia ($7.54), and Seattle ($6.99).

However, there was some shifting in the cities' relative ranking between 1970 and 1982. For example, San Francisco and Dallas had the lowest prices in 1970 but some of the higher prices in 1982. Boston and Philadelphia had the highest prices in both 1970 and 1982.

The absolute difference between the lowest and highest prices increased from $0.82 per Mcf in 1970 to $3.26 per Mcf in 1982. The lowest price was 46 percent of the highest rate rate in 1970 and 60 percent in 1982.

Components of end-user prices by industry sector

Finally, we compiled data from the American Gas Association on the components of end-user prices by industry sector for 1970 and 1980. (See table 3.) Prices paid by end-users flow back to the three industry sectors as gross revenues. The data show that revenues to each sector—producers, pipelines, and distributors—increased between 1970 and 1981 (not adjusted for inflation). However, revenues to producers increased by the largest proportion and increased the producers' share of total revenues to from 26 percent in 1970 to 53 percent in 1981. Conversely, revenues to pipelines and distributors increased at a slower rate, leading to a decline in the pipelines' share from 29 to 25 percent and a decline in the distributors' share from 45 to 21 percent.

TABLE 2.—RESIDENTIAL PRICES IN SELECTED CITIES, SELECTED YEARS, 1970–82

[Price per Mcf in October of Year [a]]

Location	1970	1974	1978 [a]	1982
U.S. average	$0.91	$1.28	$2.83	$6.08
Atlanta	0.84	1.24	2.71	5.29
Boston	1.53	2.23	3.32	8.20
Chicago	1.00	1.31	2.78	4.94
Cleveland	0.87	1.21	2.18	5.11

[5] Mark-up prices for interstate pipelines are generally determined by the historical average cost of transmission and by the transportation profit margin allowed under FERC regulation.

[6] Neither pipelines nor distributors make a profit on the purchase and resale of gas. Mark-ups for both pipelines and distributors include operating and maintenance expenses, depreciation, interest, taxes, and net income. Thus, pipelines' and distributors' profits derive only from their investment in the transportation and delivery systems and not in the gas itself.

Expected price increases to residential users

Expected price increases in cities around the country have received widespread media coverage. Such estimates are usually based on pipeline filings at FERC and on other factors; actual increases may ultimately be different.

The Energy Information Administration projects that the average price for residential users will be $5.97 per Mcf in the first quarter of 1983, about 20 percent higher than the year-earlier price of $4.99.[8] Projected increases in individual cities, however, are expected to vary considerably. Distribution company representatives told us that some cities are expecting increases of 40 percent or more.

Conclusions

Prices paid by natural gas end-users vary considerably. Residential and commercial users (both over $4.00 per Mcf) paid higher prices than industrial ($3.14) and electric utility ($2.89) users in 1981. However, industrial and electric utility prices increased faster between 1970 and 1981.

Prices paid by residential customers increased overall between 1970 and 1982, but at somewhat different rates. Current prices vary considerably from city to city—from less than $5.00 per Mcf to more than $8.00.

Natural gas producers' proportion of revenues from end-user sales increased from 1970 to 1981 (from 26 percent to 53 percent). The pipelines' share declined (from 29 percent to 25 percent), and the distributors' share declined (from 45 percent to 21 percent).

The Energy Information Administration projects that average residential rates will increase 20 percent from the first quarter of 1982 to the first quarter of 1983. Increases in individual cities will reportedly vary considerably.

CHAPTER 3: WHY HAVE PRICES INCREASED?

Although natural gas end-user price increases are not a new phenomenon, the reported magnitude of expected increased in some cities is unusual. This chapter examines various reasons which could account for some portions of the increases. It addresses the factors which affect: (a) prices charged to pipelines, (b) prices charged to distributors, and (c) prices charged to end-users.

In this preliminary analysis, we did not attempt to determine the contribution of each factor nor to determine which factors are most important in various localities.

Prices charged to pipelines

Pipeline purchases from producers are governed by the Natural Gas Policy Act of 1978. The act established eight major price categories, covered by Sections 102 through 109,[9] and additional sub-categories depending on when a well is drilled, how deep the well is, when and where the gas was contracted for, and other criteria. Allowable prices for these categories vary widely. This section discusses factors which affect prices charged to pipelines, including prices and quantities of domestic purchases from producers and of purchases of imported gas.

Domestic purchases

Piplines purchase gas from various NGPA categories and at various prices. The pipelines' average cost of gas in a time period depends on both prices and quantities. Both the quantity of gas in each catagory and the average price paid vary, as shown in table 4 for major pipelines' projected purchases for 2 successive years. (These data were compiled by the Energy Information Administration from pipeline filings at FERC, based on pipelines' projections of gas purchases in future periods.)

The total quantity increased by 2 percent. But the quantity of old (sections 104 and 106) gas contracted for in 1972 or earlier declined 15 percent, while the quantity of section 102 gas increased 18 percent and the quantity of high-cost (section 107) gas increased 70 percent.

The average price increased 17 percent (adjusted for inflation). The average price of old gas contracted for in 1973 and later declined 1 percent, old gas contracted for in 1972 or earlier increased 2 percent, and high-cost gas increased 18 percent.

The increase in the average price, from $2.01 to $2.35 (adjusted for inflation), reflects both changes in proportionate quantities and changes in prices. To provide some perspective on the relative importance of price and proportions, we compared the actual prices and quantities for 1981 with two alternatives. First, we calculated the average price of buying the 1981 volumes at the 1982 prices, to illustrate the importance of changes in price; the average price went from $2.01 to $2.10. Secondly, we calculated the average price of buying the 1982 volumes at the 1981 prices, to illustrate the importance of changes in proportions; the average price went from $2.01 to $2.22.

The overall increase of $0.34 per Mcf may be compared with the 1981 quantities/1982 prices increase of $0.09 and the 1982 quantities/1981 prices increase of $0.21. The changes in proportionate quantities appear to account for about twice as much of the overall change as the price changes. Even after the 7-percent inflation rate between the two periods is considered, the changes in proportionate quantities appear to account for at least half the overall change. (These results relate only to the two periods. cited above and would not necessarily hold true for other periods.)

The overall changes in quantities and prices reflect many factors, including increases in maximum lawful prices under the Natural Gas Policy Act, the establishment of incentive prices under section 107, the natural decline of gas reservoirs, recategorization of gas from one sub-category to another, the operation of certain clauses in producer-pipeline contracts, and the effectiveness of Federal regulation.

TABLE 4.—PROJECTED NATURAL GAS WELLHEAD PURCHASE VOLUMES AND PRICES FOR MAJOR INTERSTATE PIPELINE COMPANIES, 1981 AND 1982

Category of gas	Mid-1981 [1]		Mid-1982 [1]	
	Volume in Bcf [2]	Price per Mcf [3]	Volume in Bcf [2]	Price per Mcf [3]
Old gas [4] (sections 104 and 106):				
Contract date 1972 or earlier	3,665	$0.89	3,129	$0.91
Contract date 1973 or later	2,683	1.73	2,674	1.71
New gas:				
Section 102	1,992	3.04	2,342	3.20
Section 103	1,060	2.79	1,184	2.86
Section 108 and 109	296	3.04	300	3.21
High-cost gas (Section 107)	390	6.12	664	7.24
Other	85	2.60	60	2.87
Total [5]	10,170	2.01	10,352	2.35

[1] For definition of periods covered, see source report.
[2] Volumes are given at an annual rate.
[3] Prices are given in constant January 1982 dollars.
[4] Contract date was unknown for 226 Bcf in 1981 and 139 Bcf in 1982. To facilitate comparisons, these quantities were added—on a pro rata basis—to the quantities whose contract date was known. Prices for gas with a known contract date only were used.
[5] Detail may not add to total due to rounding.

Increased ceiling prices

The Natural Gas Policy Act of 1978 provided for regular increases in the maximum lawful price for most gas. In many categories the increase was tied to the rate of inflation. But for section 102 (new natural gas) it was allowed to increase at an annual rate of 3.5 percent faster than inflation through April 20, 1981, and at an annual rate of 4.0 percent faster than inflation through December 31, 1984; on that date section 102 and certain other gas will be freed of Federal price controls.

Based on these factors, ceiling prices increased between December 1978 and Decem-

[8] Energy Information Administration, "Short-Term Energy Outlook," DOE/EIA-0202 (82/3Q), Aug. 1982, p.4. This estimate represents the middle of three cases projected by EIA, based on different assumptions of future world oil prices. Prices are shown in current dollars.

[9] The NGPA's definitions of the major price categories are complicated. The following definitions are general descriptions only. Section 102 covers gas from new onshore reservoirs, new wells at a minimum distance or depth from an existing well, and certain Outer Continental Shelf reservoirs. Section 103 covers gas from new wells less than a minimum distance or depth from an existing well. Section 104 covers gas from wells dedicated to interstate commerce as of the date of enactment of NGPA. Section 105 covers gas under existing intrastate contracts as of the date of enactment. Section 106 covers gas under "rollover contracts," both inter and intrastate; such a contract is entered into on or after the date of enactment for gas that was subject to an earlier contract that expired at the end of a fixed term. Section 107 covers high-cost natural gas, from wells at a depth of 15,000 or more feet and three other sources specified in the act or from other sources determined by FERC to present extraordinary costs or risks. Section 108 covers gas from "stripper" wells producing less than 60 Mcf per day under normal conditions or more than 60 Mcf per day due to enhanced recovery techniques. Section 109 covers gas not covered by any other price provision.

ber 1982 by 38 percent for most categories and by 58 percent for section 102. (See table 5.) These ceiling price increases promptly result in increased prices to pipelines, in many cases, because many producer-pipeline contracts obligate the purchaser to pay the "highest regulated rate."

TABLE 5.—MAXIMUM LAWFUL PRICES FOR SELECTED CATEGORIES OF NATURAL GAS, DECEMBER 1978 AND 1982

Section and category of gas	Maximum lawful price per million Btu's	
	December 1978	December 1982
102: New natural gas, certain Outer Continental Shelf gas	$2.08	$3.27
103: New onshore production wells	1.97	2.71
104 and 106(a): Existing interstate and intrastate contracts:		
Post-1974 gas	1.63	2.24
1973–74 biennium gas (large producers)	1.06	1.45
Interstate rollover gas	0.60	0.83
Minimum rate gas [1]	0.20	0.28
107(c)(5): Gas produced from tight formations	([2])	5.42
108: Stripper gas	2.22	3.51

[1] Price expressed in terms of Mcf.
[2] FERC, by Order 99, Aug. 15, 1980, set the maximum lawful price for gas produced from tight formations at the lesser of the negotiated contract price or 200 percent of the Section 103 maximum price. The maximum price generally applies on or after July 16, 1979.
Source: FERC

Incentive prices for high-cost gas

Among the major pricing categories established by the 1978 act is section 107, High-Cost Gas. The act defined high-cost gas to include: gas produced from a well deeper than 15,000 feet (if drilling began on/or after Feb. 19, 1977); gas produced from geopressured brine, released naturally from coal seams, and produced from Devonian shale; and other gas "produced under such other conditions as the Commission determines to present extraordinary risks or costs."

The act provides that the price for deep gas be limited to the section 102 ceiling price ($3.27 per MmBtu in Dec. 1982), and authorized the Commission to prescribe higher prices for any high-cost gas "to the extent that such special price is necessary to provide reasonable incentives for the production of such high-cost natural gas."

The Commission issued a regulation in November 1979, pursuant to the NGPA, which removed Federal price ceilings for deep gas and gas from the other three sources cited in the act. It issued another regulation in August 1980 which established an incentive price for gas produced from tight formations (geological structures which allow gas to seep out slowly, under normal conditions). It set a maximum price for such gas at twice the ceiling price for section 103 gas equal to $2 \times \$2.71 = \$5.42$ in December 1982).[10]

According to EIA's analysis of pipelines' projected purchases by volume, high-cost gas constituted 4 percent in mid-1981 and 6 percent in mid-1982. For five pipelines, however, high-cost gas constituted 10 to 15 percent of all projected purchases. Pipelines expected to an average of $6.12 per MmBtu for all high-cost gas in mid-1981 and $7.24 in mid-1982 (both in January 1982 dollars). These prices are considerably higher than the average prices for all wellhead purchases ($2.01 in mid-1981 and $2.35 in mid-1982).[11] Therefore, high-cost gas constitutes a relatively large proportion of total gas costs for some pipelines.

In an earlier study, we found that high cost gas constituted from none to 40 percent of all projected wellhead purchase costs for 20 pipelines. This gas accounted for 5 percent or less for six companies, 6 to 25 percent for eight companies, and 26 percent or more for six companies.[12]

Depletion of old fields

A reservoir contains a given quantity of natural gas. The amount of gas that can be produced economically from a reservoir generally declines each year. The productive life of a reservior varies, depending on geology and other factors; an individual well may produce economically for a few years or for 20 years or more. Thus, to maintain a stable gas supply, the continuing depletion of existing reservoirs is balanced by the addition of new reservoirs.

This turnover can lead to higher prices because production from the older reservoirs generally commands a lower price than production from the newer reservoirs. As previously noted in table 4 (page 12), expected prices in mid-1982 were $0.91 per Mcf for gas contracted for in 1972 or earlier, $1.71 for gas contracted for between 1973 and 1977, $3.20 for new gas (section 102), and $7.24 for high-cost gas.

Recategorization of gas

Because of the numerous pricing categories under the Natural Gas Policy Act, and the differences in maximum lawful prices, a producer has an incentive to try to get each well qualified to receive the highest possible price. The act—in section 101(b)(5)—provides that gas qualifying for more than one price category may be priced according to the highest applicable price category.

Moreover, the act and FERC regulations provide that gas produced from a well may qualify for an increased price under specified circumstances. For example, application of production enhancement techniques to a well may permit a producer to charge a higher price than would otherwise be permitted. As of August 1, 1982, according to FERC data, FERC had been notified that enhanced recovery techniques have been applied to 432 wells, thus permitting gas from these wells to receive a higher price than they would otherwise qualify for.

There have been conflicting reports about the extent to which gas has been recategorized from a lower to a higher price. This phenomenon has been called "category creep." Based on these reports, it is not clear to what extent recategorization has increased prices.

A June 1981 study of wellhead price increases concluded that an "unexpectedly high" price for gas contracted for before enactment of NGPA appeared to be due, in part, "to a change in the mix of gas within the price subcategories * * *. The lower priced ones disappear more quickly than the higher priced ones, and, in fact, there may be some shifting of volumes into the higher priced groups."[13]

In its November 1982 report, EIA stated: "To the extent that such an effect can be estimated, the data examined and presented in this report provide no evidence that there has been any substantial degree of gas reclassification in the period studied."[14] However, it should be noted that EIA's definition of "category creep" is more limited than that used elsewhere. EIA notes that it has been "hypothesized that some natural gas producers have been able to reclassify old gas volumes as new gas by drilling new development wells in old fields—often referred to as 'category creep.'" This definition does not include recategorization of flowing gas.

Clauses in producer-pipeline contracts

Contracts for the purchase of gas at the wellhead define the long-term relationship between the producers of gas and the purchasers—primarily pipeline companies—and in large part determine the cost of gas to distributors and end-users. The producer-pipeline contract specifies the terms and conditions of the gas sale. Among other things, the contract generally stipulates (1) the duration of the purchase agreement; (2) the price, including initial rate and price escalation provisions, the treatment of taxes, royalty payments, and deregulation clauses, if any; (3) the delivery rate—daily, monthly, and annual purchase (or "take") obligations and any makeup provisions; (4) the quantity of gas or acreage committed; (5) the gathering, processing, and delivery of the gas; and (6) the quality and measurement of the gas.

Contracts reflect the relative bargaining leverage of producers and pipeline companies at a given time. This bargaining relationship has shifted over the years to adjust to changes in the overall supply and demand for gas both nationally and in specific regional markets, the regulatory environment, and internal producer and pipeline corporate policies. Because pipelines may have more than one contract with a producer, a specific producer-pipeline contractual relationship can be viewed in the context of a web of existing and prospective contracts.

Natural gas contracts—like other contracts—represent a compromise between the conflicting bargaining positions of the seller (the producer) and the buyer (the pipeline). The producer has certain objectives in negotiating a contract, as does the pipeline company. The producer tries to obtain, among other things, the highest possible contract price and large daily pipeline gas purchase obligations (a high contract price provides little revenue if the pipeline purchases only a small daily volume). In contrast, the pipeline desires large gas reserves under long-term contracts at a lower price and minimum daily purchase obligations. This allows the pipeline to provide its customers a secure, stable supply of gas.

Contracting practices appear to respond to changes in the overall market for gas. For example, in the early years of the industry when gas supplies were abundant, the demand for gas was limited because there was not yet a well developed pipeline system to bring the gas from the field to urban markets. As a result, contracts generally reflected the strong bargaining position of the pipeline. They were often long-term contracts, with low prices and low daily purchase obligations.

[14] EIA "An Analysis of Post-NGPA Interstate Pipeline Wellhead Purchases," DOE/EIA-0357, September 982, p. x.

However, in later years, especially in the early 1970s, with the increase demand for gas and a limited supply of new reserves, the relative bargaining strength shifted to producers. Producers were able to incorporate into their contracts higher purchase obligations, prices at maximum allowed levels, and more frequent price redeterminations. More recently the pendulum has swung again, and pipelines have now been able to incorporate lower purchase obligations, provisions allowing purchasers to lower contract prices, and more favorable price escalation terms into contracts.

Other factors that affect the bargaining relationship are (1) the number of pipelines competing for gas in a specific producing area, (2) the size of the reserves, and (3) differing corporate perceptions of the future gas market and regulatory environment.

The universe of contracts is quite large. An estimated 20,000 mostly pre-NGPA interstate contracts are on file at FERC.[15] Although most producers are no longer required to file contracts, FERC's Chairman estimated a year ago that between 9,000 and 10,000 contracts had been executed since the enactment of NGPA, covering new gas sales.[16] At any time, a pipeline may have hundreds or thousands of contracts with gas producers. Further complicating this situation is the fact that a pipeline will often have several different gas contracts with an individual producer.

As noted above, many contracts obligate the pipeline to pay the "highest regulated rate." Two other types of clauses which have received considerable attention recently are "take-or-pay" clauses and "market-out" clauses. The former require the purchaser to pay the producer an amount based on a stated proportion of a well's potential or actual output—even if the purchaser chooses not to accept the entire quantity; however, such clauses often allow the purchaser to accept the paid-for gas in subsequent years. The latter allow the purchaser to offer the producer a lower price, if the existing price has made the gas unmarketable; however, such clauses often allow the producer to try to find another purchaser.

During the early and mid-1970s interstate pipelines could not always supply as much gas as their customers wanted. As will be explained more fully in the following chapter, they were subject to Federal price ceilings, which kept their prices lower than the levels which could be paid by intrastate pipelines. One way of redressing this imbalance was for the interstate pipelines to bargain on the basis of "non-price" contract terms, for example, take-or-pay clauses.[17]

"Take" obligations became increasingly strict during the 1970's. In some cases the purchasers were obligated to pay for 80 or 90 percent of the output of a well. Only in the last couple of years have "take" obligations become less strict or tempered by the presence of "market-out" clauses.[18] However, the high "take" obligations in contracts signed throughout the last decade or more remain in effect unless renegotiated.

The effects of high "take" obligations have received considerable attention. Examples of the operation of such clauses have been noted in two regions.

In the Hugoton field (in southwest Kansas, Oklahoma, and Texas), several pipelines have reduced their purchases of gas—much of which sells for as little as $0.50 per Mcf and are instead purchasing domestic and imported gas at $5.00 or more per Mcf, according to Kansas State and pipeline company representatives.

In Appalachia, Columbia Pipeline has stopped accepting gas from 21,000 small wells, whose prices are as low as $0.45 per Mcf, while continuing to buy gas from southwestern producers for up to $8.30 per Mcf, according to a company official. He stated that the wells were "shut-in" for between 90 and 150 days and that the company also shut-in its own wells in Appalachia during the period.

There are several possible reasons why pipelines—when they expect to need less gas than they could purchase under existing contracts—may choose to forego relatively inexpensive gas and, instead, purchase relatively expensive gas. First, as a general rule, the more expensive gas is likely to be covered by contracts with higher "take" obligations. This occurs because take-or-pay clauses became more prevalent during the last decade or so, at the same time that maximum lawful prices were being increased.

Second, pipelines may prefer to buy gas from their own affiliated producers or production subsidiaries, rather than from unaffiliated producers. This could cause pipelines to buy relatively expensive gas because pipeline involvement in gas production has increased in recent years, at the same time that maximum lawful prices were being increased. Third, pipelines may be willing to pay higher prices to develop or retain the good will of producers on whom they may depend in various producing regions.

Finally, pipelines' purchases may be influenced by the nature of Federal regulation. Pipeline tariff rates are established at least every 3 years based on a cost-of-service review. One aspect of such a review is a determination of the cost of gas purchased by the pipeline for resale. Recognizing that purchased gas costs would likely change more frequently than every 3 years, pipelines were allowed, starting in 1972, to adjust their rates in the intervening period. A pipeline's request to change its base tariff rates to reflect purchased gas costs is known as a purchased gas adjustment filing. Most interstate pipelines file an application every 6 months, while the remainder file annually. These filings are subject to FERC review and approval.

In the situation where a pipeline is contractually obligated to pay for more gas than it needs, if the pipeline pays for and receives gas from a producer, it can generally recover its costs through a purchased-gas adjustment filing every 6 months according to FERC officials. However, if a pipeline pays for but does not receive the gas, it cannot promptly recover such "pre-payments". Only after it receives the gas can it recover these "pre-payments" through a purchased-gas adjustment filing.

In the meantime, the pipeline can add the "pre-payments" to a specified account in its rate base and earn a rate of return on them. Therefore, to maintain cash flow, a pipeline may prefer to buy more expensive gas and recover its costs semi-annually, but incur any "pre-payments" on less expensive gas and recover these costs later. To the extent that "take-or-pay" and other contract clauses influence a pipeline to buy more expensive gas and forego less expensive gas, such clauses will contribute to an increase in the pipeline's average gas costs.

Federal regulation

Violation of Federal or State laws relating to prices received by producers or prices paid by pipelines could also result in price increases. NGPA specifies maximum lawful prices to be received by producers. It also specifies certain standards to govern pipeline purchases, including purchases from entities affiliated with a pipeline. FERC is responsible for compliance and enforcement with both types of regulation. If there were violations of either type of regulation, end-user prices would presumably be increased.

According to FERC data, it was found that too high a price had been charged at about 1,300 wells as of October 31, 1982, and about $39 million had been refunded since NGPA's enactment. (This amount may be compared to total producer revenues in 1981 of about $42 billion—20.4 Tcf of marketed production x $2.06 per Mcf average wellhead price.)

In addition, FERC regulates prices paid by pipelines. Section 601(b) of NGPA generally provides that producer-pipeline wellhead transactions are considered to be just and reasonable if the price does not exceed the maximum price authorized by Title I or if there is no ceiling for that category. Under section 601(c) interstate pipelines may pass through costs of natural gas purchased if the price, deemed "just and reasonable" under section 601(b), is not excessive due to "fraud, abuse, or similar grounds." The meaning of this "fraud standard" is highly controversial and affects pipelines' authority to pass through hundreds of millions or even billions of dollars.

As we reported in April 1982, six pipeline company purchased-gas adjustment filings were protested in 1981 because of issues relating to the purchase of deregulated gas.[19] Protesters contended, in part, that (1) prices paid for deregulated gas were too high in relation to prices for competing fuels; (2) prices paid to pipeline affiliates were too high; and (3) pipelines bought more deregulated gas than they needed.

The pipeline companies involved in the six cases responded, in part, that (1) the deregulated gas was purchased to obtain adequate reserves for their customers; (2) the protesters did not show that the purchases were unwarranted; and (3) the protesters

---

[15] In general, small producer contracts, intrastate contracts, and contracts for onshore gas executed after the enactment of the NGPA are not on file at FERC. Some post-NGPA contracts for new offshore gas are on file at FERC. See Decision Analysis Corportion, "Analysis of Natural Gas Producer/Interstate Pipeline Contracts," July 1, 1981, p. 2.

[16] Based on well determinations filed with FERC since Dec. 1, 1978. This estimate appears in a Nov. 20, 1981, letter to Philip R. Sharp, Chairman, Subcommittee on Fossil and Synthetic Fuels, House Committee on Energy and Commerce, from C.M. Butler III, Chairman, Federal Energy Regulatory Commission.

[17] "Non-price" is technically a misnomer. Such clauses do not relate to current prices, but they do relate to future prices, current and future quantities, and other conditions.

[18] Energy Information Administration, "Natural Gas Pipeline/Producer Contracts: A Preliminary Analysis," December 1981, DOE/EIA-0312, and "Natural Gas Producer/Pipeline Contracts and Their Potential Impacts on the Natural Gas Market: An Analysis of the Natural Gas Policy Act and Several Alternatives," Part 2, June 1982, DOE/EIA-0300.

[19] "Pipeline Purchases of High-Cost Natural Gas: Extent and Contested Issues," EMD-82-53, Apr. 6, 1982.

were attempting to reimpose price ceilings on deregulated gas.

In February 1982, FERC issued a policy statement on its interpretation of the NGPA's provisions relating to pipeline pass-through of purchase gas costs as guidance for the disposition of proceedings where the fraud standard is an issue.[20] The Commission stated that the general policy statement does not have the force of law, but "is an articulation of the Commission's tentative intention which will be followed unless circumstances demonstrate the policy to be inappropriate."

FERC said that it intended to limit the fraud standard to consideration of whether the price paid by an interstate pipeline was excessive due to misrepresentation, including a positive statement of fact or an omission of a material fact. It stated that the fraud standard is not a market-ordering device and that there is nothing within the 1978 act nor its legislative history enabling it to disallow pass-through of prices due to imprudence. FERC concluded that the fraud standard does not include imprudent business judgment about how much a pipeline should pay for gas. More recently, however, FERC indicated that it may consider questions of prudence of pipeline purchases.[21]

Other factors

FERC has been criticized for its part in several decisions which have allowed gas price increases to pipelines.[22]

In March 1979 FERC reversed its month-earlier proposal and allowed the 1978 act to trigger "area rate clauses." These clauses may allow producers to charge as much as other producers in an area. (44 Fed. Reg. 16,895 (1979).)

In July 1980, FERC permitted producers to obtain a higher wellhead price retroactive to December 1, 1978, based on a change in measuring the heat content of gas. (45 Fed. Reg. 49,077 (1980).)

In August 1980, FERC decided to allow pipelines to collect NGPA rates for gas produced by pipeline affiliates. (45 Fed. Reg. 53,091 (1980).)

Imported gas purchases

Natural gas has been imported, primarily from Canada, for many years. In the last few years, imports have constituted about 5 percent of total national supplies, but much higher proportions for some pipelines and distributors.

Quantities of imported gas—from Algeria, Canada, and Mexico—changed little between 1978 and 1981. (See table 6.) However, prices increased significantly between 1978 and 1981.

TABLE 6.—Natural Gas Imports, 1978–81

Year and source	Quantity (in Tcf)	Price per Mcf
1978:		
Canada	0.88	$2.19
Mexico		
Algeria	0.08	1.53
1979:		
Canada	1.00	2.61
Mexico		
Algeria	0.25	2.03
1980:		
Canada	0.80	4.32
Mexico	0.10	4.41
Algeria	0.09	3.77
1981:		
Canada	0.76	4.83
Mexico	0.11	5.01
Algeria	0.04	5.54

Source: Energy Information Administration, "U.S. Imports and Exports of Natural Gas, 1981", DOE/EIA-0188(81), June 1982.

The price of imports was above the average well-head price of domestic gas during these years. Domestic gas, on the average, cost $0.90 per Mcf in 1978, $1.18 in 1979, $1.60 in 1980, and $2.06 in 1981.[23]

A notable development relating to gas imports is the proposal by Panhandle Eastern Pipeline to import liquefied natural gas from Algeria. This gas would cost more than $7.00 per MmBtu when landed in Louisiana and more than $8.50 per MmBtu when delivered to distribution companies in the midwest, according to the representative of one such company.

Based in part on Panhandle's stated plans to import this gas, some distributors have projected substantial price increases. However, the imports are being contested and it is not clear how much of the gas will be sold to distributors and at what price.

Prices charged to distributors

Distributors generally buy their supplies from the one, or at most the few, pipelines that serve their area. Terms of trade between pipelines and distributors are not established by direct negotiation between the parties. Instead, interstate pipeline sales to distributors are governed by tariffs approved by FERC; distributors can be involved in FERC's process for setting such tariffs.

These tariffs establish such conditions as prices, quantities to be supplied, and minimum purchase (or "minimum bill") obligations. The price charged is typically the average price of gas paid by the pipeline plus an amount to cover the pipelines' operating expenses and provide a return on the pipelines' capital investments.

One possible source of increases in prices charged to distributors is the triggering of "minimum bill" provisions. However, representatives of two trade associations representing distributors told us that they were aware of few significant examples of "minimum bill" provisions being triggered.

Other provisions of pipeline distributor tariffs may also restrict the distributors' flexibility in gas supply. For example, an Illinois distributor, Central Illinois Light Company, has complained to FERC about its rate classification with Panhandle Eastern Pipeline. According to a company representative, the distributor stated that its current rate schedule prevents it from buying gas from another pipeline at a lower price and, thus, inhibits the distributor from trying to reduce its gas supply costs.

A second possible source is an increase in pipeline operating expenses and rates of return. According to American Gas Association statistics, the average pipeline share of revenue per Mcf increased at an average rate of 15 percent between 1970 and 1978 and 17 percent between 1978 and 1981. In contrast, during these same two periods the average distributor share of revenue per Mcf increased at average rates of 12 percent and 3 percent, respectively. (See table 3, on p. 8.)

Finally, pipelines' sales to distributors may be affected by declines in pipelines' direct sales to industrial and electric utility customers. According to an investment firm's analysis, such sales are important to pipelines for two reasons.

Industrial comsumption tends to be less weather-sensitive than residential consumption. This "demand constancy not only allows the pipeline to operate more efficiently, but also to amortize its operating costs over a larger number of units," spread fairly evenly over the year. "Loss of industrial load disrupts this balance, increases a system's weather sensitivity, and forces operating cost recovery onto fewer units," resulting in an increase in the delivered price of gas.

Moreover, "large volume sales for industrial consumption or for electric generation include the highest margin transactions among pipeline deliveries * * *.[24]

The decline in industrial and electric utility sales between 1981 and 1982 may, therefore, be working to increase prices on pipelines sales to distributors.

Prices charged to end-users

Although prices charged by producers and interstate pipelines are regulated by the federal Government, rates charged by distributors are usually subject to State or local regulation. Accordingly, developments in this area are very diverse.

A significant development in at least some areas of the country is the loss of industrial sales, not only losses already experienced but also anticipated losses, which are due largely to switching from gas to another fuel—often residual (or No. 6) fuel oil. The loss of industrial customers can affect distributors in some of the same ways that it affects pipelines—by reducing the number of units which contribute to paying operating costs and reducing the company's operating efficiency by increasing the company's weather sensitivity.

In an attempt to discourage industrial users from switching to an alternative fuel, distribution companies and State regulators in some areas of the country are considering or have approved rate schedules that would raise rates to residential users by a larger proportion than rates to industrial users. For example, consistent with the State of California's statutes and guidance from the California Public Utility Commission, the distributor serving Los Angeles has had higher average rates for industrial users than for residential users. But, because of concern about users switching from gas, the company has proposed a new rate structure which would place more of the cost burden on residential customers. Rates for industrial users which could switch to residual fuel oil would increase from $4.16 per MmBtu in January 1982 to $5.47 in January 1983, a 31-percent increase. While residential users

[20] 47 Fed. Reg. 6,253 (1982).

[21] In connection with a purchased-gas adjustment filing of Tennessee Gas Pipeline (TA82-2-9), the Commission stated that it may consider questions of prudence as part of a pipeline's cost-of-service review.

[22] A critical assessment of FERC's role in these and other actions is contained in "Comments of the Citizen/Labor Energy Coalition Regarding Notice of Inquiry," Docket No. RM82-26-000, Impact of the NGPA on Current and Projected Natural Gas Markets, Aug. 26, 1982, pp. 5 and 6 and App. A.

[24] R. Gamble Baldwin and Robert L. Christensen, Jr., "Large Volume Sales of Natural Gas: Their Importance and Vulnerability, First Boston Corporation, Special Report GT 1398.82, Aug. 1982, pp. 10 and 11.

face an average rate increase of about 70 percent, according to company officials.[25]

Conclusions

Numerous factors have contributed to natural gas price increases before and since enactment of NGPA. End-user rates for natural gas depend on the diverse factors affecting how gas is priced to pipelines, to distributors, and to end-users.

Prices paid by pipelines are based on purchases of both domestic and imported gas. Prices for domestic gas depend on both the quantity of gas in each category and the price for each category; these quantities and prices, in turn, are influenced by many factors, including (1) the NGPA's escalation provisions, (2) incentive prices for high-cost gas, (3) depletion of old fields, (4) recategorization of gas, (5) "take-or-pay" and other clauses in producer-pipeline contracts, (6) Federal regulations, and (7) other factors.

Prices paid by distributors depend, in part, on increases in pipeline operating expenses and rates of return and the loss of direct sales to industrial and electric utility customers. Prices paid by end-users depend, in part, on the allocation of cost increases between residential, industrial, and other users.

CHAPTER 4: CURRENT MARKET CONDITIONS

Reports of increases in retail natural gas prices may seem incompatible with other reports of an "excess supply" of natural gas. This chapter first examines whether such an "excess supply" exists, then discusses reasons which may account for it, and finally considers evidence that the industry is adjusting to current market conditions.

Is there an imbalance between gas production and consumption?

The expected balance between natural gas production and consumption in any time period depends on current production, net withdrawals from or additions to storage, and current consumption. Even if these amounts are known, or can reasonably be predicted, for a given time period on a national basis, conditions facing an end-user will depend largely on the situation of one or more pipelines serving a specific location.

FERC staff have collected information from major interstate pipelines about their expected supply availability for the forthcoming winter heating season (November through March) and actual supplies used during the previous season. (Estimates are prepared for a normal winter and for somewhat colder winters.) These data provide one measure of the balance between production and use.

Data submitted by the companies show that company estimates of available supplies for a normal winter were somewhat higher than actual supplies used in the winter of 1980-81 and very close to equal in the winter of 1981-82. (See table 7.)

Estimates of available interstate supplies for the current heating season total 6,653 Bcf. This level is higher than both estimated supplies available (6,053 Bcf) and actual supplies used (6,037 Bcf) for last winter. Moreover, based on American Gas Association data for gas utility sales during the first 8 months of 1982, it appears likely that this winter's sales will be below last winter's sales. Using the 4.3 percent decline for the first 8 months as a basis of comparison, it is plausible to expect that this winter's sales may total about 5,777 Bcf.

Thus, estimated interstate supplies available for a "normal" winter in 1982-83 are about 10 percent higher than actual supplies used in 1981-82, and about 15 percent higher than a plausible projection of actual supplies to be used in 1982-83. Such differences could be characterized as an "excess supply."

How did the current situation develop?

The current "excess supply" of gas connotes an imbalance between production and consumption. This imbalance may be traced to the various factors which effect both production and consumption.

Table 7.—MAJOR PIPELINE COMPANIES ESTIMATED AND ACTUAL SUPPLIES FOR WINTERS OF 1980-81, 1981-82, AND 1982-83

	Winter heating season		
	1980-81 (note [1])	1981-82 (note [2])	1982-83 (note [3])
Estimated supplies available (normal winter)	6,286	6,053	6,653
Actual supplies used	6,038	6,037	[3] 5,777

[1] Based on data for 28 companies.
[2] Based on data for 24 companies.
[3] GAO estimate based on actual supplies used in 1981-82 and declines in gas utility sales reported by the American Gas Association, "Monthly Gas Utility Statistical Report—August 1982." The Association reported that sales during the first 8 months of calendar 1982 were 4.3 percent below previous year levels. Residential sales (3,498 Bcf) were up 6.7 percent; commercial sales (1,728 Bcf) were up 5.6 percent; industrial and electic utility sales (4,780 Bcf) were down 13.9 percent; and other sales (192 Bcf) were unchanged. We assumed that sales during the 5-month winter heating season of 1982-83 would likewise be 4.3 percent below 1981-82 levels.

Source: FERC, "Commission Staff Reports: Impact of 1981-82 Winter Gas Supply for Twenty-Eight Pipeline Companies," Docket Nos. TC81-23, et al., October 1981, p. 5, and "Commission Staff Report on 1982-83 Winter Gas Supply for Twenty-Four Pipeline Companies," Docket Nos. TC82-12, et al., September 1982, p. 5.

Following the 1954 Supreme Court decision, gas sold in interstate commerce was subject to Federal price controls, although gas sold in intrastate commerce was not subject to these controls. In the early and mid-1970s, competition for new gas supplies pushed intrastate prices well above interstate prices.[26]

This imbalance led to a prolonged decline in the amount of gas reserves under the control of interstate pipelines. During the 11-year period ending in 1977, these pipelines experienced a fall in their inventory of dedicated reserves, from about 198 Tcf in 1967 to about 93 Tcf in 1977. (See table 8). The pipelines' inventory of reserves dropped from 17 times current production levels in 1967 to 9 times current production levels in 1977. During this period gross changes in reserves (reflecting new reserves plus the net change in assessment of already discovered reserves) were low or negative. In each year gross changes in reserves were less than production. Therefore, the net changes in reserves was negative during every year between 1968 and 1977.

Not only was the interstate pipelines' inventory apparently being depleted, but there were many instances in the early and mid-1970s when the pipelines could not deliver as much gas as their customers wanted and therefore had to "curtail," or restrict, purchases by some customers. These curtailments led to the shutting down of factories and schools, especially during the unusually cold winter of 1976-77.

Because of their experience with shortages, interstate pipelines were eager to purchase new supplies throughout the 1970s. Before enactment of the Natural Gas Policy Act in 1978, interstate pipelines faced restrictions in competing against intrastate pipelines and against each other on the basis of current price, so they resorted to competing on other terms. These so-called "non-price" terms included provisions governing: (1) how prices would be set if Federal price regulations ended and (2) how much of the production covered by a given contract would be purchased regularly.

After NGPA, interstate and intrastate pipelines were on a more equal footing with respect to allowable prices, but they still competed aggressively for new supplies. This aggressive competition apparently continued through 1980 and perhaps 1981, even though exploration efforts were considerably higher in those years and the interstate pipelines' reserves were again improving. (See Table 8.)

Table 8.—INTERSTATE PIPELINE COMPANIES' DEDICATED RESERVES, CHANGES IN RESERVES, PRODUCTION, AND RESERVES-TO-PRODUCTION RATIOS, ALTERNATE YEARS, 1965-81

Year	Dedicated reserves as of Dec. 31 [1]	Changes in reserves from previous years		Production [1]	Reserves-to-production ratio [2]
		Net [1]	Gross [1]		
1965	192	3	13	10	19
1967	198	3	15	12	17

Source: EIA, "Domestic Natural Gas Reserves and Production Dedicated to Interstate Pipeline Companies, 1981, (Preliminary Report)" DOE/EIA-0167(81)P, June 1982, table 3; and "Gas Supplies of Interstate Natural Gas Pipeline Companies—1980," DOE/EIA-0167(80), Dec. 1981, table 3.

The results of this competition included:

Some contracts which obligated the purchaser to pay the "highest regulated rate" for gas;

Some contracts which obligated the purchaser to purchase 80 or 90 percent of the gas which could be delivered from a given field, which severely limited the purchaser's flexibility;

Some contracts which, unitl the last year or two, often gave the purchaser little, if any, latitude to initiate renegotiation if the price was too high;

Some contracts to pay $9.00 or more per MmBtu for deep gas;

Some contracts with Canadian and Mexican producers to pay nearly $5.00 per MmBtu at the border; and

Considerable investments in facilities for receiving and handling imports of liquefied natural gas.

Until recently, interstate pipelines could generally sell as much gas as they could provide. In fact, there was assumed to be an unfulfilled demand for gas at existing prices. A report prepared for the Department of Energy estimated that there was "frustrated" or unfulfilled, demand for gas in the industrial sector of almost 2 Tcf in 1979.[27]

[25] Residential rates in January 1982 were $2.83, $3.81, and $5.67 per MmBtu, with higher rates for those who consume more. As of November 30, the California Commission has not acted on the company's proposal.

[26] According to the April 1977 National Energy Plan, "Recent contract prices for new gas in the intrastate market range from $1.60 per Mcf to $2.25, while the highest price ever allowed for long-term interstate gas purchases is $1.45." See Executive Office of the President, Energy Policy and Planning, "National Energy Plan," Apr. 29, 1977, p. 18.

[27] Energy and Environmental Analaysis, Inc. "Industrial Gas Demand," Appendix B to "A Study of

However, this supposed unfulfilled demand seems to have disappeared, and 1982 consumption is less than 1981 consumption. Recent consumption of gas has been significantly affected by reactions to higher gas prices and by general economic conditions. In response to sharply higher gas prices, consumers have made more efficient use of their gas and have substituted other fuels for gas. In response to general economic conditions, consumers have cut back on purchases of gas used in producing various goods and services.

The overall effect was the potential to produce large quantities of gas—at high prices. These high prices coincided with, and in some measure led to, declines in consumption. Thus developed the current "excess supply" of natural gas. However, this situation is not necessarily a permanent phenomenon.

How is the market adjusting?

In the theoretical model of a market described in a basic economics text, an imbalance between supply and demand quickly leads to adjustments which equilibrate supply and demand via the price mechanism. An excess of supply over demand, for example, would be expected to lead to a lower price. The recent behavior of the natural gas market appears to diverge from the behavior predicted by the theoretical model because prices have been rising, even though there is "excess supply" of gas.

Current market conditions reflect the cumulative effects of years of developments in the natural gas industry and regulation. Accordingly, it is not certain how quickly and completely the industry can and will adjust to the current "excess supply."

Natural gas markets have several characteristics which do not conform to the textbook model and which may tend to impede adjustments. These include features of both industry structure and government regulation—which in turn are interrelated. In the former category are long-term arrangements between producers and pipelines and between pipelines and distributors; multiple ownership interests in producing properties, which may make it more difficult to get agreement on renegotiating prices; and limited knowledge of industry developments.

In the latter category are Federal and State ceilings on wellhead prices; Federal regulations which require that a gas reservoir—once "dedicated" to interstate commerce—remains dedicated, unless FERC approves otherwise; and a pipeline's need to obtain FERC approval to increase an existing customer's level of "entitlements" or sell gas to a customer which it is not required to serve.

Nonetheless, there is some evidence that the market is responding. Examples can be found in producer-pipeline relations, pipeline-pipeline relations, and pipeline-distributor relations. This evidence is anecdotal—rather than comprehensive—because companies typically are reluctant to divulge their competitive strategy. Much of the available information has come to public attention through FERC proceedings.

In pipeline dealings with producers, perhaps the most dramatic evidence of industry adjustment to changed conditions relates to purchases of high-cost (section 107) gas. This category consists mostly of deep gas (whose price is unregulated) and tight-sands gas (whose price is regulated at a relatively high rate). According to the September 1982 EIA study,[28] the average price paid by major interstate pipelines for section 107 gas increased from $6.12 an Mcf for mid-1981 filings to $7.33 an Mcf for late 1981 to early 1982 filings, but declined to $7.24 an Mcf for mid-1982 filings (all prices in constant January 1982 dollars).

Moreover, some pipelines have exercised "market-out" clauses in contracts for the purchase of deep gas. Transcontinental Pipeline exercised its "market-out" clauses in May 1982; it offered to pay $5.00 per MmBtu, according to a company representative. Three other pipeline companies (United, Michigan-Wisconsin, and Tennessee) have exercised their "market-out" clauses since then, according to their representatives.

In addition, Southern Natural asked its suppliers this past summer to voluntarily reduce their deliveries because its pipelines and storage fields were full and its customers were using less gas than expected, according to a company representative. Columbia is renegotiating contracts with its suppliers to provide for lower prices and lower purchase obligations, according to a company representative.

In terms of pipeline dealings with other pipelines, it should be noted that many pipelines purchase gas from other pipelines. According to the September 1982 EIA report, 9 of 20 major interstate pipelines bought at least 2 percent of their supplies from other pipelines. Columbia Gas Transmission notified five pipeline suppliers in August 1982 that it would neither take nor pay for volumes required by its arrangements with those other pipelines, according to a company representative. Columbia cited a precipitous and continuing deterioration of the markets it serves.

Finally, pipelines' dealings with distributors are also evolving. Some pipelines (including Columbia and Michigan-Wisconsin) have applied to FERC for approval of a temporary discount rate for industrial customers. These rates are available for pipeline sales to distributors, for resale to qualified industrial customers. Such lower rates are designed to discourage major industrial users from switching from gas to another fuel, such as residual fuel oil.

In summary, although most of the information is anecdotal, there is a growing body of evidence that the natural gas market is acting to reduce prices and otherwise adjust to the current "excess supply."

Conclusions

Reports of an "excess supply" of natural gas are consistent with major pipeline estimates of supplies which will be available this winter. This situation reflects the many factors which determine gas production and consumption. Until recently, pipelines could generally sell as much gas as they could provide and eagerly sought new supplies.

However, there no longer seems to be any unfulfilled demand at current prices, and consumption through the first 8 months of 1982 was below the comparable 1981 level. The current situation thus resulted from pipelines' potential to supply large quantities of gas and a coincident decline in gas consumption.

Some companies are adjusting to the current situation, by exercising "market-out" clauses, renegotiating contracts, and other means, according to their representatives. However, various industry and regulatory characteristics may act to impede the pace of adjustment.

Alternatives to the Natural Gas Policy Act of 1978," DOE/PE-0034, November 1981, page 7.

HUMAN RIGHTS DAY

Mr. DOLE. Mr. President, December 10, marks the 34th anniversary of the passage of the U.N. Delegation on Human Rights, adopted by the General Assembly of the United Nations in 1948. As we commemorate this day, let us take the time to remember those whose human rights are yet to be honored, even though their governments have pledged to respect the provisions of the Declaration. Perhaps the time will come when we will be able to not only mark the anniversary, but actually to celebrate the momentous occasion of this historic document's adoption. Unfortunately, it is difficult to celebrate when so many are denied the right to exercise their basic human rights and fundamental freedoms.

As cochairman of the Commission on Security and Cooperation in Europe, which monitors compliance by the 35 signatory states with the Helsinki Final Act. I see human rights systematically violated by the countries of Eastern Europe, and particularly by the Soviet Union. In the Soviet Union today, there are millions for whom there cannot be a celebration in honor of the formal acknowledgement of human rights. Specifically, for the 51 currently imprisoned members of the Moscow, Ukrainian, Lithuanian, Georgian, and Armenian Helsinki Act monitoring groups, as well as the members of the five affiliated groups formed to deal with more specific issues; for hundreds of imprisoned Christian activists, jailed for their religious beliefs for those seeking to join their families outside the Soviet Union; for those denied their political, social, national, cultural, religious, and economic rights, this day gives no cause for celebration but is testimony of their government's relentless oppression and failure to live up to its international commitments.

Mr. President, the Commission on Security and Cooperation in Europe is taking this opportunity to mark this date by issuing its latest report entitled, "Implementation of the Final Act of the Conference on Security and Cooperation in Europe: Findings and Recommendations Seven Years After Helsinki." The report is the result of the Commission's continuing efforts to monitor international compliance with the provisions of the Helsinki Final Act. I believe, Mr. President, that it is entirely appropriate that we issue the report on this particular day. The findings of the report clearly indicate that the Soviet Union and the Warsaw Pact countries continue to violate the rights of their respective peoples, in

clear contravention to their international commitments. The Soviet Government and its satellites, through their deeds, continue to hold in contempt both the U.N. Declaration on Human Rights and the Helsinki Final Act.

The struggle for the ideals embodied by the U.N. declaration goes on today. Courageous and highly principled individuals in the Soviet Union and Eastern Europe serve as a constant reminder of the significance and the need for this and other declarations such as the Helsinki Final Act. It is a reminder to which we, as Americans, have always responded, because of our heritage as a nation of many immigrant peoples, and our own great struggle against tyranny and oppression.

Twenty-eight years ago, a very wise man, who was also a refugee from persecution, said that, "a large part of history is replete with the struggle for human rights, and eternal struggle in which a final victory can never be won. But to tire in that struggle would mean the ruin of society."

The man was Albert Einstein. This anniversary of the U.N. Declaration on Human Rights stands as a marker on the long and continuing path toward achieving basic human liberties for all mankind.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. DOMENICI, from the Committee on the Budget, without amendment:

S. Res. 513. An original resolution reaffirming Congress commitment to reduce the Federal budget.

RESOLUTION DISCHARGED AND PLACED ON THE CALENDAR

Pursuant to the provisions of section 402(c)(1) of the Congressional Budget Act of 1974, the Committee on the Budget was discharged from the further consideration of the resolution (S. Res. 495) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 3041, and the resolution was placed on the calendar.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mrs. HAWKINS:

S. 3092. A bill to amend the Social Security Act to provide for temporary borrowing authority for the Federal old-age and survivors insurance and disability insurance trust funds; to the Committee on Finance.

By Mr. EAGLETON:

S. 3093. A bill to allow the adjudication for claims against the United States for damages arising from the activities of the Army Corps of Engineers at the Clarence Cannon Dam project on the Salt River in the State of Missouri; to the Committee on the Judiciary.

By Mr. BAUCUS:

S. 3094. A bill to provide for annual budget review of the Bonneville Power Administration by the Pacific Northwest Electric Power and Conservation Planning Council; to the Committee on Energy and Natural Resources.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. DOMENICI:

S. Res. 513. A resolution reaffirming Congress commitment to reduce the Federal budget; from the Committee on the Budget; placed on the calendar.

By Mr. LAXALT (for himself, Mr. TOWER, Mr. ABDNOR, Mr. ANDREWS, Mr. ARMSTRONG, Mr. BENTSEN, Mr. BOREN, Mr. BOSCHWITZ, Mr. CANNON, Mr. CHILES, Mr. COCHRAN, Mr. COHEN, Mr. D'AMATO, Mr. DANFORTH, Mr. DECONCINI, Mr. DENTON, Mr. DOLE, Mr. DOMENICI, Mr. EAST, Mr. GARN, Mr. GOLDWATER, Mr. GRASSLEY, Mrs. HAWKINS, Mr. HATCH, Mr. HAYAKAWA, Mr. HEFLIN, Mr. HELMS, Mr. HOLLINGS, Mr. HUDDLESTON, Mr. HUMPHREY, Mr. JEPSEN, Mr. JOHNSTON, Mr. KASTEN, Mr. LONG, Mr. LUGAR, Mr. MCCLURE, Mr. MATTINGLY, Mr. MELCHER, Mr. MURKOWSKI, Mr. NICKLES, Mr. NUNN, Mr. QUAYLE, Mr. PRESSLER, Mr. PRYOR, Mr. RANDOLPH, Mr. ROTH, Mr. RUDMAN, Mr. SASSER, Mr. SCHMITT, Mr. STEVENS, Mr. SYMMS, Mr. THURMOND, Mr. WALLOP, Mr. WARNER, and Mr. ZORINSKY):

S. Con. Res. 133. A concurrent resolution to express the sense of the Congress that the national security policy of the United States should reflect a national strategy of peace through strength; to the Committee on Armed Services.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTON

By Mr. BAUCUS:

S. 3094. A bill to provide for annual budget review of the Bonneville Power Administration by the Pacific Northwest Electric Power and Conservation Planning Council; to the Committee on Energy and Natural Resources.

BONNEVILLE POWER ADMINISTRATION REGIONAL ACCOUNTABILITY ACT OF 1982

Mr. BAUCUS. Mr. President, I am pleased to introduce today the Bonneville Power Administration Regional Accountability Act of 1982. This legislation is designed to enhance the responsiveness of the Bonneville Power Administration in its dealings with the citizens and States of the Pacific Northwest. I am introducing it now for discussion purposes in the hope that we can move expeditiously to adopt it in the next Congress.

Mr. President, the Bonneville Power Administration is a Federal power marketing agency with substantial influence in the Pacific Northwest. Congress has granted BPA considerable freedom from the strictures of the authorization and budget processes. As a result, I am convinced that we do not obtain sufficient, independent information about BPA's allocation of the funds it collects from the ratepayers of Montana, Idaho, Oregon, and Washington.

Recently, I conducted a hearing of the Senate Judiciary Committee's Subcommittee on Separation of Powers concerning BPA's relationship with the States of the Northwest. Witness after witness expressed concern about BPA and its failure to be responsive to citizens and State and local governments in the region.

Indicative of those testifying are the remarks of Mr. Leo Berry, director of the Montana Department of Natural Resources and Conservation; Mr. Mike Lindberg, Portland city commissioner; Mr. Robert L. Deschamps III, Missoula County attorney; Mark Reis, director of the Northwest Conservation Act Coalition; and William Edelman, board member of the Northwest Small Hydroelectric Association.

Mr. Berry noted that, although the State had made some recent progress in its working relationship with BPA, the State has had "little or no substantive involvement" in the recent BPA transmission line construction decision in Montana. Mr. Lindberg testified that "Bonneville does not take local governments seriously * * *" and that "instead of viewing the (regional power) act as an opportunity to broaden its audience and assume new regional responsibilities, BPA has kept its perspectives narrow and taken the slowest, most cautious route possible toward conservation in general and local governments in particular."

Mr. Deschamps testified that BPA "* * * continues to manipulate the law to accomplish its own objectives * * *" and has refused to comply with Montana's transmission line siting laws—even though the agency could have complied voluntarily. Mr. Reis assert-

ed that BPA will comply with the intent of applicable law only when it suits the agency's self interest. And Mr. Edelman accused BPA of "ineptitude," suggesting that the agency is "most of the problem" in planning the region's long-term energy needs.

I have repeatedly called the Senate's attention to specific problems concerning BPA transmission line siting over the past 2 years, and I have inserted in the RECORD a series of correspondence with BPA as I have tried to make BPA more responsive to individuals and communities along the routes of its proposed transmission lines. This continues to be an uphill struggle for me and for the people of my State.

I mention these matters to indicate the depth and breadth of regional disappointment with the agency. I am aware that BPA has made an effort to improve its image and its program, but I believe firmly that Congress must take steps to encourage additional BPA responsiveness. This can best be accomplished in the context of the 1980 regional power legislation and our previous enactment giving BPA considerable freedom from normal congressional processes.

My bill will require BPA to submit its draft budget for review by the Northwest Power Planning Council that was created by Congress in the 1980 Regional Power Act. The council—composed of members appointed by the Governors of the four Pacific Northwest States—would receive an early draft of BPA's budget. The council would conduct regional hearings on the draft, thus giving citizens of the Pacific Northwest their first genuine opportunity to review BPA's expenditure plans and make constructive suggestions on them.

Thereafter, the council could evaluate the public comments and develop alternative expenditure levels or, if necessary or appropriate to achieve the purposes of the regional act, the council could recommend an alternative budget. These proposals would be sent to Congress along with BPA's final budget and a BPA response on points of disagreement.

In this way, Congress would be given valuable additional perspectives and information on BPA's budget.

The results should be a more open and responsive agency—a situation that would benefit all States of the region.

Mr. President, I ask unanimous consent that the text of the Bonneville Power Administration Regional Accountability Act be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3094

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Bonneville Power Administration Regional Accountability Act of 1982.

SEC. 2. The Act entitled "An Act to authorize the completion, maintenance, and operation of the Bonneville project for navigation, and for other purposes", approved August 20, 1937 (16 U.S.C. 832 et seq.) is amended by redesignating section 13 as section 14 and inserting immediately after section 12 the following new section:

"SEC. 13. Beginning with the calendar year 1983 and each calendar year thereafter, the Administrator shall submit, no later than July 15, a copy of its annual draft budget for the fiscal year commencing October 1 of the following calendar year for all operations, acquisitions, and activities of the Bonneville Power Administration to the Pacific Northwest Electric Power and Conservation Planning Council for review. Thereafter, the administrator shall expeditiously inform the Council of budget modifications proposed by the Administrator, the Secretary of Energy, or the Director of the Office of Management and Budget. In the event that the Council submits an alternative budget, or alternative figures for individual portions of such budget, to Congress pursuant to section 4(j) of the Pacific Northwest Electric Power Planning and Conservation Act, the Administrator, if he determines such alternative budget to be unacceptable, in whole or in part, shall submit no later than thirty days after receipt of the Council's proposed modifications, a report to the Council and the Congress, in detail, stating the reasons why such alternative budget proposal of the Council, or part thereof, is unacceptable to the Administrator. The Administrator shall provide to the Council such cooperation and assistance as may be necessary to facilitate Council review of the draft budget and modifications. In preparing budget figures, the Administrator shall conform the budget to the policies, purposes, and requirements of the Pacific Northwest Electric Power Planning and Conservation Act (16 U.S.C. 839 et seq.) and the regional electric power and conservation plan and the fish and wildlife program adopted pursuant thereto.".

SEC. 3. The Pacific Northwest Electric Power Planning and Conservation Act (16 U.S.C. 839 et seq.) is amended by redesignating section 4(j) as section 4(k) and inserting immediately before it the following new subsection:

"(j) Pursuant to the annual budget proposal submitted by the Administrator under section 13 of the Act entitled 'An Act to authorize the completion, maintenance, and operation of the Bonneville project for navigation, and for other purposes', approved August 20, 1937 (16 U.S.C. 832 et seq.), the Council shall—

"(1) review and analyze the initial budget proposal and all subsequent budget modifications proposed by the Administrator, the Secretary of Energy, or the Director of the Office of Management and Budget;

"(2) have the authority to hold hearings on the proposed budget and its modifications;

"(3) submit to Congress an analysis of the budget proposal and modifications submitted by the Administrator to the Council; and

"(4) submit to Congress an alternative budget, or alternative figures for individual portions of such budget, if considered necessary or appropriate by the Council in order to facilitate attainment of the purposes of the Pacific Northwest Electric Power Planning and Conservation Act (16 U.S.C. 839 et seq.).".

ADDITIONAL COSPONSORS

S. 2702

At the request of Mr. ANDREWS, the name of the Senator from Alaska (Mr. MURKOWSKI) was added as a cosponsor of S. 2702, a bill to amend section 8(a) of the Small Business Act to treat businesses owned by Indian tribes as socially and economically disadvantaged small business concerns.

S. 2927

At the request of Mr. NICKLES, the name of the Senator from Oklahoma (Mr. BOREN) was added as a cosponsor of S. 2927, a bill to provide for the disposition of certain undistributed judgment funds awarded the Creek Nation.

S. 3047

At the request of Mr. KASTEN, the name of the Senator from Oklahoma (Mr. NICKLES) was added as a cosponsor of S. 3047, a bill to repeal the withholding of tax from interest and dividends and to require statements to be filed by the taxpayer with respect to interest, dividends, and patronage dividends.

S. 3048

At the request of Mr. THURMOND, the names of the Senator from Illinois (Mr. DIXON), the Senator from Minnesota (Mr. BOSCHWITZ), the Senator from Arkansas (Mr. PRYOR), the Senator from Iowa (Mr. JEPSEN), the Senator from Vermont (Mr. LEAHY), the Senator from Washington (Mr. GORTON), the Senator from New York (Mr. D'AMATO), the Senator from New Hampshire (Mr. RUDMAN), the Senator from Tennessee (Mr. SASSER), and the Senator from Oklahoma (Mr. NICKLES) were added as cosponsors of S. 3048, a bill to amend title 18, United States Code, to combat, deter, and punish individuals who adulterate or otherwise tamper with food, drug, cosmetic, and other products with intent to cause personal injury, death, or other harm.

S. 3060

At the request of Mr. HATFIELD, the name of the Senator from Colorado (Mr. ARMSTRONG) was added as a cosponsor of S. 3060, a bill to amend section 7(b) of the Wild and Scenic Rivers Act.

S. 3076

At the request of Mr. SPECTER, the name of the Senator from Illinois (Mr. PERCY) was added as a cosponsor of S. 3076, a bill to provide a temporary means to correct imbalances in the natural gas market in order to restrain prices charged to natural gas users.

SENATE JOINT RESOLUTION 263

At the request of Mr. THURMOND, the name of the Senator from Kentucky (Mr. HUDDLESTON) was added as a cosponsor of Senate Joint Resolution

263, a joint resolution to authorize the President to issue a proclamation designating the week beginning on March 13, 1983, as "National Surveyors Week."

SENATE JOINT RESOLUTION 265

At the request of Mr. DENTON, the name of the Senator from Kentucky (Mr. HUDDLESTON) was added as a cosponsor of Senate Joint Resolution 265, a joint resolution to authorize and request the President to proclaim 1983 as the "National Year of Voluntarism."

SENATE CONCURRENT RESOLUTION 121

At the request of Mr. DOLE, the name of the Senator from Pennsylania (Mr. SPECTER) was added as a cosponsor of Senate Concurrent Resolution 121, a concurrent resolution expressing the sense of the Congress that the United States should maintain Federal involvement in, and support for, the child nutrition programs, and for other purposes.

SENATE RESOLUTION 478

At the request of Mr. DODD, the names of the Senator from Ohio (Mr. METZENBAUM), the Senator from New York (Mr. MOYNIHAN), the Senator from Pennsylvania (Mr. SPECTER), the Senator from Maryland (Mr. SARBANES), the Senator from Kansas (Mr. DOLE), and the Senator from Maine (Mr. MITCHELL) were added as cosponsors of Senate Resolution 478, a resolution expressing the sense of the Senate with respect to the need to maintain guidelines which insure equal rights with regard to education opportunity.

AMENDMENT NO. 1906

At the request of Mr. CRANSTON, the name of the Senator from Massachusetts (Mr. TSONGAS) was added as a cosponsor of amendment No. 1906 intended to be proposed to S. 2607, an original bill to amend and extend certain Federal laws relating to housing, community and neighborhood development, and related programs, and for other purposes.

SENATE CONCURRENT RESOLUTION 133—CONCURRENT RESOLUTION RELATING TO PEACE THROUGH STRENGTH

Mr. LAXALT (for himself, Mr. TOWER, Mr. ABDNOR, Mr. ANDREWS, Mr. ARMSTRONG, Mr. BENTSEN, Mr. BOREN, Mr. BOSCHWITZ, Mr. CANNON, Mr. CHILES, Mr. COCHRAN, Mr. COHEN, Mr. D'AMATO, Mr. DANFORTH, Mr. DECONCINI, Mr. DENTON, Mr. DOLE, Mr. DOMENICI, Mr. EAST, Mr. GARN, Mr. GOLDWATER, Mr. GRASSLEY, Mr. HATCH, Mrs. HAWKINS, Mr. HAYAKAWA, Mr. HEFLIN, Mr. HELMS, Mr. HOLLINGS, Mr. HUDDLESTON, Mr. HUMPHREY, Mr. JEPSEN, Mr. JOHNSTON, Mr. KASTEN, Mr. LONG, Mr. LUGAR, Mr. MCCLURE, Mr. MATTINGLY, Mr. MELCHER, Mr. MURKOWSKI, Mr. NICKLES, Mr. NUNN, Mr. QUAYLE, Mr. PRESSLER, Mr. PRYOR, Mr. RANDOLPH, Mr. ROTH, Mr. RUDMAN, Mr. SASSER, Mr. SCHMITT, Mr. STEVENS, Mr. SYMMS, Mr. THURMOND, Mr. WALLOP, Mr. WARNER, and Mr. ZORINSKY), submitted the following concurrent resolution; which was referred to the Committee on Armed Services:

S. CON. RES. 133

Whereas the Soviet Union has exploited United States peace initiatives in order to build up Soviet strategic and conventional warfare capabilities;

Whereas these capabilities have given the Soviet Union the means to support worldwide aggression of an increasingly bold nature;

Whereas there is a basis for concern that the Soviets may use these capabilities in armed aggression in Pakistan, Iran, and Yugoslavia;

Whereas the Soviet Union has demonstrated an unwillingness to live by the principles of international law;

Whereas the United States is the one world power that can stop Soviet expansionism: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that the national security policy of the United States should reflect a national strategy of peace through strength, the general principles and goals of which would be—

(1) to inspire, focus, and unite the national will and determination to achieve peace and freedom,

(2) to achieve overall military and technological superiority over the Soviet Union,

(3) to to create a strategic and civil defense which would protect the American people against nuclear war at least as well as the Soviet population is protected,

(4) to accept no arms control agreement which in any way jeopardizes the security of the United States or its allies, or which locks the United States into a position of military inferiority,

(5) to reestablish effective security and intelligence capabilities,

(6) to pursue positive nonmilitary means to roll back the growth of communism,

(7) to help our allies and other non-Communist countries defend themselves against Communist aggression, and

(8) to maintain a strong economy and protect our overseas sources of energy and other vital raw materials.

Mr. LAXALT. Mr. President, the greatest problem we have as a nation is how to deal with the growing Soviet politico-military threat to us and the rest of the free world.

The invasion of Afghanistan and the repression of Poland are reminders that the Soviets are as ruthless as were the Nazis in expanding and consolidating their totalitarian empire.

Soviet expansionism has been driven by the goal of world domination and guided by a grand strategy to achieve that goal.

Soviet successes have been possible only because the United States has had neither a goal or a strategy in this conflict. U.S. policy has been essentially that of reacting to Soviet initiatives in defense of the status quo.

Now, the Soviets have gained a significant nuclear and conventional military superiority over the United States. This, together with the powerful Soviet worldwide propaganda and disinformation network promoting disarmament in the West, makes rebuilding our defenses an urgent necessity.

First, though, we should adopt a national goal in this conflict and a grand strategy based on all elements of our national power—economic, political and military—to achieve that goal.

On June 8, 1982, before the British Parliment, President Ronald Reagan proposed that this goal should be "a world in which all people are at least free to determine their destiny."

To achieve that goal, President Reagan called for a "crusade for freedom" designed to "leave Marxism-Leninism on the ash heap of history" through a "global campaign for democracy."

In this connection, President Reagan declared that "it is time that we commited ourselves as a Nation—in both the public and private sectors—to assist democratic development."

I believe that most Americans agree with the goal so elequently expressed by President Reagan and will support the adoption of a national strategy of peace through strength to achieve that goal.

That is why I and 54 other Members of this body are cosponsoring a concurrent resolution calling for the adoption of a national strategy of peace through strength.

There are eight basic principles inherent in a national strategy of peace through strength. These principles will serve to clarify the direction of the strategy and the basis of some of its details, and they will serve as a yardstick to evaluate competing programs and initiatives. Unless the United States speedily adopts such a strategy to coordinate its national security efforts, it is doomed to ineffectual policies, uncoordinated responses to Soviet aggression, and ultimately, a great growth in the power and influence of the Soviet Union.

President Reagan was an early endorser of this resolution and it appeared as the defense strategy plank of the 1980 Republican Convention platform.

The President has said that he will sign this resolution, when it is passed by both Houses of Congress.

In this connection, it is important to note that this resolution, as House Concurrent Resolution No. 163, has been cosponsored by 238 Members of the House of Representatives and has been referred to the House Foreign Affairs Committee.

This resolution has been endorsed by Caspar Weinberger, Secretary of Defense; Gen. John Vessey, Chairman of the Joint Chiefs of Staff; Powell Moore, Deputy Secretary of State for Congressional Relations; and Judge

William Clark, National Security Assistant to the President. I ask unanimous consent that the letters be printed in the RECORD at the end of this statement.

This resolution has already been passed by 13 State legislatures; Arizona, Alabama, California, Colorado, Delaware, Florida, Indiana, Kansas, Louisiana, Mississippi, Nebraska, Tennessee, Texas, and the Territory of Guam.

In addition, 127 national organizations have endorsed the resolution. I request that the organizations be listed at the end of this statement.

Whatever the outcome of the outcome of the conflict between Soviet totalitarianism and democracy, the result is sure to be "peace through strength." What is being decided now is whose strength and whose peace.

So I urge that we all make this commitment to peace because, as President Reagan told the British Parliament, the struggle is "a trial of spiritual resolve" and at stake are "the values we hold, the beliefs we cherish, the ideals to which we are dedicated."

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF DEFENSE,
Washington, D.C., September 16, 1982.

Hon. STEVEN D. SYMMS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR: I understand that you, together with a large number of co-sponsors, are preparing to introduce the Peace Through Strength Resolution in the Senate. The passage of this Resolution will again demonstrate the strength of bipartisan support for the President's national security programs, which are designed to restore the margin of safety to U.S. military power. The Department of Defense strongly supports the intent and purpose of this initiative. We appreciate the effort you and your colleagues are making to express so effectively the support of the Senate for a strong defense program.

CAP WEINBERGER.

JOINT CHIEFS OF STAFF,
September 27, 1982.

Hon. STEVEN D. SYMMS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR SYMMS: The Joint Chiefs of Staff have consistently maintained the view that the security of our country and peace in the world can only be preserved if the defenses of the U.S. are strong. Bipartisan support for the passage of a Peace Through Strength resolution will send a clear signal of this Nation's commitment and resolve to continue to provide for the common defense. We appreciate and support your initiative.

Sincerely,

JOHN W. VESSEY, JR.,
Chairman.

U.S. DEPARTMENT OF STATE,
Washington, D.C., September 22, 1982.

Hon. STEVEN D. SYMMS,
U.S. Senate.

DEAR SENATOR SYMMS: Thank you for your letter of September 20 concerning the Peace Through Strength Resolution.

From the outset, this Administration established as a national priority the correction of important shortcomings in our defense posture. As the President's very difficult budget decisions reflect, we are committed to strengthening our defenses. This Administration will never accept an inferior position, recognizing that our national security and that of our Allies is at stake. A strengthened defense posture is essential to the successful conduct of our foreign policy, and is thus a critical ingredient in maintaining peace and stability in today's troubled world. It is also essential to the achievement of the balanced, verifiable and effective arms control agreements the President has proposed—agreements which would substantially reduce strategic and intermediate-range nuclear forces, and conventional forces in Europe to equal levels on both sides.

Passage of the Peace Through Strength Resolution would provide a strong measure of support for our military programs, and our arms control objectives, which are so important to the cause of peace.

With cordial regards,

Sincerely,

POWELL A. MOORE,
Assistant Secretary for Congressional Relations.

THE WHITE HOUSE,
Washington, September 16, 1982.

Hon. STEVEN D. SYMMS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR SYMMS: I understand that you and many of your colleagues intend to offer a resolution at this time reaffirming the "Peace through Strength" language, which was incorporated into the 1980 Republican Party Platform.

As the President said when the Resolution was considered last year, "Passage of the Resolution by both Houses will be a powerful symbol of bipartisan support for our national security programs, which are designed to restore the margin of safety to our military power."

Sincerely,

WILLIAM P. CLARK.

Mr. ZORINSKY. Mr. President, the principal goal of the United States has been the preservation of peace and freedom. No responsible American disputes this goal, but differences on how best to achieve it have badly divided our Nation and led to disastrous reverses in foreign policy. Because of these differences, it has proved impossible to adopt or adhere to a national strategy. Without a national strategy to give it direction and coherence, our foreign policy has been reactive, inconsistent, and far weaker than it need be.

On no issue has there been greater division than on the nature of the threat from the Soviet Union. Although Soviet strength and destabilizing behavior were recognized as potential dangers, for the past two decades, American policy responding to them was based on accommodation and unilateral gestures of restraint. The Soviet Union, it was argued, had such a dismal history of war and invasion that a strong American policy would immediately trigger suspicion and hostility. But if the United States avoided provoking this reaction, increased contact through trade, arms control negotiations, and growing cultural ties would convince the Soviet leadership of American good faith.

This argument formed the basis for the American policy of détente. During this period the United States drastically cut defense spending, froze its strategic nuclear forces, halved the size of its Navy, and allowed its conventional land and air forces to undergo a significant decline. At the same time, it dramatically reduced its international presence, dismantled much of its intelligence services, and let most of its defense alliances deteriorate.

Soviet détente behavior was diametrically different. It not only enormously increased the quantity of its nuclear forces, but went for a qualitative change as well, achieving a large force with the explosive yield and accuracy to destroy the U.S. strategic force on the ground. It increased its overall defense spending by as much as 7 percent annually each year of this period, not only greatly increasing its ground forces but also creating for the first time in Soviet history a blue water navy. The Soviet Union greatly increased the size and scope of the KGB First Directorate, responsible for foreign operations, especially subversion and disinformation. It invaded, directly or through proxies, a half dozen Third-World nations; has proved a major impediment to a negotiated Middle East settlement; and has promoted instability by training and arming terrorist worldwide.

In view of this, it is no surprise that the Soviet Union defines détente as "an intensification of the ideological struggle in the absence of nuclear war."

The United States has at last recognized that détente cannot help to achieve the national goal of peace and freedom and has begun the first steps toward strengthening its defenses and foreign policy. However, because these steps have not been explained to the American people in the context of a well-articulated national strategy, the political consensus for making them has been eroding. Such a strategy has been worked out—the national strategy for peace through strength.

The national strategy for peace through strength is based upon the realization, backed by over 20 years of experience, that the Soviet Union cannot be cajoled into good behavior by weakness or unilateral restraint. At the same time, it is neither possible nor desirable to coerce the Soviet Union by the direct use of military force. Instead, the national strategy of peace through strength, while providing for the military and strategic forces necessary to establish a margin of safety, will arrest and counteract the spread of Soviet influence by nonmilitary means.

The national strategy for peace through strength is embodied by eight principles, which will serve as a yardstick by which future U.S. defense and foreign policy initiatives can be evaluated. These principles outline the steps necessary to preserve the safety of the United States and its allies, while at the same time promoting greater understanding of and respect for democratic principles.

I urge that the U.S. Senate resolve that the national strategy of peace through strength be adopted as the national strategy for the United States. By doing so, we will not only greatly strengthen the national security policy of this country, but will also be reaffirming our support for the principle goal of the United States—peace and freedom.

Mr. DECONCINI. Mr. President, I am a cosponsor of the peace through strength resolution because it provides a Reagan-approved strategy for carrying out President Reagan's crusade for freedom.

In his speech to the British Parliament on June 8, President Reagan offered "a plan and a hope for the long term." He called for—

—the march of freedom and democracy which will leave Marxism-Leninism on the ash heap of history, as it has left other tyrannies which stifle the freedom and muzzle the self-expression of the people.

In the closing paragraph the President said:

Let us now begin a major effort to secure the best—a crusade for freedom that will engage the faith and fortitude of the next generation. For the sake of peace and justice, let us move toward a world in which all people are at last free to determine their own destiny.

It is the positive note which is so vital in that statement. A successful strategy cannot be static. Our society, values, and way of life have been targeted for extinction by the force of Soviet communism, and cannot be preserved merely by attempting to maintain the status quo.

Under our value system, military forces can only be used to defend the status quo when it is militarily threatened.

Communism is an ideology that has achieved its greatest successes by playing on mankind's best aspirations. It must be fought—and ultimately defeated—by having its abuses and brutal nature exposed, and by being countered by better and more honest ideas. In the end its own victims will eliminate it, a day which will come more quickly if enough American strength is available to blunt or prevent Soviet employment of naked force.

Once again, a focusing of the national will is a crucial precondition to forging effective policies in this area. The United States cannot convince a skeptical world of its good intentions and probability of survival if its own people are not united behind a goal and a strategy to achieve that goal.

Nor is it possible for the United States to lower its voice about the dangers posed by the Soviet system without losing much ground. In the past, U.S. policies, whether containment or détente, were based upon the hope that the Soviet Union would eventually moderate its ideology as it experi-

enced American good will. Instead, the Soviet Union has grown more assertive and more imperialistic as its military strength and aggressive momentum have increased.

A key tool available to the United States in rolling back this Soviet momentum is communications. Chief among them are the radios—Voice of America and Radio Liberty/Radio Free Europe—and satellite television, which can reach into areas barred to other forms of American influence.

Other forms of communications should not be overlooked, including overseas libraries, language and cultural instruction in American schools, exchanges, art, and entertainment.

To date our communications have been among the most effective means of spreading the Western values of freedom and democracy, even with the minimal official encouragement they have received. This should be greatly expanded and focused.

A second means of rolling back the influence of communism is to describe the shambles its "scientifically planned" economy makes of the lives of its citizens. Merely the existence of well-made Western merchandise is a destabilizing influence in Communist systems, which are forced to explain away their own shoddy products. Of more importance is the disruption "centralized planning" causes in the Soviet Union, where meat is rationed; or Poland, where food is rationed; or Cuba, where everything is rationed.

The greatest weakness of all in the Communist system should be exploited—its total denial of freedom to its citizens. Walls have to be built to contain people within the Soviet system. This fact should be more than enough to totally alienate all nations of the world except for those that have adopted their own form of repression.

But our lack of a strategy and our inability to explain our motive for foreign policy initiatives have in many cases opened the United States to charges of hypocrisy. Few nations are willing to believe the lack of coordination in U.S. policy is due to ineptness.

In short, the national strategy of peace through strength is built upon the understanding that military force is simply not appropriate for actions beyond deterring attack or containing aggression. The offensive role in a U.S. national strategy must be carried out by nonmilitary means which will take many years to bear fruit.

That is why one of the principles of a national strategy of peace through strength is to pursue positive, nonmilitary means to roll back the growth of communism.

And, that is why another principle is to help our allies and other non-Communist countries defend themselves against Communist aggression.

The emphasis on consensus and coordination that a national strategy of peace through strength places on the formulation of American foreign policy also holds true in relations with our allies. The struggle with the Soviet Union is by no means bilateral—every nation not already in the Soviet orbit is ultimately threatened by its expansionism. Therefore, it is clearly in the U.S. national interest to provide appropriate assistance to other nations whose independence or security is threatened.

By strengthening alliances and supplying aid to other nations sharing the U.S. strategic predicament, the national strategy of peace through strength not only addresses problems of U.S. security, but also demonstrates that the United States is a faithful partner whose political system deserves emulation.

Mr. TOWER. Mr. President, I have cosponsored the resolution for peace through strength because a "global campaign for democracy" must be based on the principles of strategy which utilize all elements of national strength—political, military, and economic—in achieving national goals.

Democracy does not need military power to win the fight for the minds of men. Democracy needs nothing more than energetic advocates and a world political environment in which it can demonstrate its superiority.

The key to a peace through strength strategy is to achieve our goals without armed conflict. To do this, we must deter the Soviets from starting a war.

History shows that only superior war fighting capability can deter an aggressor. Forces that cannot win cannot deter.

The United States can have a superior war fighting capability without the cost of across-the-board numerical superiority if it exploits advanced technology such as the cruise missile and space-based laser.

In a recent speech at the Army War College, Secretary of Defense Weinberger summarized the need for strengthening United States military power. He said "* * * in dealing with the Soviets, peace must be purchased with strength." That is why one of the eight principles of a national strategy of peace through strength is to: achieve overall military and technological superiority over the Soviet Union.

Mr. DENTON. Mr. President, I am proud to cosponsor the resolution for peace through strength because the United States must finally adopt a strong and coherent strategy. Perhaps the most important principle of a national strategy of peace through strength is inspire, focus, and unite the national determination to achieve peace and freedom.

Public support is necessary if the United States is to implement a national strategy of peace through strength. We are a democracy, and no major policy can long be followed in the face of strong popular opposition.

But adopting a national strategy that will influence the entire range of U.S. defense and foreign policy, including issues of such public concern as trade and military acquisition, will require far more than simple public acceptance. It must be vigorously promoted and explained.

As far as possible, all U.S. initiatives should be justified publicly in terms of their relation to the national strategy. This implies that not only will the U.S. Government have to involve the isolated and compartmentalized foreign policy community with the public, but also that we must make an extra effort to share with the public more facts about the Soviet threat.

The advantages of informing the public will be enormous. Public support for U.S. defense and foreign policy has often weakened because the people simply did not understand the realities it was based on. This lack of understanding not only has given rise to opposition to particular policies, but also has weakened public support for defense and foreign policy as a whole.

Better justification of defense and foreign policy initiatives to the public in terms of how they further the national interest would also improve policymaking.

In short, including a central element a better identification and expression by the defense and foreign policy community of U.S. national priorities and goals, implementation of a national strategy of peace through strength would not only rally the American people behind the Government, but would also prove a powerful incentive to improve the quality and coherence of national policy initiatives.

Mr. GARN. Mr. President, I am a cosponsor of the peace through strength resolution because it is vital that we have a coherent, balanced overall national security strategy. Otherwise individual actions tend to be taken without regard to their impact on other policy objectives.

In few areas has the lack of a national strategy had more disastrous results than in arms control. Beginning with the SALT I treaty of 1972, the United States has entered into numerous agreements with the Soviet Union that are unbalanced, self-ensnaring, unverifiable, or not enforceable. Because there is no overall standard by which treaties can be evaluated in the context of a total strategy, political leaders have found it easier to heed those advisers who counsel accommodation, appeasement, and unilateral disarmament.

But arms control is important—too important to be negotiated without reference to a clear overall strategy.

For example, it makes no strategic sense to bargain away the right and

responsibility of the United States to defend its citizens from Soviet nuclear missiles.

Arms control can only be one of many means to reach the goal of establishing peace and freedom. It is not a goal in itself. Arms control on its own cannot create stability, but it can help to maintain stability already established, while reducing the probability of war, the costs of maintaining deterrence, and the levels of damage should deterrence fail.

That is why one of the principles of a national strategy of peace through strength is: Accept no arms control agreement which in any way jeopardizes the security of the United States and its allies, or which locks the United States into a position of military inferiority.

Mr. JOHNSTON. Mr. President, as a cosponsor of the peace through strength resolution, I am particularly interested in the principle dealing with the economic component of strategy.

A key element of the Soviet Union's strategy is to gain control over overseas sources of raw materials and the routes for transporting them to the industrialized heartland of the West.

Yet, in few areas is the division between the United States and its allies so acrimoniously displayed as in that of economic policy.

It is difficult for some Western leaders to understand why the establishment of Soviet political control over a region should be of concern, for this seldom results in access to markets being cut off. For example, Angola sells most of its oil to the United States, and Cuba its agricultural products to Europe.

It is an important premise of the national strategy of peace through strength that these differences must be resolved by explaining and publicizing the long-term consequences of a failure to secure access to vital sources of raw material. Unless this is done, the short-term self-interest of the corporations and governments concerned will continue to undermine the enormous leverage and power which could be applied by the economic system of the West.

The most effective area of competition with the Soviet Union should be in the economic field.

However, the United States and Western Europe have helped the Soviet bloc avoid the impact of its own inefficiency by extending massive credits and loans.

The best way to accelerate the process of Communist decline, as described by President Reagan, is to let the Soviet system fall of its own weight by sharply reducing this subsidization.

That is why one of the principles of a national strategy of peace through strength is to: Maintain a strong economy and protect our overseas sources of energy and other vital raw materials.

Mr. SYMMS. Mr. President, I support Senator LAXALT's introduction of the peace through strenth resolution. All Americans yearn for peace. All Americans are strongly in favor of preventing nuclear war. I, myself, have always been a proponent of preserving world peace and preventing nuclear war. It is for this reason that I favor a strong national defense, because a strong national defense is the best guarantor of world peace. The peace through strength resolution embodies my views on how the United States can most effectively safeguard world peace and our national security.

On June 8, 1982, President Reagan in his speech to the British Parliament called for "a global campaign for democracy." This establishes a goal for the United States and the free world which can be achieved by a national strategy of peace through stength.

President Reagan endorsed a national strategy of peace through strength and has committed to sign legislation for its adoption. And, this strategy has been endorsed by 238 Representatives and 53 Senators.

The Department of Defense has long needed an agreed upon grand strategy so that it might plan a force structure to carry out that strategy. While the principles of an overall strategy go beyond purely military considerations, there is no way the Department of Defense can properly plan without knowing the overall strategy.

There is no way DOD can fully justify its major weapons programs without placing them in the context of an overall strategy. That is why it is necessary to now give our defense leaders the guidance embodied in the eight principles of a national strategy of peace through strength.

THE NEED FOR A NATIONAL STRATEGY OF PEACE THROUGH STRENGTH

The most common complaint about U.S. defense and foreign policy over the past 35 postwar years has been that it is reactive and only in defense of the status quo. We have had no unifying goal and thus no strategy.

On the other hand, the Soviet Union and its Communist bloc allies have the goal of a world socialist state, and they have an overall strategy for achieving it.

U.S. GOAL ESTABLISHED

President Reagan, in his historic speech to the British Parliament on June 8, established the long needed unifying goal for the United States. He began his speech by reviewing the failure of the Communist economic and political system everywhere in the world. He noted, for example, that 20 percent of the work force in the U.S.S.R. is engaged in agriculture; yet Soviet agriculture cannot feed the people in the U.S.S.R.

He stressed that the Communist regimes in Eastern Europe, despite 30 years of control, have not yet been able to risk elections. In a memorable phrase, he declared: "Regimes planted by bayonets do not take roots." The President, pointing toward a new political order, declared that the world was at a turning point, that the tide had turned against communism, and that a "democratic revolution is now gathering new strength." At a later point, he spoke of a "global campaign for democracy now gathering force."

He called on open and free societies to "take actions to assist the campaign for democracy." The President made it plain that communism cannot be overcome without effort, risk and an organized strategy for the free world.

He said:

* * * we must not hesitate to make clear out ultimate objectives and to take concrete actions to move towards them." He added, "The objective I propose is quite simple to state: To foster the infrastructure of democracy * * *.

Speaking for the United States, he said:

It is time that we committed ourselves as a nation—in both the public and private sectors—to assisting democractic development."

In regard to the role of American military power in this process, he said, "Our military strength is a prerequisite to peace, but let it be clear we maintain this strength in the hope it will never be used." In the contest between democracy and Communist totalitarianism, the "ultimate determinant," he said, will not be bombs and rockets but wills and ideas. He described the struggle as "a trial of spiritual resolve," and at stake were "the values we hold, the beliefs we cherish, the ideals to which we are dedicated."

President Reagan has long endorsed the adoption of a national strategy of peace through strength.

A NATIONAL STRATEGY OF PEACE THROUGH STRENGTH

There are eight basic principles inherent in a national strategy of peace through strength. These principles will serve to clarify the direction in which the details of the strategy are formulated, and serve as a yardstick to evaluate competing programs and initiatives. Unless the United States speedily adopts such a strategy to coordinate its national security efforts, it is doomed to ineffectual policies, uncoordinated responses to Soviet aggression, and ultimately, a great growth in the power and influence of the Soviet Union.

These eight principles are:

FIRST PRINCIPLE: INSPIRE, FOCUS AND UNITE THE NATIONAL DETERMINATION TO ACHIEVE PEACE AND FREEDOM

Public support is necessary if the United States is to implement a national strategy of peace through strength. It is a democracy,

and no major policy can long be followed in the face of strong popular opposition.

But, adopting a national strategy that will influence the entire range of U.S. defense and foreign policy, including issues of such public concern as trade and military acquisition, will require far more than simple public acceptance. It must be vigorously promoted and explained.

As far as is possible, all U.S. initiatives should be justified publicly in terms of their relation to the national strategy. This implies that not only will the U.S. government have to involve the isolated and compartmentalized foreign policy community with the public, but also that the entire basis for the current system of classifying government secrets will have to be reworked to share with the public more facts about the Soviet threat.

The advantages of informing the public will be enormous. Public support for U.S. defense and foreign policy has often weakened, because the people simply did not understand the realities it was based on.

This lack of understanding not only has given rise to opposition to a particular policy, but also has weakened public support of defense and foreign policy as a whole.

The need to justify defense and foreign policy initiatives to the public in terms of how they further the national interest would also improve policy making.

In short, by forcing the defense and foreign policy community to clearly identify and express U.S. national priorities and goals, a national strategy of peace through strength would not only rally the American people behind the government, but would also prove a powerful incentive to improve the quality and coherence of national policy initiatives.

SECOND PRINCIPLE: TO ACHIEVE OVERALL MILITARY AND TECHNOLOGICAL SUPERIORITY OVER THE SOVIET UNION

A "global campaign for democracy" must be based on the principles of strategy which utilize all elements of national strength—political, military and economic—in achieving national goals.

Democracy does not need military power to win the fight for the minds of men. Democracy needs nothing more than energetic advocates and a world political environment in which it can demonstrate its superiority.

The key to a peace through strength strategy is to achieve our goals without armed conflict. To do this, we must deter the Soviets from starting a war.

History shows that only superior war fighting capabiity can deter an aggressor. Forces that cannot win cannot deter.

The United States can have superior force and a superior war fighting capability. We also need to exploit advanced technology, such as the cruise missile and space based anti missile defense.

In a recent speech at the Army War College, Secretary of Defense Weinberger summarized the need for strengthening United States military power. He said. ". . . in dealing with the Soviets, peace must be purchased with strength."

THIRD PRINCIPLE: TO CREATE A STRATEGIC DEFENSE AND A CIVIL DEFENSE WHICH WOULD PROTECT U.S. CITIZENS AGAINST NUCLEAR WAR AT LEAST AS WELL AS THE SOVIETS DEFEND THEIR CITIZENS

Since the early 1960's, the United States has structured its military forces and designed its strategies in keeping with a concept called Mutual Assured Destruction (MAD).

According to the MAD principle, the U.S. and the Soviet Union will be equally deterred, and therefore secure, if the population and industrial centers of both nations are defenseless and can be easily destroyed by either a nuclear first strike or a retaliation. According to MAD, the absence of defensive weapons enhances deterrence.

As a matter of policy, therefore, the United States has scrapped nearly all it defenses. We have no defenses against Soviet ballistic missiles and only a few aged fighter interceptors to defend against Soviet bombers.

This MAD concept was never accepted in the Soviet Union.

The Soviets have built a modern, nationwide anti-aircraft defense system with a small Ballistic Missile Defense force around Moscow, backed by the missile defense capabilities of its anti-aircraft missiles (SAMs).

Over and above these active defenses, the Soviets have a very large civil defense or passive defense system. The Soviets have spent billions of dollars to build blast and fall-out shelters for political and industrial leaders and key workers in and around major Soviet cities. And, they have detailed plans for the evacuation of cities in the event of a nuclear war.

It is intolerable that the Soviet government should conscientiously provide for the survival of its people, while the U.S. government makes no effort at all to defend its people.

Using advanced technology, the United States can and must defend its citizens against the horror of nuclear war. For example, the Government Accounting Office has strongly advocated a satellite based defense.

FOURTH PRINCIPLE: ACCEPT NO ARMS CONTROL AGREEMENT WHICH IN ANY WAY JEOPARDIZES THE SECURITY OF THE UNITED STATES AND ITS ALLIES, OR WHICH LOCKS THE UNITED STATES INTO A POSITION OF MILITARY INFERIORITY

In few areas has the lack of a national strategy had more disastrous results than in arms control. Beginning with the SALT I treaty of 1972, the United States has entered into numerous agreements with the Soviet Union that are unbalanced, unequal, self-ensnaring, unverifiable, or not enforceable. Because there is no overall standard by which treaties can be evaluated in the context of a total strategy, political leaders have found it easier to heed those advisors who counsel accommodation, appeasement, and unilateral disarmament.

But arms control is important—too important to be negotiated without reference to a clear overall strategy.

For example, it makes no strategic sense to bargain away the right (and responsibility) of the United States to defend its citizens from Soviet nuclear missiles.

Arms control can only be one of many means to reach the goal of establishing peace and freedom. It is not a goal in itself. Arms control on its own cannot create stability, but it can help to maintain stability already established, while reducing the probability of war occurring, the costs of maintaining deterrence, and the levels of damage should deterrence fail.

FIFTH PRINCIPLE: REESTABLISH EFFECTIVE SECURITY AND INTELLIGENCE CAPABILITIES

Good intelligence is central to any nation's security, yet over the past ten years ferocious and disabling assaults have been made on the capabilities of the U.S. intelligence services to carry out clandestine data collection, engage in covert operations, or coordinate counterintelligence.

A national strategy of peace through strength requires the most accurate information possible, not merely for foreknowledge to forestall moves by the Soviet Union and other adversaries, but also to defend against terrorism and other internal security threats.

The United States should therefore rebuild its intelligence and internal security capabilities.

SIXTH PRINCIPLE: PURSUE POSITIVE NONMILITARY MEANS TO ROLL BACK THE GROWTH OF COMMUNISM

A successful strategy cannot be static. Our society, values, and way of life have been targeted for extinction by the forces of Soviet Communism, and cannot be preserved merely by attempting to maintain the status quo.

Under our value system, military force can only be used to defend the status quo when it is militarily threatened.

Communism is an ideology that has achieved its greatest successes by playing on mankind's best aspirations. It must be fought—and ultimately defeated—by having its abuses and brutal nature exposed, and by being countered by better and more honest ideas. In the end, its own victims will eliminate it, a day which will come more quickly if American strength is available to blunt or prevent Soviet employment of naked force.

Once again, a focusing of the national will is a crucial precondition to forging effective policies in this area. The United States cannot convince a skeptical world of its good intentions and probability of survival if its own people are not united behind a goal and a strategy to achieve that goal.

Nor is it possible for the United States to lower its voice about the dangers posed by the Soviet system without losing much ground. In the past, U.S. policies, whether containment or detente, were based upon the hope that the Soviet Union would eventually moderate its ideology as it experienced American good will. Instead, the Soviet Union has grown more assertive and more imperialistic as its military strength and aggressive momentum have increased.

A key tool available to the United States in rolling back this Soviet momentum is communications. Chief among them are the radios—Voice of America and Radio Liberty/Radio Free Europe and satellite television, which can reach into areas barred to other forms of American influence.

Other forms of communications should not be overlooked, including overseas libraries, language and cultural instruction in American schools, exchanges, art, and entertainment.

To date our communications have been among the most effective means of spreading the Western values of freedom and democracy, even with the minimal official encouragement they have received. This should be greatly expanded and focused.

A second means of rolling back the influence of Communism is the shambles its "scientifically planned" economy makes of the lives of its citizens. Merely the existence of well-made Western merchandise is a destabilizing influence in Communist systems, which are forced to explain away their own shoddy products. Of more importance is the disruption "centralized planning" causes in the Soviet Union, where meat is rationed; or Poland, where food is rationed; or Cuba, where everything is rationed.

The greatest weakness of all in the Communist system should be exploited—its total denial of fredom to its citizens. Walls have

to be built to contain people within the Soviet system. This fact should be more than enough to totally alienate all nations of the world except for those that have adopted their own form of repression.

But our lack of a strategy and our inability to explain our motive for foreign policy initiatives have in many cases opend the United States to charges of hypocrisy. Few nations are willing to believe the lack of coordination in U.S. policy is due to ineptness.

In short, the national strategy of peace through strength is built upon the understanding that military force is simply not appropriate for actions beyond deterring attack or containing aggression. The offensive role in a U.S. national strategy must be carried out by non-military means, which will take many years to bear fruit.

SEVENTH PRINCIPLE: HELP OUR ALLIES AND OTHER NON-COMMUNIST COUNTRIES DEFEND THEMSELVES AGAINST COMMUNIST AGGRESSION

The emphasis on consensus and coordination that a national strategy of peace through strength places on the formulation of American foreign policy also hold true in relations with our allies. The struggle with the Soviet Union is by no means bilateral—every nation not already in the Soviet orbit is ultimately threatened by its expansionism. Therefore it is clearly in the U.S. national interest to provide approrpiate assistance to other nations whose independence or security is threatened.

By strengthening alliances and supplying aid to other nations sharing the U.S. strategic predicament, the national strategy of peace through strength not only addresses problems of U.S. security, but also demonstrates that the United States is a faithful partner whose political system deserves emulation.

EIGHTH PRINCIPLE: MAINTAIN A STRONG ECONOMY AND PROTECT OUR OVERSEAS SOURCES OF ENERGY AND OTHER VITAL RAW MATERIALS

A key element of the Soviet Union's strategy is to gain control over oveseas sources of raw materials and the routes for transporting them to the industrialized heartland of the West.

Yet, in few areas are the division between the United States and its allies so acrimoniously displayed as in that of economic policy.

It is difficult for some Western leaders to understand why the establishment of Soviet political control over a region should be of concern, for this seldom results in access to markets being cut off. For example, Angola sells most of its oil to the United States, and Cuba its agricultural products to Europe.

It is an important premise of the national strategy of peace through strength that these differences must be resolved by explaining and publicizing the long term consequences of a failure to secure access to vital sources of raw material. Unless this is done, the short term self interest of the corporations and governments concerned will continue to undermine the enormous leverage and power which could be applied by the economic system of the West.

In conclusion, I would like to repeat that the peace through strength resolution is an excellent expression of American's deep desire for a stable and lasting world peace. It is our most fundamental hope as Americans that we can live in peace with our neighbors and preserve our freedoms, liberties, and way of life. A strong national defense is the best and time-tested guarantor of world peace.

SENATE RESOLUTION 513—ORIGINAL RESOLUTION REPORTED RELATING TO REDUCING THE FEDERAL BUDGET

Mr. DOMENICI, from the Committee on the Budget, reported the following original resolution; which was placed on the calendar:

S. RES. 513

Resolved, That the Congress reaffirms its commitment to reduce the Federal deficit. This will require gaining control of entitlement spending as well as raising sufficient revenues to pay for what we spend. Congress therefore expects the Appropriations Committee and the appropriate authorizing committees to take whatever actions are necessary to limit the increased expenditures under the legislation described in Senate Resolution 507 to the net increase in the amount of revenues received by the Treasury as a result of that legislation. In order to achieve this goal of not adding to the deficit for the life of those authorizations, the Senate urges its conferees to maintain the provisions in its bills which make new spending subject to annual appropriations.

AMENDMENTS SUBMITTED FOR PRINTING

SURFACE TRANSPORTATION ASSISTANCE ACT OF 1982

AMENDMENT NO. 4980

(Ordered to be printed and to lie on the table.)

Mr. FORD submitted an amendment intended to be proposed by him to the bill (H.R. 6211) to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes.

DRUG TAMPERING

AMENDMENT NO. 4981

(Ordered to be printed and to lie on the table.)

Mr. JEPSEN submitted an amendment intended to be proposed by him to the bill (S. 3048) to amend title 18, United States Code, to combat, deter, and punish individuals who adulterate or otherwise tamper with food, drug, cosmetic, and other products with intent to cause personal injury, death, or other harm.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON FOREIGN RELATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Monday, December 13, at 2 p.m., to hold a top-secret consultation on intermediate nuclear forces negotiations.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Monday, December 13, at 3 p.m., to hold a top-secret consultation on strategic arms reduction talks.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

AMERICANS MISSING IN SOUTHEAST ASIA

● Mr. PELL. Mr. President, on Friday, December 3, my distinguished colleague, Senator HAYAKAWA, introduced Senate Concurrent Resolution 131. I am pleased and proud to cosponsor this resolution which reaffirms our commitment to locate and bring home Americans missing and unaccounted for in Southeast Asia, expresses our sincere appreciation to the Laotian Government for recent indications of its willingness to assist the United States in this regard, and urges the Governments of the United States and Laos to move "with all dispatch to cooperate in this humanitarian effort".

Last month, on Veterans' Day, the Nation dedicated the first national memorial to those courageous Americans who fought and died in the Vietnam war. This memorial—a sleek, smooth black granite monument—bears the names of some 57,939 Americans who did not return from this tragic war. Of these, approximately 2,500 are unaccounted for in Southeast Asia. For the families and friends of these 2,500 Americans, the agony of the Vietnam war has yet to end. The passage of time has not healed their wounds or soothed their heartache because questions remain about the fate of their loved ones. Until these questions are answered, until the truth is learned and the Americans are returned home, the fear, the emptiness, and the pain of their families will continue; and the last dark chapter of the American involvement in Southeast Asia will not be finished.

The Governments of Vietnam and Laos have a humanitarian obligation to provide the fullest possible accounting of Americans missing in their countries and to return the remains of Americans killed in action. Regrettably, neither of these governments has moved rapidly to fulfill this obligation. As of April 1982, the Vietnamese Government returned only 75 sets of remains, and the Laotian Government

returned 4 sets, only 2 of which belonged to Americans. Together, these represent less than 10 percent of the 1,150 Americans who are known to have been killed in action and whose remains have not been recovered. While both governments have continually asserted that no Americans are being held captive within their territories, they have failed to substantiate this assertion by providing information on missing Americans, including a number who are known to have been captured alive.

Despite this poor record, recent developments suggest that more cooperation on this important issue may be forthcoming from the Governments of Vietnam and Laos. In September, a delegation from the National League of Families of American Prisoners and Missing in Southeast Asia was allowed to visit both Vietnam and Laos. In October, the Government of Vietnam fulfilled a pledge given to the delegation to return five sets of remains and provide material evidence about three other Americans who are not accounted for.

The delegation received an unprecedented amount of cooperation from the Government of Laos. Laotian officials scheduled meetings, made travel arrangements, and, for the first time, allowed Americans to visit two sites where U.S. military planes had crashed and collect the human remains for identification. I am encouraged by the treatment that this delegation received because it appears to reflect a new willingness on the part of the Laotian Government to fulfill its humanitarian obligation to assist the United States in locating and returning the estimated 558 Americans who are unaccounted for in Laos. I appreciate this new spirit of cooperation on the part of the Laotian Government, and I hope it will continue.

Since 1975 there have been 700 reports of sightings of live Americans in Southeast Asia. Despite persistent efforts and careful research, the U.S. Government has, as yet, been unable to prove any reports that Americans are being held against their will in Vietnam and Laos. Although I, myself, am skeptical that there are any Americans still alive in Southeast Asia, I firmly believe that we must continue to investigate these reports and to make every effort to verify them.

Senate Concurrent Resolution 131 was unanimously approved by the Foreign Relations Committee and is now before us for consideration. I urge my colleagues to vote for this resolution. It is our duty, as well as our moral responsibility, to do all that we can to recover the remains of those Americans who died in Southeast Asia and to learn the truth about those who remain missing and unaccounted for. By so doing, we not only close the book on this tragic war but also pay tribute to the many brave American men and women who served the United States in Southeast Asia.●

NORTH CAROLINA BAPTISTS ENDORSE VOLUNTARY SCHOOL PRAYER

● Mr. HELMS. Mr. President, this past month, the Baptist State Convention of North Carolina affirmed its support for the restoration of the right to voluntary prayer in our schools and other public institutions. Last June, the Southern Baptist National Convention adopted a similar resolution.

I am intrigued, though not surprised, at the confusion being orchestrated by opponents of voluntary school prayer. A typical distortion is the myth that voluntary prayer has not been curtailed by the Supreme Court. As Dr. Tom Freeman, a past president of the North Carolina State Baptist Convention has pointed out, "the contrary is true."

I commend the Reverend Doctor Freeman for setting the record straight on the positive resolution adopted by North Carolina Baptists. For the edification of all concerned with the fundamental right of our schoolchildren to participate in voluntary prayer I ask that his perceptive comments as reported in the Daily Record, of Dunn, N.C., be printed in the RECORD.

The article follows:

FREEMAN HAILS PRAYER VOTE

Dr. Tom Freeman, two-time president of the State Baptist Convention and pastor of Dunn's First Baptist Church, today hailed the action of the convention in approving voluntary prayer in the schools.

He said that if the vote had been taken when the entire convention messengers were still present, the vote would have been the same and the margin in favor possibly larger.

Dr. Freeman is one of the top Baptist leaders in the state.

"The important issue," said Dr. Freeman, "is that we voted for the freedom of those who wish to pray to do so anywhere in all public institutions, not just the schools."

He said he was referring to Congress, the Supreme Court, legislatures and wherever prayers are not taking place.

"You can usually count on the Raleigh News and Observer to get the facts wrong or to give a biased slant. Even when they get it right, they slant it," he told his congregation here Sunday.

The action of the Baptist State Convention in voting in favor of a resolution approving a proposed constitutional amendment on prayer in the public schools was incorrectly reported in the Raleigh newspapers, he said.

"The Raleigh Times editorial stated that we voted to once again let 'prescribed forms of prayer be sponsored in public schools.' That was not what we voted. The term 'prescribed prayer' was used twice in the editorial. The resolution that was approved stated:

"'That we declare our support of the proposed constitutional amendment, which states. 'Nothing in this Constitution shall be construed to prohibit individual or group prayer in public schools or other public institutions. No person shall be required by the United States or by any state to participate in prayer.'"

In 1962 and 1963 the Supreme Court outlawed "prescribed prayers" in the public schools and many persons still assume that voluntary prayer is permissible, he said, adding "The contrary is true. The Supreme Court has denied the right of voluntary prayer, and has, in fact, declared that a minute of silence is also unconstitutional."

"Baptists, and others, are upset about this, and justly so," he continued. "The Supreme Court begins its sessions with 'God save this honorable court.' The President of our nation and the other elected persons, including the judges, all swear upon a Bible to uphold the Constitution. The Congress and other states, or many of them, have chaplains who pray before each daily session.

"The American people find it hard to see the logic or fairness in this. North Carolina Baptists did not vote for prescribed prayers' in the schools, but for the right to voluntary prayers in the schools and all other public institutions. This reflected the vote on the same issue in the recent Southern Baptist Convention in New Orleans, last June," he said.

Dr. Freeman said the Supreme Court originally held that a prescribed prayer mandated by New York State was unconstitutional. "I agree with that," said Dr. Freeman. "No state or other government body should tell anyone what to pray."

Dr. Freeman said the court had gone even farther just recently in outlawing a moment of silent prayer. "I thought that was ridiculous. To say that it's unconstitutional is pretty farfetched. The constitution says nothing about silence."

The popular Dunn minister said he didn't understand how any religious body, any religious leader or any individual who professes to be a Christian could be against prayer anywhere, anytime under any circumstances as long as the individual is following his God-given right to commune with the Almighty."

The Raleigh newspaper had made a great issue over the fact that some messengers had left before the vote. Dr. Freeman emphasized that was irrelevant and said the margin in favor would have been greater had all messengers been present.●

HUMAN RIGHTS DAY

● Mr. KENNEDY. Mr. President, today marks the 34th anniversary of the adoption of the Universal Declaration of Human Rights by the United Nations. That document served notice that concern for human rights transcends national boundaries. It committed the world community to speak out against human rights abuses wherever they occur, and challenged international leaders to take action to deter continuing violations. The declaration symbolized the entitlement of all peoples in all parts of the world to observance of uniform standards of human rights.

The intervening generation has seen important progress in the realization of individual rights around the world. Most of Africa, Asia, and the Caribbean, then living under colonial domina-

tion, has achieved independence. There are increasing numbers of international groups dedicated to advancing the human rights cause—including Amnesty International, the International League for Human Rights, the International Human Rights Law Group, and the International Commission of Jurists. International human rights convenants and organizations have established an extensive framework for protecting human rights monitoring violations and pressing for improvement.

In the United States, our foreign assistance laws now clearly establish that security assistance may not be provided to governments which are engaged in a consistent pattern of gross violations of internationally recognized human rights. Congress has enacted specific legislation which bars assistance to Argentina and Chile until the administration can certify that there has been significant human rights progress in those countries. Continued assistance to El Salvador is conditioned upon similar human rights certifications at 6-month intervals.

Such legislative restrictions are no substitute for an administration foreign policy giving human rights considerations the prominence they should have; but they do oblige our Government to respond to the deep concern for human rights within the U.S. Congress and across this country.

Unfortunately, as the need for legislation of this kind makes clear, gross human rights abuses do continue in all parts of the world. Labor unions have been ruthlessly suppressed in Poland; human rights advocates in the Soviet Union are brutally persecuted; the crime of apartheid continues in South Africa; repression persists in South Korea and the Philippines. The list of countries where the cause of human dignity remains at risk is formidable.

Indeed, December 10 has assumed a double significance for the cause of human rights. On this date in 1979, the authorities cracked down on a human rights rally in Taiwan's second largest city, Kaohsiung. Eight opposition leaders were arrested, convicted for sedition, and received prison sentences ranging from 12 years to life. There was no evidence that their testimony about torture was ever seriously investigated.

Subsequently, the general secretary of the Presbyterian Church of Taiwan, Rev. C. M. Kao, and nine other church leaders, were arrested for working with the opposition. These political and religious leaders remain imprisoned today, and the martial law provisions under which these punishments were imposed remain in effect. In fact, martial law has been in force on Taiwan for 33 years.

This morning I took part in a Washington press conference held to renew the appeal for the release of political and religious prisoners, and for full democracy and respect for human rights in Taiwan. I was joined by three speakers who are uniquely qualified to testify to the current human rights situation in Taiwan: Mr. William P. Thompson, Thompson is the stated clerk of the United Presbyterian Church in the U.S.A., whose counterparts in Taiwan have worked long and hard to advance democracy and respect for human rights. Reverend Kao, the Presbyterian Church's general secretary, has been imprisoned along with nine other Presbyterian leaders in Taiwan.

Professor Seymour is an expert member of Amnesty International U.S.A.'s National Advisory Committee. He has visited Taiwan on two Amnesty International missions and is also the author of "The Fifth Modernization," a book examining human rights in the People's Republic of China. Amnesty International sent observers to the trial of the Kaoshiung eight, and has pressed appeals for the release of 120 prisoners of conscience.

Finally, Dr. Chai is professor of political science at the City University of New York and president of the Formosan Association for Public Affairs—a group dedicated to informing the public about the denial of human rights, freedom and democracy in Taiwan.

I have had a longstanding interest in the relationship between the United States and those who live on Taiwan. I am proud of my role in the Senate as a principal sponsor of the Taiwan Security Resolution in 1979, now a part of the law of our land. In that resolution, Congress reassured the people of Taiwan about our concern for their security and prosperity and for lasting peace in the area.

But political repression on Taiwan blights our mutual interests and undermines ties between our two peoples. I have spoken out against serious human rights abuses in the People's Republic of China, with which we are building an important new relationship, and I believe that the American people cannot stand aloof from capricious imprisonment and persecution in Taiwan.

Last May, Senator PELL, Speaker O'NEILL and Congressmen SOLARZ and LEACH joined me in calling for an end to martial law and for progress toward restoring individual freedoms and human rights for all the people of Taiwan. We called then, and I reaffirm this call today, on the authorities in Taiwan to release the political and religious leaders imprisoned after the Kaohsiung incident. I have sought improvements in the prison conditions endured by Reverend Kao and Lin Yi-Hsiung, the brave assemblyman whose mother and two daughters were murdered after his arrest, and I am pleased to hear that conditions have improved to some extent.

Last August, the Taiwan Provincial Assembly called for the release of Assemblyman Lin, and just last month the Governor of Taiwan agreed to transmit the assembly's request to Government and party officials who share responsibility for this decision. I hope that the authorities will respond favorably to this and other pleas for the release of Reverend Kao and too many other citizens who are still jailed in Taiwan. Their only crime has been to express their political beliefs and defend their human rights.

I am therefore renewing my call for the leaders of Taiwan to release all political and religious prisoners, to end the repressive reign of martial law, to guarantee basic rights for all, and to permit increased participation in government by the island's people.

I welcome the fact that the proportion of native Taiwanese serving as local officials has increased, that fair local elections have taken place, and that restrictions have been reduced on freedom of speech and association. However, a small minority of mainland Chinese living on Taiwan still retain virtually full control of national affairs; genuine opposition political parties are outlawed, and press censorship and other political controls persist on the island. I believe a more broadly based government, with greater support for democracy and respect for human rights, offers the best hope of Taiwan's continued peace, stability, and well-being.

In an eloquent appeal last September, four of the leading political and religious prisoners called democracy "the most effective way to counter the threat of communism." They argued that "the strongest force in modern society is freedom of choice expressed by the people through voting." They petitioned the authorities "to end repressive rule and quickly return political power to the people." Immediately after this statement was made public, it was banned by an official order prohibiting any person or organization from reproducing it.

On this 34th anniversary of the Universal Declaration of Human Rights, let us recommit ourselves to the cause of human dignity—in Taiwan as well as in other parts of the world and in the United States itself—and above all, let us recommit ourselves to upholding the cause of human rights in this country's foreign policy. Let us show that the American heritage of concern for human rights remains as vigorous as ever, and that the cause of full human rights for all peoples on this Earth shall never die.●

HUMAN RIGHTS DAY

● Mr. TSONGAS. Mr. President, 34 years ago today, the United Nations General Assembly adopted the world's first Universal Declaration of Human Rights. In so doing, the United Nations created a common standard of human rights achievement for all nations. In 30 articles, the declaration recognizes basic political, civil, economic, cultural, and social rights of all individuals. These rights represent the greatest accomplishments of our civilization. The Universal Declaration of Human Rights embodies a synthesis of the tradition of the Greek sophists, the great Christian thinkers, the enlightenment philosophers, and America's Founding Fathers.

Unfortunately, despite the existence of this important document, human rights violations remain one of the most serious and insidious problems facing us on this, the 34th anniversary of the declaration's adoption. Mr. President, I feel that it is altogether fitting and proper that on this day we call special attention to the entire issue of human rights, reaffirming our unwavering dedication to the spirit and the letter of the Universal Declaration of Human Rights, and call upon those who are now violating the rights of innocent people around the globe to cease these abuses.

In the Soviet Union, the persecution of religious and ethnic minorities remains an institutional function of the State. Jewish emigration has fallen to the lowest level since that exodus began over a decade ago, while Soviet authorities have heightened their persecution of those unfortunate refusniks still in the Soviet Union. While the dissident movement has not been broken, the brave men and women who dare to speak out for religious and political freedom bear terrible risks. The cases of Alexander Paritsky and Anatoly Shcharansky clearly attest to this fact.

Shcharansky, an imprisoned refusnik and dissident, has been severely persecuted by Soviet authorities. His wife, Avital, was literally forced to leave the Soviet Union on the day after their wedding in 1974, and has not seen Anatoly in the last 9 years. He has been constantly mistreated by his Soviet captors, denied proper food and clothing, placed in solitary confinement, and denied contact with his family. He has been on a hunger strike for over 2½ months, Mr. President, and I fear that he will not survive in his weakened condition.

Dr. Alexander Paritsky, a leader of the Kharkhov Jewish community and a leading dissident, has been languishing in a labor camp since 1981. He was convicted of anti-Soviet slander in a trial that was extraordinarily lacking in substance and justice. Paritsky is currently in failing health, suffering from a serious heart condition. Despite cries for justice which have emanated from around the globe, including a concurrent resolution from this Chamber, Paritsky has not been released and is in fact now being threatened with a new trial. Mr. President, I feel that we must make it very clear to the leadership of the Soviet Union that such terrible violations of recognized human rights are unacceptable to the Congress, to the American public, and all freedom-loving people of the world.

Furthermore, Mr. President, on this day, we must not forget the people of Afghanistan, nor the people of Poland. Nearly a year ago, the government of General Jaruzelsky declared martial law in Poland, brutally repressing the Solidarity movement. As for Afghanistan, we all have been witness to the proud struggle of the Afghanistan freedom fighters, the Mujahideen, to preserve their independence and freedom. Again, we must not let this day pass without pledging to them our unwavering support and admiration for a noble struggle against overwhelming odds.

In the Republic of South Africa, Mr. President, the government perpetuates its cruel and unjust system of apartheid. Although the millions of nonwhite citizens of South Africa constitute a numerical majority, they are denied dignity, political, civil, and economic equality from birth through a set of laws and customs which makeup the system of apartheid. The continued presence of apartheid stands as one of the most odious and reprehensible examples that we still must eliminate before the Universal Declaration of Human Rights becomes more than just a standard to which nations can aspire.

There has been growing interest in this country over the case of the tiny Pacific Island of East Timor. This island, which until 1975 was a Portuguese Colony, is the location of a very serious abuse of human rights. On the 7th of December 1975, East Timor was invaded by Indonesia. Starvation, disease, and warfare have claimed perhaps over 100,000 lives in East Timor. The Indonesians have placed many of the Timorese into resettlement camps, and Amnesty International has reported that repression and torture have accompanied the Indonesian invasion. Several of my colleagues and I sent a letter to President Reagan on the occasion of Indonesian President Suharto's visit to the United States expressing our interest that the administration raise the question of East Timor with the Indonesian leader. Again, Mr. President, we as a nation cannot let such violations of human rights as these pass without comment if we are to retain our moral positional internationally.

Many Members of Congress are greatly troubled over the violations of the human rights of the minority in Northern Ireland. The tragic situation there is made more difficult for the United States because it involves two countries with whom we share longstanding traditions of history, culture, and values. Yet even here we must not shrink from raising the issue of human rights and reaffirming the indivisible nature of those rights.

Lastly, Mr. President, I shall comment on the human rights picture in this hemisphere. President Reagan recently returned from a visit to Central America. That region, so important to U.S. interests, has been the site of brutal repression. It is very distressing to me that the perpetrators of much of this violence are governments which the President would have as our allies.

For example, after meeting with the leader of Guatemala, Gen. Rios Montt, the President reported that the Guatemalan leader is getting "a bum rap," and is "totally committed to democracy." General Montt took power in a coup last March and has since then completely suspended political activity. His security forces have launched a counterinsurgency campaign in the highlands which, according to Amnesty International, has already claimed thousands of lives among Guatemala's Indian and peasant populations. General Montt does not even attempt to deny these terrible abuses. On the same day President Reagan claimed that the Guatemalan leader was receiving "a bum rap," Rios Montt said: "We have no scorched earth policy, we have a policy of scorched Communists."

Mr. President, on this Human Rights Day, the anniversary of the adoption of the Universal Declaration of Human Rights, let this body, and this Nation reaffirm our dedication to the noble principles which the United Nations embraced 34 years ago today. We can do no less.

MILTON MUNGER

● Mr. LUGAR. Mr. President, I ask the Senate to take note of the recent passing of a remarkable man and public servant. Mr. Milton Munger of Elwood, Ind., served this country for many years as a management analyst for the Department of Defense. His contributions often required great sacrifice and the forgoing of personal gain. His outstanding work and civic record typified the selfless spirit of public employees who serve our country in so many diverse ways.

Milton Munger leaves behind a wonderful family. I hope that the patriotism and dedication which he brought to his duties will always characterize our great civil service system.●

ECONOMIC PROBLEMS FACING SMALL BUSINESSES IN THE FOREST PRODUCTS INDUSTRY

● Mr. BAUCUS. Mr. President, yesterday I had the opportunity to co-chair a hearing of the Senate Small Business Committee's Subcommittee on Productivity and Competition with our distinguished colleague from Washington, Senator GORTON. The story told by small businessmen in the forest products industry was not encouraging. Indeed, the gloom that overshadows the entire industry is darker than an Arctic storm coming down the Rocky Mountain front this time of year.

I remain hopeful that these difficulties can be overcome. America has a vast timber resource, both private and Federal. The industry's plants are in better shape than virtually any other segment of the economy. While work is needed, our infrastructure is basically sound and ready to move raw materials and manufactured goods. Labor is highly motivated, well-trained, and available.

Furthermore, no industry better typifies the kind of know-how characteristic of small businesses than the forest products industry. Today, 60 percent of the forest land in the United States is still held by some 7.5 million landowners. Giant corporations own only 14 percent. Thus, from the growing of the wood to cutting and hauling by gyppo loggers to manufacturing by family-owned sawmills, the industry benefits from small business involvement.

I am, nonetheless, concerned that the current economic slump is disproportionately affecting small business. In an article which recently appeared in Business Week, the chairman of Boise Cascade summed the situation up. He said that many companies that do not have solid cash reserves, as well as timber holdings, will have to "go out of business or combine with others."

Whether engaged in making traditional products such as lumber, or products that require massive capital investments such as paper, plywood and composite wood products, we have all seen the trend toward multi-national, horizontally, and vertically integrated companies. In plywood production, for example, the two largest firms have increased their share of the market from 8.4 percent in 1960 to 28.8 percent in 1982. My concerns is that without immediate attention, this process will be needlessly accelerated.

The purpose of the hearing held by the Subcommittee on Productivity and Competition was to get an overview of the situation facing small businesses in the timber industry. Witnesses included Mr. Robert McDermott, the associate administrator of the Small Business Administration and lumbermen from Alaska, Washington, Oregon, California, Idaho, and Montana. The witnesses underscored several "survival" issues for small businesses during this unprecedented economic recession.

Chief among their concerns was the presentation of the small business timber set-aside program. In addition, however, many small businesses feel that legislation is needed which will allow for termination, adjustment and/or extension of contracts with the USDA Forest Service to reflect the reality of today's economy. Furthermore, for the Rocky Mountain States, a provision to make purchaser credits "effective" is widely supported. Without help, the message was clear. Many small businesses face closure.

Principal among proposals for relief being considered is S. 2805. I am very concerned that the particularly pressing needs of small businesses will get lost in the legislative shuffle. We cannot allow this to happen. Without immediate constructive and innovative action, many small businesses in the timber products industry will not be around to enjoy the benefits of an improved economy.

I look forward to working with my colleagues on this matter and ask that the statement of Mr. Gary Jones of Darrington, Wash., be included in the RECORD at the conclusion of remarks to further expand on the needs of the industry.

STATEMENT OF GARY E. JONES

Mr. Chairman, my name is Gary E. Jones. I am Vice President of Summit Timber Company in Darrington, Washington. Darrington is a small community of 1,000 people nestled in the Cascade Mountains 80 miles northeast of Seattle. Summit is a family-owned corporation founded 40 years ago.

I am here today not only representing Summit Timber management, but also our employees and the town of Darrington. Summit is not a large company, but we are the major employer in the Darrington area. We do not have any asset in our family that is not tied to the timber industry. To survive the past few years, we have exhausted all of our own cash and some of the bank's. Our concern here is the same as other mills in the northwest—Survival!

We favor the Hatfield-Jackson-McClure timber contract proposal. Summit is 95 percent dependent on National Forest timber. We must buy federal timber to operate. During the decade of the 1970s, we were forced to bid high timber prices because of two major factors: declining supply and inflation.

Supply became a factor because of uncertainty caused by wilderness additions, land use strictures and Forest Service budget problems. The second factor, inflation, became a problem because we were bidding on timber to be removed two to seven years in the future. When bidding against the competition one had to use an inflation factor of from 8 to 12 percent to have a chance to buy the sale. This was realistic at the time because we had seen our product increase at or above the inflation rate during the 70s.

Some may say we took a gamble and lost, so why should we receive relief? My answer is: when we bid we were bidding under fiscal policy established by the past Administrations, but we now are forced to harvest these sales under fiscal policies set by a new Administration. We agree with what the President is doing and my hope is that we, as an industry, and especially the small independent business, can survive to help strengthen our nation. We need a chance, however, to harvest timber sales that can be purchased under the conditions of this new fiscal policy. We feel that passing our industry bill will give us that chance. It will keep our timber supply from being tied up in the courts as a result of defaults and bankruptcies resulting from default damages.

We have 185 million board feet of Forest Service timber under contract at a delivered log cost of $360 per thousand board feet. On today's log market, that same quality timber can be delivered at $250 per thousand board feet. The $110 difference would create a loss of over $20 million for Summit Timber Company. That, added to losses of more than $10 million in 1981 and 1982 would nearly equal Summit Timber Company's total net worth.

Our 450 union and salaried employees have done their part by taking a 25 percent cut in pay. With this help, cash flow has stayed fairly stable and we have kept our employees working. But if we are forced to operate these contracts, we have no choice but to default and close our doors, leaving the town of Darrington with 50 percent unemployment.

We think it is to our country's benefit to keep the independent sawmill operator in business so we can continue to supply the jobs necessary to keep local communities strong.

Thank you for your time. I will try to answer any questions you may have.●

COAL TRANSPORTATION

● Mr. HEINZ. Mr. President, despite conservation and energy efficiency, the world's free nations will continue to depend on an ample supply of reasonably priced energy to fuel economic growth and development.

Today, America stands in a premier energy supply position. This Nation has enough coal to fuel the energy needs of our society for several lifetimes, and still have the reserves to share increasing amounts of coal with our allies abroad.

In just 10 years, coal's share of the crucially important electric utility market has increased from 43 percent to more than 52 percent. By 1990, coal's share is expected to rise to 60 percent.

Over the past 3 years, as oil prices worldwide have skyrocketed, American coal exports have reached record levels. Last year, America sent 110 million tons of coal abroad—including 33 million tons of steam coal overseas—to help the world's free nations fuel economic growth.

Mr. President, these exports added nearly $6 billion to America's balance of trade and created or maintained 65,000 American jobs. By the end of this century, coal exports could swell to as much as 200 million tons each

year, accounting for a $15 billion contribution to our balance of trade, and making coal America's leading export commodity.

What is more, the increasing use of coal—our most abundant and lowest cost energy resource—is crucial to keeping energy prices at home stable. Expanding coal exports also have strategic, diplomatic, and political international significance. American coal exports in Europe and among the Pacific rim nations already are responsible for OPEC's declining share of the world oil market in recent years.

And, American coal in Europe can be one of the answers to preventing European dependence on Soviet energy supplies.

Yet, Mr. President, coal can continue to serve the United States and our allies only so long as its price remains competitive.

The coal industry is doing its part. In recent years, because of huge investments in new mines, improved technology, mine worker training, and programs between labor and management to promote labor peace, impressive gains in productivity have been the result.

Since 1978, productivity in underground mines has increased an average of 8 percent per year, and 4 percent each year in surface mines. More important, the real price of coal at the mine has remained stable, even as oil and natural gas prices continued to go up.

Yet, Mr. President, America's competitive price is being eroded by increasing transportation costs. Even a slight increase in transportation costs for coal exported to foreign markets could jeopardize those markets. The coal industry could stand to lose, but so could our country.

That is why it is so crucial that the transportation system in this country is as competitive and efficient as possible.

Mr. President, one of the vehicles to achieving a fully competitive transportation system is more competition between the railroads and other transportation modes, and among themselves.

Congress took a long step to this goal 2 years ago when it passed the Staggers Rail Act. The act ushered in a new era of regulatory freedom for the railroads, and it allowed them to enter into contracts with shippers—both needed to preserve the railroads' financial strength and to assure shippers reasonable rates and good service.

Because the railroads are dominant in coal transportation, carrying 65 percent of all the coal hauled in the United States, Congress gave specific protections to captive shippers. The law says that where captive shippers are present, shippers have the right to petition the ICC for recourse where rates are unreasonable or service is poor.

Unfortunately, Mr. Chairman, rulings by the ICC on market dominance threatened to erase the captive shipper protections mandated by law. This matter was taken to the Fifth Circuit Court of Appeals, which I am pleased to say has held in favor of the shipper protections, and remanded the case to the ICC.

Yet, Mr. Chairman, there are two other proposals facing the Commission, which could result in driving up the delivered price of coal to domestic and foreign markets.

Mr. President, On December 10 Mr. Carl Bagge, president of the National Coal Association, delivered a speech about the Staggers Rail Act and competition to the Association of Interstate Commerce Commission Practitioners in Chicago.

Among other things, Mr. Bagge calls attention to the failure of the ICC to carry out the mandate of Congress to inject the fullest possible competition in transportation markets—particularly to stimulate more competition among the railroads themselves.

I commend this excellent address to my colleagues in the Senate, and request that it be printed in the RECORD.

The address follows:

ADDRESS OF MR. CARL BAGGE

It's a high privilege to break bread and to share some thoughts with this distinguished audience about the Staggers Rail Act and competition.

There are many perspectives of this law and its effects, but I come today with only one: That of a lobbyist who is paid to pray over the interests of America's coal producers.

Let me be clear from the outset: I'm not here to call for a repeal of the Staggers Rail Act. I didn't come to Chicago to lament the coal industry's support of the law.

My purpose brings to mind the time when someone asked George Bernard Shaw if Christianity was working.

He said: "Christianity would be a good thing if anybody ever tried it."

That's the problem with Staggers.

The law hasn't been tried.

The Interstate Commerce Commission is failing to carry out the law the way Congress intended or as the coal industry expected.

For the next few minutes, I want to tell you why and to suggest some ways to make a difference.

By the way of history, this law never would have been passed unless the coal industry had thrown a lobbying lifeline to the railroads.

And we did for good reasons.

For more than a century, the coal industry and the railroads have shared a strong, mutual economic interest.

The rails carry the lion's share of coal to the coal industry's largest customer, the electric utility industry.

For this reason alone, it's in the coal industry's interest to see the railroads financially-healthy and able to carry an increasing amount of coal in the coming years.

And it's the reason the coal industry was among the first to recognize that the railroads were dying a slow death from regulatory suffocation.

Financial strength, however, wasn't possible unless the railroads were allowed greater rate-making flexibility, the chance to streamline operations, and to enter into contracts with shippers.

Staggers is the mechanism to achieve these ends.

It got the rails out from under the ICC's oppressive thumb.

It ushered in a new era of regulatory freedom, and it made contracts with shippers legal.

Yet, given the railroads dominance in coal-hauling markets, these revolutionary changes were't made without some protections.

Congress fully appreciate the implications of cutting the regulatory ties from the railroads, so the law balanced a measure of deregulation with legal protections for captive shippers.

Staggers says that when captive shippers are present, the shippers have recourse to the ICC when rates are unreasonable and service is poor.

There was another Sine Qua Nou involved, which is even more fundamental to a workable law. Even from a cursory reading of the Act's preamable and the Committee Conference Report, it's clear that Congress expected the railroads to respond to deregulation by competing vigorously in the marketplace—with other modes of transportation and among themselves.

In this vein, Staggers isn't simply a vehicle of mindless deregulation.

It's a blueprint for the widest-possible competition in transportation markets.

That was two years ago.

It's time to assess how the law is working and if it's successful.

In this, recall the airline pilot who once radioed: "I have some good news and some bad news.

"The good news is I'm making excellent time.

"The bad news is I'm totally lost."

The railroads are making excellent time toward financial health.

Just pick up the financial press or one of their annual reports.

The contractual sanctions seem to be bearing fruit.

To date, 2,000 contracts have been approved by the Commission.

But like that pilot, the ICC has lost its way.

There is no sense of direction.

What's more, the railroads are taking advantage of the ICC's lack of vision in implementing the law—creating a "never-never land" of deregulation without adequate protection for captive shippers.

Such a course is leading to more inefficiencies in the system at the expense of competition.

To be more specific, let me turn to three ICC decisions, and comment on each one.

One is the ICC's decision to ignore the law, and to set up "guidelines" to determine market dominance.

For the ICC to review a rail rate alleged to be unlawfully high, the shipper has to prove market dominance over the involved transportation.

When the Act was passed, the Commission had precise standards for such a decision.

One was a revenue-to-cost ratio of 160 percent.

This was changed by Staggers.

In its place, the law says that during the first year, rates are no longer subject to ICC

review if they yielded less than 160 percent of the variable costs of transportation.

Instead, in succeeding years, this ratio increased in increments of five percentage points.

It now stands at 170 percent.

Briefly, there were two other tests when Staggers was passed.

The most important was a presumption of market dominance if 70 percent or more of a shipper's output from a single source was carried by a single shipper.

The other was whether a shipper had made substantial investments in rail transportation facilities.

The law didn't make any changes in these tests.

To the contrary, the legislative history is clear that they were to be kept in force.

No matter.

In July 1981, the Commission swept aside these presumptions.

In their place, the ICC set up guidelines on the kinds of evidence that shippers and railroads could introduce on the issue, including product competition and geographic competition.

With one sweep of the regulatory pen, the ICC turned the table on shippers.

In effect, the Commission erased captive shippers, not through competition, but by regulation.

It's not difficult, if not impossible, for a shipper to demonstrate that there is no reasonable alternative to rail.

Today the shipper is no less captive than before the law was enacted, and as vulnerable to escalating rail rates.

As expected, NCA and other parties took this matter to the Fifth Circuit Court of Appeals, where hearings were held last May.

On Wednesday of this week, the Court issued a decision, striking down the standards set by the ICC and remanding the issue to the Commission.

We are obviously delighted with this turn of events.

Meanwhile, the coal industry was jolted by another assault on Staggers' protections.

The railroads have petitioned to put into effect a rate-setting scheme called, "Ramsey Pricing."

Any rail carrier—deemed revenue inadequate—could charge what the market will bear until financial adequacy was reached.

The current standard is a 16.5 percent return on their total cost of capital.

Needless to say, not a single major rail carrier has reached this financial promised land.

We are talking about rates set on the level of demand—not the cost of service.

The higher the demand, the higher the rate.

The rails would have a free hand to exact rents on coal traffic, so they could cut rates where they are competing with inland waterways and trucks.

Simply put, coal would be subsidizing other products by paying a larger share of the railroads' fixed costs.

This petition and the coal industry's rebuttal are also under review.

But now comes the N&W, supported by Family Lines and CSX with a proposal to exempt from all ICC regulations export coal going by rail to east and gulf ports.

The coal industry expected the Commission to dismiss this proposal out-of-hand.

Instead, the Commission not only agreed to consider it, the ICC also announced its decision would apply to all export coal in the United States.

The railroads' rationale is that worldwide coal competition is sufficient to keep the railroads from charging unreasonable rates.

Yet, even a rudimentary understanding of world coal markets reveals, that even a small increase in the cost of coal delivered abroad, would lead to a substantial loss of America's share of these markets.

What's more, the coal industry has good reason to look at the railroads' promise of restraint with a jaundiced eye.

For over the past three years, coal rail rates have gone up an average of 50 percent, more than for any other commodity.

The Coal Exporters Association, and the NCA have opposed export coal exemption vigorously.

And we've been joined by other shipping entities, water carriers, and the majority of interested Federal parties, including State and Commerce.

As well, Nippon Steel, in behalf of Japanese buyers, and virtually all interested European coal buyers have filed comments in support of the coal industry's position.

There is no mystery why all these parties are resolute in opposing export coal regulation exemption.

Coal exports are an increasingly growing market for the American coal industry.

Last year, we shipped abroad 110 million tons of coal—a record—and nearly one-third of the total was steam coal overseas.

Three years ago, the steam coal market didn't exist.

By the end of the century, total coal exports could swell to as much as 200 million tons, making coal America's largest export commodity.

The Department of Commerce is on coal's side, because those 110 million tons of coal added nearly $6 billion to America's balance-of-trade.

And they created or maintained 65,000 American jobs as 11 million workers were looking for a job.

State is interested, because export coal is of strategic, diplomatic and international political importance.

Coal is the centerpiece of international energy policy.

Coal conversions and new coal plants around the world are the surest way to keep the heat on OPEC, to reduce or eliminate European dependence on Soviet energy supplies, and to help the world's free nations to build energy sufficiency.

Our allies have rushed to coal's position, because they depend on an ample supply of reasonably-priced coal to fire economic growth and development, and the United States can deliver.

As a matter of fact, our principal coal buyers abroad see the potential consequences of rising coal prices better than anyone.

The Japanese already have served notice that rising coal rail rates no longer can be tolerated. At the United States-Japanese Coal Conference in Kyoto in October, they warned that unless these trends change by next year, there would be no other choice than for Japan to turn to other world coal-producing nations for supplies.

In summary, there's a broad consensus that the coal industry must take every possible step to improve the efficiency and effectiveness of the mine-to-market chain.

We've responded with huge investments in new mines, and with management-labor programs to ensure labor peace.

Both have resulted in productivity gains of eight-percent per year in underground mines and four percent in surface mines.

The overall result is that the real price of coal at the mine has remained stable over the past several years, even as oil and gas prices continued to go up.

The point is this: Rising transportation costs are eroding all these gains.

They are eating away at coal's marketing advantage by raising the delivered price of coal at home and overseas.

The losers are the coal industry, the railroads and consumers.

More importantly, the ultimate loser is America's economic strength.

Now, what can we do about it?

For years, the coal industry has been preaching the gospel of competition in coal transportation markets.

We have raised our voices in support of rehabilitating the aging, inland waterway system, which is critical to move far more coal in competition with the railroads.

What's forgotten—particularly as Congress rushed to tax gasoline to repair roads and bridges—is that the inland waterways are no less important than filling potholes.

What's more, the money to start the key projects and to put thousands of men and women back to work is sitting at the ready Inland Waterway Trust Fund.

This year $65 million have been collected, and the fund will grow at a rate of $100 million each year after 1985.

I repeat, not a dime's worth of taxes are needed for Congress to do something good for its country.

What we need is for Congress to get off the dime and act.

Congress also can strike a chord for competition and the consumer by granting eminent domain rights for coal pipelines.

I know this issue gives the railroads an advanced case of apoplexy, and they sit up nights thinking up ways why they don't need competition.

Yet the rails need not fear pipelines.

Instead of pressing their case against coal pipelines, the railroads would be far better off taking advantage of their financial strength and to compete for more coal-hauling traffic.

Remember, that by the mid-1990s, the rails will be carrying as much coal as produced today, creating a windfall of 40,000 new jobs.

The railroads newly-enhanced rate flexibility surely will be less subject to political attack to the degree that the marketplace offers alternate methods of transportation.

Having said this, let me get back to the issue at hand—the role of the ICC in spurring competition in transportation markets.

It's obvious that the Commission plays no role in inland waterway improvements and coal pipelines futures.

Yet, the Commission can, and it should—with a spark of regulatory wisdom and initiative—create incentives for more competition.

And a case in point is one which too often is ignored.

There always will be locations where inland waterways and pipelines cannot compete with the railroads.

To fill this void, the Staggers Rail Act mandated the ICC to promote the fullest possible degree of competition among the railroads themselves.

Here, there are some budding competition opportunities, but also no discouraging signs.

The rich, Powder River Basin coal markets are ripe for competition.

The growth of western coal in recent years has been remarkable, and there's every expectation that these markets can increasingly serve the Pacific Rim nations.

But recently, we have witnessed the Chicago and Northwestern in a public debate with the Burlington Northern.

At issue is payment by the B&N for a spur built into the Powder River Basin by the C&N.

I don't want to inject myself or the coal industry into this aspect of the issue.

What's caught our attention is the persistent haggling, but more important the delays, which are preventing the opening up of competition in the Powder River Basin markets.

When I speak to foreign coal buyers, I often point to the excellent transportation system in the United States, despite its shortcomings.

One of the advantages is the ability of the railroads to transfer coal to the waterways for lower-cost transshipment for domestic and export markets.

But until very recently, we've seen some railroads actually charging higher rates for export coal than for domestic coal over the same routes into the Ohio River Basin.

The clear objective was to force shippers away from transshipment, and to use the rails to move coal for export at Hampton Roads.

This particular disparity was eliminated in an out-of-court settlement of a lawsuit.

But it was obvious, that the railroads wanted to divert coal traffic from water transport, hurting shippers and dealing a blow to competition.

Why, I ask this audience, must we continually make lawyers rich to inject more competition into the transportation marketplace?

The coal industry also took heart in Conrail's decision to cut rates seven percent for coal moving to it's new pier in Philadelphia.

While a seven percent rate adjustment isn't high, we would like to believe that the cut is a signal that one railroad is attempting to compete with others.

But our hopes for more intra-modal competition were dashed when CSX refused to enter into joint rates with Conrail, and indeed, cancelled those which existed.

This clearly prevents any coal lying in the Chessie System from moving to Philadelphia to take advantage of lower rates.

It's an obvious attempt to keep shippers from having a choice, and what's more to limit the extent to which lower rates can effect larger markets.

It's easy to see the vast potential that could be gained from increased competition between these two stellar rail carriers.

But the examples that I've just given point out the kind of inward-looking marketing approach that is frustrating competition.

It might be understandable why a railroad would be less than enthusiastic about more competitors.

But why isn't the ICC moving aggressively to create the competition which would permit deregulation and increasing rail traffic?

Instead the Commission is allowing the railroads to erect these marketing fiefdom, and to build walls of protection around them.

We intend to pursue actions in court and before the commission as far as possible.

This may take months or years, but we will stick to this course.

The coal industry also will continue to put inter-modal competition at the pinnacle of legislative priority.

Win or lose on pipelines and inland waterways in this session, we will be back pressing the issue.

And the decision already has been made to go back to Congress next year for changes in the Staggers Rail Act—to close the loopholes with amending language to make sure captive shippers get the protection they require and Congress intended.

We must take this step, because it's obvious that the ICC isn't preserving the balance set out in the law.

It isn't taking steps to foster competition among the railroads—the only path toward achieving full deregulation.

Today, we see the Commission embarked on an ideological tangent of mindless deregulation—blindly hacking away at regulations in this philosophical stratosphere, while ignoring the real-life, practical problems of monopolies and captive shippers.

This Commission has a chance to set aside a special place for itself in regualtory history.

And I challenge the Commissioners and their staffs to use some vision—to find ways to create the fullest-possible competition in transportation markets.

It can start with rulings, which give the railroads even more incentive to compete among themselves—to prevent the building of walls of protection around their markets.

We will not have achieved this goal—or the goal of full competition—until the term "captive shipper" is wiped from the transportation lexicon.

But the elimination of captive shippers must come—not by the stroke of the pen as the ICC has thus far unsuccessfully tried to do—but through a structual market change by injecting competition.

In this vein, the Staggers Rail Act must not become another version of the Natural Gas Policy Act or other legislative monstrosities which require an army of lawyers and bureaucrats to figure out and to administer.

We don't need that kind of stifling, oppressive, counter-productive regulatory climate.

If the Commission will seize the opportunity to carry out the Act properly, it can be a vehicle to cut regulatory overload, and to promote more intra-model competition in transportation markets.

In this sense, the Act can be a kind of "Bill of Rights" for shippers, for consumers and industries—a document to achieve the lofty, yet achievable goals, of full competition, reasonable rates and excellent service.

In closing, let us recall the thoughts of one of Illinois greatest citizens and of these United States—words which the ICC would do well to pay heed.

Abraham Lincoln said: "The dogmas of the quiet past are inadequate for the present.

The occasion is piled high with difficulty, and we must rise to the occasion.

As our case is new, so we must think and act anew."

I pray God that the Commission and all of us never forget it.●

CHECKING TOXIN WARFARE

● Mr. BOREN. Mr. President, last week, I submitted for the RECORD a news report detailing fresh evidence of Soviet complicity in chemical warfare in Afghanistan and by Soviet agents in Kampuchea. At that time, I touched on the questions this raises regarding the validity of Soviet signatures on international agreements, in particular, the 1925 Geneva Protocol banning the use of chemical and biological weapons in war, and the 1972 convention prohibiting even the possession of toxin weapons. On the first of December, the Christian Science Monitor printed an editorial which expands on this subject. It makes the point that even the Soviet leadership should see that violations of this type raise serious questions about the validity of the whole arms control process. If the Soviets cannot be relied upon to adhere to signed agreements, what confidence can we have in the pursuit of such agreements?

I ask that the text of the Christian Science Monitor editorial be printed at this point in the RECORD.

The editorial referred to follows:

CHECKING TOXIN WARFARE

New reports out of Washington that the Soviet Union and its allies are using chemical and toxin weapons in Afghanistan and Southeast Asia should elicit the deepest concern in the international community. These regions may seem far from the worries of most nations. But, as U.S. Secretary of State George Shultz remarked in presenting a report to the Congress and the United Nations, any Soviet violation of treaties banning the use of such weapons has serious implications for the security of the whole world.

This is one arms race that mankind had thought had already been brought under control. The 1925 Geneva Protocol bans the use of chemical and biological weapons in war and the 1972 convention prohibits even possession of toxin weapons. Then why is the world not speaking out? So far only Canada, Thailand, and Britain have done so. If the public can be so preoccupied with the dangers of a nuclear war that has not happened, surely it should be no less concerned about the hazards of weapons being used right now.

The relative silence may be due to disbelief of what in the past has seemed meager evidence, or perhaps to a lurking suspicion that the Reagan administration is vigorously pursuing such charges against Moscow in order to help justify its own development of chemical weapons and its military buildup generally. Yet all the evidence now accumulated—blood samples, gas masks, testimony from a Soviet defector, a Laotian pilot, and Afghan refugees—indicates that something is definitely going on, Soviet denials to the contrary. The Canadians, among others, have also unearthed evidence of the use of banned chemicals and toxins.

To resolve this problem, the U.S. seeks two things. One is the naming of a permanent panel of scientific experts to be available to the U.N. secretary general which could investigate future charges. The other is a reconvening of the Biological Convention to toughen the provisions dealing with verification and compliance. Both deserve strong international support. The U.N. itself has a group investigating the issue but it has been hampered in its work largely because of lack of access to the sites.

Washington might also consider appointing a high-level panel of scientists to study and assess all the material gathered to date. It should concern the administration that academic scholars raise questions about the evidence and its presentation—for instance, the lack of adequate controls on experimental samplings. Also, the US should press the

Russians harder on the issue of on-site inspection for possession or destruction of chemical weapons. Resumption of bilateral US-Soviet talks would be helpful in nudging further progress on this issue in the UN Disarmament Committee.

World apathy now would be unfortunate. The point is, if the Russians and their Southeast Asian clients are widely employing the poisons in violation of international agreements, there can be little confidence in the whole arms control process and in signing new agreements. Surely even the Soviet leadership must see that violations in the biological and chemical area merely strengthen the hand of hawkish elements in the US government who oppose serious nuclear arms talks. It is hard to refute the argument that, if the Russians cannot be trusted on agreements already signed, pursuing further accords is a futile exercise.

Here is an early opportunity for the new crew in the Politburo to demonstrate their trustworthiness. Yuri Andropov can either let the Soviet Union remain under a cloud for breaking existing pacts—thereby poisoning the disarmament climate as well as men—or he can join in a good faith effort to strengthen safeguards and make progress toward the control of this lethal weaponry.

Needed ultimately is an international agreement banning the development and production as well as the use of chemical weapons. That objective seems as distant as ever, however—unless the nations of the world fine their voice on the subject and call Moscow on the carpet.●

NURSES WHO CAN BE DOCTORS

● Mr. INOUYE. Mr. President, a recent edition of the Honolulu Star-Bulletin featured an article by Ms. Jane See White of the Associated Press, highlighting a revolution that has been occurring within our Nation's health care system in which our Nation's professional nurses are being allowed to function to the fullest extent of their professional capacity.

Ms. White's article, entitled "Nurses Who Can Be Doctors," highlights the extent to which our Nation's professional nurses are able to make complicated clinical decisions in a highly cost-effective manner at the York Hospital in York, Maine.

In my judgment, those of us in the Congress who are serious about curtailing our ever-escalating health care costs should give serious attention to utilizing these competent professionals in every way possible.

Mr. President, I ask that Ms. White's article be printed in the RECORD.

The article follows:

[From the Honolulu Star-Bulletin, Sept. 13, 1982]

NURSES WHO CAN BE DOCTORS

(By Jane See White, Associated Press)

YORK, MAINE.—When he describes what York Hospital's pioneering new nursing system means to patients, Dr. Barry Salter likes to relate his wife's recent experience at another hospital.

"There was a rule on the surgery floor that patients couldn't shower without their surgeon's permission," he says. "Clearly, this rule was aimed at preventing wound problems after surgery. But my wife wanted to take a shower on the night before her operation.

"When the nurse tried to reach the surgeon, she couldn't get him. Finally, she told my wife to go ahead and shower, and she'd just pretend she didn't know."

At York Hospital, patients no longer must endure such "absurd evasions," as Salter, an internist, calls them.

Neither must they endure headaches while nurses try to locate a doctor to order medication; nor must they blink at the ceiling through a sleepless night because their doctor is not available to authorize a sleeping pill.

Nurses at York Hospital now can make these medical decisions themselves. Under "joint practice"—or "collaborative practice"—York's nurses are not longer foot soldiers, but officers who can give orders traditionally issued only by doctors—about a patient's diet, his activities, and some medications, diagnostic tests and treatments.

"Forty years or so ago, nurses weren't allowed to take blood pressure. When physicians discovered they could do it, they were delighted to delegate that job," says Salter, who chairs York's joint practice committee. "Nurses are capable of performing a lot of the functions that doctors perform, so now we are simply extending that process."

York is a tiny hospital in a small, white-clapboard town on the southern coast of Maine. Joint practice arrived there in 1978 as a pilot project run by the National Joint Practice Commission, a creation of the American Medical Association and the American Nurses' Association. Both groups were casting about for solutions to a critical national shortage of registered nurses that was linked to low job satisfaction.

The commission tested joint practice on a 22-bed medical-surgical unit at York, and on units at three other hospitals. When the tests ended, the nurses said it made their work more challenging and satisfying. Physicians endorsed it, and patients did, too. But, so far, only York Hospital had tossed out the traditional team nursing approach in favor of joint practice.

Although York's pilot unit began using joint practice in 1978, it wasn't until last year that the entire 86-bed hospital made the switch. Some of the 30 physicians who practice at York resisted out of concern that nurses weren't competent to handle graver medical decisions alone. Some of the nurses also had reservations, among them, Madelin Bezgumbluk.

"Now that I'm used to it, I think it's great," she says. "But I had some adjusting to do. I graduated from nursing school 38 years ago, and this was a big change."

The idea behind joint practice is to encourage RNs and MDs to collaborate on a patient's care. Its flip side is the traditional nursing system, in which RNs have authority to do very little without a doctor's instructions, in which they are handmaidens to physicians.

To encourage collaboration, joint practice mixes these elements:

Primary nursing. Each patient is assigned an RN who is responsible for nursing care, for everything from dispensing medication to giving backrubs.

Integrated patient records. Instead of separate nurses' and doctors' charts, all notes about a patient are written in a single record. This forces doctors to review nurses' observations, and vice versa.

A joint practice committee, composed of an equal number of physicians and registered nurses, arbitrates disagreements and irons out bugs in the system.

Expanded RN decision-making authority. York's joint practice committee produced a document that spells out what RNs can do unilaterally, including ordering X-rays, dispensing sleeping pills, sedatives and painkillers, and taking or ordering tests. The document was approved by the hospital's medical staff.

In theory, the result is a hospital where RNs and MDs are partners, a team that compares notes on patients, discusses treatment options, debates, argues and consults. In fact, despite some resistance from both the medical and nursing staffs, it's worked out pretty much that way at York.

What does all this mean to patients? The phrase York staffers use most often to answer that question is "continuity of care."

"The patient is the one who really sees the difference best," says Salter. "Instead of having 12 different nurses in and out of his room, he has one on each shift he can identify with, talk with, confide in."

Before joint practice, York used a "team nursing" system, in which nurses were assigned specialized duties. One day RNs would be medication nurses, dispensing pills to all the patients on their unit. The next day, they might have another duty.

"Under team nursing, two or three people would be going in and out of a patient's room," says Gail Browning, York's director of nursing. "The next day, it could be two or three different people."

Nurse Bezgumbluk describes the difference this way: "Now, when I'm off for a day, my patients miss me. They say, 'Where were you yesterday?' "

This new intimacy between nurse and patient pays off in other ways, according to James Stuart, a York general surgeon.

"We had a urology patient, for example, whose appetite fell off. The nurse noticed, and pointed it out to his doctor. The physician hadn't noticed anything, since he was focusing on the patient's urologic problem. But he did some tests, and found that the patient also had an acute gall bladder problem," he says.

Often, says Stuart, patients choose not to "bother the doctor" with their worries. Joint practice gives them an outlet—their nurse.

"The nurse will know if the patient is troubled," says Stuart. "Often she'll tell me he's worried, for example, about how to manage his colostomy at home. Once I know that, I can talk with him in a meaningful way."

Cardiologist Lawrence Petrovich isn't enthusiastic about joint practice, but he does believe it's a good system for heart attack patients.

"I think cardiac rehabilitation benefits from the nurse making the judgments, in consultation with me," he says. "She's in a better position to know when a patient is ready to sit up or walk, because she's with him all day."

A key element in joint practice—and the most controversial—is the broad scope of nurses' authority. York internist Thomas Chayka boycotted the 22-bed pilot unit for a time because, he says, "I'm uncomfortable with losing control over some of the routine orders. I just like to know what's happening, and I think there's potential for a communications breakdown."

Though Chayka isn't impressed with joint practice, he's come to accept it. Says Chayka, "I've had no problems with nurses writing orders in error. In the past, many old-timers did this anyway without legal backing."

Though no one's studied how York's patients feel about the new system, most hospital staffers believe they prefer it. Administrator Susan Garrett says some patients now request admission to the former pilot unit because they liked it during an earlier hospital stay.

As for the nurses, they appear to be unanimous about joint practice.

Says RN Pam Todd: "It makes the job much more satisfying. You'd earn more money at a major medical center than you do here, but you'd probably leave because you wouldn't be as happy there."●

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Senate?

Mr. BAKER. Mr. President, if Senators will listen to me just for a moment, I will make an announcement that they may find gratifying.

Mr. President, may we have order in the Senate?

Mr. President, there will be no more rollcall votes today.

ORDER FOR RECESS UNTIL MONDAY, DECEMBER 13, 1982

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 12 noon on Monday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, will the distinguished majority leader state for the information of the Senate the program for the rest of the day and for Monday, insofar as he can, and for Tuesday as well?

Mr. BAKER. Yes. Mr. President, let me say that today the only thing remaining will be business that can be transacted in routine morning business.

CLOTURE VOTE ON MONDAY

On Monday, as Members know, of course, under the provisions of rule XXII, 1 hour after we convene, a quorum call will commence to establish the presence of a quorum in preparation for a vote on cloture against further debate on the motion to proceed to the consideration of the Highway Act.

Mr. President, if cloture is invoked, we will proceed to debate that for not more than the time permitted under the act post cloture. It is my hope, Mr. President, that we can indeed obtain cloture Monday and perhaps even, I hope, get to the bill itself. I expect that there will be other matters that we can take care of on Monday that are on the list that we have been trying to deal with so far. Some of them that come to mind are perhaps the bankruptcy bill, the California utilities bill, and others.

I do not anticipate, Mr. President, that I will attempt on Monday or Tuesday to take up the TV in the Senate resolution.

Mr. President, any appropriations bill that can be reached should be reached in my opinion.

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER (Mr. WARNER). The leadership is correct. Senators are requested by the Chair to take their seats and refrain from conversation in the aisles.

Mr. BAKER. Mr. President, any appropriations bill that we can reach in my opinion we should reach. The principal matters that must be dealt with at this time, of course, are the defense appropriation bill and the continuing resolution. There are other appropriations bills that may be available, and I will try to have further announcements on that.

So the summation of this announcement is that we will continue to try to deal with the highway bill, with the defense appropriation bill, with the continuing resolution, maybe even two continuing resolutions, and other matters that we have discussed from time to time including things such as the bankruptcy bill, California utilities, a shipping bill, and a number of others, together with any appropriation bills and any bill that we can reach on the calendar that has been reported from a committee that qualifies.

Mr. ROBERT C. BYRD. Mr. President, is it still the intention of the majority leader and his expectation and hope that the Senate will complete action and adjourn sine die no later than Friday, the 17th?

Mr. BAKER. Mr. President, it is certainly my hope that we can adjourn sine die on the 17th of December. Senators should know that I have discussed this matter with the Speaker of the House of Representatives today and indicated to him that I had concern about our ability to do all that I have just named and finish it by the time the continuing resolution expires by its terms on December 17. I inquired of the Speaker if the House might be willing to send us a small continuing resolution, meaning one that extended for a few days while we tried to complete the work of the Senate. That issue has not yet been resolved. The Speaker indicated his strong disappointment at that prospect, but I think he perhaps understands and acknowledges that it is real prospect.

There is some chance that we will have to pass two continuing resolutions, but I am not sure of that by any means. If the minority leader will permit, I will try to have a more firm announcement to make and something further to say on that shortly after we convene on Monday.

Mr. BUMPERS. Will the Senator yield?

Mr. BAKER. Yes, I yield.

Mr. BUMPERS. Is it anticipated that the quorum call and the cloture vote on Monday will begin at 1 p.m.?

Mr. BAKER. Yes; that would be so under the rule, and no unanimous request has been made to change the rule.

Mr. METZENBAUM. Will you yield for another question?

Mr. BAKER. Yes.

Mr. METZENBAUM. Is it understood that there will be no other legislative matters to come before the body before the cloture vote?

Mr. BAKER. No, Mr. President, I cannot say that. I do not know what that would be since we are coming in at 12 o'clock and 1 hour later you have to get onto the bill at hand, so it is not likely to be very much. I certainly cannot give that assurance at this time.

Mr. METZENBAUM. I thank the leader.

Mr. BAKER. Mr. President, let me make it clear that in listing the items that we may take up next year I am not giving an exclusive list.

Mr. METZENBAUM. Next week.

Mr. BAKER. Did I say next year? It sounded better the other way, next year.

Mr. METZENBAUM. Very good, indeed.

Mr. BAKER. It is by no means an exclusive list. There may be other matters that the leadership will wish to take up on the other side, but I assure Senators I will give notice as soon as possible and there is no desire to take any Member by surprise on any issue, so we will proceed very slowly and very cautiously and make sure that people who have indicated an interest in particular legislation are fully apprised of any scheduling decisions that are made on this side.

Mr. President, I did not include on the list a nuclear waste bill which is coming over from the House of Representatives and should be added to the list of things that we would like to take up.

Mr. ROBERT C. BYRD. Mr. President, as I recall, the President asked the Congress to reconvene after the election to dispose of certain appropriation and budgetary matters. I would hope, with the exception of possibly one, or two, or three other measures which may have compelling reasons supporting them, to stick to this. I want to help the majority leader as best I can to get on with the business of taking up the appropriations measures, the continuing resolution, and the jobs measure, and I would hope that we would not be around here Christmas week.

It seems to me that if we all put our shoulders to the wheel we can dispose

of these measures by the 17th. I hope so. I would certainly hate to see the other body send over a continuing resolution that will have us back 3 or 4 days into the Christmas week or following Christmas week. I just want to say that for the RECORD, and say to the majority leader that I want to assist in any way I can to expedite these measures that have to be done. He is enumerating some measures that perhaps do not have to be done but he has certainly named some that have to be done before we go out.

Mr. BAKER. I thank the minority leader, and I especially thank him for this offer in passing a must list as we will agree on it.

I will say in all candor that there has always been a must list consisting of appropriation bills and a continuing resolution, and the highway bill which came along after we reconvened.

I also believe that we can get out on December 17 if we put our shoulder to the wheel. It may help to put it in perspective to say as far as I am concerned I am planning to be out on December 17, but Senators should be on notice that it may be difficult to do that, and it seems the better part of wisdom to at least discuss with the Speaker of the House of Representatives the possibility of a short continuing resolution.

Mr. ROBERT C. BYRD. Mr. President, I cannot presume to speak for other Members but I assume that most of them would prefer to stay in late on days next week and get out on December 17 rather than come back Christmas week or post-Christmas week, if that will help the majority leader.

Mr. BAKER. Yes.

Mr. President, I thank the Senator once more.

I said earlier and I say now Senators should be on notice of the possibility of late evening s every day next week in order to try to reach our adjournment date of December 17.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, there appears to be one item on the Executive Calendar that may be cleared on both sides. Could I inquire of the minority leader if he is in a position now to consider by unanimous consent the nomination of Richard T. Kennedy to be an Ambassador at Large?

Mr. ROBERT C. BYRD. Mr. President, that nomination has now been cleared on this side.

Mr. BAKER. I thank the minority leader.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate go into executive session for the purpose of considering Calendar Order No. 1421, the nomination of Richard T. Kennedy, of the District of Columbia, to be Ambassador at Large.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nomination will be stated.

DEPARTMENT OF STATE

The legislative clerk read the nomination of Richard T. Kennedy, of the District of Columbia, to be Ambassador at Large.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of this nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF TIME FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that the time for the transaction of routine morning business be extended to 4:15 under the same terms and conditions.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE RECOGNITION OF SENATOR LEVIN ON MONDAY NEXT

Mr. BAKER. Mr. President, I ask unanimous consent that on Monday next, after the recognition of the two leaders under the standing order, the distinguished Senator from Michigan (Mr. LEVIN) be recognized on special order for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL MONDAY, DECEMBER 13, 1982

Mr. BAKER. Mr. President, I am advised that the minority leader does not require to be present on the floor when I make the motion I am about to make. There is no further business to transact that I am aware of, and I see no Senator seeking recognition.

I move, in accordance with the order previously entered that the Senate stand in recess until the hour of 12 noon Monday next.

The motion was agreed to; and the Senate, at 4:08 p.m. recessed until Monday, December 13, 1982, at 12 noon.

NOMINATIONS

Executive nominations received by the Senate December 10, 1982:

DEPARTMENT OF STATE

Lewis Arthur Tambs, of Arizona, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Colombia.

CORPORATION FOR PUBLIC BROADCASTING

DEPARTMENT OF STATE

EXECUTIVE OFFICE OF THE PRESIDENT

William Poole VII, of Rhode Island, to be a Member of the Council of Economic Advisers.

DEPARTMENT OF STATE

Richard T. Kennedy, of the District of Columbia, to be Ambassador at Large.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

THE JUDICIARY

Paul E. Plunkett, of Illinois, to be U.S. district judge for the northern district of Illinois.

John W. Bissell, of New Jersey, to be U.S. district judge for the district of New Jersey.

Frank X. Altimari, of New York, to be U.S. district judge for the eastern district of New York.

Frank W. Bullock, Jr., of North Carolina, to be U.S. district judge for the middle district of North Carolina.

Lawrence S. Margolis, of Maryland, to be a judge of the U.S. Claims Court for a term of 15 years.

Haldane Robert Mayer, of Virginia, to be a judge of the U.S. Claims Court for a term of 15 years.

Reginald W. Gibson, of Illinois, to be a judge of the U.S. Claims Court for a term of 15 years.

Christine Cook Nettesheim, of the District of Columbia, to be a judge of the U.S. Claims Court for a term of 15 years.

DEPARTMENT OF JUSTICE

Anthony Bertoni, of Michigan, to be U.S. Marshal for the eastern district of Michigan for the term of 4 years.

Edward M. Camacho, of Guam, presently U.S. Marshal for the district of Guam, to be also U.S. Marshal for the district of the Northern Mariana Islands for a term expiring September 14, 1986.

Romolo J. Imundi, of New York, to be U.S. Marshal for the southern district of New York for the term of 4 years.

Matthew Chabal, Jr., of Pennsylvania, to be U.S. Marshal for the middle district of Pennsylvania for the term of 4 years.

Peter K. Nuez, of California, to be U.S. attorney for the southern district of California.

Dwight G. Williams, of Mississippi, to be U.S. Marshal for the northern district of Mississippi for the term of 4 years.

Charles E. Healey, of New York, to be U.S. Marshal for the eastern district of New York for the term of 4 years.

Daniel B. Wright, of New York, to be U.S. Marshal for the western district of New York for the term of 4 years.

James K. Stewart, of California, to be Director of the National Institute of Justice.

Victor M. F. Reyes, of Texas, to be a Commissioner of the U.S. Parole Commission for a term of 6 years.

J. Raymond Bell, of the District of Columbia, to be Chairman of the Foreign Claims Settlement Commission of the United States for the term expiring September 30, 1985 (reappointment).

COPYRIGHT ROYALTY TRIBUNAL

Katherine D. Ortega, of New Mexico, to be a Commissioner of the Copyright Royalty Tribunal for a term of 7 years from September 27, 1982.

DEPARTMENT OF THE TREASURY

Manuel H. Johnson, Jr., of Virginia, to be an Assistant Secretary of the Treasury.

IN THE COAST GUARD

Coast Guard nominations beginning Philip M. Lebet, and ending Kent D. Morris, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on November 29, 1982.

HOUSE OF REPRESENTATIVES—*Friday, December 10, 1982*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

We give thanks, O God, for the opportunities we have to be of service to others. Grant us the awareness of the beauty of Your world, the majesty of Your creation, and the power of Your word. Enable us to listen to Your message of faith, that we will become filled with that spirit that brings light to darkness, hope to every troubled soul, and strength to the weary. This we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. OXLEY. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Chair's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. OXLEY. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 282, nays 26, answered "present" 3, not voting 122, as follows:

So the Journal was approved.

The result of the vote was announced as above recorded.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed a joint resolution of the following title, in which the concurrence of the House is requested:

S.J. Res. 240. Joint Resolution to authorize and request the President to designate the week of January 16, 1983, through January 22, 1983, as "National Jaycee Week."

PERMISSION TO FILE REPORT ON HOUSE JOINT RESOLUTION MAKING FURTHER CONTINUING APPROPRIATIONS

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file a report on a House joint resolution making further continuing appropriations and providing for productive employment for the

fiscal year 1983, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

Mr. FRENZEL. Mr. Speaker, reserving the right to object; this is a continuing resolution that will be filed if the gentleman's request is granted.

May I ask the distinguished chairman whether the continuing resolution is available to the Members of the Congress, or whether we will see it for the first time when it comes to the floor?

Mr. WHITTEN. May I say that the committee has not yet met and reported any bill. We have a meeting scheduled to begin at 10:30 this morning, and we will meet as soon as we can get down there. After we act on it, then, it will be available.

Mr. FRENZEL. Can the distinguished chairman tell me when it might be in the hands of the Members?

Mr. WHITTEN. I would hope that we would get through in about an hour and a half down there, which means that we will be acting on it and make it available as shortly thereafter as possible.

Mr. FRENZEL. Can the distinguished chairman further enlighten me as to when the House might take it up?

Mr. WHITTEN. That is beyond my knowledge, but I understand it will be up Tuesday if we can get the consent. We are faced with the situation that we must have a bill signed by December 17, so we are really in a straitjacket, keeping in mind that the President has 10 days in which to sign or veto a bill. We may have that 10 days facing us, and so we are in a real straitjacket timewise, not through any fault of our own, in my opinion, but we not only have to get this through, but get it through the Senate, through conference, and signed by the President by the 17th. So, we are really up against the time problem.

Mr. FRENZEL. I thank the gentleman. I hope you will bring copies to the continuing resolution to the Members of this body in time for them to have the opportunity to review it.

Mr. WHITTEN. As I say, we are meeting immediately and we hope the committee can agree.

Mr. FRENZEL. I thank the gentleman.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

Mr. WALKER. Mr. Speaker, reserving the right to object, I do so to ask the gentleman from Mississippi, given his statement about the need to move this legislation quickly, can we not assume that we are not going to see the $5.5 billion Jobs Act, which is unauthorized, put onto the continuing resolution?

Mr. WHITTEN. Well, it is being considered in connection with the continuing resolution. The action of the committee will determine whether or not it is added, but all we have now is various proposals, there is no bill. A bill will be introduced, but it first will be considered in the committee meeting and I will have to wait until the meeting is over, but it will be considered in connection with it.

Mr. WALKER. Further reserving the right to object, can we receive further assurance that what the gentleman from Mississippi said about the need to move this legislation quickly, that he will not seek before the Rules Committee to have points of order waived against that kind of unauthorized expenditure?

Mr. WHITTEN. May I say that I will ask for an appropriate rule, but may I also say that we still face this situation of having to get through with this within the week, and I will ask the Rules Committee for such a rule as will enable us to finish our job.

Mr. WALKER. I hope the gentleman can understand that some of us would find it hard to agree that the gentleman is serious about the time pressure if we are adding major new expenditures which are not in the budget, not authorized; have a hard time understanding why that kind of controversial amendment would be attached to the continuing resolution if we are faced with this kind of time pressure.

Mr. WHITTEN. I can realize that, but may I say also that I am chariman of a 55-man committee, and the committee often has a mind of its own. I try to lead, but I also have a responsibility to try to find out what the committee wishes to do. If the majority wants it in there, it will be. Otherwise, it will not.

Mr. WALKER. I understand.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

Mr. GIBBONS. Mr. Speaker, reserving the right to object, I do so only for the purpose of trying to have a dialog with the gentleman from Mississippi, and of course his committee members, and I respect the time pressure the gentleman is under and the problems that he has with authorization bills. My remarks are not directed toward that.

My remarks are directed toward the fact that I hope that the gentleman's committee and his subcommittees will resist the Senate legislating on an appropriation bill. I know that has been the gentleman's policy, but I want him to know that the Senate has had bills from the Ways and Means Committee for over a year and a half that they have not even had hearings on and have not even attempted to move. We are ready to go to conference with them now, but they have found a way to go to conference without going to the Ways and Means Committee. They go to the gentleman's committee.

Mr. WHITTEN. May I say that they should go to their committee. Our committee has consistently taken the view the gentleman espouses. We feel that way now. In conference over the agriculture appropriation bill, we resisted all changes to put Senate legislation on our bill. If there have been exceptions, there have been very few. I have no intention personally, and I do not believe our conferees will, of accepting any kind of legislation. We are doing our best to avoid in the resolution getting into any of these differences of opinion that the gentleman mentions. We are trying not to take any part in it or address ourselves in any ways that will lend weight to one side or the other, so we are trying to avoid all of that.

Mr. GIBBONS. On our bills they put all kinds of amendments on them over there. We are ready to go to conference with them on whatever they send over, but they just have not sent anything over.

Mr. WHITTEN. I am glad to see my colleague supports our position.

Mr. GIBBONS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 7072, AGRICULTURE, RURAL DEVELOPMENT, AND RELATED AGENCIES APPROPRIATION, 1983

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent to have until midnight tonight to file a conference report on the bill (H.R. 7072) making appropriations for Agriculture, Rural Development, and related agencies programs for the fiscal year ending September 30, 1983, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

□ 1030

PERMISSION FOR COMMITTEE ON WAYS AND MEANS TO FILE REPORT ON H.R. 7397, CARIBBEAN BASIN INITIATIVE ACT

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that the Committee on Ways and Means may have until midnight tonight, Friday, December 10, 1982, to file its report on the bill, H.R. 7397.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, will the gentleman tell us, is that the Caribbean Initiative, or what are we talking about?

Mr. WRIGHT. Mr. Speaker, if the gentleman will yield, yes, he is exactly right. This is the bill to promote economic revitalization and facilitate expansion of economic opportunity in the Caribbean Basin.

Mr. ROUSSELOT. Mr. Speaker, that is a tremendous bill, and I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

FAIR PRACTICES IN AUTOMOTIVE PRODUCTS ACT

Mr. FLORIO. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5133) to establish domestic content requirements for motor vehicles sold in the United States, and for other purposes.

The SPEAKER. The question is on the motion offered by the gentleman from New Jersey (Mr. FLORIO).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 5133, with Mr. PANETTA in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from New Jersey (Mr. FLORIO) will be recognized for 30 minutes, the gentleman from North Carolina (Mr. BROYHILL) will be recognized for 30 minutes, the gentleman from Florida (Mr. GIBBONS) will be recognized for 30 minutes, and the gentleman from Minnesota (Mr. FRENZEL) will be recognized for 30 minutes.

PARLIAMENTARY INQUIRY

Mr. BROYHILL. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. BROYHILL. Mr. Chairman, I wish to inquire as to whether the time will run concurrently or whether one committee goes first and the second committee follows.

The CHAIRMAN. The Chair would interpret the rule to allow each of the respective Members to allot their time respectively without any kind of a pattern, so it could be done interchangeably.

Mr. BROYHILL. I thank the Chair.

The CHAIRMAN. The Chair recognizes the gentleman from New Jersey (Mr. FLORIO).

Mr. FLORIO. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from New York (Mr. OTTINGER), the sponsor of the legislation.

Mr. OTTINGER. Mr. Chairman, this is an important piece of legislation. I am joined as an original sponsor by the gentleman from Ohio (Mr. PEASE), the gentleman from Michigan (Mr. BRODHEAD), and the gentlewoman from Maryland (Ms. MIKULSKI). There are now 224 House cosponsors and 20 in the other body.

What the bill does is to say to our trading partners "Yes, you can continue to have access to the enormous United States market in automobiles, but if you take advantage of that market, you have to make a certain percentage of your product in the United States."

It provides a schedule of penalties for any company that fails to meet those standards that are geared precisely to the domestic content requirement, so that to the degree by which they fail to meet the domestic content requirements, they will have a penalty against their permissible imports.

I think that this is modest and totally justified legislation. What we have seen in the United States for some time is our trading partners taking unconscionable advantage of us. We have seen that, particularly with respect to Japan, taking over our electronics industry, which we developed; taking over our markets in televisions, steel, radios, recorders, and photographic equipment and many other products.

Now, in automobiles the Japanese have more than 23 percent of our market. Total imports are better than 30 percent of our market. With all the best of intentions, our trade negotiators, not only under this administration but under previous administrations, have failed to stem this flow, and our efforts in Congress to try to stem this flow have been of no avail.

This came about historically in a very understandable way. After World War II, we wanted to help build up Europe and Japan, so in addition to helping them with the Marshall plan, we were very lenient with respect to our trade relations with them, and we lowered our barriers far below the point at which they have lowered their barriers. Today, Japan and the Common Market have achieved economic parity with us, but our trade imbalances have not been rectified.

As we have now entered into hard times, we find both Europe and Japan actually increasing their barriers against the United States, and the answer that we hear from the opponents of this bill is that we ought to be the champions of free trade and we ought not to take any meaningful action.

So in effect we have been acting like "Uncle Sucker." We have seen our entire industrial base eroded, and we have done nothing to counter it.

This bill attempts to address this situation that is really grievous in the automobile industry. We have 300,000 automobile workers unemployed at the present time. There are 600,000 or more unemployed people in related industries because the auto industry is the one that affects the economy the most. It affects rubber, glass, and textiles, and a huge number of jobs in other related industries.

If we succeed in this legislation, there will not be retaliation. When Canada acted against Japan, there was no retaliation; Japan accommodated itself to the situation and entered a trade agreement.

Our so-called trading partners are not going to feel that we are really serious about trying to get equity in our international trade relations unless we are prepared to be as tough as they are. This legislation does not restrict them from our markets. It merely says, "Look, if you guys are going to take advantage of our markets, you are going to have to help preserve our jobs and create some of the goods which you sell in our markets here in the United States." I think this is a reasonable measure. I think it is a measure which is very much needed.

It is estimated that this will create and preserve some 800,000 jobs in the United States. Those people in turn will be able to buy again, and this will create a ripple effect at least three times that number of jobs. If we want to put our economy back on its feet, if we want a strong defense, we need this industrial base and we need this kind of legislation.

I would like to take a few moments to offer some facts to address the inaccurate allegations that have been advanced by opponents of the bill.

GATT RETALIATION AND U.S. EXPORTS

Critics of H.R. 5133 argue that retaliation against U.S. exports would nullify the gains to the auto industry by enacting it. The assumption that massive retaliation from our trading partners, particularly Japan, is likely cannot be supported by a careful analysis of auto policies around the world, the political context of the GATT, and Japan's trade patterns.

Japan has never brought a GATT complaint, much less retaliated, against the dozens of countries which restrict Japanese auto exports much more stringently than H.R. 5133. Indeed, to achieve or maintain their market presence, Japanese auto companies have invested in many of those countries.

GATT procedures require that Japan first meet with the United States to try to iron out difficulties before a formal complaint is filed. If

Japan were to file a formal complaint, the United States could file countercharges against the auto policies of Japan and many other GATT members in Europe, Australia, Latin America, and Indonesia.

THE PRICE OF CARS

The domestic content law would not drive up the prices of U.S. cars because it does not reduce competition in the U.S. market.

Based on extreme assumptions, the CBO predicted that the original H.R. 5133 would boost car prices 6 percent. They assumed that H.R. 5133 will result in no foreign compliance, which would cause foreign car companies to put plants here in order to maintain access to the U.S. market. Clearly, Japan will not abandon the biggest auto market in the world. With compliance, competition in the United States wili be stiffer, and no increase in U.S. car prices would result.

A widely publicized study by Harbridge House has predicted very large price increases. That study, financed by the Import Dealer's Association, combines a distortion of the experience of the last year with unfounded projections about the future. Since restraints on Japanese car exports to the United States began in early 1981, list prices of U.S. cars have risen at a 5 to 6 percent rate—less than the Nation's inflation average. Recently, prices have begin declining, as large and expended rebate programs have been put in effect.

PRODUCTION QUALITY

Alleged deficiencies in U.S. production quality has often been cited as a reason for increased auto imports, and it does not hold water. I can only quote to you from a speech given by Hideo Sugiura, executive vice president of Honda Motor Co.: "The quality of motorcycles that we now make in the United States is equal to, or better than, the quality of those manufactured in Japan to the complete satisfaction of our dealers and customers. Through this experience, we are convinced that the automobiles which they are about to start manufacturing in the United States will fully achieve satisfactory quality standards. The work force at the plant has proven itself to be as diligent and as hard working as one could expect anywhere in the world, and I, as a member of Honda's management, am totally satisfied with them."

JOB CREATION

Opponents assert this bill will not create jobs. I strongly disagree. The United Auto Workers projected that H.R. 5133 would result in more than 800,000 jobs created or preserved in the auto and related industries, with the ripple effect in the economy bringing the total impact to over 1 million jobs. It is important to take into account that none of the studies done that indicate a net jobs loss take into account jobs preserved in the auto industry as well as the jobs created. In the absence of retaliation, even CBO projects a net increase of about 250,000 jobs, and I believe that the no-retaliation estimate is the right one.

We need to revitalize our auto industry. This bill will assure that cars sold in the United States are substantially built here.

We need to achieve equity in our international trade. Congress and the Executive have sat idly by while our industrial base has been transferred to our so-called trading partners. We have merely protested while they have acted. We need this bill to let them know we will act to insist on equity.

I strongly urge adoption of this legislation.

Mr. BROYHILL. Mr. Chairman, I yield myself 5 minutes.

Mr. COURTER. Mr. Chairman, will the gentleman yield?

Mr. BROYHILL. I yield to the gentleman from New Jersey.

Mr. COURTER. Mr. Chairman, I thank the gentleman for yielding.

Mr. BROYHILL. Mr. Chairman, I rise in opposition to H.R. 5133, the Fair Practices in Automobile Products Act.

I consider it most unfortunate that H.R. 5133 is before the House today. I recognize that many Members of the House believe that this bill is an appropriate vehicle to address the very serious unemployment problems in the U.S. auto industry. In addition, some believe this bill will send a long overdue signal to Japan and our other foreign trading partners of problems created by tariff and nontariff barriers which must be resolved by this country.

I strongly believe that both of these problems are real and need to be addressed. However, I just as strongly believe that H.R. 5133 is not the answer to either of these problems. Let me explain.

The negative effects of this bill far outweigh any benefits which might flow from its enactment.

Although proponents of the bill argue that the bill would result in over 800,000 new jobs in the auto industry, information provided by the Commerce Department and by the Congressional Budget Office indicates that this bill will result in a net loss of jobs. This will occur if one takes into account its negative impact on jobs at U.S. assembly plants of foreign auto manufacturers, at U.S. port facilities, and the repercussions throughout other American industries as our trading partners retaliate. We can safely assume that such retaliation will result in the substantial loss of American jobs in our export industries.

According to the Congressional Budget Office, this bill will undoubtedly increase car prices in this country. It will also push up the overall rate of inflation by increasing the Consumer Price Index by an estimated 0.1 percentage points.

In addition, H.R. 5133 will make the U.S. auto industry less competitive just at a time when the industry is making strides to become more competitive in the world market. Based on these facts, both the Department of Commerce and the Federal Trade Commission have indicated that this bill is both anticonsumer and anticompetitive. As the Federal Trade Commission stated in their comments, this bill would result in "less competition, higher production costs, and higher automobile prices to consumers." The U.S. Trade Representative and the Departments of Treasury, Transportation, and Agriculture also oppose the bill.

Even the bill's purported benefits have been called into question. Several recent studies do not corroborate the UAW's estimate of jobs which would be created by this bill.

Since the committee reported this bill, at least 50 associations and organizations representing a cross spectrum of American industry have taken a position opposing this bill. These organizations include the U.S. Chamber of Commerce, the National Association of Manufacturers, the American Farm Bureau Federation, and the American Association of Port Authorities. We should not vote for a bill which is opposed by so much of American industry.

In just 10 pages, this bill totally reverses over 30 years of American trade policy. H.R. 5133 clearly is violative of the General Agreement on Tariffs and Trade (GATT). Should this bill be enacted, GATT signatories can be expected to seek compensation for lost exports to the United States. The Department also points out that, if we do not approve tariff reductions to meet these claims, our trading partners will most likely retaliate against our exports. Exports which are especially vulnerable include aircraft, office equipment, electrical and electronic components, corn, wheat, and soybeans.

This bill would also, I believe, destroy any hope that we have of opening up trade in services—a frontier of critical importance to the future of the U.S. economy. By enacting a content law, we would suddently drop from the ranks of the major trading powers to join with the lesser developed countries.

This is not an investment bill, as the proponents of the legislation would have us believe. In fact, it is opposed by General Motors and Ford Motor Co. It is also opposed by all of the auto manufacturers who have invested in this country—that is, Volkswagen of America, American Honda Motor Co.,

and Nissan Motor Manufacturing Corp., U.S.A.

In summary, I strongly urge my colleagues to seriously consider all the negative effects that this bill would have upon the economy of this country. I must oppose H.R. 5133 and I urge all my colleagues to do the same.

□ 1040

ANNOUNCEMENT BY THE CHAIRMAN

The CHAIRMAN. The Chair would advise the Members that although the time could be used interchangeably that it is the will of those controlling the time that the gentleman from New Jersey (Mr. FLORIO) and the gentleman from North Carolina (Mr. BROYHILL) use their time first and then the gentleman from Florida (Mr. GIBBONS) and the gentleman from Minnesota (Mr. FRENZEL).

Mr. FLORIO. On that point, Mr. Chairman, it would be my hope to reserve some time to be in a position to take part in the concluding portion of the 2 hours' debate.

The CHAIRMAN. The gentleman is free to do that.

Mr. FLORIO. Mr. Chairman, I yield 3 minutes to the gentlewoman from Maryland (Ms. MIKULSKI).

Ms. MIKULSKI. Mr. Chairman, I rise in support of H.R. 5133, the Fair Practices in Automotive Products Act.

Mr. Chairman, we in this country are fighting for our economic survival. We have to decide if we will be victims in the name of free trade and lose thousands of jobs and our industrial base to Japan and other countries that do not play fair in the trade game or become competitors and victors. We have to decide if it is in America's best interest to continue to be economic pacifists.

We have got to get tough or we are going to lose millions of jobs in this decade, including the best-paying factory jobs that have helped so many people attain economic security.

The auto industry is into its fourth year of depression. Thirty major plants from New Jersey to California are closed. Approximately 250,000 auto workers have been laid off, and supplier firms, material industries, and dealerships have let go twice that number.

Our economy cannot sustain this level of joblessness much longer. The problem needs correction. I believe that H.R. 5133 can be the primary weapon to place our domestic auto industry back on its feet.

The cry for free trade must be set aside to reveal how the world really works. And we must defend our economic interests in this world. This bill is a step toward our economic self-defense.

We must also think of our national defense. What will happen to our military preparedness if we lose our industrial base? If we have to rely on imports of industrial and technological goods? This country will not have the capability to make uniforms, let alone steel, ships, trucks, weaponry, or computers.

This bill for domestic content in automobiles sold in this country, is one of simple justice. It requires that cars sold here meet a gradually increasing standard for American content in them—including parts, labor, and advertising. And when I speak of American content, I am firm in my commitment that American labor be an indispensible part of domestic content.

This legislation will stimulate our economy and industrial base to create and preserve jobs in the auto and related industries. It is an investment bill, to establish a sound, jobs-oriented auto policy. Its enactment would represent an effective action to alleviate our high rates of unemployment and beef up our industrial base.

I feel this bill is superior to import quotas because:

First, it does not block imports, not only will cars that are made in other countries still be imported, but more parts for car production will come through our ports.

Second, this bill fosters competition, because it encourages foreign companies to transfer some of their auto production to the United States. Everyone in the auto market will compete on equal basis.

Third, the domestic content bill does not hurt car dealers, they will still be selling the cars consumers desire, only those cars will have local content.

In closing, I want my colleagues to know that I recognize the fact that there is a world market for automobiles, but my message to foreign car manufacturers is this—if you expect to sell in America, then you are going to have to build in America.

Let's keep American production in America. I urge my colleagues to vote in the affirmative on this legislation.

Mr. MADIGAN. Mr. Chairman, I yield 3 minutes to the gentleman from California (Mr. PASHAYAN).

Mr. PASHAYAN. Mr. Chairman, I rise in opposition to H.R. 5133, the so-called Fair Practices in Automotive Products Act.

This bill is a threat to the prosperity of the United States under its open market trading system established by the General Agreement on Tariffs and Trade.

Yes, there are countries that do not open their markets to the United States such as we should like and I am personally familiar with that because in my district there is a lot of citrus fruit grown. My citrus farmers are most aware that the Japanese Government has all but closed the doors to the sale of oranges and other citrus fruits that the Japanese people need. So I am aware of this situation.

Mr. FRENZEL. Mr. Chairman, will the gentleman yield?

Mr. PASHAYAN. I yield to the gentleman from Minnesota.

Mr. FRENZEL. The area the gentleman represents is selling a small amount of citrus fruit to the Japanese. We are trying to expand that market. If we close our markets to Japanese automobiles, what does the gentleman think happen to the small amounts of citrus that are now being sold to Japan from his area?

Mr. PASHAYAN. I should have to say in answer to the gentleman's question that that would be one of the first doors, which door is now only slightly opened, that would be absolutely slammed shut.

Mr. FRENZEL. I am sure the proponents of the bill will send all of your constituents black arm bands.

Mr. PASHAYAN. I thank the gentleman.

I realize the economy is in terrible shape. I take as much concern at unemployment as anyone in this House. Interest rates are too high and so is unemployment.

But this particular bill is so narrow in what it targets that it is more of a cutting edge and it is a bullet being fired that would start a trade war and would make the unemployment situation worse.

Let us think of all the people who would go out of work who are in the importation business in this country. There are some figures which were done by the CBO and others that indicate clearly that more people would lose their jobs if this bill should become law than would maintain or gain them.

I do not think that is improving the unemployment situation at all.

I stand before this House as one who voted not with my own party on a particular issue, the Chrysler bill. I am one who voted in favor of the Chrysler bill. I am perfectly in favor of the idea of Government selectively assisting major industries when it has a beneficial effect. I personally think the Chrysler bill did.

But this has so many negative potential effects, that is to say the retaliation that this bill would invite and engender, they have made me conclude that this is not the way to help the automobile industry.

□ 1050

It does not do the unemployment situation in this country one whit of good when it has the dire effects on general unemployment that this bill must necessarily have because of what it does.

Mr. FRENZEL. Mr. Chairman, I yield myself 2 minutes.

Mr. Chairman, I note from the number of amendments that are at the desk that it would be extremely

unlikely that we could finish this bill today unless there are restrictions on time.

As the maker of a number of those amendments which have been filed in the RECORD, on which I probably do not intend to ask for recorded votes, I simply serve notice at this time that if there are restrictions on time, I will begin to ask for recorded votes.

I think it is very important for this body to review this bill very carefully because once you read it and get beyond the symbolism into the substance, you can begin to see immediately what a terrible thing it is for America and for the world.

Mr. Chairman, last night we heard repeated entreaties that we must send a message to Japan. All of our friends whose constituents are suffering because of unemployment in automobiles and steel say over and over again, "Send a message to Japan."

May I suggest to them that they use their local Bell System and its transoceanic lines to send their messages, or perhaps go to Western Union, or even the U.S. Post Office.

We seem to be the only country in the world that has to send messages to people by shooting ourselves in the foot, or other vital organs. Why should we inform others of our distress by committing, if you will pardon the expression, hara-kiri.

It is quite obvious that this bill will cost more jobs than it will produce. It seems to me to be the essence of insanity, or perhaps the essence of greed, to demand that one of your constituents be given a job and that two other people who are constituents of others must be denied jobs. It is the essence of greed to demand that constituents and consumers must pay an extra $300 to $500 for every new automobile that they buy.

So as this debate progresses, Members of this body are going to find out about this bill. I have been told by a number of its proponents that if we had a secret ballot, it would be defeated 10 to 1.

Every independent analysis shows, in clear terms, that passage of this bill will have serious adverse effects on our Nation's economy and on its workers. In addition, it would signal a reversal of this country's progressive foreign trade policy and would establish a trend of protectionism worldwide. At home, this bill will send a message to our industries that they no longer have to be efficient and competitive, but can rely on the Congress to protect them from market forces and to insulate them at considerable expense to the economy as a whole—from the evils of competition. Last night, I explained that the Ways and Means Committee was denied enough time to find out how awful the bill really is. We discovered enough to know it is a disaster, but we have much more to learn.

What we have learned is now available. The Trade Subcommittee has now published the testimony it received on this bill. It amounts to 856 pages; more than 125 witnesses appeared before the subcommittee or submitted their testimony for the record.

Of all these witnesses, I am aware of only two organizations who supported this legislation—the AFL-CIO and the UAW. Witness after witness spoke of the adverse effects they would experience should H.R. 5133 become law. These witnesses represent a broad cross-section of concerned Americans who know that this bill asks them to make considerable sacrifices in order to create more jobs in the automotive sector. Farm groups, consumer groups, economists, manufacturers who export even part of their production, automobile dealers, and the automobile manufacturers themselves—Ford Motor Co., American Motors, General Motors, Volkswagen, and Honda—all oppose this legislation as harmful to their interests, their jobs, and their position in the U.S. economy.

PARLIAMENTARY INQUIRY

Mr. MADIGAN. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. MADIGAN. Mr. Chairman, is the gentleman from Minnesota using the time of the gentleman from North Carolina? Or is the time expiring simultaneously?

The CHAIRMAN. The gentleman is using the time that is assigned to the gentleman from Minnesota.

Mr. MADIGAN. I thank the Chair.

The CHAIRMAN. The Chair recognizes the gentleman from Florida (Mr. GIBBONS).

Mr. GIBBONS. Mr. Chairman, I do not care to use any of my time until after the other committee has used its time. I reserve all my time.

The CHAIRMAN. It is my understanding that the time can be assigned interchangeably. Initially, it was thought that an agreement had been worked out that the time would be used consecutively.

Mr. GIBBONS. Mr. Chairman, I am reserving my time until the Energy and Commerce Committee has used its time.

The CHAIRMAN. Is there any further debate?

PARLIAMENTARY INQUIRIES

Mr. OTTINGER. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. OTTINGER. Mr. Chairman, under the procedure as announced by the Chair, it seems to me that that is not an equitable division. My understanding was that both committees were to proceed simultaneously. We can all sit here and all reserve our time, but it just does not seem to me that that is proper. We ought to allocate this fairly as we go along.

Mr. GIBBONS. If the gentleman will yield, I want to say that I had no understanding. Nobody even consulted me about it, and I am controlling the time for the Ways and Means Committee. The Ways and Means Committee chooses to use its time when the Energy and Commerce Committee has used its time.

You all sat on this bill for 9 months and gave us 8 days. And I insist on my rights.

Mr. DINGELL. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. DINGELL. Mr. Chairman, am I correct in my understanding that the rule provides that the time may be used alternatively by the several persons who control this time?

The CHAIRMAN. The rule does permit that, the Chair would advise the gentleman, but it does not provide for any necessary order.

Mr. DINGELL. And as the Chair advises, there is no necessary order. It can be used interchangeably, and so forth.

The CHAIRMAN. That is correct.

Mr. DINGELL. Mr. Chairman, I would observe to the Chair that we who support the bill, and who have so far the support as manifested by the membership in the adoption of the rule, have one-fourth of the time under our control.

The gentleman from Florida, who has most diligently sat upon all trade legislation and who wholly opposes any efforts to protect American industry and jobs, controls one-quarter of the time and proposes to conclude debate. I do not find that fair.

The CHAIRMAN. The Chair recognizes the gentleman from Florida (Mr. GIBBONS).

Mr. GIBBONS. Mr. Chairman, I resent the gentleman from Michigan trying to slur my good name. If the gentleman wants to keep this debate on a high level and stick to the merits of the bill, we can. But if the gentleman insists on getting in the gutter, I can sling mud just as well as the gentleman.

Now, the gentleman sat on this bill for 9 months, knowing that it belonged in the jurisdiction of the Ways and Means Committee. The gentleman sat on it and gave us 8 days to consider it, one of which was a religious holiday. Now the gentleman has the gall to come in here and protest about his rights.

I reserve my right to control the time for the Ways and Means Committee, and the Ways and Means Committee chooses to take its time when the gentleman's time has expired.

Mr. DINGELL. Mr. Chairman, if I have slurred the gentleman, I apologize.

The CHAIRMAN. The Chair will ask if there is any Member who wishes to yield time.

Mr. MADIGAN. Mr. Chairman, I yield 5 minutes to the gentleman from Iowa (Mr. TAUKE).

Mr. TAUKE. Mr. Chairman, the bill which we are asked to consider is labeled the Fair Practices in Automotive Products Act. It may be illuminating to inquire as to whom it is fair and what unfair practices it is intended to correct.

The apparent "unfair practice" addressed is the successful competition by our Japanese and European trading partners in our domestic automobile market. But foreign automakers are not dumping their automobiles in the United States. They are making a profit on their U.S. sales by providing a product in demand in our market. Nor are their sales the result of their government's providing subsidies to them. Their advantage over U.S. automakers stems instead from their greater efficiency, productivity, and sensitivity to the needs and tastes of the American consumer.

The proponents of this bill have defined a new obligation to be imposed on all foreign firms who would successfully compete in our market. It is not enough that they supply our consumers with quality, reasonably priced products and through competition stimulate our domestic producers to better performance. They would now be required to provide manufacturing jobs to domestic workers in proportion to their success in our market. But I doubt that we would like our firms held to a similar standard. Could we seriously entertain such a proposal with respect to our own industries which compete successfully in the export market? Would we vote to ship American manufacturing jobs overseas?

We are aware that our Japanese trading partners unfairly place nontariff barriers in the way of American automobile sales and sales of other American products in Japan. But this bill is not an appropriate vehicle for addressing such problems. We should not instigate trade warfare. We do indeed have significant exports to Japan where our products are competitive.

German and Japanese automakers have indeed placed facilities in the United States employing significant numbers of American workers. But they have chosen to do so on the basis of sound economic decisionmaking and not because of market-frustrating restrictions such as this bill would impose. This bill before us would in fact jeopardize the continued operation of these facilities.

Is the bill fair to our European and Japanese trading partners? Clearly it is not and they may be expected to retaliate with economic barriers against imports from the United States.

Is the bill fair to American consumers? If we hinder foreign competition with quotas and uneconomic supply source restrictions, the production costs of foreign cars will increase and their availability will be significantly reduced. The resultant excess of demand over supply will raise prices in the American market by as much as $3,000 per car according to some estimates. United States automakers will also face higher component source costs because of their own loss of foreign sourcing. It is estimated that United States car prices would increase by 10 percent. Who pays? The beleagured consumer. We ought also to note the extensive bookkeeping and bureaucracy necessary to implement this bill should it become law. That too must be paid for by the consumer.

Is the bill fair to U.S. automobile manufacturers? Their own import policies would be affected as would be their component sourcing. Their market is not elastic. Consumer demand for U.S. cars cannot be expected to grow by the amount of lost foreign car sales. Perhaps of even more importance, their increased production costs would be a threat to their potential success in foreign markets. The U.S. market is a mature one and significant growth can only be expected in the foreign markets. Significantly, we are not hearing the voices of U.S. firms raised in strong support of this bill as one might expect if it were good for the auto industry.

Is the bill fair to U.S. autoworkers? The estimates of jobs restored in the U.S. auto industry are grossly overestimated by the bill's proponents. CRS and CBO estimates are slightly in excess of 100,000. Some may argue that even this number is significant. Certainly any rehired autoworkers benefit. But even more jobs would be jeopardized in the auto importing sector. UAW workers in the agricultural and construction equipment industries would be jeopardized by the loss of exports through retaliation. In short potential gains for autoworkers are questionable and can only be achieved through this bill at the expense of consumers and workers in other industries. We would all like to see the recovery of the auto industry. But its primary problems are structural and cannot be solved by suppressing competition. It is cruelly misleading to autoworkers to suggest that they will receive long-time benefits if the United States fires this major shot in an incipient trade war.

Is the bill fair to producers of nonautomotive products for export? Here the answer in all cases is decidedly no. Local content restrictions are a clear violation of our international obligations under the General Agreement on Tariffs and Trade [GATT]. Our blocking the primary export of our trading partners could only be interpreted as total abandonment of the concept of free trade. We may expect with certainty similar restraints on our own exports. But it is not the U.S. auto industry whose exports will be curtailed. Rather those of our industries which are competing successfully on their merits in world markets will suffer the consequences of foreign protectionism. Their workers too have jobs which deserve our consideration.

Is the bill fair to the citizens of my district? Iowa's extensive exports of agricultural products and manufactured goods to Japan and the European Economic Community would be at risk. Over $1.8 billion of Iowa's $3.7 billion agricultural exports go to Japan and the EEC. More than $1.7 billion of our $2.8 billion exports of manufactured goods go to these trading partners. Iowa's exports to these countries account for approximately 87,000 jobs. Hundreds of more jobs in Iowa would be eliminated in the sales and distribution of foreign automobiles. The losses we would incur are not fair to the citizens of my district.

I urge you to consider the total impact of this bill on your districts. I think you too will conclude that this is the Unfair Practices in Automotive Products Act.

□ 1100

The CHAIRMAN. The Chair would advise the gentleman from New Jersey (Mr. FLORIO) that he has 23 minutes remaining; the gentleman from North Carolina (Mr. BROYHILL) has 17 minutes remaining; the gentleman from Florida (Mr. GIBBONS) has 30 minutes remaining and the gentleman from Minnesota (Mr. FRENZEL) has 28 minutes remaining.

Mr. FRENZEL. Mr. Chairman, in the interest of preserving the much abused rights of the great Committee on Energy and Commerce, I will yield 2 minutes to the distinguished gentleman from Indiana (Mr. COATS).

Mr. COATS. Mr. Chairman, as a member of the Committee on Energy and Commerce who supported this legislation and voted for it in committee, I rise in opposition to the bill.

I continue to agree that we desperately need to send a signal to our trading partners in Japan, that we cannot continue this imbalance of exports and imports, that we cannot continue trade on a policy that does not allow our products into their country, where we so freely allow their products into our country. But on analysis of H.R. 5133, having taken the time to go back to my district and talk to manufacturers, and talk to farmers, and talk to exporters and talk to our people, I

have come to the conclusion, the inescapable conclusion, that H.R. 5133, the local content bill, would be detrimental to the people of my district and my State and detrimental to the people of this country.

It is unfortunate that we have to debate this bill in the limited timeframe of the lameduck session. Many Members of this body had determined that this bill would not come up and so have not been able to spend the necessary time investigating the pros and cons of this bill and the impact that it would have on the people who they represent and on this country.

Had they had the opportunity to do so, they would have come to the same conclusion that I have come to.

If a Member represents farmers, he cannot help but agree that this bill is going to have an adverse impact on our farmers who so desperately need to export their products in order to achieve a reasonable price.

If they would talk to their manufacturers of electrical components, they would realize that the future for this country lies in our ability to produce electrical components, computer components, and other high technology types of products.

The CHAIRMAN. The time of the gentleman from Indiana (Mr. COATS) has expired.

Mr. FRENZEL. Mr. Chairman, I yield 30 seconds to the gentleman from Indiana.

Mr. COATS. The point I am trying to make is that it is incumbent upon each Member of this body to learn from their district what the impact of this bill would be. Take the time to read the first 12 pages of the report prepared by the Congressional Budget Office, CBO, that details what the overall economic impact of this legislation would be.

You cannot help but come to the conclusion that this bill would adversely impact employment, increase prices, and have a devastating impact on our economy.

The CHAIRMAN. The time of the gentleman from Indiana (Mr. COATS) has again expired.

Mr. MADIGAN. Mr. Chairman, I yield 1 minute from the Committee on Energy on Commerce to the gentleman from Indiana.

Mr. Chairman, will the gentleman yield?

Mr. COATS. I yield to the gentleman from Illinois.

Mr. MADIGAN. Mr. Chairman, I yield this time for the purpose of engaging in a brief colloquy with the gentleman about the importance of this bill to agriculture, and the importance of the Japanese market to American agriculture, points being stressed by the gentleman in the well.

And what I am curious about is why we should be so defensive about that when we know that a pound of American beef in San Francisco costs roughly one-sixth what it costs in Japan.

In other words, when you try to buy that pound of beef in Japan, it costs six times as much as it would cost you in San Francisco. And here we are talking about free trade, and talking about not doing anything that would put up artificial barriers to our agricultural exports, when they obviously already exist. And we have been very, very unsuccessful about doing anything to tear them down.

I wonder why the gentleman is so defensive about this bill when the Japanese are doing to us in agriculture the very thing that the gentleman says he does not want to happen.

Mr. SHARP. Mr. Chairman, will the gentleman yield?

Mr. COATS. I yield to the gentleman from Indiana.

Mr. SHARP. I appreciate the gentleman yielding.

The gentleman makes an important point regarding the risk of retaliation.

The CHAIRMAN. The time of the gentleman from Indiana (Mr. COATS) has again expired.

Mr. MADIGAN. Mr. Chairman, I yield one additional minute to the gentleman from Indiana.

Mr. SHARP. Mr. Chairman, will the gentleman yield?

Mr. COATS. I yield to the gentleman from Indiana.

Mr. SHARP. I appreciate the gentleman yielding.

I would suggest today with passage of this bill, agricultural interests in this country could be very well served. They are getting shortchanged in Japan, they are getting shortchanged in the Common Market. We have been unable to get the attention of the governments in Europe and the Government of Japan to this serious question.

I suggest to the gentleman that passage of this bill will get the attention of those governments, and they will begin, to open up their markets more to our agricultural commodities.

Mr. FRENZEL. Mr. Chairman, will the gentleman yield?

Mr. COATS. I yield to the gentleman from Minnesota.

Mr. FRENZEL. Mr. Chairman, those countries are interested in this. They are dreaming up laws just like it which they can hardly wait to enact if we enact this bill.

Mr. COATS. If I could reclaim the balance of my time that the gentleman so graciously allotted me, I would just make the point that the gentleman from Iowa who preceded me indicated the high level of Iowa agricultural exports. We have an equal level in Indiana. We do now want to jeopardize that. We want to expand that. We have an opportunity to expand that. And I think raising trade barriers in automobiles or agriculture is going to prevent us from doing that.

The CHAIRMAN. The time of the gentleman from Indiana (Mr. COATS) has expired.

Mr. BROYHILL. Mr. Chairman, I yield 2 additional minutes to the gentleman from Indiana and ask him if he would yield.

Mr. COATS. I yield to the gentleman from North Carolina.

Mr. BROYHILL. Mr. Chairman, I can very well understand the concerns that people are expressing here. Of course they are stating their support for this bill, saying that in some way this bill is going to open up trade opportunities for our American-made products or agricultural products in other countries.

The gentleman has studied this bill. Can he point to any particular part of this bill that would accomplish that purpose? I have looked through here. I cannot find that. This bill is a "slam the door on importation of certain products" kind of bill. It has nothing to do, as I see it, with opening up trading opportunities in other countries. I see no incentives here. There is no authority to the President for negotiating, or there is nothing in here that says that the provisions of this bill will be canceled out if some other country does something in return.

Mr. COATS. I can only respond by pointing out that the Detroit News concluded that this bill is nothing more than protectionism with a capital "P." And it is bad economic policy for the United States. Protectionism never breeds opening up new markets; it closes markets. The study of history shows that protectionism, tariffs, and trade barriers almost always result in retaliation.

The CBO study pointed out that very fact. It is very clearly pointed out in the study that retaliation would occur. And the end result would be a devastating impact, not only on the macroeconomic effect, but on the microeconomic effect of our own particular districts, on industries in our districts, not just agriculture, but electrical components manufacturers, many other types of industries that are dependent on world trade for profits and for jobs at home.

□ 1110

Mr. FLORIO. Mr. Chairman, I yield such time as he may consume to the gentleman from Missouri (Mr. CLAY).

Mr. CLAY. Mr. Chairman, I have listened intently to the enlightened debate today. Those for and those against this legislation have articulated their positions in very scholarly fashions. When I arrived on the floor this morning, I was reasonably certain that the passage of this bill would be in the best interest of the Nation. Now, Mr. Chairman, I am convinced beyond a shadow of a doubt that the enactment of the domestic content bill

is not only desirable but also mandatory.

Fourteen years ago, I came to Congress committed to the principles of international free trade. I am still of that philosophical persuasion and am prepared to match my free trade credentials with anybody in this House. But Mr. Speaker, my version of free trade embodies, encompasses, embraces the fundamental concept of fair trade. Free trade cannot totally, exclusively, preemptively, disregard a sense of equity. Unless and until our trade partners recognize this basic fact, the term free trade becomes rhetorical nonsense and the advocates of it become pawns in a one-sided economic world chess game that inflicts injury and suffering on many of our citizens.

Mr. Chairman, opponents of this legislation have likened the content bill to the Smoot-Hawley Tariff Act of 1930 which precipitated worldwide economic disaster. They have cited one horror story after another in an effort to persuade Members of this body to defeat the bill. Speaker after speaker has predicted grave consequences if it passes. But let me speak of the unmentioned horror stories and the ignored grave consequences if it does not pass. Why are the opponents conveniently disregarding the horror of some 200,000 unemployed American autoworkers, and the pain and anguish they and their families are enduring as a result? Why are the opponents not talking about the grave consequences of rejecting this bill?

This legislation is designed to assure a healthy and competitive domestic auto industry. This bill would create or preserve over 1,000,000 jobs and would not trigger significant car price increases. Instead, it is designed to stabilize the future ratio of U.S. auto production to sales. In the absence of a domestic content law, the U.S. automobile production is predicted to fall to about one-half of the automobile market by the end of this decade. If the U.S. automobile production falls from three-quarters of the market to one-half of the market, another 200,000 autoworkers will lose their jobs and this situation will trigger the loss of other jobs outside the auto industry.

Mr. Chairman, no nation has the moral right and certainly should not have the legal right to saturate the markets of another nation with cheap, sometimes government subsidized products while in the process destroying the livelihoods, the earning capacities, the economic viabilities of hundreds of thousands of citizens.

Contrary to the scarce tactics, this bill in no way takes on the dimensions of a Smoot-Hawley Tariff Act. Its passage will not generate a worldwide series of counteractions because it is a very limited, very justifiable response to a very serious problem. This act provides for a sliding scale to determine the ratio of domestic content required for automobiles. Any company selling 900,000 units would be required to produce 90 percent of the parts here in America. A company with 200,000 units would only be required to produce 20 percent. And what is wrong with that. Japan already has an auto content law, as do 31 other countries. In Japan the auto content understanding is 100 percent.

The threat of worldwide tariff war is only that, a threat. Our trading partners know that this lagislation is amied at only one country which has abused the policies of free trade. While dumping millions of autos on the American market, Japan has steadfastly refused to permit American products including autos to freely flow into their market. They proclaim that tariffs are not imposed by them and in a sense that is correct. But the forms and papers and regulations and impediments required constitute not a tariff but a total embargo. After successfully meeting all of the Japanese requirements, American businessmen often find that there is no agency of Government authorized to approve entry of products into the country.

The list of American products which cannot get approval to enter the Japanese marketplace would stretch from this podium to the Members' cloak room. It includes everything from oranges to meats. A pound of ground sirloin beef sells for $4.25 a pound in the United States. That same pound sells for $14 a pound in Tokyo. But our cattlemen and meat processors are prohibited from selling in Japan. Numerous agricultural products are not allowed to enter the Japanese market because elected officials point to the political dangers of displacing, dislocating politically potent farmers. It is then fair for this country to displace, dislocate, upheave thousands of politically potent autoworkers?

Almost 2½ million jobs in this country are directly or indirectly related to the production of automobiles. The problem would not be as acute if Japanese automakers produced their cars in this country or purchased parts for the cars here. But they refuse to do either. In Germany the No. 1 selling auto is not Volkswagen, it is Ford. And the No. 2 selling auto is Opel made by General Motors. But they are all made in Germany.

We cannot in the name of free trade willingly surrender a critical, crucial internal market to insensitive, uncaring trading partners. If this bill is not enacted, imports will account for 40 percent of the U.S. market in cars and light trucks by 1990. The United States-Japan trade deficit has grown to $47 billion in the last 5 years. It was $13 billion alone last year. The potential loss of more than 1.3 million jobs will cost the Federal Treasury an estimated $25 billion a year loss in terms of transfer payments and tax revenues.

Mr. Chairman, I urge support of this legislation.

Mr. FLORIO. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. LUNDINE).

Mr. LUNDINE. Mr. Chairman, I rise in support of this legislation.

I think it was Winston Churchill who said that democracy was the worst form of government, except for all the others. I am inclined to think that this is the worst kind of a trade bill, and I acknowledge that it is a trade bill, except for all the others.

I think that automobiles are a critical linkage industry and if that industry in America is destroyed, our economy will suffer.

I am convinced that we cannot afford to sit idly by any longer while a critical linkage industry in our economy is destroyed. A strong, vibrant domestic automobile industry is of basic importance to maintenance of a manufacturing base in our economy. The production of automobiles are linked, among other things, directly to steel, glass, and rubber production in our economy.

Without a strong manufacturing base in our economy, we cannot hope to maintain international economic leadership or to preserve a strong national defense. While it is true that our service sector has been growing rapidly over recent years, it is also true that even that service industry is dependent on an efficient, healthy manufacturing base to grow and prosper over the long term.

The history of agricultural production in this country illustrates this point. Even though the number of people employed in agricultural production has been drastically reduced during this century and mechanization of agricultural production has become standard, agricultural production still provides a basic component to a strong American economy here at home and through international trade.

This bill represents an important step forward in creation of a national policy to assist our troubled auto industry. Foreign industrial policies and trade practices are having a serious impact on our economy and standard of living.

There is no such thing as free trade in today's world. Acceptance of this fact is the fundamental tenet which must underlie a whole new debate which must occur if we are to solve our economic problems.

This bill says to our trading "partners"—a euphemism for competition—that we will take strong and aggressive action to preserve industries critical to our industrial base. These trading partners do not hesitate to take actions which they are convinced they

need to for their economic survival. Their lexicons contain such phrases as local content, nontariff barriers, subsidized financing, and they have learned how to use them expertly.

Yet, I must admit to you that there are aspects of this legislation which trouble me deeply as I stand before you today. I am troubled that this Congress has not carefully examined all the options available to revitalize our auto industry, and has instead settled for acceptance of the first proposal that came along.

When the local content bill first was proposed, I contacted colleagues and advisers inside and outside Congress issuing a challenge to work together to come up with a better solution than the proposal before us today. That challenge went unanswered. As a result, we are left today with a blunt policy instrument to address a subject which I am convinced requires specific surgery. We are left reacting to a crisis situation instead of asserting a well-coordinated, positive policy.

These results are largely a failure on all our parts to recognize that this country needs an industrial strategy carefully co-ordinated with macroeconomic policies, to address the needs of both our emerging industries and our troubled industries that comprise our basic manufacturing sector. Without the development of such a policy, I predict we will be back here on the floor time and time again next year with Band-Aid approaches to our economic problems and emergency legislative measures that will make piecemeal contributions to an industrial strategy of the worst kind—an ad hoc one.

All this notwithstanding, I believe that a vote in support of this measure is warranted on the merits of the bill. In addition to sending a strong and long overdue signal to our trading partners, this bill, if implemented, can contribute to the preservation of the higher skilled, quality jobs in the auto and supplier industries in the United States where these skills are going to be needed. Also, this bill can help insure that America will continue to remain a central focus of automobile production, instead of just becoming the home for automobile corporate headquarters.

In summary, our auto industry is in serious trouble. It is going to take time to make the necessary structural adjustments to address these troubles. This bill is not a panacea, but it is an important first step in realizing that we must develop an industrial strategy for preservation of our industrial base and for stimulation of emerging industries.

We must understand that passage of this bill is a panacea, but neither can we afford to ignore this problem any longer. Time is short, and action is needed now. I urge support for this bill.

Mr. BROYHILL. Mr. Chairman, I yield 2 minutes to the gentleman from Virginia (Mr. BLILEY).

Mr. BLILEY. Mr. Chairman, I thank the gentleman from North Carolina for yielding me this time.

As has been pointed out previously by other speakers, it is a mistake to bring this bill up at this time, to give the impression that something can be done in these waning days of this Congress, when in reality everyone knows that nothing can be done.

Most of the major newspapers in this country have condemned this legislation for what it is, as protectionism, including, as has been pointed out by the gentleman from Indiana, the Detroit Free Press.

What it will do in addition to many other things, it will cause the price of already too expensive automobiles to go higher.

The first thing that happened when the Japanese established a voluntary quota was that almost within the week the Big Three announced price increases when that occurred; so it is no boon for consumers.

There has been talk about it creating jobs, but as has been ably pointed out by the CBO, the agricultural interests of this country, the U.S. Chamber of Commerce, that it will have a net effect of costing jobs, somewhere between 100,000 and 200,000.

Now, we also live in a world that is a real world and it is not a vacuum. Isaac Newton said that for every action there is a reaction, and just as surely as we think we are only dealing with one thing and with one nation, whatever we do as one of the major consuming nations of this world will be equally watched by other nations.

We currently have a trade surplus with Europe. They have many industries and activities they would like to protect. They have not done so in all of these, but just as surely as we adopt legislation such as this, the interests in their countries who want protectionism will become overwhelming and we will find barriers.

Mr. FRENZEL. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Tennessee (Mr. BEARD).

Mr. BEARD. Mr. Chairman, well, here we go again, the Congress in its wisdom trying to deal with a very delicate balance of trade with a sledge hammer.

The thing that amazes me and the thing that disgusts me is the fact that this bill was brought up in this means in a lameduck session. The thing that somewhat concerns me is the fact that people pushing this piece of legislation really do not have any real meaningful studies supporting their contentions.

Now, for people to talk about the agricultural community and say, "Well, look what is not going to happen to the agricultural community," is somewhat irresponsible because every farming organization in this country has come out in violent opposition—violent opposition to this piece of legislation, all of whom have said it would definitely hurt exports, and the one thing that our farmers who are fighting for their very survival today do not need is a diminished export market.

I think it is only important to remind people who are thinking about voting for this piece of legislation that we have tried this once before. We tried it with the Smoot-Hawley Tariff Act back in the 1930's. What did we get in return? We got one of the most devastating trade wars the world has ever seen. We saw a loss of jobs, thousands of jobs.

They have taken the UAW study that has said, "Look at the wonderful hundreds of thousands of jobs that this piece of legislation will create," and all the different agencies, the CBO, the CRS study here by the associates of the Harbridge House, Inc., did a study saying it would raise the cost of automobile units by up to $800 to $1,200.

The coal people have come out saying it could hurt their exports.

I have a plant in Tennessee, Nisson, where we are looking at a $1 billion investment creating thousands of jobs and the Nisson people have stated they would lock the door, even though they were in production, they would lock the door, turn around and walk away, meaning the loss of thousands of jobs and hundreds of millions of dollars in revenue for supporting city, local, and State government, and yet now we are in the lameduck session trying to push this piece of irresponsible legislation.

I ask Members to please consider the overall effect, the studies which show there would be a net loss in jobs and there would be an increase in automotive costs and that is what we do not need at this time.

Mr. FLORIO. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. STRATTON).

Mr. STRATTON. Mr. Chairman, I am one of the original charter cosponsors of this legislation and also, I think, one of the strongest friends of Japan in the House of Representatives. Next to the gentleman from California (Mr. SHUMWAY), I may have the best speaking ability of Japanese of those Members not of Japanese ancestry.

My understanding of this legislation is that it was not designed primarily to restrict imports. It was also designed to encourage foreign manufacturers to follow the lead of Volkswagen; if they wanted to enter the American market and sell in the American market, they

should at least build plants in our country.

In my former district in Auburn, N.Y., the Nippon Steel Co. several years ago established a steel manufacturing plant, the first Japanese plant in the United States which hires today 250 Auburnians in an area where there had been a lot of unemployment.

□ 1120

It has just a few Japanese managers. But this company is one of the major economic and industrial citizens of that community.

I got on this particular bill after they closed down the Ford plant in Mahwah, N.J., and threw thousands of New York State employees out of work. I think this bill is designed to try to encourage plants to be built in the United States.

The one thing that bothers me, however, is that I do not have any particular feel for the exact content ratios that are in the bill, or the numbers of vehicles that ought to be allowed under any particular model year. But I hope to be able to offer at the proper time an amendment that would allow the Secretary to review these figures to determine whether we are actually getting foreign car manufacturers moving into plants in the United States.

The CHAIRMAN. The time of the gentleman from New York (Mr. STRATTON) has expired.

Mr. FLORIO. Mr. Chairman, I yield 1 additional minute to the gentleman from New York.

Mr. STRATTON. I thank the gentleman for yielding further.

Mr. Chairman, it was my understanding that some Japanese auto manufacturers have said that there should be some adjustment in these various ratios so that they could profitably move into the Mahwah plant, or some other empty plant and I think we ought to have some such feature in the legislation.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. STRATTON. I yield to the gentleman from New York.

Mr. OTTINGER. I thank the gentleman for yielding.

Mr. Chairman, I know the gentleman is one of the staunchest supporters of our defense in this body, and the automobile industry is also a major manufacturer of tanks and other military equipment, and I assume that the gentleman shares our concern that if this industrial base were to erode seriously our defense capability would be hurt.

Mr. STRATTON. There is no question about it, Mr. Chairman. That is one of the reasons why I think if we were to encourage new autoplants in the United States, they might contribute to that base.

The CHAIRMAN. The Chair would advise the gentlemen that the gentleman from New Jersey (Mr. FLORIO) has 18 minutes remaining, the gentleman from North Carolina (Mr. BROYHILL) has 11 minutes remaining, the gentleman from Florida (Mr. GIBBONS) has 30 minutes, and the gentleman from Minnesota (Mr. FRENZEL) has 23½ minutes remaining.

PARLIAMENTARY INQUIRY

Mr. OTTINGER. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. OTTINGER. Mr. Chairman, the time was to be divided between the two committees and between the majority and minority. I wonder if the Chair could not prevail to see to it that this was equitably used.

In our committee, in fact, we were seriously delayed because the opponents of this legislation used every delaying tactic they could. It was not our committee's decision to assign such a short period of time to the Ways and Means Committee. The Ways and Means Committee could well have held hearings before they decided to take up the matter.

But whatever those disputes may be, it seems to me in dealing with this legislation we ought to have an equitable apportionment of the time and hope that the Chair would help us in that respect.

The CHAIRMAN (Mr. PANETTA). As the Chair has stated, the rule permits the time to be used interchangeably. The Chair would prefer that the Members exercise that ability under the rule at this point. However, if no Members seek additional time, the Chair is prepared to move into the reading of the bill.

Mr. FRENZEL. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Nebraska (Mr. BEREUTER).

Mr. BEREUTER. Mr. Chairman, I rise in strong opposition to this bill.

I urge all Members, particularly those from farm States, to look closely at the bill and realize its disastrous implications for the international trading system.

I made many general remarks about the bill last night in the debate on the rule, so I would like to focus my comments today on its impact on the American agricultural sector.

Members know, of course, that American agriculture is the leading export sector of the Nation. I would like to point out that, as the following chart shows, today Illinois provides 9 percent of our agricultural exports, California 8 percent, Indiana 4 percent, Missouri 4 percent, just to pick out a few States.

THE NATION'S 10 LEADING AGRICULTURAL EXPORT STATES [1]

[Dollars in millions]

State	Value of exports	Share of U.S. total (percent)
Illinois	3,644	9
Iowa	3,270	8
California	3,168	8
Texas	3,086	8
Kansas	2,215	5
Minnesota	2,004	5
Nebraska	1,932	5
Indiana	1,705	4
North Dakota	1,457	4
Missouri	1,440	4
Ten-State total	23,921	59

[1] Fiscal year 1980: Source: Economic Research Service, USDA.

I say to the Members from those States, some of whom have spoken in support of this legislation, if they want to throw their share of the agricultural exports up into the air for possible loss after this bill is passed, then they are indeed riverboat gamblers or Barbary Coast gamblers.

Ed Andersen, master of the National Grange recently warned, "passage of this legislation would be disaster for American farmers." With one-fourth of U.S. farm income derived from export sales, Andersen noted, any type of protectionism raises the potential for harmful retaliation. Andersen added further:

> We are increasingly concerned at growing use of trade-distorting practices such as export subsidies, and at the threat of major new import-restricting measures which could seriously disrupt the world trading system, for our perspective, it (H.R. 5133) would be a devastating blow to American farmers who have a desperate need for exports to ease the critical income problems which they are now facing.

Some may doubt the ability of this bill to touch off an international trade war, in light of the allegation that the bill really only applies to imports from Canada and Japan. Yet even if the enactment of this bill would only cause an equivalent response from Canada and Japan, the impact of the actions by these two nations alone would seriously disable the U.S. economy.

In agricultural exports alone, we shipped $6.6 billion of products to Japan last year, our No. 1 agricultural export market, since 1964.

Canada received almost $2 billion of agricultural exports last fiscal year. Those two nations account for one-fifth of our total agricultural exports.

If we act against the Japanese automobile industry in such a blatant fashion, certainly the Japanese will have no objection to buying their agricultural products from Canada, Brazil, Argentina, Australia, France, and other willing suppliers.

In the last few years, the United States has put great pressure on Japan to open its import markets, especially for agricultural products, for which Japan maintains a number of import quotas which I believe are in

violation of Japan's GATT obligations. Japan has agreed to some expansion of quotas for beef, citrus fruit, and other products. More progress is needed and is coming. These efforts would be effectively reversed by action now against Japanese automobiles. The importance of a recent statement by 16 of the nation's major farm groups should not be ignored. In speaking against H.R. 5133, they said:

We don't want to hinder strong negotiating efforts to persuade our international trading partners to change critical trade policies, including export subsidy and restrictive access practices which could open up further markets for U.S. exports.

Having just returned from the Soviet Union last month, we saw very well that as a result of our grain embargo of the Soviet Union we have become the residual supplier.

The CHAIRMAN. The time of the gentleman from Nebraska (Mr. BEREUTER) has expired.

Mr. FRENZEL. Mr. Chairman, I yield 30 seconds to the gentleman from Nebraska.

Mr. BEREUTER. I thank the gentleman for yielding further.

Mr. Chairman, it is very clear we are the residual supplier today for grain and other agricultural products to the Soviet Union. This bill may well be labeled the Soviet grain embargo No. II because the impact would be at least as deleterious for American agriculture and the country as the original Carter grain embargo.

I ask my colleaguess here to remember that farmers are in their third year of depressed prices and income. We must not take actions that lessen the pressure on important trading partners to change trade policies affecting the entire international agricultural trading system. I ask not to jeopardize our current agricultural export trade by voting for H.R. 5133. That is exactly what we would do if we pass this legislation.

Mr. COATS. Mr. Chairman, I yield 2 minutes to the gentleman from Nebraska (Mr. DAUB).

Mr. DAUB. I thank the gentleman from Indiana for yielding this time to me.

Mr. Chairman, I was particularly interested, having listened a little while ago to some comments that the gentleman was making, so if I could get his attention, I would like him to share, because I have not read it, a CBO report which was prepared at the request of the Committee on Ways and Means.

I think the Members need a little bit more information about some of the very revealing data that was determined by them as they took a look at the proposed legislation of the day.

Mr. COATS. If the gentleman would yield to me, that report was prepared at the request of the Committee on Ways and Means, their Subcommittee on Trade, by Alice Rivilin of the CBO. That report indicates on page 3 that there will be both primary and secondary economic benefits and detriments as a result of the passage of this bill.

I think it is important to note in quoting from that report:

Assuming equivalent retaliatory trade restrictions on the part of our trading partners, a highly probable outcome, CBO results show that by 1990 United States price levels will be higher, real Gross National Product will be lower, unemployment—

Yes, unemployment—

will be higher than otherwise.

The report goes on to say:

But even without retaliation, the net effect of H.R. 5133, the content bill, the net effect on the United States economy will be negative.

These are primary effects. Secondary effects are listed as a slowdown in American economic activity, a slowdown in demand for U.S. exports, the appreciation of the dollar in the world's currency exchanges, hurting the relative competitive position of both our export and import competing industry, losses in U.S. auto production efficiency, and larger auto industry wage rate increases than otherwise would be induced as a result of foreign competition.

All of these negative impacts are reported by CBO, a report that is generally accepted by our colleagues on the other side of the aisle as being the bible of economic projections.

Mr. DAUB. Mr. Chairman, I want to thank the gentleman for bringing these facts more particularly to our colleagues' attention. I think it is incumbent upon every Member of the House to at least pick up that report from Ways and Means and read the summaries contained in the first 15 pages before considering this bill.

The CHAIRMAN. The time of the gentleman from Nebraska (Mr. DAUB) has expired.

Mr. FRENZEL. Mr. Chairman, I yield 1 minute to the gentleman from Nebraska.

Mr. DAUB. I thank the gentleman for yielding.

Mr. Chairman, I really urge my colleagues to consider this from the standpoint that if this bill should pass, what we have done, in effect, is legislate a quota. I think that it would be a big mistake for this country to commence, much in the fashion or tradition of Smoot-Hawley, to get into the business of legislating tariffs, barriers, quotas, or ad valorems, to engage in the very practices that we have condemned for so many years, and instead commence to engage in the process of encouraging voluntary restraint.

I have a thought. My thought would be simply this: Indeed, what we ought to be doing perhaps to our trading partners around the world is to say, "We are just not going to subsidize your defense to the extent we have so that indeed you cannot devote your GNP resources to subsidizing your competitive private products into the American marketplace."

That, I think, is a much better way to resolve a message being sent to Japan or Germany or the European Common Market.

Mr. GIBBONS. Mr. Chairman, I yield 3 minutes to the gentleman from Pennsylvania (Mr. BAILEY).

Mr. BAILEY of Pennsylvania. Mr. Chairman, I thank the gentleman for yielding. This comes as an unexpected pleasure, and I am very grateful to the gentleman from Florida.

Mr. Chairman, a number of things have been mentioned here on the floor that relate to Japanese trade practices. I would like to cite two examples for the Members' benefit.

Cigarettes and we have heard about agricultural products. Let us talk about beef. Beef is $19 a pound in Japan today; beef, which Japanese consumers want very badly.

Mr. FLORIO. Mr. Chairman, will the gentleman yield?

Mr. BAILEY of Pennslyvania. I yield.

Mr. FLORIO. Mr. Chairman, just to make an observation, I was in Japan in August and inquired about the unquestioned existence of nontariff barriers. The response was that they had to have those barriers to protect their admittedly inefficient Japanese farming community from the very great efficiency of American farmers.

Mr. BAILEY of Pennslyvania. I thank the gentleman for his comment. To give the Members an example; there are Members here, and I would like to invite them to comment if they wish—on this matter.

Roughly 5 years ago, because Japanese consumers very much want to buy American-made brand cigarettes, the Japanese were asked to have their licensees, who are controlled by the Government, to make available, advertise, put out on the counter, and so forth, American cigarettes. Not much to ask, is it? Not very much. Just recently, we uncovered a memo going from Japanese Government officials to licensees, threatening to harrass them, shout them down, control the advertising, control the sale of American cigarettes. We elicited testimony before the Trade Subcommittee of the House Ways and Means Committee on the matter—the Department of State was there. They were asked whether or not it was possible that these very broad Government prohibitions and practices on behalf of the Japanese Government would have been possible without the direct authorization, control and instigation of Japan's top political leaders. The answer was—listen to this: The answer was unequivocably, no.

This was a contrived Government policy in direct violation of an agreement with the U.S. Government, and every member of the subcommittee sitting there, including individuals who had had experience on this issue acknowledged that this was dishonest and unfair.

One more example, and that is the real reason for this legislation, ladies and gentleman. Japan has got to enter the modern world and understand that she has got to accept her responsibility. God bless the great democracy that she is.

Mr. FRENZEL. Mr. Chairman, will the gentleman yield?

Mr. BAILEY of Pennsylvania. I yield.

Mr. FRENZEL. Mr. Chairman, I do not want to use the gentleman's time. Essentially, the cigarette matter, as I understand it, is as outlined by the gentleman from Pennsylvania. We made a unusual deal on cigarettes with Japan in the first place. Then we have found that Japan apparently has no intention of living up to the agreement it signed. I think the gentleman is correct in pointing out how serious this matter is.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. FLORIO. Mr. Chairman, I yield 1 additional minute to the gentleman from Pennsylvania.

Mr. BAILEY of Pennsylvania. The difficulty with that agreement was the very poor intentions, the bad faith and dishonesty of top leaders in Japan. If we are ever going to achieve something in terms of decent trade balances that we can go to the American people with and say, "This is something we justifiably have to do because it helps in the international arena, we need help and cooperation from them."

I would like to give one more example. Canada, when the voluntary restraint agreement was negotiated with the United States, was very concerned that they have a parallel agreement with Japan. Japan resisted, they did not want to do it. Canada at that point, through her customs officials, all of a sudden dropped the curtain and said, "You are not going to be delivering any more cars."

Within 2 days, with no jawboning, a voluntary trade agreement was negotiated with the Canadian Government parallel with the agreement reached with the United States.

This piece of legislation is not the best thing to do in an ideal sense. It is a necessary political vehicle to teach some lessons.

Mr. FRENZEL. Mr. Chairman, I yield 2 minutes to the gentleman from Ohio (Mr. OXLEY).

Mr. OXLEY. Mr. Chairman, it has been interesting to watch and listen to the debate today. One of the things that occurred to me involving the sales of agricultural States is the effect that this type of legislation would have on my home State of Ohio. It currently ranks 11th in the Nation in wheat production, 67 million bushels annually. Sixty percent of Ohio's wheat crop is exported; 50 percent of our soybeans are exported; one-third of the corn crop is exported.

So, I do not think that there is any question, with the farms groups coming out in strong opposition to this legislation, of the effect it would have on the farmers. What effect would it have on the consumer? Some Members might have farmers, but all Members have consumers. It was interesting to look at the testimony that took place in the committee when Catherine England, from the Heritage Foundation, indicated what the cost would be to the consumer. She said:

> These higher price tags mean that consumers will be paying a great deal to generate jobs for autoworkers. One study concluded that, for every job generated in the automobile industry at $20,000 per year, consumers would pay $80,000 to $90,000 in higher prices.[50] Other estimates are higher. Administration estimates predict that every job gained in the auto industry would cost the American economy $100,000.[51] Other studies claim that the cost to the economy of reemploying an autoworker under the current voluntary import restrictions ranges from $245,000 to $1,125,000. The proposed domestic content law could cost more.[52]
>
> Ironically, autoworkers are among the highest paid American workers. Their wages are currently 28 percent above the average for all manufacturers.[53] With domestic content laws in effect, the average manufacturing employee earning $7 per hour would be required to subsidize autoworkers earning a $9.50 hourly wage.

That tells what it is all about. We are talking of anywhere from $400 to $1,000 for each new automobile sold in this country to the consumer.

The CHAIRMAN. The gentleman from New Jersey (Mr. FLORIO) has 17 minutes remaining; the gentleman from North Carolina (Mr. BROYHILL) has 9 minutes remaining; the gentleman from Florida (Mr. GIBBONS) has 27 minutes remaining, and the gentleman from Minnesota (Mr. FRENZEL) has 18 minutes remaining.

Mr. FLORIO. Mr. Chairman, I yield such time as he may consume to the gentleman from Maryland (Mr. MITCHELL).

Mr. MITCHELL of Maryland. Mr. Chairman, I strongly support this legislation.

Mr. Chairman, the measure before you today represents a significant step toward addressing the problems of national unemployment as well as the troubled automobile industry. The bill, sponsored by Congressman OTTINGER and supported by our United Auto Workers, requires automobile manufacturers to meet minimum levels of "domestic content" or to reduce their automobile sales to the United States.

I would suggest to my colleagues that we are moving in the right direction with this bill. Quite simply, we are attempting to assure that new automobiles or parts for new cars sold in the United States be made, for the most part, in our own country. The bill also provides that, as a manufacturer sells more cars in this country, a higher percentage of its vehicles' value must be American made; a maximum requirement of 90 percent for model year 1986 is stipulated.

I certainly cannot understand how we could impede the progress of any effort which would strengthen the auto industry, a part of the backbone of this Nation; provide significant employment opportunity potentials; and aid in the stabilization of our overall domestic economy. If we do not endorse H.R. 5133, then we can blame ourselves for ignoring the critical need to address these problems.

I certainly do not need to rehearse the fact that major automobile plants around the Nation continue to implement massive layoffs, and simultaneously struggle with international competition and adverse domestic economic conditions. Ironically we look to this particular industry to remain a stalwart as a major employer, yet we continuously fail to provide the protection the industry needs to maintain its stability in the long run.

We cannot look to the auto industry to prosper and aid in economic stabilization when it is a main victim of increased imports, recessionary impacts, decreased consumer purchasing power, and spiraling energy costs. Unfortunately, these problems merely aggravate each other and tie the auto industry, its employees, and its market in a vicious cycle of plummeting production and sales, resultant unemployment, and other residual effects which cripple the industry.

Mr. Chairman, many of us are grappling with the question of the day—what role should the Government play in insuring the well-being of its citizens? I submit that, along with other priorities, our Government is obligated to intervene and aid in the stabilization of the auto industry. Such intervention is a sound investment—our returns will benefit the economy as a whole and severely depressed areas in particular.

Initiatives to aid the auto industry are also initiatives which aid in job creation, the consumption of such products as steel, iron, synthetic rubber, the development of new manufacturing technologies, and the encouragement of overall productivity which serves as a foundation for our economy. So, indeed, aid to the auto industry does not only represent help for a single entity. It is a significant step to national economic stabilization. I urge the expeditious consider-

ation and passage of the domestic content bill.

Mr. FLORIO. Mr. Chairman, I yield 2 minutes to the gentleman from Michigan (Mr. KILDEE).

Mr. KILDEE. Mr. Chairman, I rise in strong support of this bill. It is a reasonable measure which addresses a serious economic problem.

As is the case with many Members, I believe in unencumbered commerce among the many nations of the world. In an ideal world where each country pursues the same goals, free trade would be a policy worth striving for. I do not feel, however, that we should take actions detrimental to our economy if virtually every other country in the world chooses not to observe such a principle. We do not live in an ideal world. We only need observe the recent GATT meeting to see how far we are from the ideals which all seem to espouse. To my mind it is naive to conduct a foreign economic policy on principles which no one else chooses to observe.

Opponents of the measure say it would violate GATT. The original purpose of GATT was to introduce a degree of equity and fairness into international trade. The process must be a two-way street. I would ask how well other auto-producing countries measure up to the principles of GATT. If we pass this bill, why is it said we violate the agreement if Italy does not when it limits Japanese imports to 2,200 units? Why is it not a violation when Great Britain, France, and now even West Germany limit imports? Why is it not a violation when Japan places barriers against virtually any imports which may compete with their own products? Why are domestic content requirements permissible in Brazil or Mexico but not here? Why can the Japanese impose domestic content requirements on aircraft purchases?

We seem to be observing a different set of rules than the rest of the world, and it has affected many of our basic industries. These industries are the very sinews of our strength as a nation. Nations which rely on that strength are steadily sapping it.

I have reviewed the automotive import restrictions of every country in the world which produces its own autos, and without exception our market is the most open in the world. Imports now constitute about 30 percent of the sales in the United States. No other nation in the developed world would permit or has permitted such deep market penetration at the expense of its own workers and industry. Every other country has erected barriers. In some instances these are tariff barriers. In other instances they are nontariff barriers such as quotas, domestic content requirements, or homoglogation requirements. Because our markets are so open, we have been targeted by other countries in order to help their balance of payments, develop their own industries, and create their own jobs.

The auto industry is such a vital element in our economy that we cannot stand idly by and let it be devastated. The health of the auto industry has an impact on many other industries. Those of us who represent districts where steel or rubber is produced are painfully aware of their interdependence with the auto industry. Conditions in the steel mills and rubber plants of our country are just as dire as in the auto plants. Other industries are also affected. Such products as plastics, aluminum, electronics, and fabrics are components of American cars. One job in six in our country is dependent on automotive manufacturing, and conditions in many other areas reflect those in my own district. For every unemployed auto worker, two other workers have been laid off in support industries.

Almost 2 years ago, the outgoing Secretary of Transportation issued a report which examined conditions in the auto industry. He warned of dire consequences if the industry failed to recover. He spoke of "a permanently diminished industrial and employment base" in our country. I am sure that such a condition is not acceptable to those of us charged with guiding the course of our Nation. Despite that dire prediction, the current administration has done nothing to address the problem. They say that as general economic conditions improve, the industry will recover. Even in the context of a general economic program, the Government has a responsibility to address specific problems. Their failure to address the specific problem necessitates this piece of legislation. Even if they choose not to act, we must.

The current administration has struggled with a sick economy, and their failure to treat more than the symptoms is baffling. The cost to the Federal Government is high. Two years ago, it was estimated that each imported car cost more than $1,000 because of the services which unemployed auto workers received and the taxes which they did not pay. That figure may have gone down in the interim, but it is not something to take heart in. The reason for the reduction is that thousands of workers have totally exhausted unemployment benefits. It is very hard for me to explain to such people why our Government chooses to indirectly subsidize imported cars at $1,000 per unit.

In the past, the auto industry has helped to lead us out of recession. I know it would like to do so again. Instead, the auto industry faces disaster. Over 20 percent of the workers in my home town of Flint, Mich., are unemployed. The time has come when we must examine the Federal policies which have contributed to their plight and take corrective action. I ask my colleagues to support this legislation. It is time for a degree of equity to be added to our trade policies.

□ 1140

Mr. GIBBONS. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from Ohio (Mr. PEASE).

Mr. PEASE. Mr. Chairman, I rise in support of H.R. 5133.

In the short time available to me I would like to make one point and ask the question: Can Members of this House vote for this bill without feeling guilty?

Opponents will try to lay a guilt complex on Members and try to make them feel a little unclean and make them feel like they ought to slink out of the Chamber after voting for H.R. 5133.

The answer to the question is, yes, Members can vote for this bill without feeling guilty. If this is a form of protectionism, so be it. Every nation protects the basic economic interests of its people. That means that every nation protects its basic industries. That is especially true in a democracy, and it cannot be any other way. A representative body must represent the economic interests of ordinary citizens or they will not stay in their jobs.

Erudite economists can construct sophisticated theories about how free trade benefits everybody in the long run, but the ordinary working man or woman in any nation in the world views it more narrowly. He views it in terms of asking himself, "do I have a job or don't I have a job?"

So the elected representatives in a democracy must fashion public policy with that inescapable fact in mind. Thus, every nation protects its agricultural industry. Certainly Japan does; we have heard that. Certainly the European community does; we have heard that.

Every auto manufacturing nation tries to protect its own auto industry. The United Kingdom and Germany restrict Japanese imports to less than 10 percent of their market. France restricts Japanese imports to less than 3 percent, and Italy to less than 1 percent. Brazil has a domestic content requirement.

And what about Japan? Until a few years ago it was impossible for foreign cars to enter the Japanese market. Now it is merely next to impossible.

Never fear, what we do here today at the bottom line is no different from what every other industrial nation does for its auto industry.

Yes, Mr. Chairman, Members can vote for H.R. 5133 without feeling guilty. No industry is as crucial to the economic health of this country as the auto industry.

Mr. FRENZEL. Mr. Chairman, I yield 2 minutes to the gentleman from Texas (Mr. PAUL).

Mr. PAUL. Mr. Chairman, I thank the gentleman for yielding me this time.

Mr. Chairman, we have been spending a good deal of time here today, as well as yesterday, discussing the pros and cons of protectionism. I happen to think that we are talking mainly about the symptoms and we have not once mentioned the basic cause; the root cause of the problems that we face.

The problems we have today are nothing new. We have had these problems off and on for centuries. As a matter of fact, our Nation was born with problems very similar to the problems we face today. After the Revolution, between 1781 and 1787, we followed policies whereby the economy was a closed economy. Each State had a different currency, each State inflated at different rates, and because of the inflation each State tried to compensate by putting on wage and price controls, and it did exactly what one would expect. It caused a depression. There were strong prohibitions against free trade among the States, and as one would expect, this caused nothing but economic chaos. It was out of these problems that the Constitutional Convention was convened, and the Founding Fathers in their wisdom decided that there was something wrong, and they did two things.

They instituted free trade. That is, they put into the Constitution the commerce clause. Even though today, in the 20th century, we use the commerce clause in the Constitution as a justification for the Congress and the courts to regulate commerce, the commerce clause, at the time it was written into the Constitution, was intended to break down all barriers so we would not prohibit free trade among the States. In the 20th century the courts and the Congress have changed their attitude about this. The Founding Fathers broke down the trade barriers between the States and they instituted, more importantly, sound money. This brought on a tremendous revitalization in the economy in the 1790's after the Constitution was ratified.

Mr. Chairman, that is what we need today, sound money as well as free trade. We cannot solve the problems of a sick economy brought on by a sick currency by protectionist legislation. It never would before and will not work now.

The world today is like the States were between 1781-87. Only with the acceptance of a stable currency and the institution of free trade can we expect to recover from the worldwide depression that we are suffering from today.

The argument for "domestic content" legislation is analagous to the Michigan delegation saying that no parts of any automobile can be manufactured in Ohio and that no energy source can come from out of State. The argument falls flat and its obvious absurdity makes it imperative we regret this legislation. You cannot solve the problems brought on by monetary destruction with protectionist legislation designed to help the few at the expense of the many.

Mr. BROYHILL. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from Ohio (Mr. BROWN).

Mr. BROWN of Ohio. Mr. Chairman, we always get a little bit of trouble going when we get into lameduck sessions, and I think we have that here. I do not want to tell any secrets out of school, so if the people on C-Span will turn down the volume, I would like to suggest to my colleagues, as all of us are aware, that this bill is not going to become law in this session. We are doing some cosmetic work here. But I want to be sure that we do it as close to right as possible and not set any really bad precedents for ourselves.

In this discussion there is a good deal of rectitude and truth on both sides. We do have problems with imports coming in from abroad that are taking our markets and, therefore, our jobs. Nobody argues that. I have been discussing this problem from my vantage point on the Joint Economic Committee for some time. We need to do something about that, and perhaps we need to limit imports in order to give us time to become more effective competitors.

One of the objectives of this legislation is to encourage jobs in this country, and in doing so, the restrictions are set in the hope that some of those foreign producers will be encouraged to put their plants in the United States so that our citizens in this country can have jobs producing those foreign products. That is a laudable objective, and we ought to be encouraging its accomplishment.

It has been encouraged already by Douglas Fraser, the head of the UAW, who came to the Joint Economic Committee in March of 1980 and said that what he wanted were three things: He wanted those plants from foreign producers put into the United States; he wanted voluntary restrictions on the volume of products they send into the United States from abroad, and he wanted an increased domestic content—that is what we are talking about today—in the products that they sell here.

This legislation addresses the whole range of products produced by an individual company or producer, and so if a foreign producer puts a plant in the United States to produce one of its models only a portion of the content that is in their whole range of products would qualify as domestic content.

In my district the Honda Corp. has made an investment of $250 million. That is more than Honda has invested in aggregate outside of Japan in the last 20 years. That $250 million is a major investment here.

□ 1150

The plant has recently begun production. The first Honda Accords, the highest quality car of their line, are now coming off that assembly line produced by 2,000 American employees, autoworkers.

I am going to introduce an amendment to this legislation that will correct content quotas that would close that Honda plant because the schedule of percentages are too high for them to comply because those percentages apply to all their sales—not just the Accords built in the United States with 50 to 65 percent domestic content with the next few years. So the schedule of content percentages in section 4 would require Honda to close its U.S. plant and lose those 2,000 jobs of U.S. citizens.

I hope my colleagues will be attentive to that time.

Mr. GIBBONS. Mr. Chairman, I yield 6 minutes to the chairman of the Budget Committee, the gentleman from Oklahoma (Mr. JONES).

Mr. JONES of Oklahoma. Mr. Chairman, it is with sincere regret that I find myself opposing the views of Douglas Fraser and the United Auto Workers. I consider Doug Fraser to be truly one of the most outstanding labor leaders in our Nation's history. In the case of this domestic content legislation, I recognize the frustration which fosters this protectionist approach—but I plead with my colleagues to take this debate seriously and consider our lessons from history before casting your vote.

Chiseled in stone in front of the Archives Building just down from this Capitol are the words, "what is past is prologue * * * study the past." Perhaps no other proposed legislation at no other time in the last half century commands us to follow those precepts more than this domestic content bill. It is protectionist pure and simple—53 years ago the United States and the world trading nations found themselves in economic circumstances very similar to what we experience today. President Hoover called Congress into special session in 1929 to consider tariff protection only for American farmers. By 1930 when the Smoot-Hawley bill was signed into law, nearly every section of the American economy had joined the logroll of protectionist tariffs. That triggered protectionist retaliation from our trading partners—international commerce

came to a screeching halt and that legislation, Smoot-Hawley, perhaps more than anything else, was the spark that ignited a worldwide depression lasting for a decade.

Those same conditions exist today. We saw recently at the GATT ministerial meeting in Geneva that our trading partners are primed and cocked to protect their markets and will do so especially if the United States as leader of the free world sets the example. If that happens, it is just as much a no-win situation for us as is nuclear war in a much graver sense.

Specifically on this legislation let us ask: Will it do what its proponents claim? Will it create more jobs in America and not increase inflation?

Very clearly, from any objective study, the answer is a firm "No."

Let me underscore what the Congressional Budget Office study of the domestic content legislation reveals. The CBO does acknowledge that 38,000 jobs will be reborn or created in the automobile industry. However, when the overall effects of protectionism are factored in there will be, the CBO notes, a net loss of American jobs. Unemployment in the nonautomobile sector will actually be increased by more than 100,000. For the American consumer, according to the CBO study, it will mean higher prices not only in automobiles but in other products as well.

Let us dwell especially on where that net loss of jobs will occur. There you find that the increased unemployment will hit in the very areas on which we must rely for economic growth for the rest of this century.

For example, four out of every five new industrial jobs created in the past 4 years have been in the export sector. More than one out of every six American jobs is totally dependent on exports. One out of every three agricultural acres goes into export. Those will be the first wave of new unemployment if we start down this dangerous road of protectionism.

One of the problems with this bill is that it aims at the wrong target. It aims at Japanese imports, and the facts are that Japanese imports on a per unit basis are at the same level as they were 4 years ago.

The real target should be the American economy which has depressed all auto sales and that is not the target that is aimed at in this legislation.

This bill clearly violates the rules of international trade called GATT. That is not to say that other countries including the principal one at whom this bill is aimed do not also violate the rules of free trade. What I am suggesting is that there is another course to deal with this problem. We can pass legislation that provides for reciprocity similar to the Frenzel bill. That provides for fair trade, that puts American products on an even playing field with other nations, and it is legislation that strengthens our hand to enforce on a continuing basis, and within the rules of international trade, free and open and fair trade.

The problem is that the reciprocity legislation is not before us today; it has not completed its markup in the Ways and Means Committee and that means we do not have the opportunity to vote on it today. Therefore, I urge my colleagues to wait until the start of the 98th Congress to deal with this problem in a more thoughtful, calm and deliberate manner. I agree that we should send a message to Japan. But let that message be a legal one. Let not this great lawmaking body, the greatest in the world, send a message which in itself violates the code of international trade law.

The philosopher, Santayana, said, "Those who cannot remember the past are condemned to repeat it." Let us not forget Smoot-Hawley. Let us not forget the last worldwide depression which it sparked. Let us not repeat that mistake again today by passing this legislation.

Mr. FRENZEL. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Pennsylvania (Mr. CLINGER).

Mr. CLINGER. Mr. Chairman, I rise in opposition to H.R. 5133. I am a cosponsor of this legislation, a cosponsorship which I now regret. I was not fully aware of the implications, rather drastic implications, of what this legislation would do at the time I agreed to cosponsor this bill some months ago. I have since had time to consider those implications which are serious and dangerous.

Only a few months ago, this Chamber passed, with great fanfare, an export bill to promote entrepreneur's in overseas markets. Today, we are debating the merits of adopting protectionist legislation for the domestic auto industry. And this to me is practically an overnight change in the course of our international trading policy.

In effect, the House is sending the following message to our international partners: "We want to have our cake and eat it too." Our domestic car industry is in trouble from the recession and its inability to compete in the marketplace against foreign imports, particularly from Japan. Any car manufacturer who wants to sell their products here, must build their products here.

Mr. Chairman, the distinguished chairman of the Budget Committee clearly indicated the impact this would have on jobs in this country. Underscoring this point the Washington Post said, "Legislation that reduces imports will also, indirectly but inevitably, reduce exports—and the jobs that depend on them."

Just imagine the chilling effect on the number of industries with great export potential in world markets. Our domestic coal reserves are in tremendous demand in order to replace imported oil and natural gas. Innovative industries in wind and solar energy have universal worldwide applications. Surplus farm products have nowhere else to go but into overseas countries.

My point is that with domestic content legislation, we will be deterring the growth of other promising economic sectors in the future.

It is unconscionable for this body to shore up the less competitive industries at the expense of the most competitive. In addition, this bill, if fully enforced, will add $333 to the costs of new cars and two-tenths of 1 percent to the inflation rate.

I regret that I did not recognize the overall impact of H.R. 5133 when I first decided to cosponsor this legislation. However, after weighing the overwhelming cost of enacting this measure against the minimal benefits, I hope that more Members of this body will join me in voting for the defeat of H.R. 5133.

Mrs. ROUKEMA. Mr. Chairman, will the gentleman yield?

Mr. CLINGER. I am happy to yield to the gentlewoman from New Jersey.

Mrs. ROUKEMA. Mr. Chairman, I would like to associate myself with the remarks of my colleague from Pennsylvania.

Mr. Chairman, I am opposing this bill, but my opposition comes with a significant qualification.

The trade policies of the world community cannot continue to be set with one set of rules for the United States and one set of rules for our trade partners.

We have rightly advocated free and fair trade. We have done so because we believe that all nations benefit from such a marketplace. However, too many other nations are finding that it works quite well to impose protective tariffs, quotas and to use content laws to promote and protect their home-based industries while giving minimal lip service to the trade policies they find so profitable for the United States to pursue. One fact is quite clear, unless foreign countries take steps to lower trade barriers, the United States will have no other choice ultimately but to retaliate with measures of our own. We will not stand idly by and watch our industries suffer while our foreign competitors prosper as a result of restrictive trade policy.

However, the Fair Practices in Automotive Products Act does not address the heart of the trade problem and could seriously weaken our own domestic economy. This bill has been promoted as a jobs bill. It is in fact, an

antijobs bill. It is not in our own self-interest.

While CBO estimates 38,000 auto jobs as a result of this legislation, it also says that 104,000 other jobs would be eliminated in factories that make goods for exports, especially in the electronics, agriculture, and services industries. Furthermore, its promise is pernicious. Those expecting rapid relief from high unemployment in the auto industry would be disappointed because the bill would not have full impact until 1990.

The White House Council of Economic Advisers study places a $100,000 price tag on each auto worker job protected by the bill and predicts an increase in the average price of all cars sold in the United States of up to $1,000. Experience has shown that when prices go up, sales go down and jobs are lost.

Finally, this bill does not provide any leverage for our trade negotiators to negotiate on international trade agreements and includes no incentives for other countries to open up their markets to U.S. products. On the contrary, it encourages retaliation in those areas such as agriculture where we are achieving some success in expanding markets.

Let us take this opportunity to put our trade partners on notice. Today we will continue to support a policy of free trade and defeat this bill. But our message must be clearly understood by the international community—time is running out and tomorrow is another day.

Mr. FLORIO. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsylvania (Mr. GAYDOS).

Mr. GIBBONS. Mr. Chairman, I also yield the gentleman from Pennsylvania (Mr. GAYDOS) 2 minutes.

The CHAIRMAN. The gentleman from Pennsylvania is recognized for 4 minutes.

□ 1200

Mr. GAYDOS. Mr. Chairman, if this bill were before the Diet in Tokyo today—if its provisions were to be the law of Japan tomorrow—it would be heralded here by headlines in a type-size reserved otherwise for the victorious end of wars and Moon landings,

Our Japan lobby and our editorialists and our handwringing anchormen would sing praise and high hosannas to the far-seeing Japanese statesmen who were willing to do so much to further the concept of open trade.

In Tokyo, the newspapers might grumble bitterly about the government caving in to the Americans. The grumbling might even overturn the government.

And there would be a foundation for their criticism.

Everyone should realize that a Japanese companion to this bill would give American workers and manufacturers far more right to sell in Japan than ever have had before.

If only we could get them to open all their markets—whether now closed by law or custom or cultural preference—to other of our industrial and agricultural products in this degree, we would at last be making progress.

Foremost, a law such as this in Japan would assume U.S. products have a right in Japan.

Under it, American-make automobiles could be sold freely and virtually untaxed in Japan in numbers of up to 100,000 per make without the need to have any Japanese content.

This 100,000 American-make cars would represent a 150-percent increase in imports into Japan—not just an increase of American makes, but a 150-percent increase of all imports in total.

According to testimony taken from the chairman of Ford Motor Co., by our Trade Subcommittee, only 40,000 cars of any kind are imported into Japan in most years.

Although the Japanese Government and our Japan lobby swear there is no official policy of exclusion—it is a matter of consumer preference and custom, you know—imports have inexplicably hovered at 40,000 a year for several years.

If, under a Japanese copy of our law, some U.S. maker got hot and sold 150,000, it would then have to have some domestic content.

Let us say Buick could get hot because I have read Buicks are a $30,000 status item there. The price is pushed up in part by a 22.5-percent commodity tax they levy on entry, but status is status. Incidentally, they forgive this tax on cars they export. It is a form of subsidy that does not offend GATT. It is a large part of their much discussed $1,500 price advantage over U.S. makers in this market. It is not a labor advantage, it is a tax advantage.

Nevertheless, Buick would need domestic content in Japan if it sold 150,000, and if they copied our law faithfully. By the way, these Buicks would constitute 3 percent of their 5 million car market. Imports, mostly Japanese, were running 28 percent of the U.S. market in September when Ford's chief testified.

But Buick could get its domestic content by paying to advertise on Japanese television and doing a few other things, probably.

And this unrestrained access to Japanese television could be a real breakthrough. Right now, as I understand it, a criteria for being allowed to advertise on Japanese television is consideration by the Ministry of International Trade and Industry of the competitive effect on Japanese producers—on Japanese producers of anything. How is this—"for freedom of the press."

Now if Buick's advertising was good, and Buick got really successful, it might have to build its own plant in Japan.

Under this bill, a Japanese company is free to make such an investment here—is invited to make it, to hire Americans who have been put out of work. The bill will do this.

Since this is the invitation, it is fair to look at how they have handled such investment.

According to the book, "Miti and the Japanese Miracle," they do not like the thought of what they call the invasion of American capital. They looked on their most aggressive and nationalistic vice minister as a Samurai among Samurai at Miti, and they perfected Samurai economics—block and slash, parry and hack.

When IBM first went to Japan, Miti said, we will hamper your business unless you license IBM patents to Japanese firms at no more than 5 percent royalty. The book says IBM sold its patents and accepted limits on the number of computers it could sell as a condition for getting into Japan.

When Texas Instruments wanted to open a wholly owned subsidiary, Miti decided it had to have a Japanese partner and could own no more than 50 percent; that its technology would have to be licensed to Japanese competitors; that its output would be limited until Japanese companies could compete.

But this is the House of Representatives in Washington.

And our Japan lobby and our editorialists and our hand wringers attempt to discredit as protectionist any attempt to address the daily devastation of America's industrial base or the future of her workers.

They are worried about starting a trade war.

We have an administration that with one tongue says it is talking tough to the Japanese and with the other says it is making heroic efforts to hold off this nasty old protectionist Congress, and to kill this bill as well.

And they worry about starting a trade war and possible retaliation.

I sincerely wish the Japanese would retaliate against us with an exact duplicate of this bill—it would be a model of liberality compared to what is in place.

Meanwhile, the trade war continues as it has for years.

Developed and developing and undeveloped nations flood this market with whatever they can send—subsidized and dumped, when necessary—to settle their own economies and solve their own unemployment. Then they close their doors to our goods.

Furthermore, our unemployment is 12 million. Even the Japan lobby recently acknowledged that at least 2 million jobs—the equivalent of 17 percent of our unemployment—can be attributed to imports.

The trade deficit will pass $44 billion this year, and I do not think unemployment will drop a lot until the deficit does. The deficit with Japan may be $20 billion or more. I do not know how much of it is in autos this year, but it was $13 billion last year.

The question is whether we will maintain the base we need to support our people and meet out world responsibilities.

By passing this bill we will show we realize there is a "trade war already" and that all the Samurai economies of the world should recognize that our indulgence is at an end. Than we can go on and get the answer to the question.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. GAYDOS) has expired.

Mr. BROYHILL. Mr. Chairman, I yield 1 minute to the gentleman from Pennsylvania.

Mr. Chairman, will the gentleman yield?

Mr. GAYDOS. I yield to the gentleman from North Carolina.

Mr. BROYHILL. Mr. Chairman, I would like to ask the gentleman if he would show me the section in this bill that empowers our trade negotiators to work with the Japanese to do something about the trade barriers that he talks about. I have been looking at this bill while the gentleman has been talking here, and I see nothing in here that would accomplish the purpose of what the gentleman is talking about.

Mr. GAYDOS. That is not the purpose of the bill, to address those points. Those points I raise in substantiation of my overall position that I take. That is the reason that I cite those items. I think it is part of the trade picture. I do not think that it is incongruous with the arguement that we are making. No, it is not in the bill. I admit that.

Mr. FRENZEL. Mr. Chairman, I yield 1 minute to the distinguished gentleman form Minnesota (Mr. ERDAHL).

Mr. ERDAHL. Mr. Chairman, we are all concerned with our current unemployment situation and the plight of our domestic automobile industry. We must be careful, however, when designing policies to remedy these problems that we take all of the issues into account.

None of the studies done have been able to prove that this is actually a jobs bill. According to the CBO, net employment effects of this bill throughout the economy would be negative. While 38,000 auto jobs would be created by 1990, approximately 104,000 jobs would be eliminated in other sectors of our economy as a result of the bill. The net impact of H.R. 5133 would produce fewer jobs, not more, and the impact would be felt by Americans who earn a living in import markets, primarily in transportation and retail sales. We have been told that we can expect retaliation by our trading partners if this bill goes through. Domestic content requirement are specifically prohibited by the General Agreement on Tariffs and Trade and their adoption would entitle others to take reciprocal action against U.S. exports, a development that could cause severe damage to our export related industries such as agriculture, timber, electronics and other manufacturing industries. Between 1977 and 1980, four out of five new manufacturing jobs were created in export industries. It is clear that the United States has a great deal to lose from this protectionist legislation.

In short, this is too controversial and complex a bill to be considered hastily during this lameduck session. Instead of creating jobs, this bill would cut jobs, discourage foreign investment and invite foreign trade barriers. It has not been given sufficient consideration in this Congress and considering the enormous negative consequences, it should be rejected.

Mr. FRENZEL. Mr. Chairman, could we have the time remaining, please?

The CHAIRMAN. The gentleman from Minnesota (Mr. FRENZEL) has 13 minutes remaining; the gentleman from North Carolina (Mr. BROYHILL) has 5 minutes remaining; the gentleman from Florida (Mr. GIBBONS) has 16 minutes remaining; and the gentleman from New Jersey (Mr. FLORIO) has 13 minutes remaining.

Mr. FLORIO. Mr. Chairman, I yield such time as he may consume to the gentleman from Illinois (Mr. ANNUNZIO).

Mr. ANNUNZIO. Mr. Chairman, as a cosponsor of H.R. 5133, the Fair Practices in Automotive Products Act, I rise today to urge my colleagues to support this important legislation, and take a positive step toward reversing the serious decline in the largest manufacturing industry in America.

Since 1978, sales of cars produced in this country have dropped by 33 percent, and production in the domestic automobile industry is at its lowest level since 1958. This recession has eliminated more than 850,000 jobs in the auto industry, and in auto-related industries, including the steel, textile, glass, rubber, plastics, and electronics industries. We need a rebuilding effort to revitalize the automobile industry, an industry whose vitality is crucial to turning around the American economy, and this bill is a strong step in that direction.

This legislation simply encourages the production of automotive products in the United States by requiring manufacturers to use specific levels of American-produced labor and parts based on the company's total sales. Utilities, taxes, insurance, advertising, and all other U.S. based expenses are included in determining a vehicle's total domestic content. Such requirements will enable consumers to buy American and support and invest in the American economy, regardless of the car they choose to purchase, and this buy American purchasing power will strengthen our automobile industry and our country.

In the past, we have allowed open access to our markets, while tolerating tariff barriers, and other unfair trading practices when we try to sell American goods abroad. This bill sends a strong message to foreign governments that our country will no longer tolerate these barriers, which have hurt American automakers trying to sell abroad, and no longer permit open access to our own market, which has hurt American automakers selling at home.

Mr. Chairman, I believe that this legislation will go a long way in helping the American auto industry get back on its feet, which in turn will stimulate our economy and reverse the high unemployment rate by providing additional jobs in the steel, textile, glass, rubber, plastics, and electronics industries. Therefore, I urge my colleagues in the Congress to support this most needed legislation.

Mr. FLORIO. Mr. Chairman, I yield 3 minutes to the gentlewoman from Ohio (Ms. OAKAR).

Ms. OAKAR. I thank the chairman for yielding.

Mr. Chairman, we have heard a lot of talk about the trade deficit. We know in durable goods we have a trade deficit of $30 billion. We also know the statistics in the countries who have the local content requirements. I do not think that this would hurt our farming community. If it did, I would not support the bill. But I do support the bill.

I want to bring to the Members' attention the human side of what we are talking about, and I would like to talk specifically about my State of Ohio, but this is certainly true of Pennsylvania, Michigan, Illinois, and some of the Northeastern States, and certainly in pockets all over our entire country.

Since 1980, our State has lost 283,000 workers who are in the manufacturing area. Forty percent more small businesses who manufacture small parts are bankrupt than last year. We have 160,000 steelworkers, who do not have a job today and who had one in 1980; 36,000 who manufacture cars; 28,100, who manufacture rubber and deal with plastics. Our dealerships are closing every day across this country. In Ohio alone 16,800 of these have closed.

Now, who are these people, and what is happening to them, and who will address them?

We are talking about people, not statistics and numbers. I would request that the Members on the other side of

the aisle who are opposed to this bill listen to what I have to say. Obviously they have not heard the human side or they would not oppose this bill.

□ 1210

I am asking the people who oppose this bill to look at who the unemployed are who have been affected by the unfair practices of other countries in trade and the fact that it is so difficult to compete, because of the unfair restrictions. The unemployed in deep depression and pain. These are the 50-year-old men who have been laid off and have been looking for a job for 2 years or more, and cannot find a job. These are minorities, and the women, who are laid off. These are the people who are losing their homes, who are homeless.

We are going to have a hearing next week, our Housing Committee, on the homeless, and they are not just the poor people. They are the former middle-class people who do not now have a job. We are seeing more divorce, more suicide, more family abuse, than at any time in our country's history. It is time to consider our unemployed and signal to them that we care and want to do something constructive for the unemployed.

The CHAIRMAN. The time of the gentlewoman from Ohio (Ms. OAKAR), has expired.

Ms. OAKAR. Mr. Chairman, I want to say, I think some of my time was used up by the fact that I had to be interrupted by Members who do not care about listening.

The CHAIRMAN. The time of the gentlewoman from Ohio has expired. The Chair will state that the Chair did allow for the calling to order of the committee. It was not taken out of the gentlewoman's time.

Mr. FRENZEL. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from California (Mr. LAGOMARSINO).

Mr. LAGOMARSINO. Mr. Chairman, I rise in strong opposition to H.R. 5133, the Fair Practices in Automotive Products Act.

Supporters of H.R. 5133 call this measure a jobs bill. It may be a jobs bill, but if it is, it is a bill that exports jobs, not saves them for Americans.

The Congressional Budget Office, the Department of Commerce, and MIT have all produced studies showing the devastating effect this legislation would have on the U.S. economy. By trying to protect employment in one sector of the American economy, the rest of our country would be severely affected by the loss of jobs resulting from lost exports. An estimated 66,000 jobs would be lost in the next 7 years if this legislation were approved, some say 100,000.

Establishing an arbitrary formula for domestic content in automobiles is contrary to U.S. commitments on the General Agreement on Tariffs and Trade. If we approve this violation of the GATT, we open up the opportunity for all of our foreign competitors to do the same against our major exports. U.S. production of electrical components, computers, in aerospace and in agriculture would all be direct victims of foreign retaliation for this protective trade proposal.

The effect of this legislation would be felt not only on our export producing sectors of the economy, but also on the automobile industry itself. The increased cost for an automobile is estimated to be as high as 10 percent if this bill passes. The economic laws of supply and demand make it clear that when the price rises that dramatically, the demand will drop significantly. The demand for automobiles is already down; we need some type of program that will increase demand, not reduce it. Even the major auto manufacturers recognize that fact: Witness their rebate programs.

Business, farm, and consumer groups and companies from all over the United States have expressed their opposition to this legislation. Perhaps more than any other sector of our economy, agricultural exports have been the most significant positive factor in our trade balance in recent years. Since one out of every $3 of farm income results from exports, retaliation against U.S. farm exports would be disastrous. I have attached a mailgram that includes a list of opponents.

I urge my colleagues to resist the temptation to seek a false solution to our unemployment problems and ask them to vote against this bill.

[Mailgram]

Mr. CHAIRMAN: The broad range of 50 business, farm, and consumer groups and companies listed below strongly oppose H.R. 5133—domestic content legislation—and urge you to vote against it in the special session.

H.R. 5133 would impose domestic content requirements on automobiles that "are virtually unattainable without nearly eliminating imports," according to the congressional research service. American consumers will face increased prices for automobiles as a result of such quotas.

H.R. 5133 will damage other sectors of the economy. Domestic content requirements specifically are prohibited by the General Agreement on Tariffs and Trade; their adoption by the U.S. would entitle others to take reciprocal action against U.S. exports—threatening tens of thousands of U.S. jobs in export-related industries. As the world's largest trader, the U.S. has an enormous amount to lose from a new spiral of protectionist action and reaction.

Finally, H.R. 5133 is not a "jobs" bill. The Congressional Budget Office has concluded that H.R. 5133, in its present form, would create only 38,000 auto jobs by 1990, while it would eliminate some 104,000 U.S. jobs because of restrictions that would be placed on non-auto exports.

H.R. 5133 is a dangerous step which should be rejected during the special session.

Aerospace Industries of America, American Association of Exporters & Importers, American Association of Port Authorities, American Electronics Association, American International Automobile Dealers Association, American Retail Federation, American Soybean Association, Auto Importers of America, Caterpillar Tractor Co., Certainteed Corporation, Colonial Sugar Company.

Computer & Business Equipment Manufacturers Association, Consumers for World Trade, Continental Grain Co., Council for a Competitive Economy, Delaware River Port Authority, Imperial Sugar Company, International Apple Institute, International Association of Ice Cream Manufacturers, International Hardwood Products Association, League of Women Voters of the United States.

Lockheed Corporation, Massachusetts Port Authority, Milk Industry Foundation, Millers National Federation, National Association of Stevedores, National Association of Wheat Growers, National Automobile Dealers Association, National Broiler Council, National Corn Growers Association, National Council of Farmer Cooperatives.

National Customs Brokers & Forwarders Association, National Foreign Trade Council, National Grain Trade Council, National Grange, National Retail Merchants Association, National Soybean Processors Association, Philadelphia Port Corporation, Port of Baltimore, Port of Portland.

Poultry and Egg Institute of America, Scientific Apparatus Makers Association, Semiconductor Industry Association, The Boeing Company, The Rice Millers' Association, U.S. Cane Sugar Refiners Association, U.S. Chamber of Commerce, U.S. Council for International Business, Volume Footwear Retailers of America, Xerox Corporation.

Mr. GIBBONS. Mr. Chairman, I yield 3 minutes to the gentleman from Texas (Mr. PICKLE).

Mr. PICKLE. Mr. Chairman, I am opposed to this bill. It is obvious that there are many Members here today who would like to support this bill, and argue that this is really a jobs bill, and that with passage we would save many thousands of jobs. That is an appealing argument, Mr. Speaker, one which deserves close scrutiny. The points Congresswoman OAKAR is making are valid considerations.

It is true that our economy is depressed right now—we are all painfully aware of that. Every dollar lost to foreign imports hurts right now; we have too many Americans out of work. It is true that one of our industries hardest hit by the recession, by high interest rates and by vigorous foreign competition has been the auto industy. It might even be true that this bill would supply some relief for auto manufacturers.

But it is not true that this bill would help our Nation, or our economy, as a whole. On the other side of the coin is the terribly adverse effect that this

bill would have on our foreign trade and on many sectors of our economy outside of auto making.

If we pass this legislation, we will be inviting the other nations of the world to retaliate against our exports. At the very time when we are negotiating with our foreign trading partners to open up their markets to more American products, we would, in one great sweep, wipe away all our progress to date, providing other nations with incentive to impose harsh tariffs and harsh quotas on Amercian goods, thus hurting those American industries that are strong overseas, and crippling those already hurting.

There are several likely targets: American agriculture which accounts for 42 percent of our exports; the American electronics and aerospace industry, where we have gambled on our future; and American service-oriented industries such as banking and insurance.

The bottom line is that the benefits of this legislation to the domestic auto industry can not match the tremendous costs of this legislation to other sectors of the economy. In the end, this legislation might very well cost us net jobs, exacerbating rather than easing the unemployment problem.

We can best help our ailing auto industry by putting our own economic house in order—reducing the deficit and interest rates and encouraging a strong, well-grounded domestic recovery.

So I am in opposition to this bill, Mr. Chairman, and urge my colleagues to consider the repercussions of this bill, repercussions that would be felt throughout our economy, and in our trading markets around the world. admittedly, you might be having opposition from some automobile dealers but, Mr. Chairman, nearly every local automobile dealer in my district also is a dealer for some foreign made car. If you think you hear protests now—wait until you pass this bill—stand by. The protest will be deafening.

Mr. DANNEMEYER. Mr. Chairman, I yield 1 minute to the gentleman from California (Mr. DREIER).

Mr. DREIER. Mr. Chairman, it is very difficult to imagine a more blatantly anticonsumer measure than this so-called domestic content bill. This morning we got the very positive news that the inflation rate at the wholesale level is 3.7 percent.

In the past 23 months we have started to turn the corner on the burden of regulation which has been imposed on the private sector in this country. Now we are looking at something that is going to blatantly create problems for the consumer and fuel inflation once again.

Mr. Chairman, if we adopt sweeping domestic content requirements, we can be sure that other nations will quickly retaliate. If the United States, as the leading economic force in the free world, erects such a blatantly protectionist trade law, other nations will be quick to follow our lead. This can only mean certain hardship for every sector of our economy. Secretary Baldrige has warned that $15 billion worth of major American exports—including aircraft, office equipment, electrical components, and agricultural products—could be subject to prompt retaliatory restrictions abroad. For every billion dollars in lost exports, 25,000 jobs would be lost.

If we pass this bill, any hope of restoring stability to both our domestic economy and the ailing world economy might be lost.

I strongly urge my colleagues to oppose this foolhardy and dangerous bill.

Mr. FRENZEL. Mr. Chairman, I yield 2 minutes to the distinguished ranking minority member of the Committee on Ways and Means, the gentleman from New York (Mr. CONABLE).

Mr. CONABLE. Mr. Chairman, it has been alleged here that those who oppose this legislation do not care about the plight of the autoworkers. The plight of the autoworkers is real. But you do not serve the autoworkers by throwing people out of work in other sectors.

Our country is in serious difficulty generally, because of high interest rates and because of the recession that has resulted from our inability to get the money to create the longstanding jobs that any growing economy is going to need.

Now, high interest rates have contributed materially to the difficulty in the auto industry also. There is a voluntary restraint now in the second year accepted by the Japanese on the importation of cars into this country. Because it is voluntary, there is no basis for the Japanese to demand compensation from other American trading sectors as a result of this restraint on their freedom of trade. And in fact, imports have not been the root cause of the industries' problems to the degree that this debate so far would seem to indicate.

Although the average import penetration for the first 11 months of 1982 was 27.7 percent, as compared with 27 percent in 1981, in absolute terms import sales are running only 200,000 more this year than 5 years ago. But of course total auto sales are down very substantially.

Now, I want to repeat. The auto industry will benefit substantially if we can get the economy recovering. It is not going to recover if we are going to follow a course which will cut us out of a world market expanding much faster than our domestic market.

□ 1220

In fact, if by foolish legislation we contribute to a continuing general recession, the auto industry is going to suffer as one of our central industries.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FRENZEL. Mr. Chairman, I yield 1 additional minute to the gentleman from New York (Mr. CONABLE).

Mr. CONABLE. I hope, Mr. Chairman, the point is understood that we cannot save the auto industry by taking counterproductive steps for the economy as a whole. That is the greatest fear I have about this bill. This bill would be economically destructive. Inevitably, it will be emulated abroad by economies that are less strong than ours, and inevitably the result would contribute to a general miring down in a world economic swamp, rather than an effort to pull ourselves out by mutual support and by a trade outreach reflecting the opportunities that lie abroad. Let us not move backward, Mr. Chairman. We cannot retreat into growth, or recovery either.

Mr. GIBBONS. Mr. Chairman, I yield 3 minutes to the gentleman from Texas (Mr. HANCE).

Mr. HANCE. Mr. Chairman, some of our colleagues who have addressed the House today want to suggest that we who oppose H.R. 5133 are insensitive to the plight of workers in the American automobile industry. Nothing could be further from the truth.

The fact is that H.R. 5133 would not put automobile workers back to work. What it would do is to increase unemployment dramatically in the short run, by destroying jobs in the many industrial sectors connected with automobile imports. I think, for example, of the many Americans connected with the importation, distribution, and retailing of imported cars. In the long run, considering the near certainty of extensive retaliation by our trading partners against American goods, H.R. 5133 would be responsible for widespread unemployment in manufacturing, in services, and perhaps most importantly, in agriculture. For H.R. 5133 is an invitation to restrict imports of American products, and especially of those products that can be provided by other suppliers.

Retaliation could be expected particularly from the European Community and Japan, who together imported $18 billion, or 42 percent of our total agricultural exports in 1981.

Two out of every five acres of crops grown in the United States and nearly a fourth of all farm cash receipts are from export sales. It is easy to imagine the damage that could occur to an already depressed sector of the economy.

Retaliation or any action against U.S. exports would severely jeopardize our $40 billion agricultural export market. Further, American farmers, like all consumers in the United States, will beat the inflationary brunt

of this protectionist legislation. In short, Mr. Chairman, this bill is a disaster for the American farmer. It has been opposed by numerous farm organization—the National Grange, the National Council of Farmer Cooperatives, the National Association of Wheat Growers, the National Association of Corn Growers, and the American Soybean Association—to name just a few.

Mr. Chairman, minimum domestic content ratios are nothing more than a gimmick, and they are a gimmick that will not work. The problems of the American automobile industry will not be solved by requiring Toyota or Fiat to build production facilities in this country. As the International Trade Commission determined in the course of its section 201 proceedings, imports are not themselves cause of the plight of the American industry. Rather, the rise in imports derives from the failure of U.S. manufacturers to react promptly and properly to the fuel crisis, and also, in part, it reflects the slowdown in our domestic economy.

We must not run to the protectionist barricades, for history has taught that protectionism breeds not prosperity, but only more protectionism.

Mr. Chairman, prosperity can be achieved only through increased trade, increased productivity, and increased dedication to offer products that consumers want at prices that they are able and willing to pay. It is to these goals that American industry—and the American automobile industry in particular—should be directing its attention.

Mr. FLORIO. Mr. Chairman, I yield 2 minutes to the gentleman from Michigan (Mr. CONYERS).

Mr. CONYERS. Mr. Chairman, here we are again. The last time we were here on behalf of the auto industry it was to save the Chrysler Corp. against the wishes of the rest of its industry.

Now we have the labor movement, thank God, pressing legislation that some Members find so erudite that they are saying it will not put workers back to work.

So I come to the floor as a free trader, antiprotectionist, but will explain, if I can, just a couple points about this legislation that make it important.

First of all, the question is not, is it good for the carmakers or for Detroit, but is it what this economy requires? I think that the answer can be definitely in the affirmative.

I think that the question of the consumers and the workers who have paid the price for the negligence and the dawdling that have brought us to this point can no longer be deferred.

Mr. Chairman, we are living in an economic world in which all the U.S. automakers are now joining with all the other automakers abroad. This is a psychological step. God knows I wish it would have some effect, but it is at least a beginning step for the working people in industry, and for the consumer who has paid for the mistakes of Detroit through the nose, and we gather today on a principle—protecting jobs—that is employed by the Japanese and all other industrial countries in the world.

The Fair Practices in Automotive Products Act (H.R. 5133) has generated intense views on both sides of the issues, although the issues are not always clear.

I consider myself a free trader, and have always supported free-trade policies against protectionism. Yet "free trade," like the idea of "free enterprise," is a theoretical one when it is not examined in the light of past and present circumstances. During much of our history, free trade meant the purchase of cheap raw materials overseas and the export of our expensive manufactured goods to the world. The diffusion of industrial and technological resources has turned this situation around, much to our present distress.

The United States has promoted free trade for the sake of reciprocity in order to protect overseas markets for American multinational corporations and to safeguard American influence, defense treaties, and military installations abroad. The problem is that these historical developments in the name of free trade and international markets ended up hurting American workers and crippling domestic industries and the communities that depend on them. For years every economic concept imaginable was defended except the concept of protecting our own workers, industries, and communities. American working men and women have shouldered the biggest burden of the flight of American multinational capital, poor management decisions, the flood of overseas products of multinational companies, American and foreign, and of our longstanding dispositon to project our power overseas, whatever the cost, at the expense of handling the problems we face at home.

The so-called free trade opponents of the domestic content bill argue that the answer to the auto industry's problems is additional tax and regulatory relief. We have done that. Yet to expect a magical economic recovery under present circumstances would require too long a wait for a recovery that would be anemic at best.

The domestic content bill is a good bill at the right time. It sends a necessary signal to our trading partners, especially the Japanese, that fairer, two-way trade had better commence soon. It is a corrective to the past attitude and practice of placing the interests of American workers and consumers last on the list of priorities. It is an honest statement of the magnitude of the problem and the means to solve it now. In truth, it is a modest beginning to a complicated issue.

Mr. FRENZEL. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Wyoming (Mr. CHENEY), pending which I yield such time as he may consume to the gentleman from California (Mr. SHUMWAY).

Mr. SHUMWAY. Mr. Chairman, I rise in strenuous opposition to the legislation before us. H.R. 5133, the so-called Fair Practices in Automotive Products Act, may well be the most ill-advised, irresponsible, and untimely bill brought to the House floor in my 4 years in Congress.

The problems with this legislation and, indeed, with the entire sentiment resulting in the domestic content approach are far too numerous for me to discuss in detail; I will, Mr. Chairman, be brief.

There can be no doubt that the problems of the domestic auto industry are extremely serious. The historic importance of the auto industry to the health of our entire economy cannot be overstated. The human, social, and economic costs of thousands of unemployed autoworkers and auto industry supply workers are tragically high. It is, therefore, not difficult to understand and sympathize with the motives of the proponents of the bill. Unfortunately, in attempting to solve some of the problems of the auto industry, domestic content advocates, if successful, will have created problems, both domestic and international, of such magnitude that those of the auto industry will be dwarfed.

By restricting Japanese imports, beginning in 1984, this legislation is intended to create as many as 100,000 new jobs in auto and auto-related industries by 1990. The Congressional Budget Office, however, estimates that any jobs created would be offset by the elimination of nearly twice as many jobs in other industries; real GNP would be 0.1 percent lower by 1990; and inflation would be 0.2 percent higher than now projected.

International trade, Mr. Chairman, is not a one-way street. As many as one U.S. job in every five is linked directly or indirectly to U.S. exports. Protectionist legislation of this sort—legislation which violates in spirit and practice the international trading rules developed largely by the U.S. since World War II—can only result in retaliatory actions by our trading partners. Although it is true that, in some areas, U.S. access to important foreign markets is now restricted, it is extremely shortsighted to move further away from the free trade philosophy that has so contributed to the economic success of the United States and our trading partners over the past 30 years. If domestic content legislation is enacted for cars, other distressed in-

dustries, such as textiles and steel—where limited import restrictions already exist—will not be far behind. The danger is clear: In attempting to preserve jobs in Detroit, we are risking a global decline in trade, employment, and economic well-being.

The Japanese are not responsible for Detroit's problems. In fact, the Japanese should perhaps be commended for manufacturing and making available to American consumers quality automobiles that are greatly desired because of price and performance. If this legislation passes, those Japanese cars that remain available will be much more expensive; without the price competition of imports, U.S. cars will increase in cost as well. The ultimate result? American consumers will pay more for a reduced variety of auto models.

Again, Mr. Chairman, Japanese imports are not responsible for the problems of our domestic auto industry; to restrict such imports would be to increase costs for U.S. consumers, to increase unemployment in other U.S. industries, and to reduce global economic activity. Why, then, is this legislation even being seriously considered? The answer, I think, can only be that the UAW has used its considerable political clout, at a time when protectionist sentiment, though misguided, is understandably rising, to prevail upon some Members of this body to do something. And, in this instance, it is certainly easier to blame the Japanese than to address the real causes of our auto industry problems.

Japanese imports have achieved success in the U.S. market because they meet consumer demand. The domestic industry has frankly not been as creative, has not done as good a job in anticipating changes in the market, and has not proven as successful in maintaining quality and limiting cost. Labor, management, and the Federal Government all bear part of the blame; all will have to work together to improve the situation. Recent signs are encouraging; U.S. cars have improved in quality and design, and sales are up. Labor costs are growing less rapidly. The Federal Government is showing more flexibility in the regulatory area. As our entire economy moves out of recession, the pent-up demand for new cars may result in extremely high sales; the recent performance of U.S. auto company stocks is indicative of Wall Street's expectation of a profitable recovery.

We must, therefore, continue to work for economic recovery. We must focus on Detroit's internal problems. We must recognize that the fundamental nature of our economy is changing; that the so-called smokestack industries will play a relatively less prominent role in the future.

We must not, however, enact legislation which will increase unemployment, increase inflation, limit consumer choice and, indeed, threaten the entire international economy. We must not succumb to political pressure for an auto industry bailout. I urge, in the strongest terms possible, that H.R. 5133 be soundly defeated.

Mr. CHENEY. Mr. Chairman, I rise in opposition to H.R. 5133, the domestic content bill, because it will not, I am convinced, provide a solution to the problems faced by our automobile industry. It would, instead, take away the competitive stimulus needed to encourage the automobile industry to continue to improve its production techniques and to introduce the new technology required to regain its competitive edge on the basis of product quality and price rather than by hiding behind protective screens erected by the Federal Government.

Since the mid-1970's, U.S. industries, along with those of every other major industrial nation in the world, have experienced the pressures and pain brought on by the world economic crisis. Rising inflation and stagnating markets have taken their toll. Faced with shrinking markets it is tempting to look outside our own national borders to find excuses to explain our difficulties. It is equally tempting to seek to retreat within our own frontiers, shielding ourselves with protectionist barriers of one type or another instead of coming to grips with the crux of the real problem facing us.

Supporters of the domestic content bill argue that it is not a protectionist measure. In the classic sense of Smoot-Hawley it is not. It is far more subtle in it structure, but the net effect is the same. It closes our markets to foreign competition and will result in foreign governments seeking to take countermeasures against our exports. This will take us one step further down the road toward an all out trade war, which history has repeatedly shown harms everyone concerned.

We have been told that H.R. 5133 will stimulate the job market. That is true for one sector of the economy. Analysis by the Congressional Budget Office indicates, however, that the domestic content bill would result in the loss of nearly three times as many jobs in other sectors as it creates for the auto industry.

This is not the only way the consumer would be harmed by this bill. Analysts report that the domestic content bill would result in an average new car price increase of over $300 each.

The key to economic recovery in the auto industry, as elsewhere, is to face the fact that for the time being at least, we are being outdone by the better application of technology, and in some instances by the production of a better, more competitive product. The situation is improving in that regard as anyone who has watched the American automobile industry over the past couple of years can tell. I have no doubts that American management and American labor can produce a better product than their competition anywhere in the world. To compete, however, the automobile industry must continue to make the hard decisions and necessary adjustments in its production methods. The incentive to make these changes, however, will be lacking if the automobile industry is able to hide behind the type of Government protection which the domestic content bill would erect.

Mr. Chairman, this bill is a turkey, and I urge its defeat.

□ 1230

Mr. DANNEMEYER. Mr. Chairman, I yield 3 minutes to the gentleman from New York (Mr. LENT) a member of the Committee on Energy and Commerce.

Mr. LENT. Mr. Chairman, there is no doubt that the unemployment of so many of our auto workers is tragic. The figures are indeed grim. Many thought this lameduck session might produce some sort of a jobs bill. We have not and we will not. And this is a disappointment to our unemployed.

It is ironic that, instead, we are taking up this bill which is the very antithesis of a jobs bill. This bill, according to almost all of the disinterested experts and economists who testified at the hearings before the Ways and Means Committee, will actually increase the ranks of Americas' unemployed rather than decrease them.

While 38,000 auto jobs would be created by 1990, according to the Congressional Budget Office, 104,000 would be lost in other sectors of our economy as a result of this bill. In other words, auto jobs would be created at the expense of workers in other American industries. This is an unacceptable tradeoff. It is also unwise. Statistics indicate that a majority of all new jobs created in this Nation during the past 5 years are export related. This is the area of the American economy's greatest growth potential—exports. So this bill will impact most adversely on that part of our economy we should be fostering and encouraging.

Even in the auto industry, there is sharp disagreement as to whether this bill will help. General Motors and Ford—the two companies which should be the bill's biggest boosters—are on record opposed to it. So is the Motor Vehicle Manufacturer's Association.

The foreign auto companies like Volkswagen, Honda, and Nissan, which the proponents of the bill contend will be caused to invest in setting up plants in America, testify exactly the opposite. The President of Nissan testified that if this bill were enacted, his com-

pany might halt construction of its $660 million Tennessee plant which employs thousands of construction workers and will employ a permanent work force of 2,650 autoworkers. Why? What is wrong with this legislation that the American auto industry opposed? Why is the LEWV opposed? Why are the editionials almost unanimously opposed?

By reducing imports, this bill can be expected to raise prices of both foreign and domestic automobiles in the United States by somewhere between 4 and 10 percent. That would translate into $100,000 in higher prices per year for each additional job created in the auto industry. As a result, the experts forecast between 500,000 and 800,000 fewer auto units will be sold if the bill becomes law.

The bill is skewed to advantage small foreign manufacturers at the expense of larger American companies. Any foreign company that sells less than 250,000 vehicles annually need only meet a domestic content figure of 25 percent. These smaller companies can easily to do this without investing a dollar in the United States.

Volkswagen says it cannot expand U.S. production capacity unless it can first build up U.S. demand through importing. The bill would make that impossible.

Honda tells us the bill would limit the company's ability to attain optimum efficiency and competitiveness. It cannot meet the domestic content level for at least 3 years.

The administrative burdens of local content schemes are staggering. The workload of Government and industry in computing and verifying domestic content ratios for the manufacturers would be extremely burdensome. The 40,000 or more firms that supply parts often deal with more than one manufacturer and use imported parts and materials. The paperwork, data collection, and recordkeeping required to make this system work would be enormous and would be a complete reversal of our efforts in other industries to deregulate.

The bill is not going to go anywhere.

Even in the unlikely event it were to pass in the Senate, it is doomed to be vetoed.

The days left to this session are numbered.

There is much important business to be attended to. The people are watching.

This bill would not even begin to take effect until 1984, it would not be fully implemented until 1986, and would not have full impact on the industry until about 1990.

I urge my colleagues to vote "no" on H.R. 5133.

Mr. FLORIO. Mr. Chairman, I yield such time as he may consume to the gentleman from Indiana (Mr. SHARP).

Mr. SHARP. Mr. Chairman, I rise in strong support of the legislation, and I urge my colleagues to support H.R. 5133.

The auto content bill is, unfortunately, the result of years of frustration and failed negotiations to resolve international trade problems. It is a clear and unmistakable signal to our trading partners, to the administration and to American workers that we are serious in our determination to develop a better deal in foreign trade.

I hope that we will hear a great deal of debate and discussion today on ways to resolve our trade problems. Indeed, Congress has already waited too long for such debate. The message expressed by the voters last month was that we need jobs. The latest Indiana unemployment statistics show a 13 percent unemployment rate. Nearly 13,000 more people lost their jobs that month and 310,000 people are out of work statewide. These are the worst unemployment statistics since the Indiana Employment Security Division began the current labor reporting series. The highest rates are in those cities, towns, and counties dependent on steel, automobile, and related production.

Basic U.S. industries are in deep trouble for many reasons, and only partially because of international trade policies. The domestic steel, rubber, and glass industries remain depressed. As in the auto industry, massive investment and modernization is needed. Management and labor must develop better relations. None of the problems is caused by a single factor; nor can solutions addressing only one element expect to succeed. We are today debating only one—but a key—aspect of the problem: international trade.

The U.S. auto industry is in a painful transition period, and no one should be fooled into thinking that H.R. 5133 will reemploy all of our auto industry workers. We are seeing the beginning of a closer cooperation between labor and management, and clearly they must shoulder the major responsibility of resolving the industry's problems. The Government for its part must make sure that the rules by which they compete in the world markets are fair ones.

When I came to the Congress in 1975, I subscribed to the arguments presented by the opponents of this legislation. Little has changed in our international trade policy in the last 8 years. That is the crux of the problem. Conditions have changed, both in our own industries and economy and in world markets. We are simply no longer in a position to ignore restrictions put on our exports while allowing virtually unrestricted imports into our country in the name of free trade. A lesson our foreign trade partners must learn is that free trade must also be fair trade.

H.R. 5133 is not intended to penalize efficient production and aggressive marketing. It is, however, a policy that requires those profiting from our markets to share in the responsibility of maintaining the health of our economy. Indeed, some companies, such as Honda and Volkswagen, have recognized and are fulfilling this duty. They are to be commended. Others, however, have ignored this obligation and have made this legislation necessary.

It is ironical, and more than a little perplexing, that this administration demands a massive military buildup so that we can deal effectively with friend and foe alike from a position of strength while refusing to take this same course in international trade policy.

Only recently have the Japanese, for example, appeared to soften an otherwise intransigent trade policy. I have stood here on the House floor in the past with some of my colleagues urging the Japanese to assume more of the burden of resolving our trade difficulties. Those urgings fell on deaf ears. Progress has only recently been made—and it remains to be seen how serious the Japanese are—when it became clear that legislation forcing change could be enacted by the Congress.

Few proponents of H.R. 5133 would advocate an isolationist trade policy. The national economies of the world are now too sophisticated, interlocked, and mutually dependent. That fact makes more imperative the solution to our trade problems with Japan, the Common Market countries, the Soviet bloc, and developing Third World nations. Trade tensions not resolved may force more drastic changes in all foreign trade laws throughout the world. Fair trade, however, will benefit all—ourselves in the short run and the rest of the world economy in the long term.

Not only are national economies of the world interlocked through international trade, but diverse sectors of our domestic economy are linked through trade policies. All will benefit from our efforts today to resolve auto industry trade issues. An important element in resolving the dire condition of the farm economy in this country is development of a better agriculture export policy. Massive commodity surpluses have depressed farm income to the lowest level in decades. The President must look on our action today not only as a demand for resolving auto industry problems, but also as dissatisfaction with current trade policies affecting other industries, such as farming.

Mr. Chairman, a clear and compelling case has been made that an auto content requirement bill is a fair and

overdue response to the barriers that have been erected against U.S. autos abroad. We must fight fire with fire.

Mr. FLORIO. Mr. Chairman, I yield 2 minutes to the gentleman from Michigan (Mr. BRODHEAD).

Mr. BRODHEAD. I thank the gentleman for yielding this time to me.

Mr. Chairman, a major part of the objection to this legislation comes from those who feel that there will be some retaliation from our trading partners and that that retaliation will result in a loss of American jobs.

I think if we analyze just what this bill will accomplish, we can see that there is really only one country that might be likely to retaliate, would have any reason to retaliate, and that would be the country of Japan.

This bill is not going to limit or harm any other country in the world.

If we start talking about Japan, their balance of trade with the United States is so extremely favorable they are not about to start a trade war with us. That is ridiculous. That is the last country in the world that is going to start a trade war with us. Furthermore, they have very, very extensive restrictions, far beyond anything in this bill, on American products coming into Japan.

The documentation is voluminous. Over there there are limitations on the importation of agricultural products, limitations on American electronic equipment and many other products. Their limitations on the American auto industry, the hoops you have to go through to sell an American car in Japan are simply unbelievable, far beyond anything in this legislation.

This is purely and simply a projobs, procompetition bill. We are not saying that we want to keep Japanese cars out of the United States. We are saying to the Japanese manufacturers: You ought to do what the American manufacturers have done, Ford, General Motors, and Chrysler. When they want to sell overseas they have located plants overseas, bought domestically and hired domestic workers in those countries.

All we are saying to the Japanese auto industry is: If you want to sell in this country, begin to source a greater share of your parts, begin to hire American labor.

We welcome the competition from the Japanese, but it is devastating in the way that it is being done now because they have not done so responsibly, as the American manufacturers have done. They have not followed our lead, and it has had a devastating impact on our economy.

Mr. FRENZEL. Mr. Chairman, will the gentleman yield to me?

Mr. BRODHEAD. I am happy to yield to the gentleman from Minnesota.

Mr. FRENZEL. I thank the gentleman for yielding.

Mr. Chairman, the trouble is that one of the principal Japanese automakers, Nissan, is trying to build a plant here.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. BRODHEAD) has expired.

Mr. FRENZEL. Mr. Chairman, I yield 1 additional minute to the gentleman from Michigan.

Mr. Chairman, will the gentleman yield to me further?

Mr. BRODHEAD. I yield to the gentleman from Minnesota.

Mr. FRENZEL. Mr. Chairman, Nissan is trying to build a plant in Tennessee. I guess it is about half done, a $1 billion plant. Nissan says if this bill is passed, they will have to lock the door and let her go.

What incentive is there in this bill for the Japanese to invest in production in this country?

Mr. BRODHEAD. I think there is every incentive in the world. The laws of economics are the same all over the world.

General Motors, Ford, and Chrysler have found very, very substantial incentives to locate here. Renault is locating here. Volkswagen is locating here. There are all kinds of incentives to do that. I do not believe their statement that they are going to close that plant. That is just scare tactics, utter and complete nonsense.

The net effect of this piece of legislation is going to be that there are going to be more locating here, not less. To say that they are going to locate less here is absolute and complete nonsense.

This is a big and powerful and important and rich market, so to say that these very skillful and talented business people are going to walk away from this market is absolute and complete nonsense.

Mr. FRENZEL. If the gentleman will yield about 10 seconds of my time to me, may I inquire of him when was the last time General Motors or Ford built a $1 billion auto plant in the United States?

Mr. BRODHEAD. There is one under construction at the moment in the city of Detroit. In fact, the Big 3 auto makers will be spending $80 billion on new plant and equipment in the United States in this decade.

The CHAIRMAN. The Chair will advise the gentleman that the gentleman from New Jersey (Mr. FLORIO) has 7 minutes remaining; the gentleman from North Carolina (Mr. BROYHILL) has 1 minute remaining; the gentleman from Florida (Mr. GIBBONS) has 10 minutes remaining; and the gentleman from Minnesota (Mr. FRENZEL) has 5 minutes remaining.

Mr. DANNEMEYER. Mr. Chairman, I yield 1 minute to the gentleman from Georgia (Mr. BRINKLEY).

Mr. BRINKLEY. Mr. Chairman, quoting from the DSG, the domestic content bill:

> . . . requires all auto manufacturers selling over 100,000 vehicles in the U.S. to include in their cars specific levels of American-generated content for each model year. The content requirements are calculated on a company's total U.S. sales. The more cars a manufacturer sells in the U.S., the greater the amount of American-generated content or costs incurred in the U.S. that manufacturer must achieve. The domestic content ratio is a combination of the manufacturer's credits and debits: under the bill, all U.S.-based production expenses and U.S. costs of doing business are a credit and all costs incurred outside of the U.S. are a debit. The exact percentage of domestic content required of a manufacturer is determined from a scale of U.S. sales that starts at 100,001 cars and increases to 900,000 cars, after which the requirements level off.

Mr. Chairman, anytime that legislation is advanced with a stated goal of one thing and a real goal of something else, it presumes a case where the merit is lacking on the real issue.

In the case at point, the legislation purports to increase the active involvement by American producers and workers. In fact, the ultimate of the bill is chillingly protective in nature. It says, between the lines, that other countries are doing and can always do, a better job in the production of automobiles than we can, and that they can sell them cheaper even after transporting them across the ocean.

I do not subscribe to that and neither should the auto makers. This competitive edge presently enjoyed by foreign imports should be treated as a temporary condition, with the future edge going to whoever outcompetes. With free and unrestricted competition, the American consuming public will most assuredly benefit and other American industries, innocent bystanders, would not be the object of retaliation.

I am reminded of a chemistry story which went like this: Johnny was a scientist, but Johnny is no more; for what he thought was H_2O was H_2SO_4. The prescription of H.R. 5133 is also a prescription for something different than we think.

A trade and export formula of 3 plus 7 plus 1 is not changed by rearranging the figures to 7 plus 1 plus 3. It is a cosmetic shuffling of figures and, if this bill is enacted, labor markets not now being displaced would be substituted for the presently displaced workforce, whether in agriculture or otherwise. This being the case, the bill is illusory and should be rejected.

You really do not make the room larger by rearranging the furniture.

Mr. GIBBONS. Mr. Chairman, I yield 3 minutes to the very distinguished member of our committee, the gentleman from Massachusetts (Mr. SHANNON).

Mr. SHANNON. I thank the gentleman for yielding, and I thank the chairman.

Mr. Chairman, like many of my colleagues in this Congress, I, too, have come to the conclusion that it is a time for us to take strong action to restore work opportunities for hundreds of thousands of auto workers who have been losing their jobs.

The problems facing the auto industry are clear: 275,000 auto workers have been laid off. When we include related industries such as parts and suppliers, the number of people who have lost their jobs is more than 1 million.

In 1981, domestic auto sales were at their lowest level in 20 years. The situation will be worse this year. Meanwhile, foreign auto imports have increased from 18 percent of the domestic market in 1978 to 27 percent last year.

As if these figures were not enough, we are also finding that the U.S. auto makers are using more and more foreign-made parts in their cars.

□ 1240

The manufacturers are increasingly contracting with foreign auto makers to produce whole vehicles or parts of vehicles. Those vehicles end up getting an American label, but what they actually represent is a loss of American jobs.

These are some of the factors that are prompting me and many of my colleagues of the House and Senate to take a second look at the auto industry and its needs. But beyond these specific problems, I think the crisis in autos raises a larger question, one that goes right to the heart of America's long-held allegiance to the principles of free trade. What we are finding is that ever so slowly America has become a kind of lonely crusader extolling the virtues of free trade to a world that seems unwilling to listen.

We have kept our own markets open and have asked for open markets in return. But, where are they?

I do not mean to suggest that all the problems of the auto industry can be laid at the doorstep of foreign trade policy, but who can deny that our competitors have been saying to us, "Sure we will compete—on your soil, and in your auto showrooms."

I want to say also that I have heard suggestions that this legislation is a bad idea because what we really should be doing in the Congress is saying, first, that the American economy must make transitions to newer industries, create new jobs, to replace its old auto jobs. I think I can view these suggestions from a unique perspective because I do have an area of the country which has the largest concentration of high technology industry, but I have also got and automobile plant in my district. I have always believed that the strength of the American economy comes from its diversity. I was afraid, when this legislation was first proposed, that perhaps it would be setting up a trade war and hurt the economy. Then I started hearing from some of those high-technology executives who were coming to me with the same kind of complaints about the Japanese that the auto industry has been talking about and saying, "Unless we do something now we are going to be in the same position the auto industry is in, and in just a few years."

They are saying, "Let us anticipate this problem."

I say to you, my colleagues, that unless we act now we are going to be saying to the Japanese and the world that Americans are willing to sacrifice basic industry for some abstract foreign policy goal. We cannot do that. Our future depends upon it.

Mr. FRENZEL. Mr. Chairman, I yield myself 2 minutes.

Mr. Chairman, a couple of weeks ago, when we had a bill dealing with the FTC before this body, there was a great clamor raised by a group called Common Cause, which calls itself a public-interest group. Common Cause complained that some of our Members had received campaign contributions from a group that had an interest in that bill and wanted to spread that information on the record.

I think that is a good thing. I think that the broader and more prominent disclsoure of campaign contributions we have, the better it is for our democracy. So, I endorse that sort of disclosure, even through I do not happen to endorse Common Cause's conclusion.

That group has a sort of devil theory of history. It believes that there is a corrupting relationship between contributions and votes.

But, in the interest of complete disclosure, and because Common Cause indulges in selective disclosure, I would like to read some totals from the Federal Election Commission report dated December 9, 1982, showing that the United Auto Workers voluntary community action program contributed in 1981 and 1982 to 327 Democrat candidates for Congress $1,266,502; and to 5 Republican candidates $8,450.

Their report is available to our Members, and they can find out who is who, and on which committees serve the people to whom those contributions were given. It ought to be at least as illuminating and instructive as Common Cause's press releases on the FTC vote.

I would like to state further, Mr. Chairman, that I believe very strongly in political action committees' activities. Right now I am wearing a tie that says, "Democracy is not a spectator sport."

Indeed, it should not be, and therefore, I endorse both the UAW committee PAC and the AMA PAC, which was the one Common Cause identified. I simply raise this subject as a matter of disclosure that I think might be helpful to some of the Members and others who may be following this debate.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. FRENZEL. Mr. Chairman, I yield myself 1 additional minute.

Mr. Chairman, it has been repeatedly stated in this body and in the press, notably over the radio, by people who have not been following the issue very closely, that this is a bill the industry wants. I want to restate and restate and reiterate and say again that every automobile manufacturer in the United States, whether it is domestically or foreign owned, from General Motors to Volkswagen to Honda, said in its House testimony that this is a bad bill and it should not be passed.

There is one group, or maybe two, that want this bill passed. They are the United Auto Workers and the AFL–CIO. Of course there are other union workers such as the stevedores who understand the needs of trade, who oppose the bill. This is not an auto industry bill. It is a particular special interest bill promoted mostly by one union.

Mr. PASHAYAN. Mr. Chairman, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from California.

Mr. PASHAYAN. Mr. Chairman, just to restate the gentleman's proposition in different words, its principal effect is really to transfer jobs within this country from one group to another.

Mr. FRENZEL. I thank the gentleman for his contribution. He is correct. It simply represents a jobs transfer; one job created for each two jobs that are lost as a result of this bill.

The real intent of the bill, of course, is to limit the U.S. companies.

We have heard much complaint about Japan, and indeed, Members have never heard me say that Japan is an open market. I have been a vigorous critic, and will continue to be, of Japanese market restrictions. I think Japan is a restricted market. They have not begun to open markets, and I will continue to work for that.

On the other hand, the real intent of this bill is to restrict U.S. companies so that they do not use parts from outside the United States. They will have to use the controlled higher priced parts from the United States. As Secretary Baldrige has said, the United States will be taken out of world competition and lose our chance to make a world car that we can sell around the world competitively in foreign markets.

That is really the bottom line of this bill. Forget about Japan. Forget about jobs. We acknowledge the Japanese closed market problem, and we know that jobs are going to be lost on a net basis. Instead, concentrate on the parts situation. That is the heart of the bill. It will take America out of world markets.

The CHAIRMAN. The Chair would advise that the gentleman from New Jersey (Mr. FLORIO) has 7 minutes remaining; the gentleman from Florida (Mr. GIBBONS) has 7 minutes remaining; and the gentleman from Minnesota (Mr. FRENZEL) has 1 minute remaining.

Mr. FLORIO. Mr. Chairman, I yield 2 minutes to the gentleman from Minnesota (Mr. OBERSTAR).

Mr. OBERSTAR. Mr. Chairman, I thank the gentleman for yielding. In the course of debate on this bill, I have heard a great deal of discussion about fair trade and free trade and the question of who is going to benefit and who is going to be hurt by this legislation; indeed, there has been further speculation about whether it even can be enacted and whether the expected President's veto can be overridden. What we are losing sight of is the fact that for several years now America's preeminent position in trade in the world marketplace has been eroded by blatantly unfair practices engaged in by our foreign competitors.

Every working man and woman in America understands that. I can go to any meeting of steelworkers or dairy farmers or dockworkers in my district, and every one of them understands what the problem is—it is unfair foreign competition. They have no illusions about buy-America legislation or about domestic content legislation, they do not harbor false hopes that it is going to solve their problems overnight. They fully realize that American industry has to respond to the efforts that workers have made; that domestic industry has to modernize; that our Government has to be tougher in its trade negotiations with our foreign competition. But, they do recognize that there has to be a starting place and that if America would but take a hard line, and when the Japanese say, "Yes, we will buy aerospace from the United States, that 40 percent of it has to be built in Japan," then we are going to say the same thing to the Japanese.

□ 1250

When we draw that line tough enough, they are going to break down their barriers and they are going to deal with us on a fair and square basis.

I learned my lesson firsthand. I did my graduate work in Europe, at the College of Europe in Bruges, Belgium, right at the time of the formation of the European Common Market, shortly after the coal and steel community was well under way. We studied and we saw firsthand how the Europeans protected their domestic markets and built up their industry and agriculture with government subsidies in order to compete with the United States.

Mr. Chairman, this is an opportunity for us to fire a warning shot across the bow and tell them to eliminate unfairness and protectionism from their trade practices in the international marketplace.

The domestic content bill, H.R. 5133 is needed to arrest the U.S. auto industry's 3½-year crisis, which has resulted in the closings of 30 major plants, the indefinite layoff of about 285,000 autoworkers, and the loss of another 670,000 jobs in firms supplying auto manufacturers, including the steel industry, which affects my iron-ore producing district. The auto industry alone cannot counter the conditions that have caused car production in the first 8 months of 1982 to drop 26 percent below the same period in 1981, and that may reduce 1982 car sales to the lowest level since 1961.

For the last 20 years, the United States and other industrial countries have prevented textile and apparel imports from increasing their share of domestic markets. Separate agreements have been reached between each importing and each exporting country. That industry has tens of thousands of different companies that can readily pickup and move their operations. In the auto industry, however, only a few multinational companies control most of the world's production. Thus, it makes more sense to impose import restrictions on the multinational companies than on countries.

Substantial local content cannot be implemented overnight. But the timetable carried out by Volkswagen over the last few years can serve as a clear example for others. VW began U.S. production in 1978. Now, in addition to its assembly plant in Pennsylvania, it has a stamping plant in West Virginia and a new multiplant complex in Texas. Currently, the North American content of VW Rabbits is 70 percent.

Japan has imposed local content requirements for its aerospace purchases. As a condition of its purchases of billions of dollars' worth of fighters and patrol planes for Lockheed and McDonnell Douglas, Japan will produce at least 40 percent of their value.

The domestic content bill requires that for every 10,000 vehicles sold, 1 percent of the content of the vehicles must be made by or involve American workers. A company selling 100,001 vehicles would have to have 10 percent domestic content, and one selling 900,000 (the ceiling), 90 percent. Renault and Volkswagen already meet the requirements of the bill; Honda could, on current projections, easily do so by 1986; Datsun is far under the content standard but making modest progress toward it. Toyota is the most distant from the requirement.

In short, the bill mandates a modicum of social responsibility for multinational investments but does not deny access to the American market if corporations meet that responsibility. It also focuses, by implication, on some basic issues: who is going to pay for the restructuring of the world economy—workers and their communities? the poorest countries?

The free trade answer, of course, is that multinationals must be allowed the unrestricted right to manipulate the world market and to avoid the resulting social costs.

The domestic content bill is a step—but only a first step—in gaining some measure of democratic control over such corporate decisions. It also points toward the need for international controls over multinational decisions.

In this global setting, the domestic content bill is a modest effort in the direction of seeing to it that the most vulnerable people in the world should not be forced to pay the costs of the most wrenching economic transition in a century—from smokestack capitalism to computerized capitalism. The alternative is not a 19th-century idyll of free-trade markets; it is a world run from the boardrooms of multinational corporations.

Mr. FRENZEL. Mr. Chairman, I yield such time as she may consume to the gentlewoman from Rhode Island (Mrs. SCHNEIDER).

Mrs. SCHNEIDER. Mr. Chairman, I rise in support of H.R. 5133, the Fair Practice in Automotive Products Act. However, as a supporter of free trade principles, I carefully and thoroughly assessed the ramifications of the "domestic content" legislation and welcome the opportunity to explain my decision to send a strong signal to countries which do not share our principles.

An objective assessment of U.S. trade policy clearly indicates in case after case, country after country, that the U.S. exports face governmental subsidies, high tariffs, credit financing and in many instances, illegal quotas under the General Agreement on Tariffs and Trade (GATT). And while Europe engaged in government subsidized export financing, our Japanese trading partners maintain beyond any doubt, the tightest of all markets—bar none. Whereas Japan enjoys 75 percent of our electronics sales, 25 percent of our auto business and an increasingly high percentage of consumer goods, the United States is slapped with stiff quotas on beef, citrus, and other commodities as to effectively be priced out of the market. Chicken, for instance, that sells in

New York for $2.19 per pound is sold for $5.35 per pound in Japan.

I believe it is essential that the United States send a message to Japan and other trading partners that until they adhere to a policy that guarantees our ability to compete equitably we will be willing to take another look at our relatively free import policy. Fairness and balance in trade, after all, must be reciprocal. Presently, 31 nations, including England, France, Italy, West Germany, and Australia all have placed restrictions on the import of foreign made cars. Here in the United States, since 1978, Japanese imports have risen from 12.1 percent of the U.S. automobile market. Estimates from Merrill Lynch Economics and the National Academy of Engineers show that by 1990, Japanese imports could rise anywhere from 40 to 60 percent.

By implementing domestic content legislation, we are not seeking to limit Japan's ability to compete. We are simply alerting them to the fact that the United States can no longer afford to engage in a policy in which American auto companies in Japan assume 0.9 percent of the market and the Japanese assume 30 percent of ours. We need to address the question of balance of trade and make the Japanese aware of our discontent with present circumstances. We can not idly sit by while the United States-Japan trade deficit in automobiles climbs yearly to the present $47 billion. Japanese exports are soaring due to the undervalue of the yen and the marked increase in the dollar's value.

Of course, our own automobile industry and the Federal Government must simultaneously work toward more permanent, positive, long-term solutions—industrial innovation, downsizing and professional pride to name just a few. My visit to Japan last year taught me that technological innovation, retooling and viable labor policies can and do make for higher production innovation. In addition, my support for my colleague Representative SHAMANSKY'S "perfect car" initiative lends further credence to my argument that the United States has the capacity to build a fuel efficient, environmentally safe and reasonably priced vehicle using existing technology.

Let us not be antagonistic with our trading partners, but rather, work willingly and fairly. Domestic content should not be viewed as the antagonists approach but should instead be recognized as an effective means by which to convey American sentiment that we are indeed serious about fair trade. The Japanese can no longer be allowed to continue on a course in which more than 20 GATT illegal quotas are imposed on American products.

I urge my colleagues to recognize the importance of such a signal and thereby support the intent of this "domestic content" legislation.

Mr. GIBBONS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, first, as I start, there are a few things that I would like to stipulate: First, the Europeans are not following the international trade agreements; second, the Japanese are not following the international trade agreements; and third, the Americans are not following the international trade agreements.

We do have a choice. We can live in a jungle or we can live under our agreements. All of us must keep them. That is my position.

My second position is that we do not live to trade; we trade to live. We should trade nothing that we cannot grow better here or manufacture better here, and I do not think anybody else should dump any goods into our market, perform any predatory practices in our market, or subsidize their goods into our market.

I think that all within this room can agree with what I have said up to this point. It is perhaps at this point that we begin to follow divergent lines. But I want to assure everyone within this room and every Member of Congress and every American that as the chairman of the Trade Subcommittee of the Committee on Ways and Means, I feel that I am following that course of action, and I shall continue to follow it as long as I am allowed to be that chairman.

I want laws that are fair and international agreements that are fair to the rich, to the poor, to the large, to the small, to the developing, and to the undeveloped.

In truth, and in fact, Mr. Chairman, I believe in the rule of law, just law.

Mr. Chairman, I will also stipulate that there are enough votes in this House to pass this bill. With some clever maneuvering it could probably be added on to something in the Senate and go to the President. We would then have a veto situation on our hands. I do not know what would happen then. But, truthfully, I do not worry about that happening to this bill because this bill is such a ridiculous piece of legislation that I do not believe the proponents of it, when taken away from the charged atmosphere of this Chamber, would say that we ought to go that far.

To use a terrible cliche, this bill shoots us in the foot. This bill in its present form—perhaps it can be changed, but I know not how—will have the ultimate impact of increasing prices and inflation in America, making America less competitive in the world, destroying jobs in America, and transferring some jobs from competitive industries to the less competitive automobile sector at an atrocious cost. The best estimate is that it would cost for each job saved and transferred in the automobile industry about $100,000 per worker per year.

In the automobile industry—and I have the greatest sympathy for all those people who have made their living and cast their lives with the automobile industry—unemployment is a personal disaster. It wrecks homes and families. We have an industry that is in transition. We have an industry that at one time was the technological leader of the world. It was the most productive industry in America. Somewhere, sometime, it began to slip. It is now an industry in transition. It is an industry that has been characterized as being labor-intensive with low-skilled workers. Those kinds of industries just cannot survive in America. The leaders, labor leaders and management leaders, recognize that.

This is an industry in transition, and we should have some kind of humanitarian program to help those people who cannot help themselves because they are caught in this transition. We had a program known as trade adjustment assistance. It was ill-designed, it did not work, and it has been abandoned. But that does not mean that we should not have a program.

We should help this industry make the transition, and this Government has attempted to do that. We have the highest tariff on light trucks of any country in the world. Perhaps that will at some time be of some advantage. The light truck tariff in the United States is 25 percent ad valorem. If we want to help the U.S. Treasury, we should buy a Japanese truck. That is a ridiculous thing, but 25 percent of the value of that truck or a German truck or a truck from anybody else goes into the U.S. Treasury. No other industrialized nation in the free world has as high a tariff as we do.

There are no more Japanese cars coming into this market now than there were 4 years ago. We pressured them and probably stretched our antitrust laws to the limit. The Japanese voluntarily restrained the exportation of their cars to our country. But what did they do? They are not stupid. They did what any intelligent person would do, and, I think, what any American would do certainly. They just boosted the price of all the cars they send to this country.

The CHAIRMAN. The time of the gentleman from Florida (Mr. GIBBONS) has expired.

Mr. GIBBONS. Mr. Chairman, may I inquire, has all the time available to me now expired?

The CHAIRMAN. The gentleman is correct.

Mr. FRENZEL. Mr. Chairman, I yield my last remaining 1 minute to

the gentleman from Florida, and extend to him my good wishes.

Mr. GIBBONS. Mr. Chairman, I thank the gentleman from Minnesota (Mr. FRENZEL).

Mr. Chairman, I have nothing but good wishes toward every Member in this debate, no matter what side he is on. It is a serious matter.

I hope that we can fashion a solution to this problem that is uniquely American. No one who understands the Japanese would want to trade places with them. Their Government has imposed upon them a condition that would in this country cause a reenactment of the Boston Tea Party. We should not attempt to emulate them.

Their Government tells them what they can buy and how much they have to pay for it. Their Government restricts them from the opportunity to get the benefit of their work. That is almost slavery. They live in substandard homes, in a polluted environment that no American would put up with, all for the purpose of perpetuating the type of economy that they have there.

The CHAIRMAN. The time of the gentleman from Florida (Mr. GIBBONS) has expired.

□ 1300

Mr. FLORIO. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the Fair Practices in Automotive Products Act has attracted a tremendous amount of attention both in and out of Congress. When my subcommittee heard testimony on the legislation this spring, 124 Members of the House had already cosponsored it. The number has now grown to 223.

With car sales falling far below even last year's record low level, the demand for relief for the auto industry is growing stronger every day. Even as car levels have declined, foreign car manufacturers have steadily increased their penetration of the U.S. market. As a result, many have called for restrictions on foreign car imports as a way of bringing about the recovery of the U.S. automobile industry.

Mr. Chairman, I would like to comment for a moment on the criticism this bill has received from those who claim it threatens to undermine our international free-trade system. I reject this notion for the simple reason that, except for isolated cases, there is very little "free trade" left in the commercial relationships between our country and many of our trading partners.

Mr. Chairman, at the heart of our free trade system is the concept of balance of concessions. Under this principle, each country extends to its partners trade concessions which approximate the trade concessions or benefits which it enjoys. In this way, the nations of the world have assurances of equal trade opportunities and no country is victimized.

In exchange for the claim foreign auto makers have on the U.S. market, this principle would dictate that foreign auto producing nations should extend to the U.S. trade opportunities which approximate those they have in the American market.

For example, the United States has been talking with Japan about buying more American-made auto parts for many years. Annually, U.S. companies buy $2 billion worth of Japanese parts whereas Japan purchased last year only about $100 million worth of U.S.-made parts.

These efforts, which have been a high negotiating priority of the United States for some time, have failed terribly. An agreement was reached 2 years ago under which Japan was to triple its annual purchase of U.S. auto parts, but that objective has never been achieved.

In other areas like beef, citrus, tobacco, insurance, aluminum smelting, petrochemicals, telecommunications, pharmaceuticals, medical and dental equpment, and reactors, Japan also treats American business unfairly. These are all industries in which the United States has achieved greater productivity and efficiency than Japan and which, under a real system of free trade, the United States should be able to capture substantial shares of the Japanese market. To date, very little progress has been made in removing these and other barriers which prevent U.S. products from competing fairly in many foreign countries.

The United States and many auto producing nations simply do not enjoy reciprocal trade benefits, thus creating a distinct imbalance in the trade concessions or benefits which each enjoys. Our trading relationship with these countries does not, therefore, offer any remedy to that part of the U.S. unemployment problem that is caused by this imbalance.

For these reasons, I reject the charge some have made that this legislation will set off a new wave of international trade protectionism. Instead, I believe our Government not only is justified but has an obligation to take direct steps now to restore fairness and equity to our trade relations with many of our trading partners. I believe this bill is a positive step in that direction.

Mr. Chairman, I yield the balance of my time to the gentleman from Michigan (Mr. DINGELL).

The CHAIRMAN. The gentleman from Michigan (Mr. DINGELL) will be recognized for 5 minutes.

Mr. DINGELL. Mr. Chairman, I thank my good friend and colleague, the distinguished subcommittee chairman, for yielding me this time.

There have been some comments made during the course of the debate here about how Members have received campaign contributions from this sort of giver or that. That denigrates the House and it also denigrates the maker of that statement because I am disposed to believe that the Members here are honorable men and that we are going to discuss this issue on its merits.

The issue here before us is jobs. The issue here before us is not free trade, it is fair trade.

Every industrial nation in the world that produces automobiles discriminates against American auto producers. Every nation in the world that sells to Japan finds itself discriminated against by the Japanese on autos and everything else.

The United States is the only Nation in the world which practices free trade and fair trade. It is the only Nation in the world which has other nations dumping every kind of commodity in this country below cost and subsidizing their industry, from agriculture, to steel, to automobiles, to leather, to food products, to everything else.

To my good friend from Florida (Mr. GIBBONS), and he is my good friend, I say, we have been fond of each other for a long time. I respect and admire him. I enjoy needling him about the way he has handled this matter, as he enjoys needling me, too. He tells how he held days of hearings on the bill, and he did. They were excellent hearings but they do not deal with the basic point that his committee could deal with.

These hearings could have dealt with what the Japanese are doing to the United States and how we could get a decent reciprocal, trade relationship with the Japanese which would be truly one that would work for the benefit not just of the automobile workers, but for the benefit of everybody else and for every other industry in the country.

The reason why this kind of legislation is coming to the floor from the Committee on Energy and Commerce is that the Ways and Means Committee has not done its job and has not taken the steps that are necessary to protect basic American industries and to see to it that we are treated fairly.

American plays by the Marquis of Queensbury's rules and the others have their knee in our groin. That is not fair trade. That is not free trade. It is practice which sanctifies the most vicious kind of discriminatory practice to the great hurt of our people.

The gentleman would have us believe that autos are the only instance where there has been a trade problem. That is not true. In the case of steel, there have been well-documented cases of dumping, subsidizing of exports in our U.S. market, and closure of foreign markets to our exports.

Let me read my colleagues something from Ambassador Macdonald, our trade representative, describing some of the American industries that are afflicted by restrictive practices by the Japanese on U.S. exports to Japan, leather, beef, beef products and citrus; fruit and vegetable quotas, and inter alia, some 28 quotas on other things such as high test molasses and canned pineapples.

I could tell my friends from the Pacific Northwest of Japanese discrimintions which he cites about lumber and lumber products and plywood.

I will put in the RECORD at the appropriate time a letter to my good friend from Florida from Ambassador Macdonald. I would commend to him that he should read that letter because it tells what the Japanese do to discriminate against Americans and American products and American goods.

We give them free access. They deny us. They do not even permit American firms to participate in the standard making which goes into market acceptability and compliance with Japanese law and voluntary standards.

They have all manner of provisions for sustaining and supporting industries in their developmental stages and the minute a Japanese industry begins to hurt they have other restictive devices to prevent Americans from achieving any advantage in the Japanese markets.

It takes months before Americans are able to get clearance through all manner of governmental devices by the Japanese. But that is only part of the issue.

We are sending a message to the Japanese with this bill, and it is good that we should. But it is also good that we should recognize that the sinews of America are America's heavy industry, steel, and autos and the workers that work in those industries and the supplier industries to those industries.

Without those industries there will not be any national defense and there will be not much here to defend because Americans will not have industry, they will not have jobs, and we will not have a standard of living worthy of the name.

The Japanese denied admission of the United States automobiles totally to Japan until a few years ago. The Japanese until just recently required that tobacco products had to be advertised in English in Japan and they limited the number of outlets to a very few. The Japanese increase the cost of American food products manyfold before they can be sold in Japan.

We are simply trying to keep in place a basic American industry essential to the well-being of American workers and essential to the national defense. That is what is at issue here.

Mr. Chairman, this is important legislation for the working people of America—for those who are a part of the motor vehicle industry and for those who are not. Today, unemployment in the U.S. automotive industry exceeds a quarter million workers, and new layoffs are announced weekly. My State of Michigan, one of the leading automobile and truck producing States, now has an unemployment rate of 17.2 percent

According to the Labor Department, employment in automobile manufacturing has dropped from 762,400 in December 1978, to just 459,700 in April 1982. In addition, thousands of other workers whose jobs are related to the vehicle manufacturing industry, or who live and work in communities dependent on the vehicle manufacturing industry, have been fired or laid off. Some 800,000 workers in Illinois, Indiana, Michigan, and Ohio have exhausted extended unemployment benefits since January 1980. Many of these workers are a part of the record 10.8-percent national unemployment rate reported last week by the Department of Labor, and others are not even counted in the figures.

The cost to the Federal Government of this devastating unemployment in the automobile industry in terms of lost tax revenues and payments to the unemployed has run into the billions of dollars for each of the last 2 years—the cost for State and local governments has been enormous as well. Some estimates are that 1 million jobs have been lost due to the auto crisis—a full percentage point in our national unemployment rate. Since it is estimated that each percentage point rise in the unemployment rate results in a loss of roughly $25 to $30 billion to the U.S. Treasury, it is clear why we must take action now. As we face a potential deficit in fiscal year 1983 of $200 billion, we must consider this bill and all other means of getting Americans back to work. Until we do that, this deficit well never go away.

H.R. 5133 will put thousands of Americans back to work. It is a fair and balanced response to current problems in the world automobile market. There is no such thing as "free trade" today in the automobile industry or, for that matter, in other industries. Germany, France, the United Kingdom, and Italy: All have sharp curbs on Japanese encroachment into their automobile markets. And the Japanese, who flatly prohibited auto imports until the early 1970's, rely now on a system of nontariff trade barriers to block foreign entry into their market.

The deputy U.S. Trade Representative, in a November 10, 1982, report to subcommittee Chairman GIBBONS entitled "Japanese Barriers to U.S. Trade and Recent Japanese Government Trade Initiatives," said that the Japanese Ministry of Transportation "has repeatedly turned down a U.S. request to recognize U.S. manufacturers' self-certification of automobiles to Japanese standards." Yet the U.S. permits, as he points out, "all auto manufacturers to self-certify compliance with U.S. regulations." He also said that despite "a May 1980 commitment" by the Japanese to accept public affirmations of the "dates of manufacture" of U.S. vehicles, which are necessary in Japan to determine which year's regulations tests must be performed on imported cars, the ministry of transportation has not yet adopted the necessary implementing procedures.

The only major open market in the world for motor vehicles is the United States, and we have become victims of the Japanese export economy—a trade philosophy which provides for worker security in Japan and unemployment in the United States.

That is why American labor unions are so supportive of the bill, from the United Auto Workers to the AFL-CIO and steelworkers. Others supporting the bill include the NAACP, consumer groups, women's groups, senior citizens, the National Urban League and many other organizations.

H.R. 5133 simply requires that those who want to sell to the U.S. market return something to that market in the form of jobs and investment. It does not distinguish foreign manufacturers from domestic manufacturers—it treats them all equally. It does not exclude foreign companies from selling vehicles in the United States, as a quota would do, but allows all companies to sell in the United States on a fair and equal footing. Nor does the bill automatically raise the cost of foreign vehicles in the U.S. market—as would a tariff.

The bill that was reported to the House by the Committee on Energy and Commerce adopts a carefully considered, administratively workable and a equitable local content requirement. In the 9 days of testimony by over 50 witnesses before the Ways and Means Trade Subcommittee, virtually no criticism was directed at the technical provisions of the bill. It has been carefully crafted, and is much improved over the bill as introduced.

First, the bill has been simplified and is consistent with other legislation relating to the motor vehicle industry. The adoption of the energy policy and conservation act approach, which is based on U.S. customs data about imports by each manufacturer, means that the bill will be simple to administer and enforce. The bill works model year by model year, so that it takes into account the production schedule of the industry. Moreover, the motor vehicle industry is already familiar with the energy policy conservation act system, so it can readily adapt its practices to the bill's requirements

without the need for complicated and costly accounting systems.

Second, the bill sets a schedule of domestic content requirements which recognize the efficiencies of production in the motor vehicle industry. This bill encourages the production of motor vehicles and parts in the United States—it does not exclude these products from entering the country. In order to achieve this purpose, the bill sets domestic content requirements at a level which can be met by U.S. and foreign manufacturers alike. The "Big Three" U.S. auto companies are today in compliance with the strictest requirement the bill would impose, as are Volkswagen of America, which is producing cars in New Stanton, Pa., and American Motors Corp., with both its domestic nameplate cars and its new jointly produced cars with Renault.

Those who argue that H.R. 5133 prevents auto companies from making efficient investment decisions, and that this will drive up the price of cars, do not understand how this bill works. The bill leaves manufacturers free to organize production in anyway they deem appropriate in order to take advantage of economies of scale, specialization, diversification of supply networks, and worldwide markets.

Under this bill, companies would be free to market cars in the United States whose engines are made in Japan, transmissions in Brazil, bumpers in Mexico, bodies and differentials and wheels made in various parts of the United States—or any other production and supply configuration they consider to be efficient. What the bill says to the auto industry is "organize production anyway you want, but if you are going to sell a large number of cars in the United States, then you must also see that we get a fair share of the jobs and investment generated by your U.S. sales."

Third, the bill sets fair penalties for violating the law. The penalties provided in the bill "fit the crime." A manufacturer who violates the law is penalized in proportion to the extent of the violation. This provision will also serve to encourage compliance and, unlike the bill as introduced, does not set arbitrary thresholds for dramatic changes in the requirements. Thus, H.R. 5133 is carefully designed not to throw the baby out with the bath water—it focuses exclusively on the real goal: To protect U.S. jobs while leaving the maximum room for management flexibility, efficiency, and competition.

The Congressional Budget Office and Congressional Research Service did studies which claimed that H.R. 5133 would dramatically increase car prices and would actually reduce U.S. jobs. Some of the Members may have seen these studies referred to in advertisements which have been run in newspapers over the last couple of days by an organization of foreign car importers and dealers, and we will hear about these studies in our debate on this bill. In fact, these studies are based on two completely unrealistic assumptions: First, that Toyota, Nissan, and Honda would effectively abandon the U.S. market by reducing sales to between 100,000 and 250,000 vehicles rather than complying with the law, and second, that there should be massive retaliation by many other countries against U.S. exports. Both of these assumptions are absurd.

First, Toyota sold 719,000 cars and light trucks in the United States in 1981. Nissan sold 736,000 and Honda 371,000. These account for 20 percent, 25 percent, and 35 percent respectively of all the cars these companies made in that year. These companies simply cannot afford to abandon the U.S. market. Reducing U.S. sales to 100,000 would reduce Toyota worldwide sales by 620,000—or 17 percent—Nissan by 637,000—or 21.6 percent—and Honda by 272,000—or 25.5 percent. None of these companies can possibly afford such declines: There is nowhere else to sell such a huge number of cars—every other major market for Japanese cars already has restraints. In fact, despite their protestations to the contrary, if we stand firm and pass this bill there is no doubt that the major Japanese companies will adjust to reality and start buying U.S. manufacturing capacity.

Second, retaliation: The CBO and CRS studies assumed massive retaliation by all or most of our trading partners sufficient to reduce all our exports by the same proportion as we reduce automotive imports. This too is absurd.

First, no other country except Japan is affected because all other companies either sell too few cars in the United States or have already built sufficient U.S. capacity to bring them into compliance. Further many of these same countries; for example, France, Italy, Great Britain, themselves have very tough restrictions on imports of Japanese cars—why should they object if we impose much less restrictive requirements than they have themselves?

Second, the Japanese are not going to retaliate either. They have never retaliated against any of the other countries which have import restrictions; the Japanese sell far more to us then we do to them; and they are far more dependent on foreign trade than we are. Any restrictive trade practice would damage their economy far more than ours. They know this and they know that they cannot tolerate such a battle. So far they have been able to exploit our naive, fuzzy ideal commitment to textbook free trade by pursuing ruthless mercantilist policies. But that approach only succeeds so long as we acquiesce in our own exploitation.

Obviously the Japanese would like to continue to benefit from this situation for as long as possible. And so they and their companies claim that they will abandon the U.S. market rather than comply with local content requirements—even ones which are shown to be practical. But I am totally convinced that if we stand firm the Japanese will have no choice but to relent and begin playing by less selfish rules. They have shown a remarkable capacity to adjust to hard reality—and to prosper—in other situations. I am sure they will display the same qualities again.

In sum, I am fully convinced that should H.R. 5133 become law there will be no retaliation at all—not by Japan and not by our other trading partners. The CBO study concluded that should there be no trade retaliation, H.R. 5133 would stimulate economic activity, increase GNP and create about 250,000 new jobs—to say nothing of the existing jobs which would be protected from further erosion. This is what I firmly believe will really happen if we make the bill law.

In conclusion, the "local content" requirement which is reflected in H.R. 5133 is a needed and fair response to the invasion of foreign vehicles into the U.S. marketplace. It is a necessary bill for American workers, and it is a fair bill for American consumers. It will bring jobs and investment into the United States, and it will continue to provide the American consumer with a wide selection at the lowest price.

This bill encourages foreign automakers to utilize auto parts built in the United States and to build facilities here just as some have already done, like Volkswagen of America and Honda. It does not establish a quota or a trade barrier. It is a fair bill designed to provide more jobs which have been lost on part due to the deep penetration of foreign automakers into our markets under our free trade policies.

To illustrate some of the concerns, I want to point out that the Japanese still maintain onerous tariffs on U.S. goods imported into Japan. These tariffs make U.S. goods overly expensive and restrict the market even where the U.S. product is much better than the Japanese equivalent.

Even with the administration's much publicized May 28 package of tariff reductions, Ambassador David MacDonald reported to a congressional committee on September 14, 1982, that significant tariff reductions were needed on Wood and wood products; paper and paper products; unwrought magnesium; refined copper; chocolate confectionery; feather and down bedding; harvesting equipment; tobacco product; leather; computers and computer parts; cash registers; photo-

graphic enlargers; and photograph files.

While there might be some justification for a tariff on some of these goods, it is hard to believe that the Japanese cannot fairly compete in photographic goods.

The November 10, 1982, report by the U.S. Trade Representative indicated that Japan currently maintains quotas on 27 items which the United States believes violate the tariff provisions of the GATT. These include:

Leather.

Beef: In addition to a 25-percent tariff on imported beef, the use of a quota has the effect of raising the price of beef to over $12 a pound.

Citrus: Japan uses "general" and "seasonal" quotas to exclude United States imports of citrus. In addition, seasonally adjusted tariffs range from 20 to 40 percent, and the tariffs on juices range from 22.5 to 30 percent.

Fruit and vegetable quotas limit imports of United States: grape and apple juice; tomato juice, ketchup and sauce; as well as other products available for U.S. export. These quotas are sometimes announced on an emergency basis, so U.S. exporters cannot predict or plan for them.

The May 28 reductions in quotas on four items (herring, prepared and preserved pork, high-test molasses, and canned pineapples) are not of major interest to the United States.

The Japanese agricultural standard (JAS) on structural plywood, written for domestic makers that use a hardwood to make plywood, specifies how the plywood should be put together—for example, how the plies should be assembled and bonded—rather than how the plywood should perform in use. The lowest grade plywood most commonly used for construction in the United States does not meet the standard, partly because it is made from softwood and partly because of U.S. production methods. For example, if the knothole in the wooden panels exceeds the limit in the Japanese standard, the panel is rejected despite the fact that U.S. technical data demonstrate that the U.S. product equals or exceeds the performance characteristics of the Japanese produced product.

The U.S. plywood products industry has pushed for 8 years for a new Japanese standard on structural plywood. Three years ago Japan with the United States developed a mutually acceptable performance standard for structural plywood by 1980. Two years after the deadline has passed, we continue to hear about complex negotiations on "knothole" size and the "white speck" problem, but U.S. exports still have not increased.

The Japanese Ministry of Transportation (MOT) has repeatedly turned down a U.S. request to recognize U.S. manufacturers' self-certification of automobiles to Japanese standards. The U.S. permits all auto manufacturers to self-certify compliance with U.S. regulations. The MOT still has not adopted administrative procedures to implement a May 1980 commitment to accept U.S. notaries public affirmations of the "dates of manufacture" of U.S. automobiles. "Dates of manufacture" are necessary in Japan to determine which year's regulations tests must be performed on U.S. imported automobiles.

There has been more than a 2-year delay in resolving this standard issue, which is one of many in the automobile area.

Japan's restrictive standards and approval procedures exclude foreign products from the market because of the prohibitive cost of establishing at the border that the product meets the requirements or delaying their entry, often long enough to allow Japanese manufacturers to introduce a competitive product.

Foreign companies are excluded from the Japanese standards-writing process so they often learn about prospective new or revised standards well after their Japanese competitors.

Japanese standards are often written in terms of design criteria rather than performance specifications. As a result, an American-made product may not be acceptable because of minor differences in design. Even though these variations do not affect the product's compliance with the performance objective of the standards.

Japan refuses to accept test data developed outside Japan for many products, including pharmaceuticals and medical equipment. Testing is very expensive, as complete samples must be provided. Backlogs in Japan for starting tests on electrical and medical products, for example, are up to 5 or 6 months. The testing process itself can take another 3 to 4 months, and delays of 1 to 2 years have been cited in cases of medical equipment products.

Product standard problems could be resolved if inspectors from Japan visited and inspected the manufacturing site, or accepted U.S. product approval. But they will not do so.

According to the U.S. Trade Representative other standards barriers apply to: Cherries, sake, dried fruit, concentrated fruit juice, processed foods, frozen bull semen, pharmaceuticals, cosmetics, autos, sporting goods, plywood, and other chemical substances.

The Japan tobacco and salt public corporation (JTS) is a government monoply. JTS is obligated to buy all domestically produced tobacco leaf (some 140,000 tons annually) at prices three times the world price.

JTS strictly controls sales of imported cigarettes, cigars, and pipe tobacco, permitting them to be distributed at only 20,000 of 250,000 tobacco products shops and selling them at much higher prices than domestic cigarettes.

Japan imposes 35-percent tariff on imported cigarettes. The effect is that imported cigarettes sell in Japan for 55 percent more than comparable Japanese brands. Even though their pretariff price when entering Japan is about the same as the price of Japanese brands.

As a consequence of tariff and nontariff barriers, the U.S. share of the Japanese cigarette market is still only slightly over 1 percent. U.S. industry estimates our potential share of the Japanese market in the absence of any barriers range upward from 25 to 50 percent. Since each percent of market share is roughly equal to $50 million, the potential value of increased U.S. exports in this sector is between $1.2 and $2.5 billion.

At this juncture, I insert the full text of the November 10, 1982, report:

DEPUTY U.S. TRADE REPRESENTATIVE,
Washington, D.C., November 10, 1982.

Hon. SAM GIBBONS,
Chairman, Subcommittee on Trade, Committee on Ways and Means, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: It gives me great pleasure to be able to transmit the enclosed document entitled Japanese Barriers to U.S. Trade and Recent Japanese Government Trade Initiatives. The document represents the collective efforts of the member agencies of the Trade Policy Committee (TPC). It is an attempt to identify and catalogue the barriers, both direct and indirect, to imported goods, services, and foreign investment currently in effect in Japan, and the actions and commitments on the part of the Japanese Government, if any, to reduce or eliminate them. We plan to update this catalogue on a periodic basis as developments merit.

The range of particular Japanese Government and private sector policies and practices addressed in the paper are not the only factors that affect the flow of imported goods, services, and investment into Japan. That flow also is influenced by macro-economic factors which are not specifically addressed in the paper. Of particular importance in this regard is the relationship of the value of the yen to that of the dollar.

In recent months the yen has depreciated considerably against the dollar, as have all major currencies, and this depreciation has enhanced the price competitiveness of Japanese exports to the United States, while decreasing the competitiveness of U.S. exports to Japan. The reduced competitiveness of U.S. exports, coming at a time of increasing penetration of the U.S. market by Japanese products, has contributed to the frustrations experienced by U.S. businessmen attempting to compete in the Japanese market, and has further exacerbated U.S.-Japan trade frictions. As a result, criticisms have been raised that the Japanese yen is artifically undervalued vis-a-vis the dollar. It is a particularly complex issue and has been and will continue to be the subject of considerable study within the government and the private sector.

Mr. Chairman, I appreciate the Committee's considerable patience with this exercise. I am confident that the Committee will find the document informative and useful

and that it will contribute to its understanding of the Japanese trading system. In that regard, I believe the Committee will find the wait worthwhile.

Sincerely,

DAVID R. MACDONALD.

JAPANESE BARRIERS TO U.S. TRADE AND RECENT JAPANESE GOVERNMENT TRADE INITIATIVES, NOVEMBER 1982

OVERVIEW

This paper is an attempt to identify and catalogue the barriers, both direct and indirect, to imported goods, services, and foreign investment currently in effect in Japan. The paper also details recent actions or commitments, if any, by the Japanese Government to reduce or eliminate such barriers. Every effort has been made to make the list as up to date and complete as possible. Nevertheless, the list is necessarily a provisional one and is subject to revision, addition, or deletion, as new barriers are identified and existing barriers are reduced or eliminated.

For the past decade and a half, the United States has made a concerted effort to persuade Japan to open the Japanese economy to foreign goods, services, and investment. Over the course of that time, Japan has moved slowly, but steadily, towards a more open economy. Although the Japanese market in 1982 is substantially more open to foreign goods, services, and investment than it was only a few years ago, barriers to imported goods, services, and foreign investment still remain. Needless to say, Japan is not unique in maintaining barriers to foreign goods, services, and investment in its economy. All countries, including the United States, maintain certain barriers to trade and investment. Nor are all the barriers maintained by Japan inconsistent with her international obligations. However, a widespread perception persists among Japan's trading partners, including the United States, the European Community, and others, and not incorrectly, that the Japanese market remains relatively less open to foreign suppliers when compared to access for Japanese goods and services in their markets. This perception has resulted in increasing friction between Japan and her trading partners in recent years as the volume of Japanese exports and their percentage of world trade has grown considerably.

Over the past year, our two countries have developed, largely at U.S. initiative, the elements of a new institutional framework for bilateral trade consultations and negotiations. The oldest of these, the Trade Facilitation Committee, was established in 1977 with the objective of resolving specific cases involving individual firms where Japanese Government policies or private sector practices constitute barriers to U.S. access. In 1979 the U.S.-Japan Bilateral Forest Products Committee was established to consult on problems involving trade in logs and wood products. More recently, this past year has seen a number of new bilateral institutions created, in some instances with broader purposes than the TFC, and in others with specific industry sector-related objectives. These include: first, the U.S.-Japan Trade Subcommittee in which broad-ranging trade policy issues are reviewed and negotiated; second, the U.S.-Japan Ad Hoc Study Group on Petrochemicals set up to examine the factors affecting chemical production and trade; and third, the U.S.-Japan Work on High Technology, where objectives include reducing or eliminating distortions to trade in these important industries. Two other groups, one addressing issues concerning manufactured tobacco products and the other beef and citrus, will begin meeting in October 1982.

As a result of these efforts, particularly over the past several months, the Japanese Government has announced a number of initiatives to liberalize access to Japanese markets. In November 1981, Japan agreed to make effective on April 1, 1982, many of the tariff cuts which it had scheduled for implementation under the Multilateral Trade Negotiations for fiscal years 1983 and 1984. On January 30, the Japanese Government announced the creation of an Office of Trade Ombudsman (OTO) to handle complaints about import practices. It also announced its commitment to implement some 67 actions to alleviate non-tariff barriers, primarily in the customs and standards areas. Most recently, on May 28, the GOJ announced a second, broader set of initiatives addressing both tariff and non-tariff barriers. In addition, Prime Minister Suzuki made a concurrent statement appealing to both Japanese officials and the public to welcome foreign imports.

The list of barriers that follows incorporates whatever action or commitment that has been undertaken by the Japanese Government in each case, if any, in the recent initiatives. In view of the very recent announcement of the last set of initiatives, and since the positive value of the recently made commitments will depend on the spirit in which the measures are implemented, assessment of their effectiveness in lowering the barriers to U.S. imports will be reserved until a detailed analysis, now underway, has been completed. Efforts to clarify the implementation of these measures by the Japanese Government also are underway. Such efforts began with a visit to Japan by an interagency USG delegation, within the framework of the U.S.-Japan Trade Subcommittee, during August 1982. There will be frequent subsequent visits for the purpose of working with the Government of Japan to ensure full implementation of the package and in pursuit of our overall goal of opening the Japanese economy to U.S. goods, services, and investment.

We view the latest package as part of a continuing process of opening the Japanese market, primarily, but not exclusively, through such bilateral negotiations. Needless to say, when bilateral negotiations fail to achieve satisfactory resolution of outstanding problems of access, U.S. policy is to act to promote such access using, as appropriate, either the authority contained in various sections of existing U.S. trade law or, in those instances in which Japanese trade barriers are inconsistent with Japan's international obligations, the appropriate dispute settlement mechanisms contained in the General Agreement on Tariffs and Trade (GATT) and the various codes negotiated during the Tokyo Round of the Multilateral Trade Negotiations (MTN). In pursuance of this policy, the U.S. Government has begun formal consultations in Geneva on our complaint against Japan for failure to conform to its obligation to provide equal treatment under the Standards Code in the case of aluminum softball bats. The complaint has wide ranging implications since it involves a dispute about equal access to Japan's national certification systems. In addition, the U.S. Government has informed Japan of its decision to reopen formal consultations under Article XXIII of the GATT on the issue of Japan's system of quotas on imported leather goods. In both of these disputes, lengthy bilateral negotiations failed to resolve the differences between the U.S. and Japanese positions and to promote increased U.S. access to the Japanese market. Preparations are underway to take similar action in the case of other issues which have been the subject of lengthy and unproductive bilateral negotiations.

The discussion of the barriers in the following list is organized into those deriving from government policy, of which three broadtypes are covered—import policy, regulatory policy, and industrial policy—and those deriving from private sector factors—including Japan's industrial structure, distribution system, and buy-national attitudes. Many of these policies and factors were not designed primarily to discriminate against, or exclude from the Japanese market, foreign goods and services. But that has often been their practical effect. We have treated these obstacles separately and independently, for analytic purposes, in this paper. In fact, however, the interrelationships among the obstacles which U.S. exporters confront, and their complexity, greatly complicate the process of identifying and negotiating their removal.

IMPORT POLICY

A. Tariffs

Discussion

In the 1973-1979 Tokyo Round of Multilateral Trade Negotiations (MTN) the Government of Japan (GOJ) agreed to a final tariff level that, on average, would be about equivalent to that of the U.S. or the EC. Recent Japanese actions have accelerated the implementation of their MTN reductions and, in some cases, have gone further than those levels. Tariffs will be eliminated on 96 products. Despite these actions, high tariffs remain on a number of products in which the U.S. has a significant interest, and for which we have requested tariff elimination or reductions; for example: wood and wood products, manufactured tobacco products, chocolate confectionery, beef, citrus, egg products, leather and furskins, refined copper, and kraft paper.

GOJ Action

On April 1, 1982, Japan implemented MTN tariff cuts scheduled for 1983 and 1984. This action affected 1,635 items, or about 60 percent of all dutiable products.

In its May 28 package of trade measures, Japan eliminated duties on 96 items, including digital calculating machines, cut diamonds, medical equipment, and certain machine tools, as well as reducing tariffs on 102 items, including such economically important items as photographic film, and selected agricultural products.

B. Quotas and quota administration

Discussion

Since 1963, Japan has eliminated the majority of its quotas; however, 22 agricultural and marine product quotas, 4 quotas on leather and leather products, and a quota on coal briquettes (see Attachment A) remain, which significantly inhibit U.S. exports. It is the U.S. view that most of these quotas are in violation of Japan's obligations under the General Agreement on Tariffs and Trade (GATT), and the U.S. Government has repeatedly requested the elimination of the quotas. Recent Japanese actions have slightly expanded the size of some of the quotas.

In addition to the quotas themselves, the lack of transparency in their establishment

and maintenance adversely affects U.S. exports. Problems include arbitrary changes in quota size and late announcement of, or failure to announce, quota levels. The involvement of domestic competitors in administering quotas severely restricts even the limited access to the Japanese market granted under the quotas.

Examples of specific problems encountered in the administration of the quotas include:

Leather: The amount of the global quota has never been made public (which is also the case for some fruit product quota).

The quota is allocated only to tanners or to importers/wholesalers who are members of specific organizations. There are no quota allocations to end users.

Beef: Each year in March, prior to the start of the Japanese fiscal year (JFY) on April 1, the Ministry of Agriculture, Forestry, and Fisheries (MAFF), through an advisory council, establishes the upper and lower stabilization prices for that year for the wholesale price of beef carcasses. When wholesale beef carcass prices drop below the lower stabilization price, the Livestock Industry Promotion Corporation (LIPC), a quasi-governmental corporation, buys and stores beef. When wholesale beef carcass prices exceed the upper stabilization price, the LIPC releases beef bought up at support prices plus imported beef held in its custody. The GOJ levies a 25 percent *ad valorem* tariff on imported beef. As this usually leaves the cost of imported beef far below prices for domestic beef, import surcharges of various amounts are also assessed on certain imports under the Hotel, Okinawa, and General quotas. The LIPC also establishes minimal "floor release prices," below which certain of its purchases of imported beef cannot be sold. The LIPC is a profitmaking entity, and by law its profits are used for promotion of the livestock industry, rationalization of beef production, and improvement of the distribution system. Cattle imports (for feed or slaughter) are severely restricted by the size of the animal quarantine facilities as well as by a quota on feeder calves. These measures make the price of U.S. beef to Japanese consumers significantly higher than the price at which it enters Japan.

Citrus: The fresh orange quota is divided between "general" and "seasonal." The "seasonal," June-August, quota corresponds to the period of low availability not only of Japanese citrus, but also of U.S. oranges. So during the period when the U.S. has more oranges available, the Japanese quota size is not correspondingly larger. Moreover, the juice quota levels are announced late, making planning more difficult for U.S. shippers.

In addition to the quotas on oranges, orange juice, and grapefruit juice, an array of tariff and non-tariff barriers impede U.S. exports. Oranges face high and seasonally adjusted tariffs (20 percent June-November, 40 percent December-May) which are aimed at protecting the Japanese growers. The juices are subject to tariffs of over 20 percent (ranging from 22.5 percent to 30 percent depending on sucrose content). In addition, a Japanese Government program to promote the sale of domestically produced satsuma (a tangerine type citrus fruit) juice, requires that all imported orange juice be blended with at least 40 percent satsuma juice.

The trade in these citrus products is concentrated among a relatively small number of Japanese firms. The fresh orange quotas are allocated to about 95 Japanese trading firms. However, since eligibility is based on a "record of imports," the top ten companies are estimated to import close to 50 percent of the total. Juice quotas are allocated to only four associations of domestic juice manufacturers who in turn designate Japanese trading companies for the actual transactions.

Fruits and Vegetables: The main problem associated with the grape and apple juice quotas is that they are only announced on an as needed or emergency basis. In the case of grape juice, the quota size increased from 1,500 metric tons in JFY 1979 to 1,800–2,400 metric tons in JFY 1980, and again to 3,600 metric tons in JFY 1981. These changes were not announced until after the beginning of the quota year, thus preventing U.S. exporters from predicting or planning for them. The same problem occurs with respect to apple juice quotas, where the quotas (in metric tons) varied from 1,100 in JFY 1976 to zero in JFY 1977, up again to 2,000 in JFY 1978, down to 1,200 in JFY 1979, and up to 4,000 in JFY 1980.

In the case of fruit purees, pastes, and pulp, and tomato products (tomato juice, ketchup, and sauce), the size of the quota is not announced by the GOJ. Individual companies are informed of their allotments, usually twice per year, and allotments are based on the company's record of imports.

GOJ Action

In its May 28 package, the Government of Japan (GOJ) committed itself to improve market access for four quota items: herring, prepared and preserved pork, hi-test molasses, and canned pineapples. No other quota items were addressed. Beef and citrus negotiations are scheduled for October 1982. Quotas on beef and citrus as well as leather are of major trade interest to the United States.

ATTACHMENT A—JAPANESE QUOTA ITEMS

	BTN number
Livestock:	
Meat of bovine animals	02.01
Milk and cream (fresh)	04.01
Milk and cream (processed)	04.02
Processed cheese	04.04
Meat of bovine animals or pigs prepared or preserved in air tight containers	16.02
Marine products:	
Inshore fish and cod roe (fresh)	03.01
Inshore fish and cod roe (salted, etc.)	03.02
Scallops, shellfish, and cuttlefish (fresh, salted)	03.03
Edible sea weed	[1] 12.08
Fruits and vegetables:	
Oranges and tangerines (fresh)	08.02
Oranges and tangerines (temporarily preserved)	08.11
Fruit puree and fruit pastes	20.05
Pineapples and fruit pulp, canned	20.06
Fruit juices and tomato juice	20.07
Tomato ketchup, tomato sauce, and mixed seasonings	21.04
Sugars and starches:	
Starches and insulin	11.00
Grape sugar, etc.	17.00
Grain:	
Wheat and rice flour, etc	11.00
Wheat and rice groats and meal	11.00
Other agricultural and related foods:	
Small red beans, broad beans, and peas	07.05
Ground nuts (except those for vegetable oil)	12.01
Tubers of Konnyaku (Amorphophallus)	[1] 12.08
Food preparations containing added sugar, milk, sea weed, wheat, etc	21.07
Leather and footwear:	
Bovine cattle leather	41.02
Sheep and lamb skin leather	41.03
Goat and kid skin leather	41.04
Leather footwear, except sportswear	64.02
Coal: Coal briquettes	27.01

[1] Edible sea weed and tubers of Konnyaku have the same tariff item number (12.08). This accounts for the fact that the agricultural and marine products items under quota total 23 rather than 22 as shown on this list.

C. Informal quantitative restrictions

Discussion

In addition to the formal quotas, certain GOJ policies have the effect of creating informal quantitative restrictions on other imports.

The following are examples of such restrictions:

Petroleum Products: Although there are no formal import quotas on any petroleum products, the Petroleum Industry Law requires all prospective importers or dealers of petroleum products to register with the Ministry of International Trade and Industry (MITI). MITI must be notified of any import plans for petroleum products (or changes in plans) and may issue formal administrative guidance to importers to alter their plans. U.S. industry complains that the regulatory framework for petroleum and petroleum products in Japan facilitates informal industry arrangements restricting imports of naphtha, petrochemicals, and fertilizers.

Naphtha: Each year Japanese oil refineries are required to submit to MITI their estimates of naphtha production for the coming year. MITI limits naphtha imports to the amount by which MITI estimates of naphtha demand exceed domestic production. Only Japanese oil refineries are permitted to import naphtha.

Feed Grains: The system affecting the importation of grains for feed also limits imports. The GOJ only allows duty free entry of corn for feed if purchased by one of 215 bonded feed mills or 46 flaking mills. Otherwise, imports are subject to a 15,000 yen/ton specific duty (approximately 36 percent in the fall of 1981). The same is true for sorghum, which enters at a duty of 5 percent if imported outside of the bonded mill channels. Furthermore, imports of mixed feed are limited by a 15 percent duty. So while the GOJ does not directly control the importation of grains for livestock feeding (except barley and feed wheat, which are imported by the Food Agency, and oats which are restricted by a tariff quota), indirectly, imports are controlled and on-farm feed mixing is discouraged.

GOJ Action

No reference is made in recent initiatives by the GOJ to the restrictions on petroleum, naphtha, or feed grains.

D. Customs

Discussion

A recent review of Japanese customs procedures, including a six-week study trip to Japan by U.S. Customs experts, shows that the major current problem is the need to obtain import approval of other GOJ agencies before Customs can initiate its clearance process. Such requirements, chiefly those of the Ministry of Health and Welfare (MHW), cover approximately 40 percent of

Japanese imports and are broadly related to enforcement of Japanese standards.

In the past, Japanese Customs' practices gave added weight to the perception of Japan as a closed market. Key problems were: price "uplifts" for calculations of tariffs, overzealous concern for accuracy of documentation, lengthy delays, and absence of an appeals mechanism.

Japanese Customs has undertaken improvements. American exporters indicate that the GATT Code on Customs Valuation has helped to reduce valuation problems and the time needed to obtain customs clearance. Recent GATT data shows that Japanese Customs now uses the internationally favored method of valuation in nearly 95 percent of all import transactions. (The U.S. figure is the same.) Measures to further speed Customs' clearance were included in the January measures. Early reports indicate that these measures facilitate entry for repeat shipments of identical goods and allow release of goods from Customs' custody before completion of entry.

To speed import procedures of other GOJ agencies, the USG has asked the Japanese Government to:

1. narrow the range of products covered by import approval requirements;
2. allow blanket import approval, instead of requiring shipment-by-shipment approval; and
3. delegate import approval authority to Japanese Customs officials at ports of entry.

One problem area in Japanese customs encountered by U.S. exporters is difficulty in shipping demonstration equipment into Japan. Although Japanese Customs law permits duty-free importation of commercial samples if the samples are re-exported within one year, it has sometimes been impossible for U.S. exporters of high technology equipment to actually receive the duty-free treatment for demonstrator units. Such difficulties impose additional costs of U.S. and other foreign firms introducing innovative products that their potential clients will want to examine before making a decision to buy.

GOJ Action

Recent Japanese measures have removed the most serious problems in this area. Five items in the January 30 package deal with various aspects of Japanese customs procedures. These represent the most far-reaching changes in attitude and actions in that package.

On April 1, 1982, Japanese Customs adopted an after-permit examination system whereby it defers examination of import declarations and supporting documents until after goods are released from Customs' custody. In addition, under simplified examination and inspection procedures, Customs clears repeat shipments without physical inspection or the normal document review. A further significant measure is the establishment of a classification center in Tokyo Customs, which operates like the U.S. national import specialist system. This center will issue advance classifications binding on all ports. If properly implemented, these measures should be of considerable benefit to U.S. exporters. In addition, the GOJ announced the Office of Trade Ombudsman (OTO) as a contact point for bringing complaints. Any difficulties with Customs in the future should be easier to resolve through such a mechanism.

The May 28 package promises further actions in the customs area including amending the Pharmaceutical Affairs Law, the Poisonous and Deleterious Substance Control Law, and the Food Sanitation Law, in order to streamline the customs procedures for the importation of pharmaceuticals, cosmetics, medical equipment, and fresh food.

E. Other restrictions

Discussion

Other restrictions placed on imports which do not fall under the policies discussed earlier include tariff quotas and the variable levy on pork. Under the system of tariff quotas, a quota is established by the GOJ for each fiscal year based on domestic supply and total demand. Imports above the quota are subject to higher tariffs. For example, all corn for industrial use above 2.4 million metric tons entering in JFY 1981 was subject to a 15,000 yen per metric ton duty, while below the quota, the corn entered duty free. Several agricultural products including feeder cattle, natural cheeses, oats, corn for industrial uses, corn for corn starch production, and malt are subject to tariff quotas (tariff quotas on non-agricultural categories cover fishmeal and molybdenum.

In October 1971, Japan replaced its pork import quota system with a program that applies the higher of either a variable levy or a ad valorem duty on the price of imported pork. The domestic support program for pork establishes a floor and ceiling price level at wholesale level. The variable levy system guarantees that import pork will sell in Japan for at least the mid-point price. The variable levy is then equal to the difference between the mid-pork price and the price of pork delivered to the importer.

GOJ Action

None.

REGULATORY POLICY

A. Standards, testing, labeling, and certification

Discussion

These have been areas that have spurred a particularly large number of complaints from American exporters. The complaints span many specific problem areas, but common threads run through them. First is the lack of transparency in standards setting and compliance. Second is that Japan's restrictive standards and approval procedures have the effect of either excluding foreign products from the market because of the prohibitive cost of establishing that the product meets the requirements (inspection at the border rather than at the factor, for example), or delaying their entry, often long enough to allow Japanese manufacturers to introduce a competitive product.

One problem that affects American exporters is that foreign companies enjoy only limited access to the Japanese standards-writing process or are excluded from participation altogether, a problem only recently acknowledged by the GOJ. In the United States, foreign firms generally have this opportunity. In drafting standards or technical regulations, Japanese ministries either run on recommendations from the standards-writing committees of various industrial associations or establish ad hoc groups to frame a specific standard or regulation. These associations are generally closed to foreigners. For example, American companies are excluded from the Government's voluntary standards-writing process operated through the Japanese Industrial Standards Committee (JISC).

Because American firms have little if any access to Japan's standards-drafting process, they often learn about prospective new or revised standards too late for their input to be of value, and well after their Japanese competitors. Although Japan is a signatory to the Standards Code and as such provides U.S. interests an opportunity to comment formally this opportunity is often too late in the process to be meaningful.

Another difficulty U.S. firms have with Japanese standards is that they are often written in terms of design criteria rather than performance specifications. As a result, an American-made product may not be acceptable because of minor differences in design, even though these variations do not affect the product's compliance with the performance objective of the standards.

Japan, like the United States, has a "positive list" for approved ingredients in processed foods and cosmetics. Unlike most countries including the United States, which use a positive list for food additives generally recognized as safe for human consumption and negative list for substances banned from use in human food, Japan has only a list of approved food additives. What makes this situation so trade-restrictive is not the positive list per se, but the fact that the Ministry of Health and Welfare has been extremely reluctant to expand the list to include new uses for approved additives and almost never approves new additives, even though the development of new food products and related additives has been rapid in recent years.

With regard to testing procedures, there are general complaints about the lack of transparency in requirements and the timetable which can be expected for obtaining product approval.

Japan's commitment to accepting test data developed outside Japan for many products, including pharmaceuticals and medical equipment, has not been fully realized among administrative officials. Testing is very expensive, as complete samples must be provided. Backlogs in Japan for starting testing on electrical and medical products, for example, are up to five or six months. The testing process itself can take another three to four months, and delays of one to two years have been cited in cases of medical equipment products. Certain products, such as automobiles, are subject to individual or lot inspection as opposed to type testing when imported into Japan under the type approval system. The GOJ has argued legal grounds against conducting on-site inspection for most products. These difficulties would be resolved if inspectors from Japan visited and inspected the manufacturing site, or accepted U.S. product approval.

Another source of difficulty for U.S. exporters in the testing field is that American manufacturers cannot apply directly to Japanese testing organizations for product approval. Instead, due to Japanese product liability laws, they must submit an application through a Japan-based importer or agent who, in turn, holds the approval rights once they are granted. One peculiar effect of this requirement is that a U.S. firm cannot change importers in Japan without reapplying for product approval, unless the original importer is willing to transfer the approval to the new importer.

Another testing problem concerns medical electronics. Before a new medical electronic product is introduced into the Japanese market, the importer must furnish three samples for testing. Only after they pass the tests can the importer request authorization to sell the equipment, which, with the current backlog, takes eight to nine months.

Examples of specific product standards issues:

Plywood: The Japanese Agricultural Standard (JAS) on structural plywood, written for domestic makers that use a hardwood to make plywood, specifies how the plywood should be put together (for example, how the plies should be assembled and bonded), rather than how the plywood should perform in use. The lowest grade plywood most commonly used for construction in the United States does not meet the standard, partly because it is made from softwood and partly because of U.S. production methods. For example, if the aggregate width of growth characteristics (knot hole) exceeds the limit in the Japanese standard, the panel is rejected despite the fact that U.S. technical data demonstrate that the U.S. product equals or exceeds the performance characteristics of the Japanese produced product.

The U.S. plywood products industry, anxious to increase the volume of its exports to Japan, has pushed for eight years for a new Japanese standard on structural plywood. In fact, as part of the MTN, Japan and the United States agreed in mid-1979 to develop a mutually acceptable performance standard for structural plywood by 1980. Recently there has been some progress toward changes in the Japanese standards which would, with the resolution of two key issues (knot hole size and white speck) make increased trade in U.S. plywood possible.

Softball Bats: After a year of discussions, U.S. bat suppliers were finally allowed access to the Japan Softball League (JSBB) certification system. The JSBB, however, failed to change their standard for aluminum softball bats. The JSBB standard requires the use of an aluminum alloy NOT used for U.S. bats, and is based on "design criteria" rather than "performance criteria" as encouraged by the Standards Code. That is, instead of describing the performance of the bat's base, the Japanese standard requires a certain design, in this case a rubber or plastic plug in the base. U.S. bats have solid bases without rubber or plastic plugs. Only recently has the JSBB agreed to approve U.S. bats that meet the requirements of the Ministry of International Trade and Industry (MITI) for obtaining the "s" mark that signifies a safe product.

One of the criteria for receiving the "s" mark covers inspection of goods, either during the manufacturing process (factory inspection) or, for imported goods, at the dock at the time of importation. Dock inspection is tedious, slow, and sometimes arbitrary and, therefore, not favored by U.S. producers of bats. However, MITI interprets Japanese law as prohibiting the inspection of foreign factories. Thus, unless U.S. producers opt for the burdensome dock inspection procedure, they cannot obtain the "s" mark. Without the "s" mark they cannot obtain the JSBB mark. Without the JSBB mark U.S. bats cannot be used in official games and are not afforded the commercial advantage that goes along with carrying the JSBB mark.

Automobiles: The Ministry of Transportation (MOT) has repeatedly turned down a U.S. request to recognize U.S. manufacturers' self-certification of automobiles to Japanese standards. The U.S. permits all auto manufacturers to self-certify compliance with U.S. regulations. The MOT still has not adopted administrative procedures to implement a May 1980 commitment to accept U.S. notaries public affirmations of the "dates of manufacture" of U.S. automobiles. "Dates of manufacture" are necessary in Japan to determine which year's regulations tests must be performed on U.S. imported automobiles.

There has been more than a two-year delay in resolving this standards issue, which is one of many in the automobile area.

An illustrative list of standards problems U.S. exporters face is at Attachment B.

GOJ Action

The January 30, 1982 package developed to reduce Japanese non-tariff barriers dealt principally with problems in the areas of standards, testing, and certification procedures. The package did little to provide substantial relief for problems in these areas. The May 28 package says that the Japanese Government will implement measures to allow foreign entities and individuals concerned to participate in the standards formulation process. While this is a step in the right direction, the effectiveness of the measures in the May 28 package will depend on their implementation.

A companion document to the package details specific measures that the GOJ has promised to implement.

With regard to the official approval system for sporting goods used by sports organizations, official guidance has been given to:

Give national treatment to foreign goods;

Conform to international standards;

Simplify and expedite inspection procedures; and

Make public the standards and procedures of the official approval system.

With regard to softball bats, the Japanese Rubberized Baseball League will improve their standards.

With regard to plywood, Japan has decided to revise it plywood standards.

With regard to cosmetics, the GOJ has taken steps to publish lists of permissible ingredients, simplify registration for minor formula changes, and accept relevant animal test data generated abroad.

With regard to pharmaceuticals, steps have been taken to clarify test standards and accept relevant animal test data generated abroad.

ATTACHMENT B.—EXAMPLES OF STANDARDS BARRIERS

Product	*NTB*
Papayas and cherries.	Product inspection difficulties.
Sake	Lack of testing procedures for imported sake.
Dried fruit	Inconsistencies in product additive regulations.
Fresh fruits and vegetables.	Instances of excessively strict plant quarantine regulations, nonacceptance of U.S. test data.
Concentrated fruit juice.	Excessively strict requirements concerning product packaging.
Processed foods.	Excessive ingredient and product formula disclosure requirements. Lack of transparency in new food additive evaluation procedures.
Frozen bull semen.	Commercial imports prohibited based on unjustified concern about animal health standards/ domestic industry protection.

ATTACHMENT B.—EXAMPLES OF STANDARDS BARRIERS—CONTINUED

Product	*NTB*
Medical and scientific instruments.	Excessively strict product testing and certification procedures.
Pharmaceuticals.	Nonacceptance of accelerated stability test data for market approval. Nontransferability of approvals for manufacture and import. Nonacceptance of results of preclinical tests conducted outside of Japan.
Cosmetics	Nonacceptance of U.S. test data. Lack of a complete list of approved ingredients. Prohibitions on conducting • • • preference testing. Delays in product registration.
Automobiles	Refusal to allow self-certification of compliance with Japanese standards; failure to implement commitment to accept affirmations by U.S. notaries public of "dates of manufacture."
Softball bats, tennis balls, inflatable athletic balls.	Lack of access to Japanese sporting associations' certification marks (changes are being implemented).
Plywood	Design as opposed to performance requirements.
Chemical substances.	Nonacceptance of U.S. testing data.

B. Licensing

1. Insurance

Discussion

Licensing of U.S. insurance firms to do business in Japan is an unnecessarily lengthy and complex process. This is true both for new firms entering the market and for established firms that want to expand their product lines.

The Ministry of Finance strictly controls access to and limits competition in the Japanese insurance market. As a consequence, U.S. and other foreign firms represent only a small percentage of the insurance business in Japan.

GOJ Action

Earlier this year the Ministry of Finance, following U.S. request in December and March, acted on a backlog of applications by U.S. firms for insurance licenses. This action was not accompanied by any announcement of a change in fundamental policy.

In the May 28 package the Japanese Government committed itself to the maintenance of a national treatment policy in insurance. It is not yet clear, however, how this will ensure that future license requests will be given punctual consideration. The GOJ also requests the relevant business associations to open "information windows" to provide information concerning market entry and operation in Japan.

2. Medical and Dental Equipment

Discussion

To import medical and dental equipment into Japan, an importer must receive a license from the Japanese Ministry of Health, which usually takes six months. In addition to the regular duty, the importer must pay approximately $100 per item.

GOJ Action

None.

C. Antitrust

Discussion

The Antimonopoly Law of Japan makes entrepreneurs liable if they have engaged in private monopolization, unreasonable restraints of trade, which includes unauthorized cartel behavior, or unfair business practices. In the past, the Japanese Fair Trade Commission (JFTC), which is charged with enforcing Japan's antitrust laws, limited its activities. Since the mid-1970s, however, the number of matters investigated and the number of actions taken by the JFTC have increased. More aggressive enforcement of the Antimonopoly Law by the JFTC serves to discourage unfair trading practices which may affect the distribution of imported goods.

Despite these positive signs, certain problems still remain in the antitrust area. Of concern are: (1) the general exemptions provided for in the Antimonopoly Law which permit the creation of cartels in certain specific instances; (2) similar special exemptions provided for in other laws; and (3) the use of administrative guidance by various parts of the GOJ to attempt to achieve actions which are prohibited by the antitrust laws, such as the informal, unauthorized cartels which are addressed later in this paper. Based on the Japanese Fair Trade Commission report to the OECD, as of March 31, 1980, there were over 400 authorized cartels, including one depression cartel, one rationalization cartel, 267 small and medium enterprise cartels, and assorted others. Clearly many of these cartels do not have an impact on the ability of the United States to export to Japan. Moreover, some of the small and medium enterprise cartels may have little, if any, economic significance for the Japanese domestic market and consequently for imports.

The Antimonopoly Law of Japan provides specific exemptions for the creation of depression and rationalization cartels. Under Article 24-3, producers or their trade associations are permitted to form a depression cartel when there is an extreme disequilibrium of supply and demand for a particular commodity. In these circumstances, producers may impose restrictions on output or sales or may engage in price fixing arrangements after they obtain prior approval from the JFTC, which continues to monitor the cartel throughout its existence. Although there have been as many as 13 depression cartels in existence at once, as of 1981, there were only two, one each in the shipbuilding and pulp and paper manufacturing industries.

Rationalization cartels, which are provided for in Article 24-4, involve concerted activities of producers when they are found necessary for effecting the advancement of technology, an improvement in the quality of goods, a reduction of costs, an increase efficiency, and any other rationalization of enterprises. As with depression cartels, rationalization cartels must be enacted in accordance with the rules of, and with prior approval from the JFTC. According to the statute, the JFTC will not permit rationalization cartels where there is fear of injury to the interests of customers or other entrepreneurs, where the cartel is unjustly discriminatory, and where there are unreasonable restrictions on participation in or withdrawal from the cartel. According to recent OECD reports, a one-year rationalization cartel for the synthetic textile dyestuff industry, which was first approved on January 10, 1980, and subsequently renewed on April 1, 1981, was the only rationalization cartel in existence as of April 1981.

In addition to explicit exemptions from the Antimonopoly Law's prohibition on cartels, specific laws have been passed which permit cartel behavior. Among these laws are the Law Concerning the Organization Structure of Small and Medium Enterprises, the Environmental Hygiene Law, and the Provisional Law on Measures for the Stabilization of designated Depressed Industries, which was enacted in 1978, for a period of five years, to facilitate adjustment in designated structurally depressed industries. The law identified several sectors—including aluminum smelting, synthetic fiber manufacturing, shipbuilding, open hearth steelmaking, and electric furnace and ferrosilicon manufacturing—as candidates for support, and allowed for the designation of additional industries by MITI (upon application by two-thirds of an industry by May 15, 1979. In October 1982, such a depressed industry cartel was authorized by MITI to reduce production of ethylene, a petrochemical product.

Once an industry has been designated, the particular Ministry with jurisdiction over its activities drafts a basic stabilization plan for the reduction of surplus capacity, outlining possible plant reductions, employment measures, and other conversion measures. Participation by firms in the industry's capacity reduction cartel is voluntary. For those firms which participate the law provides a specific exemption from the antitrust laws. The JFTC, however, reviews all joint action plans and must consent to the creation of these stabilization cartels. Latest data indicates that there were depressed industry stabilization cartels in eight different industries as of April 1981.

Depression cartels are distinct from depressed industry stabilization cartels in that their purpose is primarily temporary relief during a counter-cyclical downturn in an industry, while depressed industry stabilization cartels provide for permanent disinvestment of facilities. The former nurse along an entire industry, including its less-competitive producers, whereas the latter simply seek to eliminate uncompetitive capacity.

In addition to these formal exemptions from the Antimonopoly Law, MITI and other Ministries employ "administrative guidance" to create informal, unauthorized cartels. Such guidance does not create an antitrust exemption under Japanese law. In fact, the 1977 amendments to the Antimonopoly Law permit the JFTC to collect surcharges from participants in illegal cartels. In fiscal year 1980, 203 companies were levied surcharges totaling 1,331 million yen (approximately $53 million). Both the JFTC and those courts that have considered the issue have indicated that administrative guidance is not a defense to liability under the antitrust laws of Japan.

The number of cartels that have a limiting effect on imports is unknown. The few import cartels that are known would, of course, have such an effect. Conceptually, a domestic cartel that limits output or raises price would be expected to enhance the competitive position of imported goods. There may, nevertheless, be situations where cartels act in conjunction with import restraints, subsidies, or restrictive distribution linkages. In fact, some Japanese cartels do benefit from or include such ancillary measures. The attendant advantages to member firms derived from such ancillary measures may insulate weak firms from the effects of their own inefficiency and allow them to continue to compete with other domestic and foreign producers. To the extent that Japanese cartels assist uncompetitive Japanese firms to cope with more competitive foreign producers, their effect is to distort competition and improve the free flow of trade and investment.

GOJ Action

In the May 28 package, the GOJ communicated its decision to monitor intensely the distribution of imported goods and to strictly enforce Japanese antitrust laws against any practices which restrict competition.

D. Investment

Discussion

In December 1980, the Government of Japan implemented a new Foreign Exchange and Foreign Trade Control Law (FOREX). This new law represents a basic liberalization of the laws affecting foreign investment in Japan. However, foreign investment in certain sectors (mining, petroleum, leather and leather products, agriculture, forestry, and fishery) and in 11 designated firms its still restricted. Japan retains wide latitude in is authority to modify and/or block foreign investment which imperils national security, competing domestic enterprises, or the domestic economy.

The FOREX requires prospective direct investors to file a detailed notification with the Ministry of Finance describing the scope of the planned investment. The Ministry of Finance, in cooperation with other Ministries directly concerned, reviews each investment notification. The investment may proceed if the Government takes no action within the prescribed period (normally 30 days). The Bank of Japan also reviews all capital flows associated with direct investment. There is very little transparency to the investment screening process. However, the USG has received no report of the GOJ rejecting a notified investment subsequent to enactment of FOREX.

In the case of investments in the manufacturing sector, important delays may be encountered at the local government level in connection with obtaining essential start-up permits such as authorization to acquire land and build manufacturing facilities.

GOJ Action

The Government of Japan in its May 28 package announced that it welcomes direct investment in Japan by foreign entities and individuals. No reference was made to the investment screening process or to the critieria the GOJ will use in administering the new 1980 law.

E. Financial Market

Discussion

In recent years, the Japanese financial market has experienced substantial liberalization. Foreign access to the Japanese financial market has also been greatly increased. Nonethelss, the ability of foreign borrowers to obtain yen financing in the Japanese market, both through the commercial banking system and through the

Japanese bond market, has been limited through administrative guidance.

During the 1970s, the Japanese Ministry of Finance and the Bank of Japan encouraged evolution toward a market-oriented financial system and liberalized controls on capital flows largely in response both to foreign pressures and to the emergence of large current account and budgetary imbalances and concomitant financing needs.

In recent years, administered interest rates have been replaced by market-oriented rates for most key short-term instruments. Moreover, the Japanese have taken numerous actions to internationalize their financial system by revoking many prohibitions of inward and outward capital flows.

These actions to liberalize external flows were codified in the "Amended Foreign Exchange and Foreign Trade Control Law," implemented in December 1980, which embodied the principle that all transactions were free unless specifically prohibited.

Also, part of the explanation for the large capital outflow from Japan is the wide differential between nominal interest rates in Japan and most overseas financial centers. The low Japanese nominal interest rate structure is fundamentally associated with relatively low Japanese inflation; Japanese real interest rates have risen sharply over the past year.

Nevertheless, Japan has maintained controls on capital flows (mainly on capital outflows) through administrative guidance, largely in view of balance of payments, exchange market, and domestic monetary policy considerations. These controls have related primarily to limitations on banks' yen lending and to ceilings on yen bond issues by foreigners in the Japanese market. In 1981, overseas yen lending and yen bond issues by foreigners were 925 billion yen (around $4 billion). Domestically, certain deposit and lending rates and primary market issues of government bonds are also still subject to administrative control, though the extent of control in these areas is undergoing significant erosion.

Because these overall ceilings on foreign access to yen financing were less than foreign demand, Japanese financial institutions, influenced by the Ministry of Finance, allocated available funds through a queue. Additionally, foreign firms have experienced difficulties in their efforts to float bonds in the Japanese market because of the Japanese practice of permitting the flotation of only secured debt; exceptions have been made for a few foreign firms.

GOJ Action

In recent months, Japanese officials have stated that official guidance limiting foreign access to raising yen financing in the Japanese financial market is no longer in force and that such limitations on foreign access as presently exist are imposed by the market itself. In its May 28 package, the GOJ states: "* * * the GOJ will also pay due consideration to further facilitating foreign borrowers' financing in the Japanese financial market." Naturally, the true value of the measure regarding financial market liberalization will depend on its implementation.

G. Securities

Discussion

Foreign securities firms in Japan have faced a number of restrictions. However, as the result of a process of liberalization over past months, a number of these restrictions have been significantly eased. Japanese regulations are being changed to grant national treatment by autumn of 1982.

In the past there were complaints that:

Foreign securities firms could not manage or underwrite issues in Japan. However, a U.S. securities firm recently co-managed a public issue.

Foreign securities firms could not arrange private placements in Japan. However, two U.S. securities firms recently participated in two major transactions.

Foreign securities firms could not buy seats on Japanese stock exchanges. However, the Tokyo Stock Exchange has recently changed its rules to permit membership by foreign firms.

When foreign securities firms go through a Japanese member of a stock exchange, they could keep only 50 percent of the commission, the balance going to the Japanese member firm. However, under new commission-sharing arrangements, effective in 1982, foreign firms can retain 73 percent, the same amount as Japanese non-members.

Foreign securities firms are able to establish representative offices, and—subject to the same lengthy licensing procedures applicable to Japanese firms—full-service branches, which can engage in essentially the same activities as Japanese firms. There are no restrictions on the underwriting activities of foreign firms as long as they are properly licensed and comply with local regulations.

At present, four U.S. securities firms have branches in Japan, and five more have representative offices. The Ministry of Finance recently approved an application for branch status by a U.S. securities firm.

GOJ Action

In its May 28 package, the GOJ reaffirmed its intention to adhere to a policy of national treatment, and requested relevant business associations in the banking, insurance, and securities fields open "information windows" to provide information, etc., concerning market entry and operation in Japan.

Japan has almost completed implementing a series of measures designed to attain national treatment. The last area of discrimination, the share of commissions retained by foreign firms, is being eliminated in stages, the last stage scheduled to be implemented during the third quarter.

G. Commercial banking

Discussion

As the result of a process of liberalization begun several years ago, restrictions on the activities of foreign commercial banks in Japan have been almost completely removed. The new Bank Law, which came into effect on April 1, 1982, provides for equal treatment for all banks, domestic and foreign. As in all countries banking in Japan is subject to extensive government regulation. The financial system has been going through a process of gradual liberalization, and like their U.S. counterparts, the Japanese authorities are grappling with the issues of deregulation.

In the past there have been complaints that:

U.S. banks could not solicit deposits, but this is no longer true.

U.S. banks could not issue CDs, but they now can, receiving treatment comparable to that afforded Japanese banks.

U.S. banks could not establish additional branches, but several have recently been authorized.

U.S. banks could not participate in official export/import programs, but this is no longer the case.

U.S. banks could not buy Japanese banks, but U.S. banks can now acquire Japanese institutions as long as there is mutual consent.

U.S. banks in Japan currently receive national treatment in virtually all areas, and thus are subject to the regulations imposed on all institutions operating in Japan. (These may in some cases prevent financial institutions in Japan from providing their customers with services that may be common elsewhere.) There are no restrictions on their obtaining licenses for representative offices, and full service branches can be established subject to Japanese laws. American banks can establish banking and non-banking subsidiaries in Japan and, under the new Bank Law, enjoy full legal status and can merge with Japanese banks.

At present there are 21 U.S. banks with branches in Japan. The total number of branches is greater because banks are permitted to set up more than one branch.

GOJ Action

In its May 28 package, the GOJ reaffirmed its intention to adhere to a policy of national treatment.

INDUSTRIAL POLICY

Japan's emergence as the world's second largest industrial power is the product of a complex set of factors. In part, the credit must be given to the work ethic of an educated, highly motivated and disciplined work force, and the long-range perspective of corporate managers. But a major share of Japan's success has been due to a sustained national policy of allocating scarce resources to strategically important industries and coordinating the implementation of that policy in concert with private industry. The effectiveness of those policies is in no small measure due to the ability of government, business, and labor to reach consensus on national goals as well as on policies to be implemented. The Japanese are the world's premier practitioners of such a coordinator strategic industrial policy.

To facilitate the implementation of the policies, the government has created a range of domestic policy instruments and processes which are often coordinated with broader measures and other traditional trade measures to shape the content and direction of Japanese industrial activity and to manage the problems arising from competition and sectoral growth or decline. In general, these policy tools are not devised to restrict or exclude foreign participation from the Japanese market. However, that has often been the effect. Major policy tools discussed below, include:

A. Industry targeting

Discussion

One distinguishing feature of the Japanese economy has been the extremely close interaction among government, business, and academia. These groups cooperate in the formulation of the National Economic Plan and seek to achieve a national consensus on long-range goals. The National Economic Plan attempts to harmonize the individual actions of all economic players and to ratify these long-range goals in government policy and business decisions so as to guide the allocation of resources towards the most productive sectors of the economy. This close cooperation among the various economic actors is often perceived as a type of collusion which discriminates against foreigners.

However, Japan is not a command economy. The plans are only indicative of Japan's economic goals, despite the fact that they are backed by government policy (e.g.,

market regulation, bank loan guidance, tariffs, tax benefits). These plans, established by the Economic Planning Agency, consist of projections for growth in trade, GNP, production, prices, consumption, government income and expenditures, etc., and are not economic blueprints.

On the sectoral level, industrial policies are formulated in support of a national strategy of designating particular industries as essential for the development of the Japanese economy. Industrial activities and capital investments are then planned and regulated for selected firms either in or relevant to those industries. This is carried out mainly by the Ministry of International Trade and Industry (MITI), which has lead responsibility within the Government of Japan for industrial policy and planning. MITI's authority is not exclusive, however. Other Ministries such as Finance, Transportation, Posts and Telecommunication, and Construction, etc., are also involved when industrial policy intersects activities under their jurisdiction. But it is MITI that has the overarching mission of setting Japan's overall industrial targets and seeing to their achievement.

Industry targeting, as practiced, gives selected firms in the targeted industry a privileged position in the home market. Once a firm is so identified, it benefits from specific government programs. Perhaps more important, the firm's welfare becomes a national goal, leading to less explicit benefits, such as preferential status with creditors and buyer preferences. The total effect can be to give the chosen firm in the identified sector protection from foreign competition (in the past explicit through quotas; now less transparent). To the extent that Japanese industrial policy might work to restrain imports, it can do so either indirectly, as exemplified by the potentially disadvantageous measures described in the text, or directly, through such concrete measures as tariffs, quotas, voluntary restraint agreements with affected exporters, boycott arrangements among importers or major industrial consumers, or other measures described elsewhere herein. Industrial policy as such, whether in Japan or elsewhere, does not immediately impact on import trade and can only seriously affect such trade when combined with actual measures of restraint or disincentive.

Within a target industry, there may be vigorous competition between the chosen firms, as in steel and computers, or the competition may in some cases be closely regulated, as in telecommunications. For firms that become efficient, the protected home base can allow them to benefit from economies of scale and the "learning curve." Some target industries and firms have become world class exporters (steel, telecommunications); others have been less successful (aluminum, petrochemicals). Other important sectors of the Japanese economy, particularly agricluture and distribution, have been notably inefficient.

It is important to note that industrial targeting is probably not the most efficient way of allocating reasources. While some Japanese sectors arguably have been aided by Japanese Government, targeting programs, others have been hindered. The net effect on Japanese economic welfare of Japanese Government restrictions could well be negative, not positive.

The policy tools used by the Japanese Government to foster development of its target industries may effectively limit foreign access to the fastest growing segments of the Japanese market, as well as influence competition in the U.S. and other export markets, either directly or indirectly, by affording the selected domestic firms significant competitive advantages in the form of cost and risk subsidization. Government supports include: financial and other assistance for R&D; accelerated depreciation; government-backed leasing corporations; government licensing of patents; and a near monopoly on government procurement. Foreign companies have been virtually excluded from these projects and special grants, even if they have Japanese subsidiaries. Protective elements of these programs make it difficult for foreign firms to compete; public knowledge of the industry's "target" status reinforces a bias against foreign competitors; and government control of resultant patents may restrict foreign access to Japanese technology.

Targeting also has costs—MITI can pick losers and successful targeted industries can invest in overcapacity (steel, for example). Overcapacity represents an inefficient use of resources and can produce further inefficiencies so the GOJ must use other measures to sustain the targeted industry during downturns (recession cartels).

The most egregious discriminatory government practices gradually were abandoned by Japan beginning in the late sixties. Formerly, foreign firms with a significant lead in product or process technology were in many instances either denied permission to manufacture in Japan, as was the case in the automobile industry, or were required as a condition for access to transfer their technology, as in the computer industry, or to accept Japanese joint venture partners, as in the semiconductor industry. The effect, in each case, was that the foreing firms were unable to achieve a significant share of the market at its inception and hence were denied the competitive advantage that accrues to the early market leader. Such out and out discriminatory government policies are now barred in Japan. But the recent targeting by MITI of a number of industries as vital to Japan's industrial structure in the 1980s and 1990s, and government programs instituted to spur the technological and productive capacities of those industries, raises concern that foreign firms in those industries could be denied fair and full access to the Japanese marketplace for their products.

GOJ Action

No actions have been announced with specific reference to industry targeting. However, note the commitments regarding high technology trade and access to research and development projects under the next heading.

B. Government sponsored cooperative research and development programs

Discussion

A major component of the industry targeting strategy is the Japanese Government's wide-ranging sponsorship and partial or complete subsidization of cooperative research and development projects involving both government and private corporate participation. Currently, these projects number several dozen, and range widely over the entire spectrum of what the Japanese call the "knowledge intensive" sectors: information processing, semiconductors, optoelectronics, fourth and fifth generation computers, new electronic component elements, new synthetic materials, biotechnology, and others.

The trade implications for American and other foreign imports of these cooperative R&D projects are significant, because the explicit reason for their existence is to permit Japan to "catch up" with the U.S. and Western Europe in technologies where MITI has determined that Japan is lagging. These projects sometimes involve basic scientific inquiry, but the objective is always the development of commercially applicable technology. Thus, they represent one of MITI's instruments for advancing Japanese competitiveness in specific advanced industrial technologies.[1] For instance, in 1981, MITI identified twelve key future technology projects, and plans to expend over $400 million for research in these areas. Since these projects are organized into research associations, U.S. firms may be excluded from access to such technology. These cooperatives are codified in Japanese law and are the focus of a number of activities, some for technology sharing among Japanese firms, others designed to facilitate spreading risks U.S. companies, including their affiliates in Japan, have not been able to participate in these research cooperatives, nor to gain access to know-how produced by them, nor to gain equitable access to patent rights.[2] Specifically, all patents generated by Government-sponsored research in these cooperatives are effectively controlled by the GOJ. All parties to a cooperative research effort must agree before resulting technology can be licensed, and MITI exercises tacit controls which effectively preclude foreign access to United States research, conducted in large part through universities, is freely available to Japanese companies.

GOJ Action

In the May 28 package the GOJ made several commitments pertaining to research and development and high technology that address directly or indirectly the issue of foreign access. The statement committed Japan to:

(1) free trade principles in trade in high technology and high technology products:

(2) actively promote research and development suitable for international cooperation; and

(3) maintain a non-discriminatory policy with regard to participation by partially or wholly foreign-owned Japanese firms with substantial research capabilities in projects supported by the government.

Moreover, the statement also included two other relevant items:

Moreover, the statement also included two other relevant items:
